UTAC

ADVANCING MOBILITY SINCE 1924

Since 1924, UTAC has been at the forefront of the mobility industry, advancing it towards a safer and cleaner future.

With a global presence and a team of trusted experts, UTAC continues to shape the future of mobility.

We strive to provide a wide range of agile services that help us to fulfill our mission:

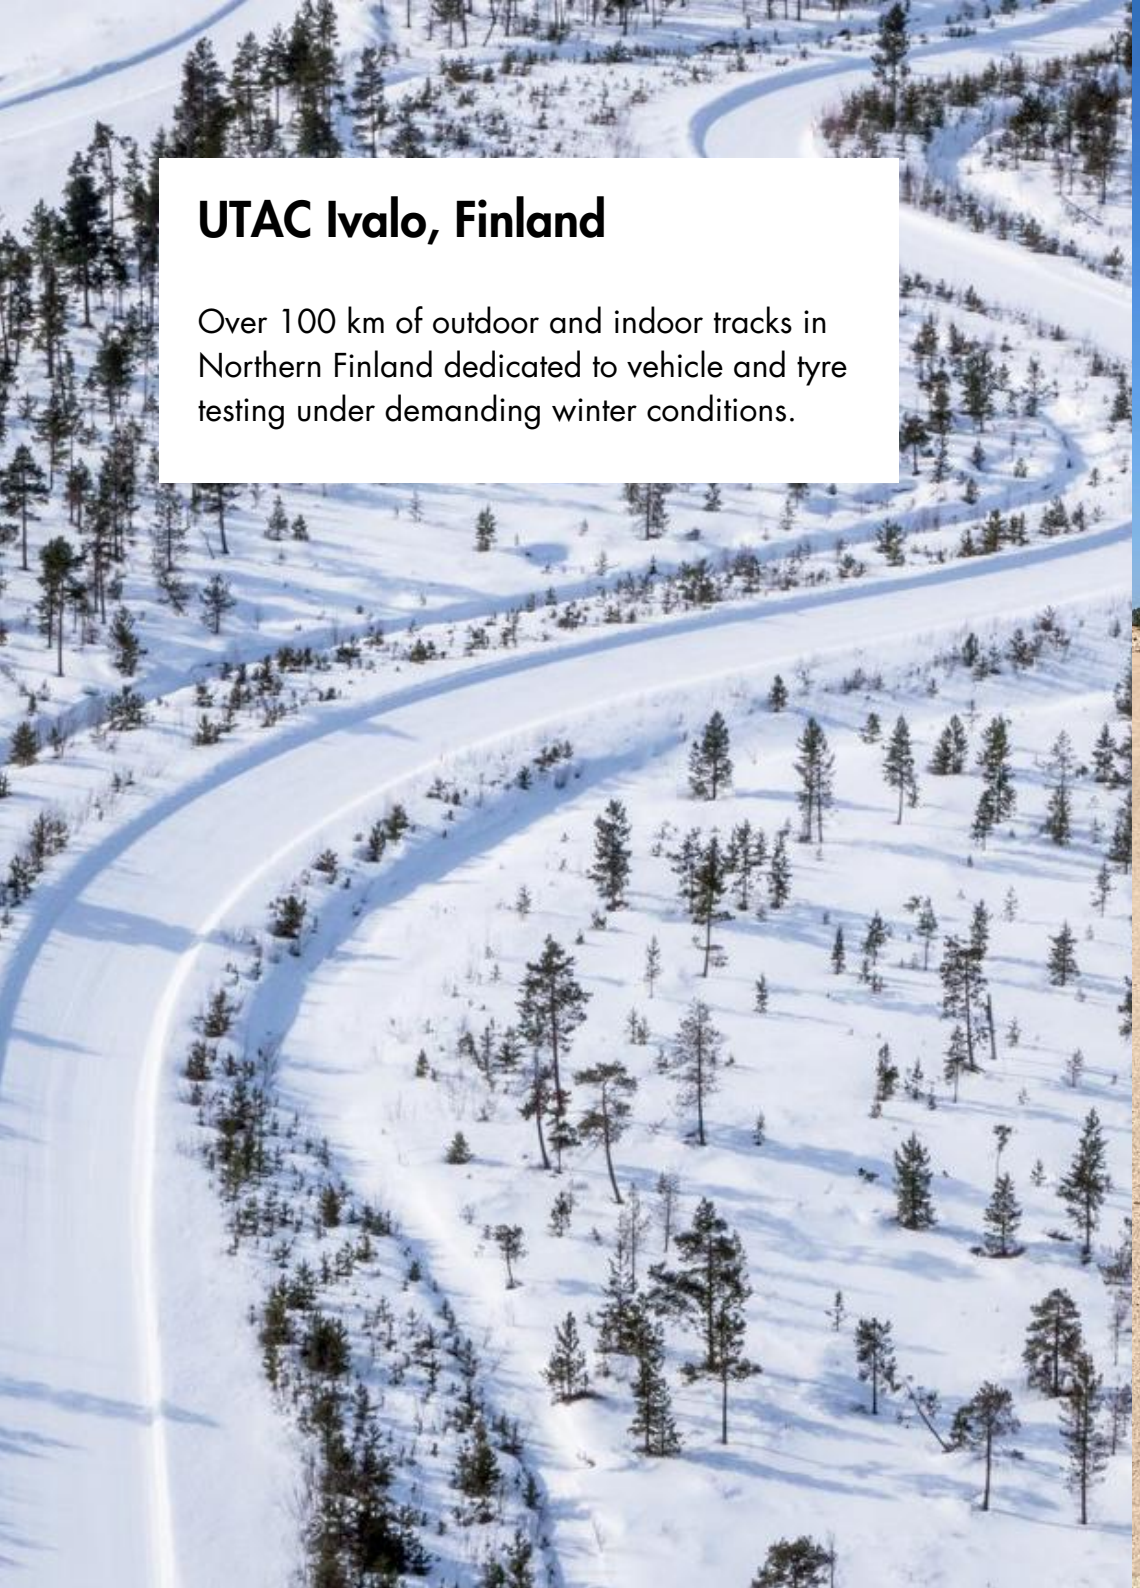
"***Leading the mobility industry to new frontiers.***"

Our one-of-a-kind venues in France, Morocco, Finland, and the UK open the door to endless possibilities for memorable, tailor-made events of any scale.

UTAC

ADVANCING MOBILITY SINCE 1924

UTAC operates a global network of proving grounds, laboratories and offices. This international presence allows us to deliver advanced testing, development, and certification services for all vehicle types, anywhere in the world, and in every environment. **Discover our sites at www.utac.com**

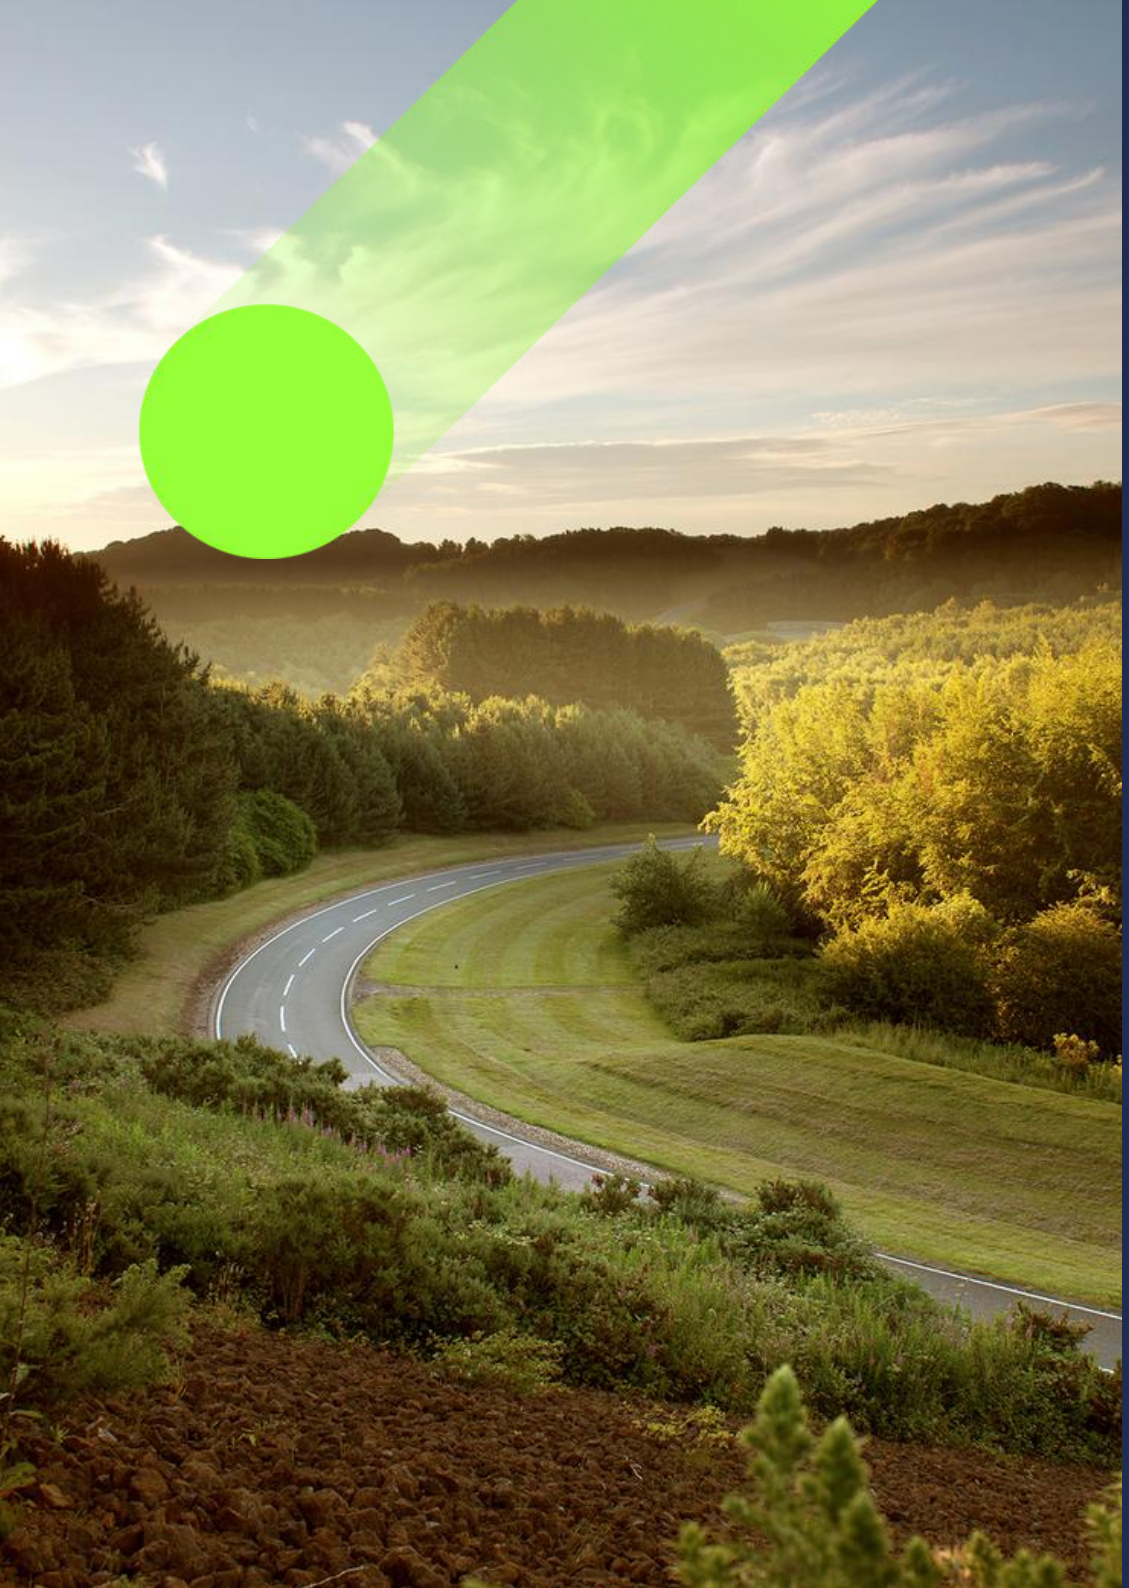


UTAC Ivalo, Finland

Over 100 km of outdoor and indoor tracks in Northern Finland dedicated to vehicle and tyre testing under demanding winter conditions.

UTAC Oued Zem, Morocco

Located in the heart of the desert, featuring 30 km of tracks designed to meet a wide range of needs, from testing to events.



With expansive, secure facilities and private test tracks, UTAC Millbrook is ideal for hosting everything from automotive product and press launches to business seminars, conventions, and corporate driving experiences, whether in meeting spaces or out on the track.

Our 700 acre proving ground ranks amongst Europe's most advanced vehicle testing and development centres. Boasting over 70 km of diverse tracks, including high-speed circuits, 4×4 trails, alpine routes, and more.

"***Whatever you need us to be.***"

Whatever your vision, we enable a customised concept that reflects your brand and meets your specific goals.

UTAC
MILLBROOK

AEV | ASSOCIATION OF EVENT VENUES

mia Accredited Venue | Excellence Quality Safety

"It offers a fantastic training space and driving opportunities, and the team at Millbrook are great to work with."

Automotive Event Agency

"It's important that guests get to experience the vehicles for themselves. We had great feedback from all who attended."

Mercedes-Benz

"We are delighted to come back to Millbrook to be able to showcase our entire product range in such a superb setting."

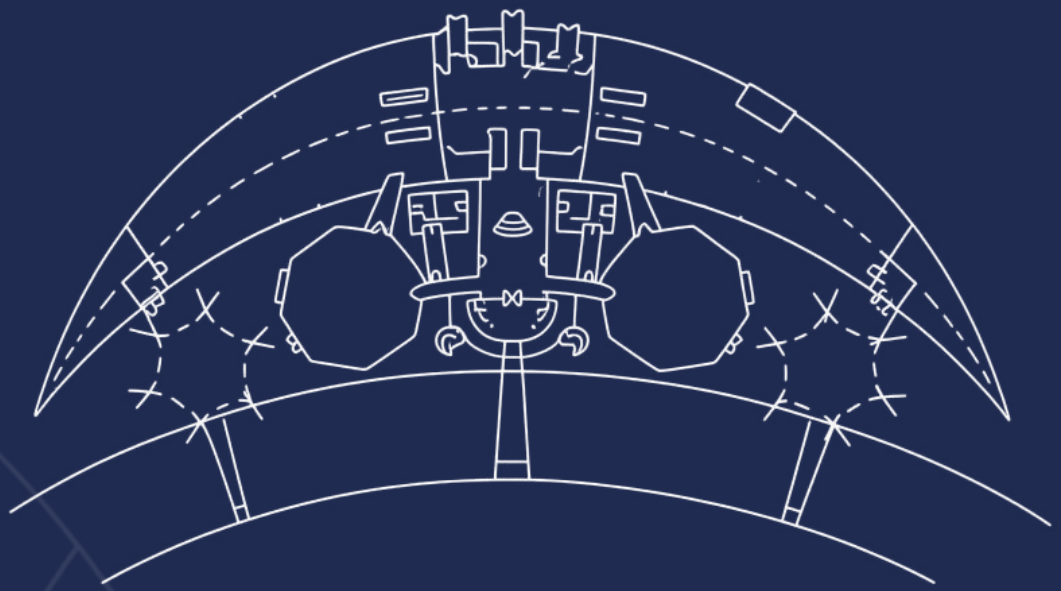
MAN Truck & Bus

Quortus
McLaren

CITROËN
CITROËN

concept 1

1,400m²
50 - 350 pax

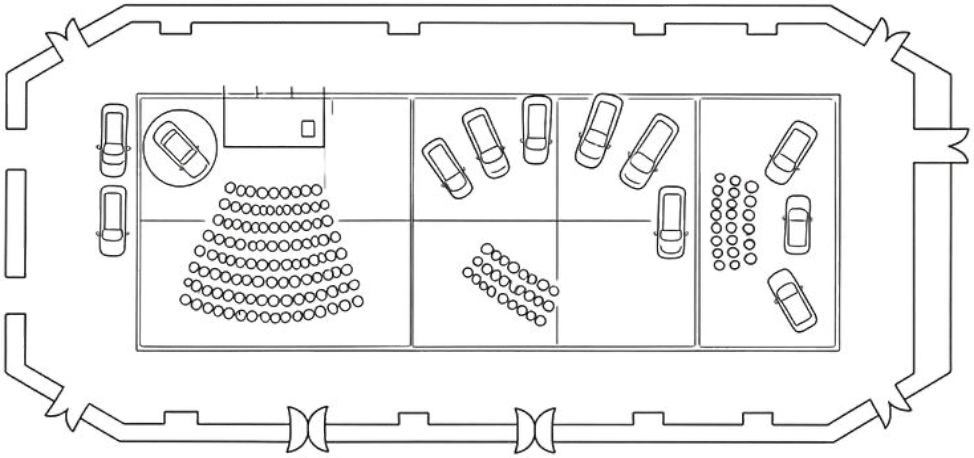


A large and versatile venue designed as a true blank canvas, Concept 1 offers maximum flexibility for event design.

This unique venue consists of a reception area, two open-plan wings divided in the centre by a mezzanine, and two domes.

The wings are ideal for a presentation theatre, while the domes can offer a panoramic view of the 15,000m² steering pad.

	Area	Theatre	Cabaret
Left/Right Wing	388m²	350	120
Left/Right Dome	160m²	150	50



concept 2

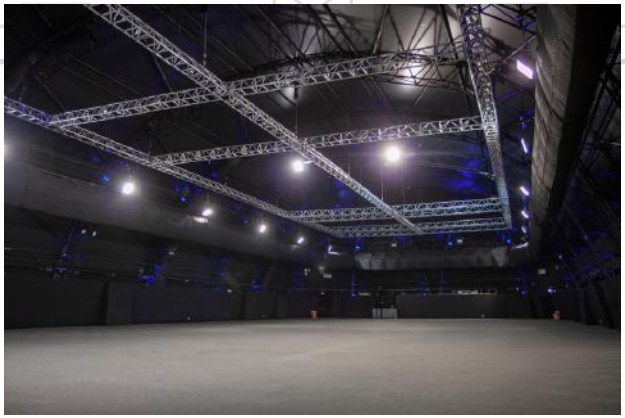
1,250m²
50 - 1,000 pax

The largest single-space on site, Concept 2 is designed for large-scale events and productions.

With its impressive size, 12m high ceilings and clear-span structure, it ensures perfect visibility and flexibility.

Linked to Concept 1 to allow for even more flexibility, including accommodating delegate arrival and catering requirements.

	Area	Theatre	Cabaret
Concept 2	1,250m²	1,000	600



pod

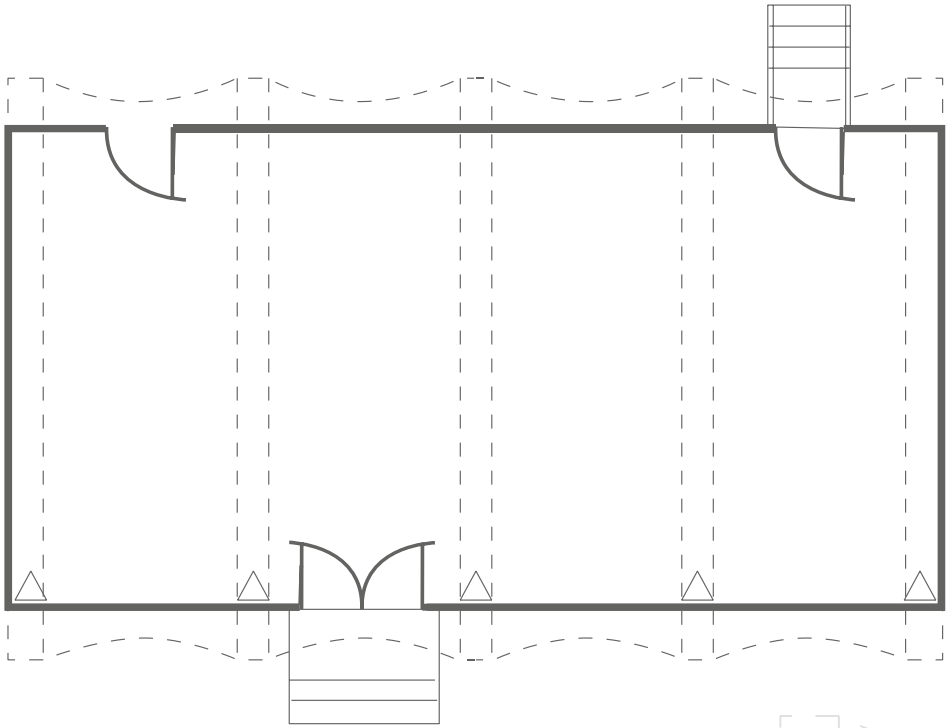
375m²
80 pax

A compact yet flexible venue located at the heart of the proving ground, offering direct access to the 70km of private tracks.

Pod offers a parking or demonstration area at the front and can be divided internally to suit the event.

Delegates can either arrive in their own vehicles, or be transported from UTAC Millbrook's main gates.

	Area	Theatre	Cabaret
Pod	**375**m²	80	80



cubo

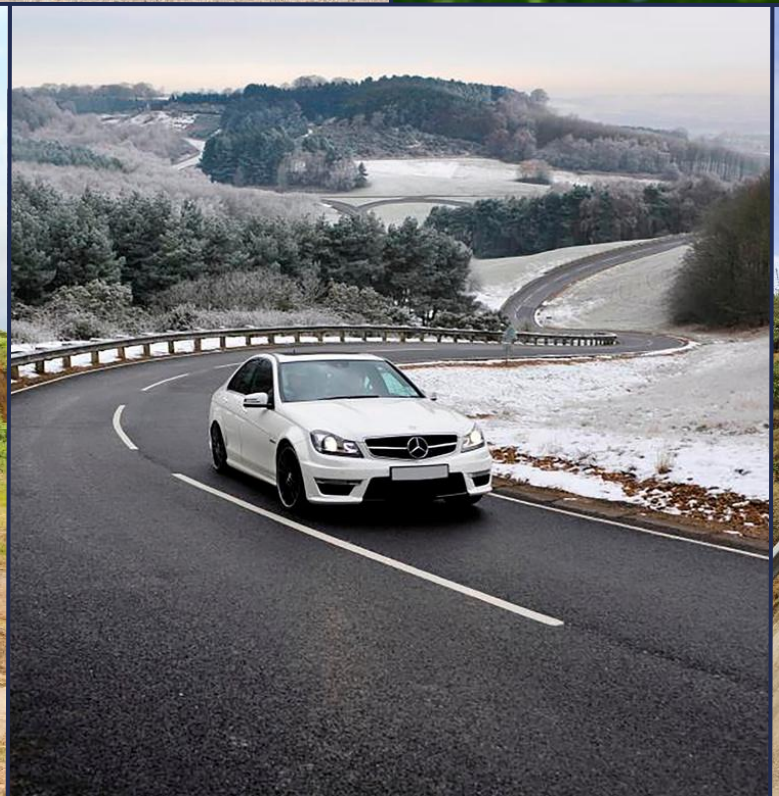
120m²
30 pax

Cubo, UTAC Millbrook's smallest venue with a unique position set in the heart of the 700 acre proving ground.

With it's own dedicated parking or display area, Cubo is an ideal base for smaller arrive and drive events.

It has ceiling-to-floor windows and can be configured with AV equipment and a bar for catering.

	Area	Theatre	Cabaret
Cubo	120m²	30	30

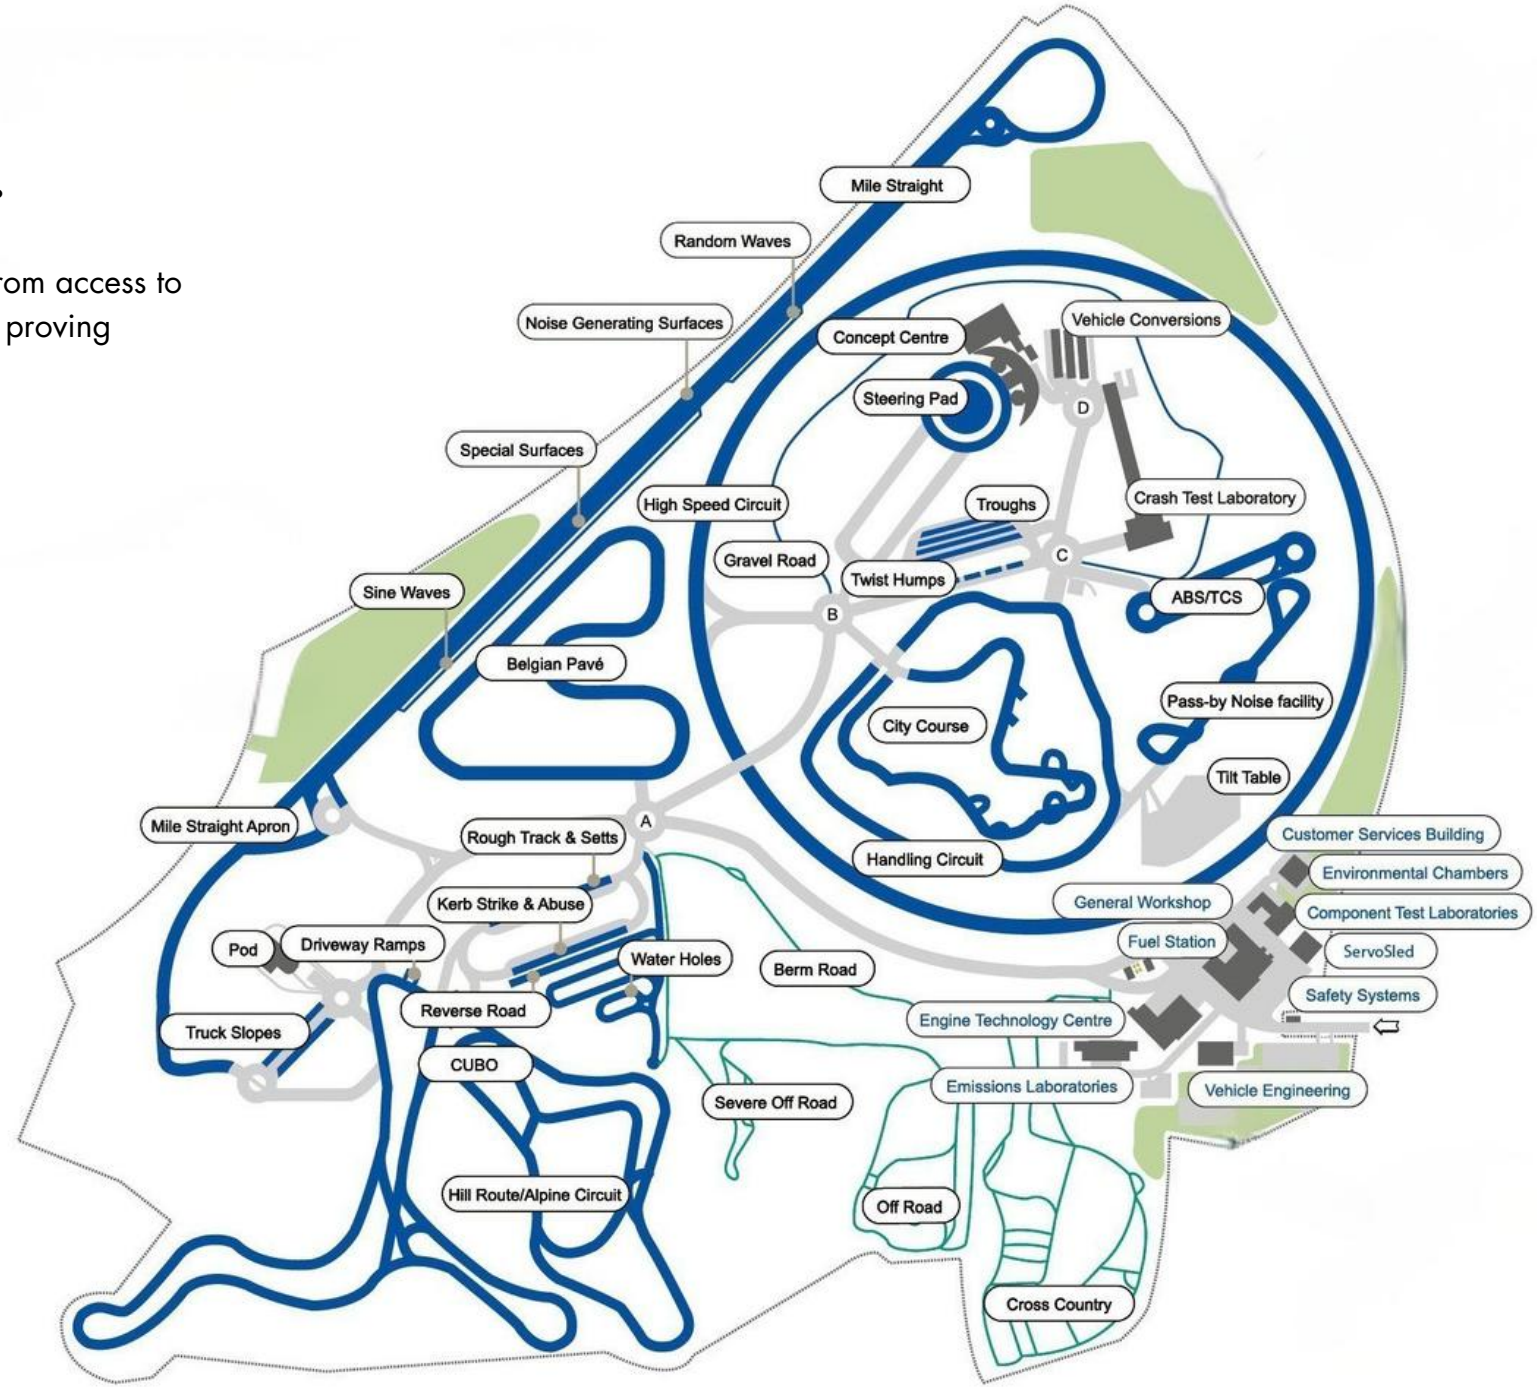


Unrivalled Access to World Class Test Tracks.

Events at UTAC Millbrook benefit from access to one of the most diverse automotive proving grounds in Europe, featuring:

- **Alpine Hill Routes**
- **High Speed Circuit**
- **Mile Straight**
- **City Course**
- **Handling Circuit**
- **Dynamics & Steering Pads**
- **Special & Technical Surfaces**
- **Off-Highway Routes**

We create tailored on-track events that put your clients in the driving seat, allowing them to experience vehicles in dynamic yet safe and controlled conditions.



Hill Routes

A unique facility replicating rural and alpine driving conditions, with constantly changing elevation and camber.

Ideal for demonstrating vehicle handling and creating a memorable driving experience.

6.5km 6m Up to 26%

3.2km 19m

High Speed Circuit

Famously known as “the bowl” - a banked concrete circuit designed to simulate motorway driving and used to test vehicles at speeds in excess of 240 km/h (150mph).

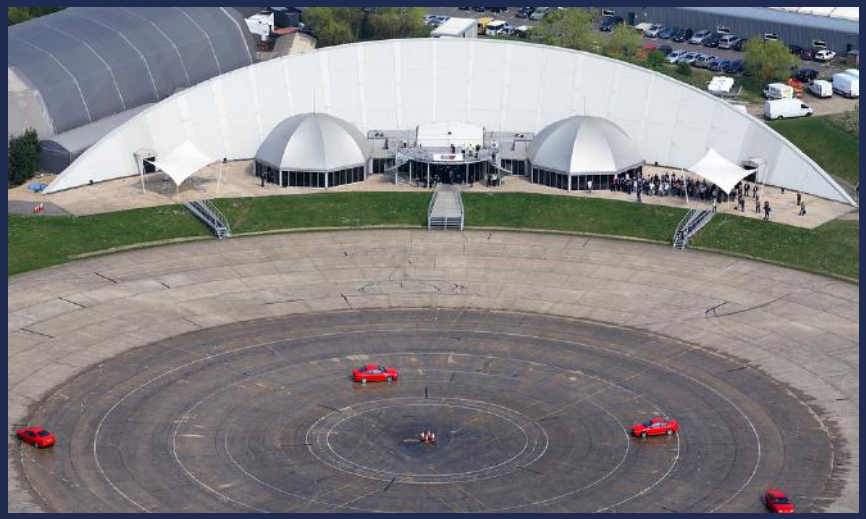
In addition to demonstrating high speed capabilities this circuit is particularly popular for tracking photography.

Mile Straight

A long, precisely levelled surface ideal for testing vehicle acceleration and braking performance.

An additional 5,750m² trianglular section of tarmac is located at the start of the mile straight.

1.6km 0%



137m 117m

Dynamics & Steering Pad

The steering pad, outside Concept 1, offers an exceptionally large 137m diameter circular surface, the inner 50m radius can be wetted using a central sprinkler system.

The tarmac dynamics pad has a 117m diameter, located at the end of the mile straight.

Handling Circuit

A concrete handling course with varying camber surrounding the inner City Course.

Can be used to demonstrate high performance capabilities in a controlled environment, such as passenger rides with a professional driver.

1.4km 6m

1.2km 6m

City Course

Designed to emulate city driving with various markings, parking and reversing bays.

Ideal for demonstrating everyday driving in an urban environment, including steering inputs and manoeuvrability.

Special & Technical Surfaces

A wide range of surfaces and constructions are available to demonstrate vehicle refinement, including a 1.5km Belgian Pavé facility designed for fast evaluation of noise, vibration and harshness.

1.5km

7.2kW - 400kW

Support Services

To support your event, we offer a comprehensive range of on-site garages and workshops, alongside a fuel station, extensive EV charging facilities, an automatic vehicle wash, and a dedicated valet bay, all available 24/7.

Off-Road & Cross-Country

Set in 100 acres of countryside, the UTAC Millbrook cross-country and off-road tracks provide a comprehensive range of terrains for every type of vehicle from soft-roaders to full high-mobility, military-specification vehicles.

A range of man-made obstacles, such as axle articulation humps and the sand pit area perfectly compliment the natural terrain of long challenging hills through to tight twisty tracks, recreating any type of environment.

Particular surfaces and features can be generated to suit customers' needs.

Location Millbrook : Filming and Photography.

Our enclosed 700 acre site offers country roads, motorways, green lanes, off-road routes and specialist test tracks. The rolling countryside around the road network offers a picturesque setting, plus a variety of industrial and unusual buildings all on one site providing a vast range of possible shoot locations on offer.

The team have extensive experience working with all levels of production from small photo shoots right through to music videos and blockbuster feature films. Our infrastructure covers all the necessary support services, including catering through to temporary offices, workshops and studio space.

This highly secure site is manned and patrolled 24/7 to ensure an unparalleled level of confidentiality, safety and control over your project. Add to that the fact that there are no time constraints as we are available 24 hours per day, 365 days per year, UTAC Millbrook is the perfect location.

Millbrook Proving Ground.
"Where Safety is a Science."

UTAC's Millbrook Proving Ground in Bedfordshire was first opened in 1970 by General Motors as a dedicated testing and development facility for Vauxhall Motors and Bedford Commercial Vehicles.

More than 2 million cubic metres of earth were moved during construction, and over 200,000 trees were planted.

In 1988, Millbrook Proving Ground began to trade as a wholly owned subsidiary of Group Lotus, part of General Motors at the time. This was the start of Millbrook becoming a highly customer-focused automotive test service provider.

Millbrook became independent in 2013 and began to expand in 2015 with the acquisition of a winter testing facility in northern Finland. In 2017 the acquisition of Lancashire-based Leyland Technical Centre further strengthened UK test capabilities.

In 2021 Millbrook merged with UTAC CERAM to create a market-leading group in vehicle testing and emerging technologies, with a portfolio of proving grounds and testing facilities that span the globe.
