GERKO

GERKO INTERNATIONAL IS PROUD TO PRESENT OUR NEW CATALOGUE FOR 2027.

Gerko international designs and develops non-paint and paint products for the professional collision repair business with the goal of becoming a one-stop shop for our distributors. Efficiency, innovation and quality together form the standard of excellence in automotive repair. What does this mean for you? It means streamlined workflows and improved efficiency with products designed to be both user-friendly and exceptionally effective. Save time and effort at every stage. Say goodbye to substandard results and welcome flawless surfaces that showcase your expertise and professionalism. Elevate your skills with Gerko and experience the true impact of experience, innovation and quality.

"GERKO INTERNATIONAL FOR THOSE WHO VALUE EFFICIENCY, INNOVATION & QUALITY"

OUR MISSION

It is Gerko's mission to help our distributors grow as a business by supporting them with as complete a range as possible, with the emphasis on the quality, efficiency and appearance of our products, so that our distributors can fully focus on the customer.

AMBITION

COMMITMENT TO RESULTS

GROWTH

OUR VISION

It is Gerko's vision to continuously expand with quality and innovative products that directly lead to greater efficiency in damage repair. This, combined with protecting our brand for our distributor.

GERKO

GERKO INTERNATIONAL IS READY FOR THE FUTURE

with the investment in a brand-new **distribution centre** where we can store more than 7000 pallets. We organize courses and workshops at our **technical training centre** at our headquarters in Belgium where distributors from all over the world can see how our Gerko products work and how they should be used.

SPRAY MASK A1P2 (ART. SMA1P2)

Compact spray mask for protection against organic vapours and harmful dust particles during general sanding and painting work.

- Protection against solvent vapours and paint mist
- P2 filter for harmful dust particles
- Comfortable and light in use
- Ideal for general automotive body repair
- Airtight storage box that extends the service life of the filters

CONTENTS OF STORAGE BOX

1 x mask
2 x A1 gas filters
2 x P2 dust pre-filters
2 x plastic cartridge

PACKAGING

Per piece

BESTSELLER

SPRAY MASK A2P3 (ART. SMA2P3)

Professional spray mask with higher filter capacity for intensive work and maximum protection against organic vapours and fine dust particles.

- Higher protection against organic vapours
- P3 filter for very fine and toxic particles
- Suitable for 2K paints and intensive spray work
- Recommended for professional automotive body repair
- Airtight storage box that extends the service life of the filters
- Dust filter integrated into the carbon filter

CONTENTS OF STORAGE BOX

1 x mask
2 x A2 gas filter with integrated P3 dust pre-filters

PACKAGING

Per piece

GAS FILTER A1 (ART. FA1)

Gas filter for protection against organic vapours during general painting and painting work with solvent-based products.

- Gas filter for protection against organic vapours during general painting and painting work with solvent-based products
- Suitable for lacquers, paints and degreasers
- Compact and lightweight design
- Compatible with various half-face masks
- Replace filters completely after approximately 40 hours of intensive use

PACKAGING
Per pair

GAS FILTER A2P3 R D (ART. FA2P3)

High-quality gas and dust filter with maximum protection against organic vapours, overspray and very fine harmful particles.

- High filter capacity for organic vapours
- P3 protection against fine and toxic dust particles
- Suitable for intensive spray work and 2K paints
- “R” = reusable for multiple shifts
- “D” = tested on dolomite dust for longer breathing resistance and higher durability
- Replace filters completely after approximately 40 hours of intensive use

PACKAGING
Per pair

DUST PRE-FILTER P2 (ART. FP2)

Dust pre-filter for protection against harmful dust particles, sanding dust and paint mist during sanding and painting work.

- P2 filter for harmful dust particles and aerosols
- Protects against sanding dust, primer dust and paint mist
- Extends the service life of gas filters
- Lightweight and easy to assemble
- To be used in combination with gas filter A1 for spray mask (ART. SMA1P2)

PACKAGING
10 pieces

DUST MASK FFP2 WITH VALVE
(ART. DM10)

Comfortable dust mask for protection against harmful dust particles, aerosols and mist during sanding and preparation work.

- FFP2 protection against harmful dust particles
- Suitable for sanding dust and light mist
- Lightweight and comfortable design
- Good fit for long-lasting use
- Equipped with soft foam on the inside at the nose area
- Suitable for people wearing glasses, lenses do not fog up

PACKAGING
15 pieces

DUST MASK FFP3 WITH VALVE
(ART. DM40)

FFP3 dust mask with valve for optimal protection against harmful dust particles, mists and aerosols. The low breathing resistance provides high wearing comfort, even during prolonged use.

- FFP3 protection against fine dust particles and aerosols
- Exhalation valve for low breathing resistance
- Soft inner seal for extra comfort
- Adjustable nose clip for an optimal seal
- Suitable for glasses wearers
- Ideal for sanding, grinding, filling and painting
- Comfortable for prolonged use and warm working environments
- Suitable for people wearing glasses, lenses do not fog up

PACKAGING
10 pieces

DISPOSABLE SPRAY OVERALL (ART. DSC)

Protective disposable coverall with CE category III Type 5/6 protection and breathable back material for extra comfort. Fitted with a hood, elasticated closures and knitted cuffs.

- Protects against dust and light chemical splashes (CE Type 5/6)
- Light, breathable and low-linting material
- Back panel in breathable SMS material for extra comfort
- Elastic cuffs, waist and ankles for optimal fit
- Antistatically treated and fitted with a closable zip

SIZE	PIECES/ OUTER BOX
M (DSC10) L (DSC20) XL (DSC30) XXL (DSC40)	25 pieces

POLYESTER SPRAY OVERALL (ART. POW)

Polyester spray coverall for professional use during painting work. The blue colour helps prevent reflection in the paint, while the underarm ventilation provides extra wearing comfort and optimal temperature regulation.

- 100% polyester and flame-retardant
- Lint-free, silicone-free and antistatic
- Blue colour for minimal reflection in the paint
- Underarm ventilation for optimal temperature regulation
- Equipped with a hood, elastic closures and a 2-way zipper
- Includes 2 rear pockets
- Washable at 30°C or dry-cleanable

SIZE	PIECES/ OUTER BOX
M (POW10) L (POW20) XL (POW30) XXL (POW40)	25 pieces

BESTSELLER

SUPERIOR NYLON SPRAY OVERALL (ART. SNC)

Durable nylon coverall with high wearing comfort and elastic fit. Equipped with ventilation at the armpits, back and hood for optimal heat regulation.

- Antistatic, dust-, silicone- and lint-free
- Protects against spray mist
- Breathable and ventilated for optimal heat regulation
- Close-fitting cuffs for a perfect fit
- Durable design with concealed zipper and high wearing comfort
- Ensures optimal freedom of movement throughout the working day

SIZE	PIECES/ OUTER BOX
S (SNC10) M (SNC20) L (SNC30) XL (SNC40) XXL (SNC50) XXXL (SNC60)	20 pieces

NITRILE DISPOSABLE GLOVES (ART. NGB)

Nitrile gloves for optimal protection and comfort during painting work. Prevent contamination of the paint by skin oils, hair and dust particles and protect the user against chemicals and splashes.

- Thickness of 6 mil (0,15 mm) for extra durability
- Textured fingertips and palm for optimal grip
- Extremely suitable for paint and solvent applications
- Latex-free and silicone-/powder-free
- Prevents contamination of the paint
- 6 gr. weight for medium size

SIZE
M (NGB10)
L (NGB20)
XL (NGB30)

PACKAGING
100 pieces

BESTSELLER

DIAMOND NITRILE GLOVES (ART. NDG)

Extra strong diamond nitrile gloves with a unique diamond grip pattern for maximum grip and control. They protect against paint, chemicals and contamination, while the comfortable fit offers long-lasting wearing comfort and optimal freedom of movement.

- Thickness of 6 mil (0,15 mm) and extremely strong
- Diamond structure for optimal grip and anti-slip effect
- Suitable for mechanical work, spray work and paint applications
- Resistant to paint and solvents
- Latex-free and silicone-/powder-free to prevent paint contamination
- 7 gr. weight for medium size

SIZE
M (NDG10)
L (NDG20)
XL (NDG30)

PACKAGING
50 pieces

PU WORK GLOVES (ART. PWG)

PU work gloves with an excellent fit, high finger sensitivity and optimal grip. The wear-resistant PU coating provides extra comfort and durability for precision work.

- Thin, wear-resistant PU coating for optimal grip
- Excellent finger sensitivity
- Lightweight and flexible
- Breathable back panel for extra comfort
- Perfect fit for maximum control
- Low-lint, ideal for clean working environments
- EN388-certified protection
- Suitable for assembly, sanding and preparation work

SIZE
M (PWG10)
L (PWG20)
XL (PWG20)

PACKAGING
12 pairs

BESTSELLER

MICROFOAM WORK GLOVES (ART. MWG)

Microfoam work gloves with excellent grip, even in oily or damp conditions. The wear-resistant microfoam nitrile coating provides optimal comfort and high durability.

- Microfoam nitrile coating for optimal grip
- Excellent grip in oil and moisture
- Very wear-resistant
- Flexible and ergonomic design
- Breathable back panel for extra comfort
- Low-lint finish
- EN388-certified protection
- Ideal for: Automotive body repair, assembly, metalworking and work in oily and damp environments

SIZE
M (MWG10)
L (MWG20)
XL (MWG30)

PACKAGING
12 pairs

INDUSTRIAL NITRILE GLOVES (ART. ING)

Extra thick industrial nitrile gloves with excellent protection against paint, solvents and chemicals. The strong, reusable nitrile material offers high chemical resistance and optimal wearing comfort.

- Extra thick and strong nitrile material
- Resistant to paint, solvents and chemicals
- High chemical resistance
- Ergonomic fit
- Anti-slip profile for optimal grip
- High wearing comfort
- CE certified
- Ideal for mixing paints and coatings

SIZE
L (ING20)
XL (ING30)

PACKAGING
12 pairs

ALLCLEAN WIPES (ART. AW100)

Professional impregnated cleaning wipes for quickly cleaning tools, parts and hard surfaces. Ideal for removing dirt, grease and other contamination in workshop environments.

- Impregnated cleaning wipes for stubborn industrial contamination
- Removes, among others, 2K paint, adhesive, epoxy, sealant, grease and lubricants
- Suitable for hands and tools
- No water required and solvent-free
- Dermatologically tested and biodegradable
- Free of parabens

DIMENSION
26 x 30 cm

PACKAGING
100 pieces per bucket

PRO HAND CLEANER (ART. PHC)

Powerful citrus hand cleaner for removing everyday and stubborn contamination such as paint, ink, glue and tar. Cleans and cares for the hands at the same time and helps prevent skin irritation. Contains natural scrubbing particles for effective cleaning.

- Excellent cleaning power
- Removes paint, ink, adhesive and tar
- Cleans and cares for hands at the same time
- Helps prevent skin irritation
- With natural abrasive particles for effective cleaning

CONTENTS	PIECES/ OUTER BOX
300 ml (PHC03)	24 pieces
3,8 liter (PHC38)	4 pieces

SUPERIOR HAND CLEANER (ART. SHC)

High-quality hand cleaner for removing extremely heavy contamination in automotive body repair and industrial applications. Removes paint, sealant, adhesive, resins and 2-component products, among others, thanks to its powerful formula with natural micro-granules.

- Excellent cleaning power
- Solvent-free and pH-neutral
- Moisture-regulating and skin-friendly
- With biodegradable corn meal scrub
- Pleasantly scented

CONTENTS	PIECES/ OUTER BOX
300 ml (SHC03)	24 pieces
3,8 liter (SHC38)	4 pieces

WALL HOLDER FOR HAND CLEANER 3,8 L (ART. WH38)

- Convenient wall bracket for Gerko hand soap 3,8 liter

CONTENTS	PACKAGING
3,8 liter	Per piece

2 MASKING

Masking is an essential step in the body repair process and provides efficient protection of vehicle parts during painting and sanding work. Correctly covering surfaces prevents overspray, dust, dirt and unwanted paint build-up, resulting in a crisp and professional finish.

In bodywork, various masking products are used, such as masking tapes, masking film, masking paper and protective solutions for specific applications. A quality masking system not only increases the speed and efficiency of the work process, but also helps limit time-consuming rework and material loss.

MASKING FILM

Masking films and protective covers are used to protect vehicles and parts against overspray, dust, dirt and moisture during body repair and painting work. Transparent HDPE masking film has static properties for optimal adhesion to the surface and is paint-adherent for better absorption of paint mist.

DESCRIPTION	THICKNESS	PAINT ADHESIVE	MOISTURE ABSORBING	STATIC LOADED	COLOUR	PAGE
Masking film	10 µm	✔	-	✔	Transparent	24
Superior masking film	15 µm	✔	✔	✔	●	24
Masking film with integrated tape	8 µm	✔	-	✔	Transparent	25
Rim masking film	20 µm	✔	-	✔	●	25

GERKO
PAINT RELATED PRODUCTS

MASKING FILM (ART. PM)

HDPE masking film for quickly and efficiently covering vehicles during spray work. Protects against overspray, dirt and dust and, thanks to its static properties, adheres perfectly to the surface for optimal coverage.

- Transparent HDPE masking film against overspray, dirt and dust
- Paint-adherent with printed spray side
- Easy to apply by one person
- Strong, elastic and easy to cut
- Static cling to the surface
- Suitable for infrared drying
- Packed per roll in a cardboard box
- Film thickness: 10 µm

DIMENSION
4 x 300 m (PM40)
4 x 150 m (PM4015)
4,8 x 300 m (PM48)
5 x 120 m (PM50)
6 x 100 m (PM60)

SUPERIOR MASKING FILM MOISTURE ABSORPTION (ART. SPM)

Transparent masking film with moisture-absorbing properties that prevents unsightly marks and can be applied to damp surfaces. Extra-thick quality for increased strength and protection.

- Paint-adherent for optimal absorption of paint and overspray
- Moisture-absorbing and breathable
- Easy to apply by one person
- Strong, elastic and easy to cut
- Static cling to the surface
- Suitable for infrared drying
- Temperature-resistant up to 120 °C
- Packed per roll in a cardboard box
- Film thickness: 15 µm

DIMENSION
4 x 150 m (SPM40)
5 x 120 m (SPM50)

MASKING FILM WITH INTEGRATED TAPE (ART. MFT)

Transparent masking film with integrated tape for quickly masking car windows, bonnets and other vehicle parts. Provides neat and efficient protection during painting work.

- Transparent masking film with tape and paint absorption
- Can be torn off by hand
- Static cling
- Corona-treated
- Straight cut
- 80 °C tape

DIMENSION

35 cm x 25 m (MFT35)
60 cm x 25 m (MFT60)
90 cm x 25 m (MFT90)
120 cm x 25 m (MFT120)
180 cm x 25 m (MFT180)
260 cm x 25 m (MFT260)

RIM MASKING FILM (ART. RMF80)

Fast and professional solution for painting and repairing wheels without removing the tire. The wheel does not need to be rebalanced after repair.

- For painting and repairing wheels without tire removal
- Suitable for wheels from 300 mm to 480 mm
- Time-saving and economical in use
- Equipped with an elastic band
- Film thickness: 20 µm

PACKAGING

80 pieces (4 x 20 pieces)

COVER SET 5 IN 1 (ART. CS05)

Complete cover set for protecting the car interior against dirt, dust and grease during repairs. Contains all essential protective covers for a neat and professional finish of the vehicle.

- Complete protection set for the car interior
- Convenient to use with 1 set per job
- Ensures a neat and professional finish

PACKAGING

1 x plastic car seat cover
1 x paper floor mat
1 x plastic steering wheel cover
1 x gear lever cover
1 x brake cover

MASKING TAPE

Masking tape is used for precise taping of surfaces during painting, painting and repair work in the automotive sector. Depending on the application, different tapes offer resistance to high temperatures, moisture and solvents, with excellent adhesion to various substrates and clean removal without adhesive residue. Thanks to flexible paper backings and high-quality adhesive layers, crisp paint lines and efficient processing are guaranteed.

DESCRIPTION	TEMPERATURE-RESISTANT 30 min	THICKNESS	TENSILE STRENGTH N/cm	ELONGATION %	PEEL ADHESION N/25 mm R	COLOUR	PAGE
Superior masking tape	100 °C	120 µm	38 N/cm	7,5 %	5		28

SUPERIOR MASKING TAPE (ART. SMT)

Temperature-resistant masking tape with a semi-crepe paper backing and strong rubber resin adhesive for general painting work. Suitable up to 80 °C and ideal in combination with masking paper and masking film thanks to its good adhesive strength.

- Excellent tape-on-tape adhesion
- Suitable for metal and plastic
- Easy to remove without adhesive residue
- Resistant to solvents
- Suitable for water- and solvent-based paints
- Excellent formability and easy to tear
- Suitable for IR and UV drying
- Adhesive strength on steel: 5 N/25 mm
- Thickness: 125 micron

DIMENSION	PIECES/ MASTER CARTON
18 cm x 50 m (SMT18)	48 pieces
24 cm x 50 m (SMT24)	36 pieces
30 cm x 50 m (SMT30)	32 pieces

BESTSELLER

AZURE MASKING TAPE (ART. MAT)

Premium masking tape with flexible crepe paper backing and strong rubber resin adhesive, suitable for automotive repairs and spray work up to 120 °C. The mouldable paper follows curved surfaces perfectly and, thanks to its striking colour, ensures good visibility and easy removal.

- Strong and durable adhesion
- Excellent formability on curved surfaces
- Removable without adhesive residue
- High visibility
- 3 days UV-resistant
- High quality
- Suitable for IR and UV drying
- Temperature-resistant up to 120 °C
- Adhesive strength on steel: 5,75 N/25 mm
- Thickness: 130 micron

DIMENSION	PIECES/ MASTER CARTON
18 cm x 50 m (MAT18)	48 pieces
24 cm x 50 m (MAT24)	36 pieces

48 cm x 50 m (MAT48)	24 pieces

AQUA MASKING TAPE (ART. AMT)

Premium aqua masking tape with water-resistant crepe paper backing and strong rubber resin adhesive, resistant to moisture, waterborne paints and high temperatures up to 120 °C. Ideal for wet sanding and spray work, with excellent visibility and clean removal.

- Suitable for waterborne paints
- Excellent adhesion on rubber and metal
- Removable without adhesive residue
- Water-resistant green crepe paper
- Excellent tape-on-tape adhesion
- Solvent- and water-resistant
- Suitable for IR and UV drying
- Temperature-resistant up to 120 °C
- Adhesive strength on steel: 5 N/25 mm
- Thickness: 135 micron

DIMENSION	PIECES/ MASTER CARTON
18 cm x 50 m (AMT18)	48 pieces

WASHI MASKING TAPE (ART. WTG)

Washi masking tape with high-quality acrylic adhesive for extremely crisp and fine masking lines. The thin yet strong Japanese paper structure ensures excellent tape-on-tape performance in automotive and professional painting applications.

- Suitable for water- and solvent-based paints
- Excellent adhesion on various substrates
- Flexible for tight curves and paint break lines
- Wet-removable without adhesive residue
- Solvent-, water- and UV-resistant
- Oven-resistant up to 120 °C
- Adhesive strength on steel: 5 N/25 mm
- Thickness: ≤ 90 micron

DIMENSION	PIECES/ MASTER CARTON
18 cm x 50 m (WTG18)	48 pieces
24 cm x 50 m (WTG24)	36 pieces
36 cm x 50 m (WTG36)	24 pieces
48 cm x 50 m (WTG48)	24 pieces

MASKING PAPER (ART. MP)

Masking paper made from recycled brown paper, ideal for covering vehicles and parts during painting work. The dust-free and absorbent paper prevents paint bleed-through and is available in various sizes.

- 50 g/m² recycled brown paper
- Ideal for masking vehicles and parts
- Dust-free and highly absorbent
- Prevents paint bleed-through
- Available in various sizes

DIMENSION

20 cm x 300 m (MP020)
30 cm x 300 m (MP030)
40 cm x 300 m (MP040)
60 cm x 300 m (MP060)

120 cm x 300 m (MP120)
150 cm x 300 m (MP150)

MASKING PAPER KRAFT (ART. MPK)

High-quality kraft paper with high density and excellent perforation resistance for reliable coverage during spray work. The strong paper combines a smooth outer side with a rough inner side for optimal handling.

- 40 g/m² high-quality kraft paper
- Strong and puncture-resistant
- Smooth and lint-free surface
- Increased water resistance
- Suitable for solvent- and water-based paints
- Available in various sizes

DIMENSION

20 cm x 300 m (MPK020)
30 cm x 300 m (MPK030)
40 cm x 300 m (MPK040)

150 cm x 300 m (MPK150)

SILICONE MASKING PAPER (ART. SP)

Silicone masking paper with a double-sided glossy protective layer, suitable for demanding paints, powder coatings and stoving enamels. The extra sturdy quality makes it ideal for both horizontal and vertical applications.

- 58 g/m² masking paper
- Ideal for vehicles and parts
- Dust-free and waterproof
- Glossy side for extra protection
- Available in various sizes

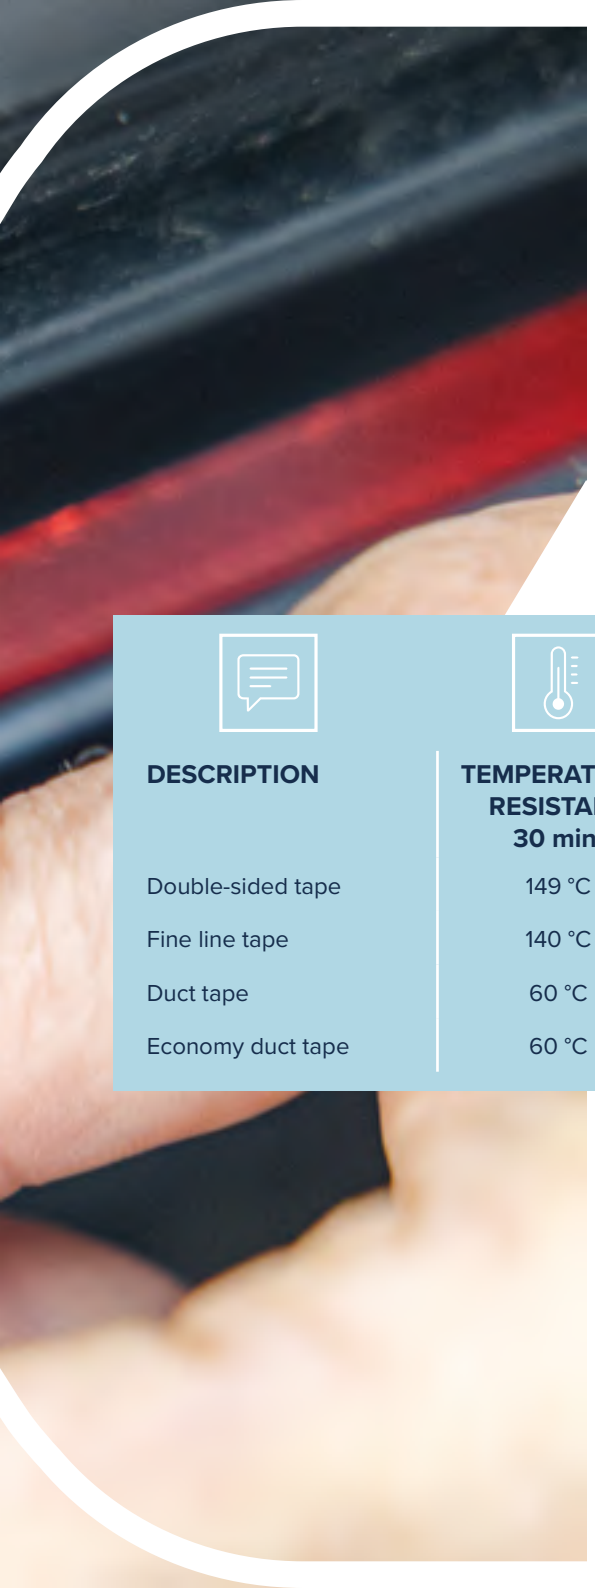
SENSOR COVERS (ART. SC05)

Gerko sensor covers are specially developed to quickly and easily cover parking sensors during the sanding, polishing and painting process

- Time-saving protection of sensors
- No sensor removal required
- Protects during sanding, polishing and painting
- Prevents contamination of sensors

DIMENSION	PACKAGING
18 mm	60 pieces



SPECIAL TAPE

Special tapes have been developed for specific applications within body repair, assembly and finishing in the automotive sector. The range includes, among others, foam tapes for sealing door openings, fine line tapes for tight paint lines, duct tapes for strong temporary fastenings, double-sided tapes for assembly work and T-foam tapes for preventing hard paint transitions. Thanks to their specific adhesion, flexibility and durability, these tapes ensure professional and efficient processing.

DESCRIPTION	TEMPERATURE-RESISTANT 30 min.	THICKNESS	TENSILE STRENGTH N/25 mm	ELONGATION %	PEEL ADHESION N/25 mm	COLOUR	PAGE

Economy duct tape	60 °C	145 µm	35	20 %	17,5		35

GERKO
PAINT RELATED PRODUCTS

T-FOAM TAPE (ART. TFT25)

T-foam masking tape with a semi-rigid flat shape for quick and easy placement on vehicle edges and openings. Prevents paint seepage and hard paint transitions without leaving adhesive residue.

- Easy and quick to apply
- Perfect edge finish without paint build-up
- Flexible and easy to shape
- Removable without adhesive residue
- Solvent-resistant
- No bleed-through

DIMENSION
25 m

FOAM MASKING TAPE (ART. FT)

Foam masking tape for professionally sealing gaps between hoods, doors and body panels during painting work. Prevents hard paint edges, absorbs paint mist and ensures a neat finish.

- For masking seams and openings
- Prevents edge build-up and absorbs paint
- Flexible foam, easy to cut to size
- Removable without adhesive residue

DIMENSION
13 mm x 50 m (FT13)
19 mm x 35 m (FT19)

LIFTING TAPE (ART. LT10)

Lifting tape for lifting and protecting rubber edges and trims during painting work. The integrated polyester strip ensures fast application and crisp paint results without overspray.

- Simplifies masking of rubber parts
- Prevents overspray on rubber parts
- Pre-cut every 46 mm
- Removable without adhesive residue
- Easy to tear off
- Polyester strip of 10mm

DIMENSION
10 mm x 10 m

LIFTING TAPE MULTI (ART. LT20)

Lifting tape multi for lifting and protecting rubber edges and trims during painting work. The double polyester strip ensures fast application and crisp paint results without overspray.

- Simplifies masking of rubber parts
- Prevents overspray on rubber parts
- Pre-cut every 42 mm
- 2 multifunctional plastic strips
- Removable without adhesive residue
- Easy to tear off
- Polyester strip of 9 + 11m

DIMENSION
9,11 mm x 10 m

FINE LINE TAPE (ART. FLT)

Fine line tape is an ultra-thin and highly flexible masking tape for tight lines and sharp curves without tearing or creasing. Ideal for multi-color work, design lines, lettering and custom painting.

- Suitable for water- and solvent-based paints
- Excellent adhesion on plastic, rubber and metal
- Ultra-thin and extremely flexible
- Ideal for sharp edges and small details
- Removable without adhesive residue
- Temperature-resistant up to 140 °C

DIMENSION

3 mm x 55 m (FLT03)
6 mm x 55 m (FLT06)
9 mm x 55 m (FLT09)
12 mm x 55 m (FLT12)

DOUBLE-SIDED TAPE
(ART. DST)

Acrylic-based double-sided tape with excellent adhesion and stress-absorbing properties. Provides durable and reliable attachment in automotive assembly and finishing applications.

- Acrylic adhesive tape for stripes, licence plates and accessories
- Strong and fast adhesion
- High adhesive strength at any temperature
- UV resistant
- Fast and easy to apply

DIMENSION

6 mm x 10 m (DST06)
9 mm x 10 m (DST09)
12 mm x 10 m (DST12)
19 mm x 10 m (DST19)

DUCT TAPE
(ART. CTZ50 | CTG50)

Duct tape for protecting vehicle parts during sanding, blasting and repair work. Also ideal for temporary fastening and protection during transport of damaged vehicles.

- Excellent adhesion at low and high temperatures
- Good performance on rough surfaces
- Easy to tear off and unroll
- Removable without adhesive residue
- Silicone-free
- Suitable for plastic and sheet metal
- Weave density: 70 mesh

COLOUR

Black (CTZ50)

ECONOMY DUCT TAPE
(ART. DTG48)

Economy duct tape with synthetic rubber-resin adhesive for bundling, sealing and general repairs. Thanks to its good adhesion, flexibility and tensile strength, suitable for various applications and do-it-yourself work.

- Easy to tear
- Good adhesive strength
- Good tensile strength
- Excellent formability
- Suitable for multiple surfaces
- Perfectly waterproof

DIMENSION

48 mm x 50 m

MASKING FILM DISPENSER (ART. MFD10)

Masking film dispenser for quick and efficient covering of vehicles with plastic film. Thanks to the practical design, one person can easily apply the film and cut it neatly along the integrated cutting guide.

- Suitable for rolls of masking paper
- Efficient masking by one person
- Space-saving in the workshop
- Suitable for rolls up to 100 cm wide

DIMENSION
1230 x 270 x 330 mm

FILM WIDTHS
Up to 100 cm

MASKING FILM DISPENSER & CUTTER (ART. MFD20)

Masking film dispenser including cutter for quick and professional application of masking film on vehicles. Ensures efficient processing and easy, precise cutting of the film during masking work.

- Large wheels for smooth maneuvering
- Robust and movable construction
- Easy to use by one person
- Equipped with a cutting rail for smooth tearing

DIMENSION
1270 x 600 x 720 mm

FILM WIDTHS
Up to 120 cm

MASKING PAPER DISPENSER 3 ROLLS (ART. MS30)

Sturdy masking paper dispenser suitable for 3 rolls of masking paper. Ensures fast, neat and efficient processing during masking work.

- Ideal for quick and easy masking
- Suitable for 3 paper rolls and 3 tape rolls
- Sharp anodized blade for precise cutting
- Adjustable rings for perfect alignment

DIMENSION
1170 x 600 x 1200 mm

PAPER WIDTHS
30 cm · 60 cm · 90 cm

MASKING PAPER DISPENSER 5 ROLLS (ART. MS60)

Sturdy masking paper dispenser suitable for 5 rolls of masking paper. Ideal for organized, fast and efficient processing of different paper widths during masking work.

- Fast and easy masking for automotive body repair
- Suitable for 5 paper rolls and 5 tape rolls
- Sharp anodized blades for precise cutting
- Movable tape holders for perfect alignment

DIMENSION
1550 x 600 x 1370 mm

PAPER WIDTHS
30 to 120 cm

3 SANDING

Sanding is an essential step in automotive body repair. It ensures an even surface, removes old paint, rust and imperfections, and creates the perfect adhesion for putty, primer and paint. By using the right sanding materials and grit progression, a flawless end result is achieved with minimal preparation time.

Our range offers a complete selection of professional sanding products for every step of the sanding process. The range includes electric and pneumatic sanders, mobile vacuum cleaners for a dust-free working environment, sanding discs in various qualities and grit sizes, foam sanding discs, sanding rolls, hand sanding materials and various accessories. This ensures you always have the right solution, from coarse sanding work to the finest finishing.

MACHINE SANDING

High-quality 150 mm sanding discs for efficient machine sanding of various surfaces. Suitable for orbital sanders and usable in all phases of the sanding process, from coarse levelling to fine finishing. Ensures an even sanding pattern, optimal dust extraction and consistent end quality.

BESTSELLER

INFINITY SANDING DISCS (ART. SPI)

Ceramic Infinity sanding discs offer high cutting power, fast material removal and a long service life for efficient, professional sanding performance.

- Paper backing
- Premium ceramic grain with self-sharpening effect
- Very high cutting power and consistent performance
- Long service life and lower consumption
- High cutting speed saves time
- Anti-sagging coating for maximum durability
- Suitable for various surface preparations

GREEN SANDING DISCS (ART. SPG)

Green sanding discs offer high cutting power, minimal clogging thanks to a stearate coating, and a flexible film structure for perfect results, even on curved surfaces.

- Film backing
- Aluminium oxide abrasive grain
- High cutting performance without clogging
- Longer service life through durability
- Stearate layer prevents the sandpaper from clogging
- Double bonding of the grain
- Perfect sanding surface

BLUE CERAMIC SANDING DISCS (ART. SPC)

Blue ceramic sanding disc is made with premium grain, strong resin bond and special stearate coating. This ensures superior performance and service life. It has a general application.

- Ceramic aluminium oxide grains
- High initial cutting power for efficient sanding
- Durable thanks to anti-clogging layer
- Lower labour costs
- Longer service life of the abrasives

TRIFLEX FOAM SANDING DISCS (ART. TFS | TFB)

Triflex sanding discs with a unique pyramid structure on a foam backing provide an extremely uniform sanding finish and a perfect result without recurring scratches. Thanks to the consistent sanding action, they form the ideal basis for polishing work.

- Pyramidal structure with microreplication technology
- Smooth and even finish
- Ideal for removing sanding scratches
- Longer service life
- Even distribution of abrasive minerals
- Up to 30% less workload

INFINITY FOAM SANDING DISCS (ART. IFD)

Infinity Foam sanding discs, thanks to their flexible foam backing, ensure an even sanding pattern and perfect conformity to the surface. Ideal for matting clear coats, paint, primer and plastics, for use both wet and dry.

- Sanding disc on flexible foam backing
- Suitable for wet and dry sanding
- Adapts to the shape of the surface
- Ideal for sanding headlights
- Aluminium oxide abrasive grain
- Excellent cutting action and finish
- Suitable for manual and machine use
- Velcro hook-and-loop backing

SANDING BY HAND

Hand sanding is used for precise surface preparation, hard-to-reach areas and fine finishing work within the automotive refinishing industry. With products such as Infinity sanding strips, soft flex sandpaper, wet & dry sanding sheets and non-woven abrasive you create an even sanding pattern and optimal preparation before primer, paint or polishing work. The range offers solutions for coarse sanding, fine finishing, matting and sanding of contours and complex shapes.

SANDING BLOCK WITH EXTRACTION (ART. SB198 | SB230 | SB420)

Sanding blocks with ergonomic handle and balanced weight distribution for even pressure while sanding. Equipped with a dust extraction connection for a clean, low-dust working environment. Thanks to the rounded-corner design, sandpaper can be changed quickly and easily.

- Ergonomic handle for comfortable use
- Balanced weight distribution for even pressure
- Equipped with a connection for dust extraction
- Rounded corners for easy removal of sandpaper

DIMENSION

INFINITY NET ROLL (ART. INR)

Infinity net roll sandpaper combines a ceramic abrasive grain with an open mesh structure for maximum dust extraction and a consistent sanding result. Thanks to the precut every 70 mm, the roll can be easily torn off by hand.

- Ceramic abrasive grain for high cutting power
- Open mesh structure for optimal dust extraction
- Precut every 70 mm for easy tearing
- Suitable for wood, putty, primer, lacquer, paint, plastic and metal
- Consistent finish and longer service life

SOFT FLEX ABRASIVE (ART. SR)

Soft flex sandpaper for manual sanding of profiled and hard-to-reach surfaces. The soft foam backing ensures even pressure distribution and reduces the risk of sanding through. Thanks to the stearate coating, the sandpaper stays free of clogging longer for an efficient sanding process.

- Flexible foam backing for contours and profiles
- Adapts to round and concave shapes
- Even pressure distribution reduces sand-through
- Stearate coating prevents clogging
- Semi-open grain for good dust extraction
- Perforated for easy tearing
- Dust-free packaging in dispenser box

MOBILE VACUUM CLEANER WITH AUTOMATIC FILTER CLEANING M-CLASS 40 L (ART. VC1000)

Mobile wet and dry vacuum cleaner with automatic filter cleaning, M-class certification and 40 L capacity for professional use. Equipped with an integrated socket for power tools, automatic start function and a robust, user-friendly construction. Ideal for low-dust working in workshops and vehicle body repair.

- M-class dust extraction with HEPA filter
- Retains 99.9% of dust
- Automatic filter cleaning for constant suction power
- Powerful 1600 W brushless motor
- Suitable for wet and dry use
- 40 L collection capacity
- Compact design with optimal mobility

INCLUDED ACCESSORIES

1x non-woven dust bag
1x HEPA filter
1x antistatic vacuum cleaner hose 4,7 m

PACKAGING

Per piece

ACCESSORY

Y CONNECTOR (ART. YCON)

HEPA FILTER (ART. HF10)

HEPA filter for efficiently filtering fine and harmful dust particles during sanding work. Ensures a cleaner working environment, less contamination and consistent extraction performance.

- Reduces exposure to fine dust
- Ensures a clean workplace
- Reduced risk of dust inclusions
- Professional extraction quality with less recirculation of dust particles

PACKAGING
Per piece

NON-WOVEN DUST BAG (ART. DB05)

Non-woven dust bag is specially designed for the Gerko vacuum cleaner and ensures powerful, clean and efficient dust extraction for every sanding job. Thanks to the durable material, the bag captures even the finest dust without loss of suction power.

- For vacuum cleaners with 40 L capacity
- Easy and quick to install
- Ensures a longer lifespan of the Gerko vacuum cleaner
- High filtration efficiency thanks to durable non-woven material

PACKAGING
5 pieces

ANTISTATIC HOSE 4,7M (ART. VCP567)

The antistatic vacuum cleaner hose is lightweight, flexible and made from the highest quality for a long service life.

- Antistatic vacuum cleaner hose of 4,7 m
- Perfect connection with Gerko sanders
- Lightweight

BESTSELLER

POLYCREAM PUTTY (ART. PC20)

Universal polyester putty for various applications within automotive body repair. Characterised by smooth application, fast drying and easy sandability for a neat end result.

- Universal 2K polyester putty with high filling power
- Excellent adhesion on steel, aluminium and galvanised metals
- Very easy to spread, with a smooth, non-porous surface
- Easy to sand
- Maximum stability on vertical surfaces
- To be finished with fine putty or directly with primer
- Colour: beige – hardener: red (BPO)
- Mixing ratio: 2–3% hardener

CONTENTS

2 kg

BESTSELLER

MULTI GREEN PUTTY (ART. MG14 | MG16)

Versatile body putty with excellent adhesion on steel, aluminium, galvanised substrates, wood and fibreglass-reinforced plastics. Characterised by fast drying, easy sandability and high filling power without pinholing.

- Suitable as filling and finishing putty
- Medium creamy structure for easy application
- Smooth, non-porous surface
- Excellent sandability from P120
- Good adhesion on various substrates
- Mixing ratio: 2–3% hardener

CONTENTS

1,4 kg cartridge (MG14)
1,6 kg (MG16)

MULTI BLUE PUTTY (ART. MF10 | MF30)

High-quality semi-lightweight polyester putty suitable as both a body putty and finishing putty. Easy to apply and sand, with a colour indicator that changes from blue to grey when the product is ready to sand.

- Universal polyester putty with low specific gravity
- Suitable as filling and finishing putty
- Colour change indicates sanding time
- Extra creamy texture for easy application
- Smooth, non-porous surface
- Excellent sandability from P120
- Good adhesion on various substrates
- Mixing ratio: 2–3% hardener

CONTENTS

1,6 kg (MF10)
3 liter (MF30)

EASYGO PUTTY (ART. EG10)

Lightweight polyester putty with low product consumption for filling imperfections and dents. Easy to apply with excellent adhesion to steel, aluminium and galvanised substrates.

- Universal lightweight polyester putty with low specific gravity
- Extreme adhesion on steel, aluminum, e-coat and GRP
- With glass beads for lightweight filling
- Low shrinkage and high flexibility
- Vibration-resistant on thin metal
- Smooth, compact surface with excellent sandability
- Short drying time and high stability in the can
- Mixing ratio: 2–3% hardener

CONTENTS
1 liter

FIBRE PUTTY (ART. FP18)

Polyester putty reinforced with fiberglass for strong repairs of polyester parts and rusted metal surfaces. Characterized by smooth application, good adhesion and improved sandability.

- Polyester putty with fiberglass for larger repairs
- Suitable for deep irregularities, cracks and holes
- High strength with good flexibility
- Easy to spread thanks to impregnated fibers
- Water-resistant and ideal for polyester repairs
- Excellent sandability from P120
- Mixing ratio: 2–3% hardener

CONTENTS
1,8 kg

UNIFLEX PUTTY (ART. UF20)

Two-component plastic putty with exceptional flexibility and easy application. Offers strong adhesion on most plastics and, thanks to its high impact and vibration resistance, is ideal for durable plastic repairs.

- Flexible putty for plastic and various substrates
- Ideal for finishing plastic repairs
- Built-in sanding guide: black changes to grey during sanding
- Smooth surface and easy to sand
- Good adhesion on metal, plastic, wood and old paint layers
- Mixing ratio: 2–3% hardener

CONTENTS
1,8 kg

TIN REPLACER PUTTY (ART. TR20)

Tin replacer two-component putty with excellent adhesion to steel, aluminum, zinc, wood and fiberglass-reinforced plastics. Easy to apply and sand, with high durability and good resistance to fuels and mechanical stress.

- Resistant to petrol, diesel and battery acid after curing
- Ideal for wheel arches, doors, roofs and wheel rim repairs
- High elasticity and strong mechanical resistance
- Colour: steel grey
- Mixing ratio: 2% hardener

CONTENTS
2 kg

ALUMINIUM PUTTY (ART. AP18)

Polyester putty enriched with aluminum particles for strong adhesion and high temperature resistance. Ideal for filling larger cracks and imperfections thanks to its low shrinkage and high flexibility.

- Polyester putty with aluminum particles
- Suitable for body panels under mechanical stress
- Ideal for filling coarse imperfections and holes
- Good adhesion on steel, aluminum and galvanized substrates
- High elasticity and stability on vertical surfaces
- Easy to sand
- Mixing ratio: 2–3% hardener

CONTENTS
1,8 kg

TURBO GLAZE FINISHING PUTTY (ART. TG850)

2-component self-levelling putty with excellent flow properties for an ultra-smooth, pore-free finish. Ideal for eliminating scratches and minor imperfections, and easy to sand for a fast, professional result.

- Self-levelling without pinholes
- Extra fine finishing putty
- For finishing other polyester Putties
- For removing small scratches or holes
- Easy to sand

CONTENTS
850 ml

SPRAY PUTTY (ART. SP12)

Spray filler for filling scratches and imperfections after filling and sanding. Thanks to its excellent thixotropy, it is also suitable for thicker layers and vertical surfaces. After sanding, it leaves a smooth surface ready for further finishing.

- For small and large imperfections
- Smooth finish, even on large surfaces
- Excellent adhesion
- Fast-drying and pore-free
- High filling capacity
- Easy to sand

5 GLUES & ADHESIVES

Adhesives and sealants play an important role in vehicle body repair for mounting, sealing and bonding various components. They are used for applications such as bonding body panels, plastic repairs, sealing seams and protecting against moisture, vibration and corrosion.

Thanks to their strong adhesion, flexibility and durability, adhesives and sealants contribute to a reliable repair and a professional finish.

SEALER

PLASTIC REPAIR & METAL BONDING

Our range for plastic repair and metal bonding includes products such as plastic repair, metal bond (MMA) and structural metal bonding. These products ensure strong, durable and reliable repairs of plastic and metal components in automotive body repair.

APPLICATOR GUN FOR PLASTIC REPAIR 50 ML
(ART. SPR50)

PLASTIC REPAIR (ART. PR01 | PR02 | PR03)

Fast and user-friendly 2-component plastic repair adhesive for durable repairs of plastic parts. Offers excellent adhesion, high resistance to heat, moisture and chemicals, and is quick to sand and recoat. Thanks to its good gap-filling properties, also suitable for reconstructing bumper tabs in combination with reinforcing mesh.

- Excellent adhesion
- Very fast drying
- Perfectly sandable and overcoatable
- Good sag resistance

CONTENTS
50 ml (PR01, PR02)
25 ml (PR03)

PACKAGING
Per piece

VERSION
Fast (30 sec) (PR01)
Medium (90 sec) (PR02, PR03)

METAL BONDING MMA (ART. MB50)

2-component structural acrylic adhesive for durable bonding of composites, plastics and metals. Fast curing at room temperature with excellent resistance to impact, peel and tear. Suitable for industrial and body repair applications.

- Does not affect surfaces and is safe for various materials
- Fast curing at room temperature with short open time
- Recoatable after curing
- Excellent UV and ageing resistance
- Fills gaps of up to 5 mm
- Thixotropic formula prevents sagging on vertical applications
- High impact, peel and shear strength for durable bonding

CONTENTS
50 ml

PACKAGING
Per piece

PANEL BONDING ADHESIVE (ART. PBA195)

2-component structural epoxy adhesive for bonding metal and composite panels. Suitable for steel, aluminium, SMC and various plastics, with high strength, energy absorption and corrosion protection. Overpaintable after curing and suitable for professional body repairs.

- Curing at room temperature, heat acceleration possible
- Long open time of 60 min, processing within 4 hours at 23 °C, fully cured within 24 hours
- Glass beads ensure a constant bond line thickness
- Resistant to high temperatures up to 230°C
- Excellent corrosion protection and crash performance
- Spot-weldable before curing

CONTENTS
195 ml

PIECES/ OUTER BOX
12 pieces

SEAM SEALER MS POLYMER
(ART. SS10 | SS20 | SS30)

High-quality MS polymer seam sealer and assembly adhesive based on hybrid technology. Cures through air humidity into a durable, permanently elastic rubber.

- Universal sealing, bonding and mounting for automotive
- Fast curing and recoatable
- Excellent adhesion on various substrates
- UV, weather and mould resistant
- High mechanical resistance and vibration absorption
- Isocyanate-, solvent- and silicone-free

CONTENTS
290 ml

COLOURS
White (SS10)
Grey (SS20)
Black (SS30)

SCREENBOND MS POLYMER
(ART. SCB10)

High-quality MS polymer windscreen adhesive for fast, professional bonding of car windows. Provides strong adhesion to glass, ceramic edges and old windscreen adhesive without primer. Thanks to its high initial strength, the window does not slip during installation.

- High initial strength prevents sagging
- Excellent adhesion without primer
- Increases body stiffness
- Easy processing
- UV resistant
- Free of solvents, isocyanates and silicones

CONTENTS
290 ml

COLOUR
Black

BRUSHABLE SEAM SEALER
(ART. BSS10)

One-component trowel-applied sealant for sealing weld and metal joints. Forms a durable, elastic seal resistant to water, oil and petrol. Can be overpainted with common paint systems.

- Easy to spread without stringing
- Provides an original texture
- Very strong adhesion

- Nylon brush (ART. NB30)

CONTENTS
1 kg

INSTANT GLUE (ART. IG20)

Fast-drying cyanoacrylate adhesive for bonding metal, plastics, wood, paper, leather and fabric. Suitable for fast and strong bonds on various surfaces.

- Universally applicable on various materials
- Medium viscosity
- 1-component product
- Cures at room temperature and humidity

CONTENTS
20 gr

PACKAGING
Per piece

MIXER TIPS FOR PLASTIC REPAIR (ART. MT50)

Mixing tips for correctly mixing 2-component plastic repair products in 50 ml cartridges. Ensure a consistent mixing ratio and precise application.

- Suitable for 50 ml 2K cartridges
- Ensures homogeneous mixing and a constant mixing ratio
- Even and precise product flow
- Easy to use
- Ideal for professional plastic and body repair

CONTENTS	PACKAGING
50 ml	10 pieces

MIXER TIPS FOR METAL BONDING (ART. MT195)

Mixer tips for correctly mixing 2-component metal bonding adhesive in 195 ml cartridges. Ensure homogeneous mixing and precise application.

- Suitable for 195 ml 2K metal bonding cartridges
- Ensures homogeneous mixing and a constant mixing ratio
- Reduces mixing errors and promotes consistent curing
- Easy to use

CONTENTS	PACKAGING
195 ml	10 pieces

RUBBER ERASER PAD Ø 100 (ART. REP100)

Serrated rubber removal pad for extra-fast removal of stickers and adhesive residue without damaging the substrate. The extra-thick and serrated design ensures better cooling, a longer service life and up to 3x faster operation.

- Serrated design for faster removal
- Works up to 3x faster than traditional adhesive erasers
- Removes stickers and adhesive residue without damage
- No chemical products required
- Supplied with adapter

DIMENSION	PACKAGING
ø 100 - 25 mm	Per piece

RUBBER ERASER PAD Ø 88 (ART. REP200)

Rubber removal pad for safely removing stickers, films and adhesive residue without scratching paint or glass. Easy to mount on a drill or angle grinder thanks to the integrated thread.

- Removes stickers and adhesive residue without damage
- No chemical products required
- Recommended speed: 2.000 – 4.000 rpm
- Supplied with adapter

DIMENSION	PACKAGING
ø 88 - 15 mm	Per piece

6 PAINT PREPARATION

Paint preparation is an essential step in vehicle body repair and helps determine the quality, adhesion and durability of the final result. Correct preparation ensures a clean, dust-free and perfectly prepared surface before applying primer, basecoat or clear coat.

Within this category we offer a complete range for efficient and professional paint preparation: from mixing cups and spray guns to degreasing cloths, tack cloths, mixing accessories and cleaning products. These solutions help with precise mixing of paints, preventing contamination and achieving a smooth and even spray result.

SPRAY GUNS & ACCESSORIES

Spray gun accessories are essential for maintaining, adjusting and optimising spray performance in automotive body repair. With products such as Nozzle sets, air control replacement kits, Pattern control assembly sets and maintenance kits the spray gun continues to work accurately, guaranteeing constant paint atomization and a professional finish.

PRESSURE REGULATOR (ART. PRSG)

Pressure regulator for precisely controlling and stabilizing the air supply to the spray gun. Ensures a consistent spray pattern, efficient atomization and a high-quality finish. Suitable for various spray guns.

- Improved control over the painting process
- Consistent atomisation and finish quality
- Fewer pressure fluctuations during painting
- Efficient material consumption
- Easy pressure setting for reproducible results

SMART PERFORMANCE SPRAY GUN
(ART. SPSG-0.8 | SPSG-1.0 | SPSG-1.2)

Advanced spot repair spray gun for small and extremely precise spray work. The ergonomic design and anodized body ensure optimal comfort and control. Thanks to the durable stainless steel components and low-maintenance construction, it is ideal for compact precision work.

- Compact HVLP spray gun for small surfaces and detail work
- Ergonomic and lightweight design with perfect balance
- Fine atomization with adjustable spray pattern
- Parts made from 100% stainless steel with no rubber components
- Available with various Nozzle sets
- Includes 100 ml top cup
- Low air consumption and low working pressure

PERFORMANCE PRO SPRAY GUN
(ART. PSG-1.3 | PSG-1.4 | PSG-1.6 | PSG-1.8 | PSG-2.0 | PSG-2.5)

Advanced spray gun for daily professional and industrial spray work. The ergonomic design and anodized body ensure optimal comfort and control. Thanks to the durable stainless steel components and low-maintenance construction, it is ideal for high-quality 2K applications.

- Ergonomic HVLP spray gun with perfect balance
- Lightweight anodised aluminium grip
- Fine atomization with adjustable spray pattern
- Parts made from 100% stainless steel with no rubber components
- Available with various Nozzle sets
- Includes 600 ml top cup
- Efficient air consumption at low working pressure

ELITE1 SPRAY GUN (ART. E1SG-1.2 | E1SG-1.3 | E1SG-1.4 | E1SG-1.8)

Premium spray gun developed for the perfect application of modern paint systems. The combination of ergonomics, balance and a high-quality air cap ensures a consistent spray pattern and optimal efficiency. Thanks to its durable high-end construction, the spray gun requires little maintenance and has a long service life.

- High-quality HVLP spray gun with high transfer efficiency
- Ergonomic and lightweight design for comfortable working
- Consistent spray pattern for professional finishing
- Parts made from 100% stainless steel with no rubber components
- Available with different Nozzle sets
- Includes 600 ml top cup
- Low working pressure with efficient air consumption

SPRAY GUN CLEANING KIT (ART. SGCK23)

Ideal for cleaning the paint passage, inner head, needle and air cap of the spray gun
A reusable box with 22 items including brushes and various small accessories for perfect cleaning of all types of spray guns.

- Wire brush with long handle
- Straight steel brush with long handle
- Brass brush, medium size (in bottle)
- Fine brushes (in bottle)
- Fine points (in bottle)
- Hobby knife holders
- Brush with plastic handle
- Detail brushes
- Bottle of cleaning agent (excluding oil)
- Case

GRAVITY CUPS (ART. C100 | C600 | C600UV)

Gravity cup for mounting on spray guns, suitable for efficient processing of paints and coatings. Available in 100 ml and 600 ml versions, including a UV-resistant 600 ml version for UV products.

- Separate gravity cup for spray guns
- Equipped with an airtight, sealable lid
- 100 ml (ART. C100 (smart performance spray gun)) or 600 ml (ART. C600 (performance pro / Elite1 spray gun))
- Suitable for painting UV primer (ART. C600UV)

CONTENTS
100 ml (C100)
600 ml (C600 & C600UV)

MIXING CUPS

Mixing cups are used for accurately mixing paints, primers, clear coats and other coatings according to the correct mixing ratio. They ensure efficient preparation of the painting process and consistent application.

LIDS FOR MIXING CUPS (ART. GML)

Lids for an airtight seal on mixing cups. Keep the paint fresh for longer and protect against contamination and drying out.

CONTENTS	PACKAGING
400 ml (GML0400-V)	200 pieces
700 ml (GML0700-V)	200 pieces

5000 ml (GML5000)	40 pieces

MIXING CUPS (ART. GMX)

Professional mixing cup made of high-quality polypropylene, free of phthalates and silicones. Resistant to thinner and solvents, ideal for mixing paint and 2K lacquers. Featuring a stable flat bottom and stackable design.

- High-quality mixing cup for precise mixing
- Antistatic and thinner-resistant
- Clear mixing ratios and content indication
- Easy to stack and pour
- Matching sealing lids available (ART. GML)

CONTENTS	PACKAGING
400 ml (GMX0400-V)	200 pieces

MIXING CUP DISPENSERSET (ART. MXSET)

Wall dispenser set for the organized storage and easy removal of mixing cups. Ideal for paint preparation areas where efficiency and cleanliness are important. The sturdy construction protects cups against contamination and damage.

- Suitable for mixing cups from 385 ml to 2300 ml
- Wall mounting for a tidy and efficient workspace
- Easy and quick removal of cups
- Keeps mixing cups clean and protected
- Robust design for professional use

NYLON PAINT STRAINERS (ART. VF125 | VF190 | VF280)

Nylon paint strainers filter paint and primer before painting and remove dust particles and impurities. Ensures a smooth finish and prevents clogging in the spray gun.

- **BLUE AND RED** suitable for conventional and waterborne paints
- **GREEN** specially for high solid primers and undercoat materials
- High-quality nylon strainer with fine mesh
- Ensures optimal filtering of paint and primer

125 µm - Blue (VF125)
190 µm - Red (VF190)
280 µm - Green (VF280)

METAL SPRAY CARDS (ART. MSC10 | MSC20 | MSC30)

Metal spray cards for checking colour matching and paint finish. Ideal for testing paints before application on the vehicle. Available in white, grey and dark grey.

- Black coverage line for checking coverage
- Colour accuracy check before painting
- Suitable for waterborne and conventional coatings
- ø 15 mm inspection opening for colour comparison

DIMENSION
148 x 105 mm

PACKAGING
100 pieces/box

COLOUR
White (MSC10)
Grey (MSC20)

METAL SPRAY CARD HOLDER (ART. MSCH10)

Magnetic spray card holder for painting colour samples.

- Keeps hands clean when painting colour samples
- Steel version with powder coating and magnet
- Rubber handle

PIECES/ OUTER BOX
5 pieces

TOUCH-UP BOTTLE 20 ML (ART. TUB20)

Plastic bottles with screw cap and integrated brush for small-scale paint applications. Fitted with a mixing ball and suitable for water- and solvent-based paints.

- Transparent 20 ml touch-up bottle with brush cap
- Metal ball for optimal mixing of the paint
- Includes self-adhesive labels for marking
- Equipped with a funnel for easy filling

CONTENTS
20 ml

PACKAGING
100 pieces

TOUCH-UP BOTTLE 50 ML (ART. TUB50)

Plastic bottles for precisely touching up car paint. Fitted with a safety cap, integrated brush and mixing ball, suitable for water- and solvent-based paints.

- Semi-transparent 50 ml touch-up bottle with brush cap
- Plastic ball for optimal mixing of the paint
- Includes self-adhesive labels for marking

CONTENTS
50 ml

PACKAGING
60 pieces

TOUCH-UP BOTTLE + PEN 20 ML (ART. TUP20)

Touch-up pen with an ultra-fine metal tip for precisely repairing stone chip damage. Fitted with a screw cap with integrated brush.

- Suitable for quick repairs of stone chips and paint damage
- Fine needle point for small damage
- Soft touch-up brush for larger repairs
- Sealing needle prevents the paint from drying out
- Can be used horizontally and vertically
- Equipped with a stainless steel ball

CONTENTS

EQUIPMENT

Colour inspection lamps and ionizer guns are indispensable tools for a high-quality paint finish in automotive body repair. Color inspection lamps make it possible to accurately check colors and detect surface defects such as scratches, dust inclusions and color differences at an early stage under different lighting conditions.

Ionizer guns neutralise static electricity on the surface, so fewer dust particles are attracted and paint defects are significantly reduced. Together, these devices contribute to a more efficient painting process, less rework and a professional end result.

GERKO
PAINT RELATED PRODUCTS

COLOUR INSPECTION LAMP (ART. CIL03)

Colour inspection lamp for precisely checking colours, paint finish and surface defects. Simulates various lighting conditions to quickly reveal colour differences, scratches and dust inclusions. Ideal for colour matching, spot repair and quality control in the workshop.

- Rechargeable inspection lamp for color control and detection of paint irregularities
- Quick detection of irregularities
- 3 colour temperatures: 2700K, 4500K and 6500K
- Improves finish quality and prevents re-painting
- Equipped with a hook and integrated magnets
- Removable and easy-to-clean lens

COLOUR TEMPERATURES

2700K · 4500K · 6500K

IONIZER GUN (ART. IZG10)

Ionizer gun for neutralising static electricity during paintwork. Reduces dust inclusions and other paint defects for a better finish on metallic paints, clear coats and coatings. Features a directed airflow for precise work on statically charged surfaces.

- Rechargeable ionization gun with a long operating time of up to 6 hours
- Reduces dust inclusions in the paintwork
- Ensures better colour accuracy and more even coverage
- Reduces polishing and finishing times
- Light, robust and user-friendly design
- Without radioactive radiation and ATEX approved

PACKAGING

Per piece

DEGREASING

Efficient degreasing is essential for optimal paint adhesion and a flawless end result. Use a water-based degreaser for general cleaning and antistatic action, and a solvent-based degreaser for removing silicones, greases and stubborn contamination. Combine with degreasing cloths for a lint-free pickup of dirt and residue. Application is done in a controlled and even manner using a hand sprayer for maximum efficiency and ease of use.

WATER-BASED DEGREASER (ART. WD)

Universal water-based degreaser for a perfectly clean surface. Removes organic contamination such as grease, sweat and tree resin and prevents blistering on paint, primer, metal and plastic.

- Antistatic action on the surface
- Safe for rubber, plastic and paint layers
- Leaves no traces
- Suitable without masking
- Eco-friendly and biodegradable
- Efficiently removes salt and soap residue

CONTENTS

5 liter (WD05)
25 liter (WD25)

SOLVENT-BASED DEGREASER (ART. OS)

Universal solvent-based degreaser for cleaning and degreasing the surface to be sprayed. Efficiently removes dust, grease, tar and silicones. Ideal in combination with degreasing wipes.

- Powerful degreaser
- Not aggressive on sensitive paint surfaces
- Cleans the surface and removes all silicones

CONTENTS

BESTSELLER

DEGREASING CLOTHS (ART. OD10)

Degreasing cloths are lint-free and silicone-free cloths with high absorbency. They are suitable for both water-borne and solvent-borne degreasers.

- Strong degreasing cloths with high absorption capacity
- Suitable for water- and solvent-based degreasers
- For wet and dry use
- Lint- and silicone-free

DIMENSION
42 x 30 cm

PACKAGING
200 pieces

BESTSELLER

SUPERIOR PRESSURE SPRAYER (ART. HV15)

This robust and versatile pressure sprayer is designed for intensive professional use. Thanks to the 1,5 liter reservoir, the extra-wide stable base and the durable PA spray nozzle, it is ideal for daily use in the automotive body repair industry.

- 1,5 liter capacity for less refilling
- Extra wide base for maximum stability
- Wear-resistant PA (polyamide) spray nozzle
- Viton seals, resistant to solvents
- Adjustable nozzle for a precise spray pattern
- Ergonomic design for optimal comfort
- Ideal for degreasers, cleaners and silicone removers
- Premium choice for professional use

CONTENTS
1,5 liter

PRESSURE SPRAYER (ART. HV10)

Manual spray bottle for evenly misting degreasers and waterborne products. Equipped with an adjustable nozzle for efficient and controlled application.

- Manual spray bottle with adjustable nozzle
- Suitable for waterborne and mild chemical products
- Even atomization and comfortable use
- Reusable and resistant to professional use

- Coding caps can be ordered separately (ART. CC05)

CONTENTS
1 liter

ACCESSORIES
5 coding caps (CC05)

TACK RAGS (ART. TR10)

High-quality tack cloths for effectively removing dust, dirt and lint from surfaces before painting.

- Strong dust pickup thanks to woven cotton and special impregnation
- Antistatic action
- Suitable for waterborne and conventional paints
- Leaves no adhesive residue
- Lint-free and does not dry out

DIMENSION
45 x 45 cm

PACKAGING
Individually wrapped
10 pieces per box

BESTSELLER

RUFFLED TACK RAGS (ART. TR50)

High-quality tack cloths for effectively removing dust, dirt and lint from surfaces before painting. The special corrugated structure quickly absorbs both large and fine dust particles and ensures a clean, dust-free surface.

- Strong dust pickup thanks to woven cotton and special impregnation
- Antistatic action
- Suitable for waterborne and conventional paints
- Leaves no adhesive residue
- Lint-free and does not dry out

DIMENSION
80 x 90 cm

PACKAGING
Individually wrapped
50 pieces per box

WATER-BASED TACK CLOTHS (ART. TCW20)

Water-based tack cloths with a perforated structure for effectively removing dust, dirt and lint from surfaces before painting.

- Water-based tack cloth made of polyester and viscose
- Antistatic action
- Ideal for waterborne paints
- Perforated structure for optimal absorption of dust and dirt
- Suitable for small and large dust particles
- Low tack without adhesive residue

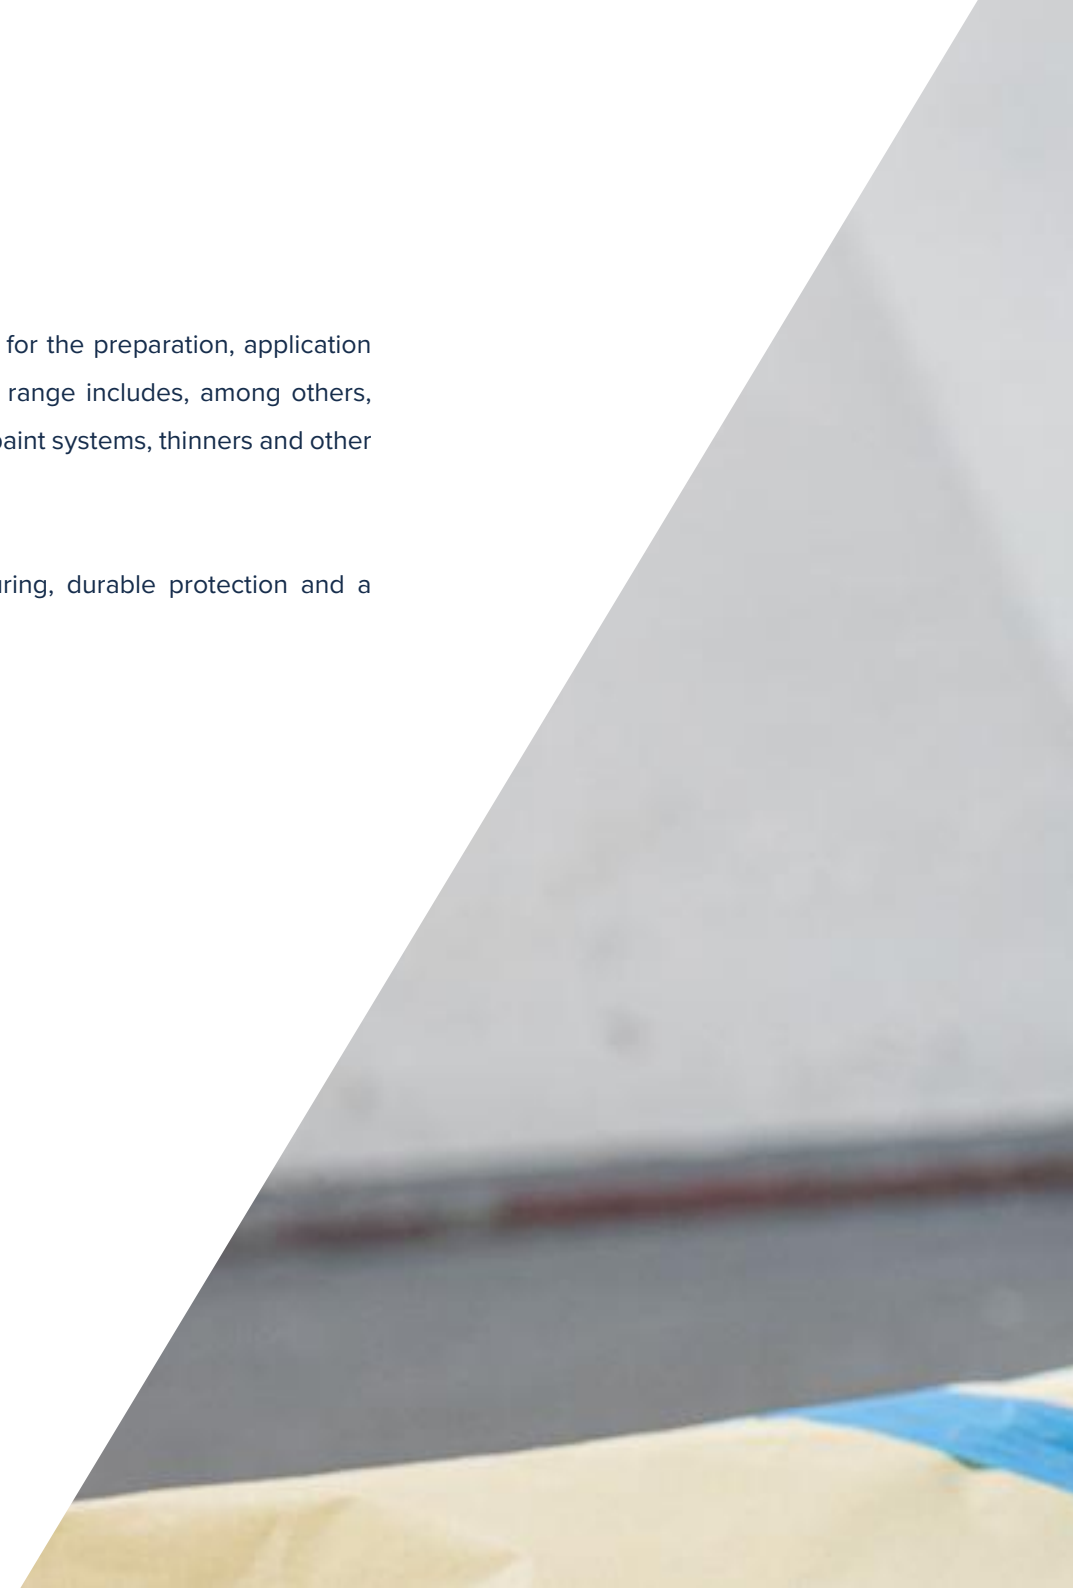
DIMENSION
43 x 31 cm

PIECES/ OUTER BOX
20 pieces packed in foil

7 PAINTING

The painting category includes products that are essential for the preparation, application and finishing of paintwork in automotive body repair. The range includes, among others, clear coats, aerosols, UV primer and UV lamps, hardeners, paint systems, thinners and other products for efficient and professional paint build-up.

These products contribute to optimal processing, fast curing, durable protection and a high-quality end result.



GERKO

CLEAR COATS

Clear coats for the automotive sector provide durable protection and a high-quality finish for painted surfaces. They offer high gloss, excellent flow and strong resistance to UV rays, weather influences, chemicals and scratches. Suitable for both spot repairs and full repaints, and developed for a professional end result with optimal durability.

2:1 MATT CLEAR COAT + HARDENER
(ART. MC10 | HMC05)

High-quality clear coat with reduced gloss level for an elegant matte finish. Specially developed for automotive body repair and resistant to weathering, UV radiation and stone chips.

- High-quality matte clear coat
- Creates a sleek matte finish
- Resistant to weather influences, UV rays and stone chips
- Durable protection for painted surfaces

CONTENTS

1 liter (Clear coat, MC10) · 0,5 liter (Hardener, HMC05)

DIAMOND CLEAR COAT 'SCRATCH RESISTANT'
(ART. CD05-1 | CD05-5)

Two-component acrylic clear coat with high solids content, high hardness and excellent gloss. Resistant to UV rays, weather conditions and stone chips. Provides perfect flow and a durable end result.

- Medium Solid clear coat with high hardness
- Excellent UV and weather resistance
- Very good resistance to stone chipping
- Durable high gloss with color-depth effect
- Compatible with solvent-based and water-based paints
- Hardener available in slow, medium and fast versions

BESTSELLER

SPEED CLEAR COAT UHS (ART. CS10-1 | CS10-5)

UHS high solid clear coat with an extremely short curing time, enabling fast polishing. Provides high gloss, excellent hardness and optimal scratch resistance.

- Extremely fast-drying
- Long open time, ideal for painting large parts
- 5 min drying time at 60 °C
- Can be used for air drying
- Significant energy savings
- High gloss level
- Excellent flow properties
- Can be diluted 0 - 5 %
- 2 full-layer system

UV CURING LAMP (ART. UVCL)

Professional UV drying lamp for fast and efficient curing of UV products such as primers, Putties, coatings and lacquers, resulting in shorter drying time and higher workshop efficiency.

- Very fast curing times
- UV-A intensity of 55 mW/cm^2 at 20 cm, suitable for UV paint products from all major manufacturers
- Produces only UV-A (395 nm) and no UV-B or UV-C
- Ultrasonic distance measurement function
- LCD control display
- Active cooling system for optimal temperature and constant light output

PACKAGING

UV drying lamp
Universal charger
Universal charging adapter
Charging station for wall mounting
UV protective glasses

1K UV PRIMER (ART. UVPF10)

UV primer is suitable for medium-sized and small repairs and enables drying times of almost 1 minute through the use of UV drying lamps, significantly shortening the total repair time.

- UV-cured 1K primer for fast and efficient repairs
- Extremely short drying time compared to 2K systems
- High film build and easy to sand
- Perfectly matched to the Gerko UV lamp
- Ideal for small and medium-sized repairs
- Increases efficiency and reduces costs

PAINT SYSTEM (ART. GPS)

Closed paint system that eliminates the need for separate mixing cups and paint strainers. Ensures faster working, less paint consumption and a cleaner painting process with minimal risk of contamination.

- Suitable for both solvent- and water-based paints
- Equipped with caps to store your paint if needed
- Includes outer cup (also available separately)
- Available in 125 and 190 micron

ACRYLIC THINNER (ART. AV)

Versatile acrylic thinner based on oxygenated and aromatic hydrocarbons. Colourless, clear and suitable for various paint applications.

- Thinner for acrylic paints and primers
- Ensures optimal application and flow
- Improves atomisation and final finish

CONTENTS

1 liter (AV01, AV01-S)
5 liter (AV05, AV05-S)
25 liter (AV25)

VERSION

Normal
Slow (AV01-S, AV05-S)

FADE OUT THINNER (ART. FOT01)

A specially developed flow-out solvent that softens the transition between existing and newly applied clear coat, for an invisible repair.

- Painting thinner for use with a spray gun
- Ensures a smooth transition between old and new paint layers
- Effect immediately visible and verifiable
- Creates soft transition zones
- Minimal polishing work required
- Compatible with virtually all high-quality clear coats

CONTENTS

1 liter

FADE OUT THINNER (ART. AS140)

Blend of organic solvents for blending transitions between old and new layers of acrylic lacquer. Ensures a smooth transition and an even final result.

- Efficient solution for SMART repairs without a spray gun
- Ensures a smooth transition between old and new paint layers
- Effect immediately visible and verifiable
- Creates soft transition zones
- Minimal polishing work required
- Compatible with virtually all high-quality clear coats

CONTENTS

500 ml

2K HS PRIMER + HARDENER (ART. PF | HPF)

Two-component high-build primer with excellent adhesion on steel, galvanised steel and aluminium. Characterised by good sandability, fast drying and versatile applications such as high-build, primer and wet-on-wet.

- Very high solids content
- Fast-drying with short recoat times
- Easy to sand
- Suitable for wet-on-wet applications
- Ensures efficient and fast repairs
- 4/1 ratio
- Can be used as a high build primer, primer or wet-on-wet depending on the amount of thinner

2K HS EXPRESS PRIMER + HARDENER (ART. PX | HPX)

High-build acrylic primer with extremely fast drying for efficient surface preparation. Offers excellent adhesion, good filling of minor imperfections and is available in various mixable colors for optimal matching to the topcoat.

- Innovative primer with high build capacity
- Extremely fast drying time
- Excellent adhesion on various substrates
- High efficiency and fast processing
- Easy to finish further after drying
- 4/1 ratio

1K EXPRESS PRIMER (ART. EPG35)

One-component primer with high filling power, active corrosion protection and excellent adhesion on steel, aluminum, zinc and various paintable plastics.

- 1K fast-drying primer with high filling power
- Active corrosion protection
- Excellent adhesion on steel, aluminium, zinc and plastics
- Suitable as primer and putty
- Overcoatable with solvent- and water-borne paints

CONTENTS
3,5 liter

1:1 EPOXY PRIMER + HARDENER (ART. EP750 | EH375)

Two-component epoxy primer with excellent corrosion protection for metal substrates. Offers strong adhesion, high chemical resistance and a durable base for further paint build-up.

- Can be applied wet-on-wet
- High corrosion resistance
- Excellent sandability
- Simple 1:1 mixing ratio
- Overcoatable with 2K paints and polyester putty
- Fast drying time

CONTENTS
800 ml

COLOUR
Grey

1K PLASTIC PRIMER (ART. PP10)

One-component colorless primer for plastic body parts, to be applied with a brush or spray gun. Ensures optimal adhesion of the topcoat to plastic surfaces.

- 1K clear plastic primer
- To be applied with a brush or spray gun
- Ensures optimal adhesion on plastic parts
- Improves adhesion of the topcoat
- Suitable for plastic body panels

CONTENTS
1 liter

AEROSOLS

Aerosols are used within automotive body repair for restoring, protecting and finishing parts quickly and efficiently. Products such as bumper texture spray, anti gravel, primers and various paint finishes ensure correct surface preparation, protection against external influences and a professional end result.

They are used to build up structure, fill small imperfections, improve adhesion and create the desired final finish in high gloss, matte or satin.

SUPERIOR PRIMER (ART. SAS)

Fast-drying elastic primer with high fill and excellent adhesion to plastic, metal and existing paint layers. Provides a smooth spray finish and can be overcoated with all common paint systems.

- High-build and fast-drying primer
- Excellent adhesion and sandability
- Anti-corrosion protection with zinc phosphate
- To be applied directly on bare metal
- Petrol-resistant and overpaintable
- Suitable for almost all plastics

CONTENTS
500 ml

PRIMER FILLER (ART. AS)

Primer spray for filling surface defects such as sanding marks and small stone chip damage. Can also be used for extra film thickness and increased corrosion resistance.

- Fast-drying hard and flexible primer
- Excellent adhesion and sandability
- Anti-corrosion protection with zinc phosphate
- To be applied directly on bare metal
- Petrol-resistant and overpaintable with modern paints

CONTENTS
400 ml

PLASTIC PRIMER (ART. AS050)

Professional plastic primer for significantly improved adhesion on most common plastics. Fast-drying formula, ideal for plastic repair, bonding and painting applications.

- Universally applicable
- Effective adhesion promoter
- Fast-drying and quickly recoatable
- Recoatable after 10 minutes
- Ideal for building up repairs

CONTENTS
500 ml

COLOUR
Transparent

ETCH PRIMER (ART. AS060)

Fast-drying etch primer with excellent adhesion to aluminum, stainless steel and galvanized sheet. Provides a smooth, non-porous finish suitable for any topcoat.

- Excellent etching and corrosion-inhibiting action
- Fast-drying and flexible primer
- Can be applied directly to bare metal
- Ensures a super-smooth finish
- Petrol-resistant and widely overpaintable

CONTENTS
500 ml

COLOUR
Grey

HIGH-GLOSS BLACK
(ART. AS080)

High-gloss black paint for decorative applications on cars and motorcycles.
Ideal for contrast parts and partial paintwork.

- High-gloss paint in deep black color
- Fast-drying with excellent coverage
- Good adhesion on various substrates
- Ensures a smooth finish
- Resistant to chemicals and weather influences

CONTENTS
500 ml

SEMI-GLOSS BLACK
(ART. AS090)

Black satin-gloss paint for decorative applications on cars and motorcycles.
Ideal for contrast parts and partial paintwork.

- Satin lacquer in deep black
- Fast-drying with excellent coverage
- Good adhesion on various substrates
- Ensures a smooth finish
- Resistant to chemicals and weather influences

CONTENTS
500 ml

MATT BLACK
(ART. AS100)

Matt black paint for decorative applications on cars and motorcycles.
Ideal for contrast parts and partial paintwork.

- Fast-drying paint with excellent coverage
- Good adhesion on various substrates
- Ensures a smooth finish
- Resistant to chemicals and weather influences

CONTENTS
500 ml

ANTI GRAVEL
(ART. AS110 | AS120)

Overcoatable stone chip coating for protecting sills and spoilers. Forms a durable, elastic layer against stone chips, moisture and rust.

- Elastic and textured protective coating
- Protects against rust and stone chips
- Sound-dampening properties
- Fast-drying and drip-free application
- Good adhesion on various substrates
- Overcoatable with all paint systems

CONTENTS
500 ml

COLOURS
Black (AS110)
Grey (AS120)

WHEELSPRAY (ART. AS130)

Glossy silver-colored spray paint for quick and easy wheel repair. Provides an even finish with a durable result.

- Fast-drying, good adhesion
- Glossy, good flexibility, good hardness
- Excellent UV protection
- Good outdoor durability
- Non-yellowing

CONTENTS
500 ml

BUMPER SPRAY STRUCTURANT
(ART. AS150 | AS160)

Structure coating for restoring the original texture on bumpers and plastic parts. Fast-drying and adheres directly to plastic, recoatable with common paint systems.

- Flexible structure coating for plastic and bumpers
- Restores the original texture of plastic parts
- Can be applied directly without plastic primer
- Overcoatable with all common paint systems
- Ideal for plastic repairs

CONTENTS
500 ml

COLOURS
Black (AS150)
Grey (AS160)

ZINC SPRAY (ART. AS170)

High-quality zinc spray for durable protection of metal surfaces against rust and corrosion. Ideal for automotive repairs and industrial applications where reliable metal protection is required.

- Zinc spray with 90% zinc content
- Corrosion-resistant and heat-resistant up to 300°C
- Can be applied to rusty surfaces
- Suitable as a weld primer and for spot welding
- Overcoatable after drying

CONTENTS
500 ml

BESTSELLER

PREFILL SOLVENT
(ART. AS210 | AS220 | AS230)

Pre-filled spray cans with propellant gas and solvents for easily filling with your own paint. Ideal for color matching and small repair work.

- Pre-filled spray can for small paint repairs
- Ideal as an alternative to the spray gun
- Suitable for acrylic, alkyd and cellulose paints
- Fillable with a maximum of 100 ml of paint
- Not suitable for most waterborne basecoats
- Fillon technology cap integrated (ART. AS230)

CONTENTS
400 ml (AS210, AS230)

ACCESSORY
Fillon technology cap (AS220)

SOLVENT

PREFILL WATER-BASED
(ART. AS250)

Pre-filled spray cans with propellant gas and solvents for easily filling with your own paint. Ideal for color matching and small repair work.

- Pre-filled spray can for small paint repairs
- Ideal as an alternative to the spray gun
- Suitable for waterborne paints
- Fillable with up to 100 ml of paint
- Integrated fillon technology cap

CONTENTS
400 ml

WATER

CLEAR COAT 1K (ART. AS300)

High-quality 1K clear coat with a crystal-clear finish for water- and solvent-based basecoats. Provides a durable protective layer and is ideal for smart repairs.

- Ultra-glossy finish with long-lasting gloss retention
- Fast-drying 1K paint with high build
- UV and petrol resistant
- Ideal for application at a distance of 25 cm
- Best result with 2 full coats and 10 min flash-off time

CONTENTS
500 ml

CLEAR COAT 2K (ART. AS400)

Fast-drying 2K clear coat for clear-over-base applications with excellent flow and durability. Resistant to weather influences, chemicals, mechanical stress and fuel.

- 2K clear coat with deep high gloss
- Ideal for SMART repair
- Two full coats for a spray-gun quality result
- Extremely scratch-resistant
- UV, chemical and weather resistant

CONTENTS
400 ml

ANTI GRAVEL (ART. AG)

Anti-chip coating with sound-deadening properties, protecting bodywork parts against stone chips, moisture, salt and oil. Forms a durable, elastic coating and can be overpainted with all common topcoat systems.

- Protects against stone chips, water, salt and oil
- Forms an elastic, fine-grained coating
- Sound-dampening properties
- Ideal for sills, wheel arches and spoilers
- Overcoatable after 3–4 hours
- Suitable for various substrates and paint systems

CONTENTS
1 liter

COLOUR
Black (AG100)

UNDERBODY COATING (ART. UBC100)

Underbody Coating protects the underside of vehicles against rust, stone chips and weather influences. Forms a wear-resistant and sound-dampening protective layer.

- Bitumen coating for protection of vehicle underbodies
- Protects against rust, stone chips and weather influences
- Sound-dampening properties
- Extremely high wear resistance
- Suitable for all vehicle types

CONTENTS
1 kg

COLOUR
Black

UNDERCOATING GUN (ART. USG10)

Spray gun for applying truck bedliner coatings and other 1K and 2K sprayable protective coatings. Ensures an even and professional application.

- Housing made of cast aluminium alloy
- Nickel-plated trigger handle with comfortable grip
- Robust and durable construction
- Suitable for 1L cans of anti-chip and underbody coating

PACKAGING
Per piece

1K BUMPER PAINT (ART. TBP10)

One-component texture coating for repairing and painting bumpers and other plastic parts. Adheres directly to various plastics, is fast-drying and resistant to weather conditions and temperatures up to 70 °C.

- Strong adhesion to various plastics
- Fast-drying and easy to process
- Durable, weather- and temperature-resistant finish
- Ensures an original texture and even finish

CONTENTS
1 liter

COLOUR
Black

NITRO MATT BLACK (ART. NMB10)

Fast-drying nitro-combination paint with a deep black, uniform matte finish. Ideal for applications requiring a durable, wear-resistant coating and fast processing.

- Fast-drying nitro-combination paint
- Deep black matte finish
- High hardness and excellent scratch resistance
- UV and weather resistant
- Heat-resistant up to 120°C
- Quick to recoat and process

CONTENTS
1 liter

BASECOAT 1K RAL9005 (ART. GB9005)

Basecoat for painting automotive bodywork with fast air-drying and no chemical curing. Must be finished with a clear coat for durable protection and gloss.

- 2:1 mixing ratio
- Air-drying
- To be finished with clear coat
- No chemical curing required

CONTENTS
1 liter

2K ACCELERATOR (ART. AA05)

Professional accelerator that speeds up the curing and drying of 2K polyurethane and acrylic products. To be added to the mixture for faster processing without loss of quality when used correctly.

- Accelerates curing and drying of 2K PU and acrylic products
- Addition of 1–2% of the total mixing weight
- Suitable for paint and hardener
- Faster processing without loss of quality when used correctly

POLISHERS

Our professional polishers have been developed for the quick and efficient restoration and finishing of car paintwork. The range includes both electric and battery-powered models, available in centric (rotary) and eccentric versions. This means you can find the right machine for every polishing application, offering the ideal combination of power, control and ease of use.

DESCRIPTION	DIMENSION	ROTATIONAL SPEED (RPM)	WATTAGE	SANDING ORBIT	PAGE
Electric polishing machine centric (CPM10)	ø 120	1.000 - 3.000 rpm	1200 Watt	-	110
Electric polishing machine eccentric (EPM10)	ø 125	1.650 - 4.800 rpm	810 Watt	15 mm	110
Polishing machine with battery centric BACPM05)	ø 125	500 - 3.000 rpm	18 V	-	111
Polishing machine with battery eccentric (BAEPM05)	ø 125	2.000 - 5.000 rpm	18 V	15 mm	111
Mini polishing machine with battery centric/ eccentric (BACPM01)	ø 75	2.500 - 5.000 rpm	12 V	-	111

GERKO
PAINT RELATED PRODUCTS

ELECTRIC POLISHING MACHINE (ART. CPM10)

Powerful electric rotary polisher for professional polishing of painted surfaces. Provides a high-gloss finish and efficient removal of scratches. Ideal for use in vehicle body repair and detailing.

- Powerful 1200 W electric polisher
- 5 m cable for optimal freedom of movement
- Includes 120 mm backing pad and extra carbon brushes
- Lightweight design of ± 3 kg

VERSION
Centric

PACKAGING
Per piece

ELECTRIC POLISHING MACHINE ECCENTRIC (ART. EPM10)

Electric orbital polishing machine for a hologram-free and even polishing result. The orbital motion reduces the risk of overheating and paint damage, ideal for both correction work and fine finishing.

- Electric polishing machine with 15 mm orbit
- 5 m cable for optimal freedom of movement
- Variable speed from 1650 – 4800 rpm
- Includes 125 mm backing pad and extra carbon brushes
- Lightweight design of ± 3 kg

VERSION
Eccentric

PACKAGING
Per piece

CORDLESS POLISHER CENTRIC
(ART. BACPM05)

Battery-powered rotary polisher for the professional polishing, waxing and correction of paint surfaces. Equipped with a powerful brushless motor, adjustable speed and 125 mm backing pad. The rotary action ensures a high degree of paint correction.

- Cordless polisher with powerful brushless motor
- Variable speed display via LCD screen
- Spindle lock for quick pad changes
- Ergonomic design with comfortable soft grip
- Includes 2 batteries and 1 charger

VERSION	PACKAGING
Centric	Per piece

CORDLESS POLISHER ECCENTRIC
(ART. BAEPM05)

Battery-powered random orbital polisher for the professional polishing of painted surfaces. Equipped with a powerful brushless motor, adjustable speed and 125 mm backing pad. The random orbital action ensures a hologram-free result.

- Cordless polisher with powerful brushless motor
- 15 mm orbit for high efficiency and optimal polishing results
- LCD screen with real-time speed display
- Spindle lock for quick pad changes
- Ergonomic design with comfortable soft grip
- Includes 2 batteries and 1 charger

VERSION	PACKAGING
Eccentric	Per piece

MINI POLISHER WITH BATTERY
(ART. BACPM01)

Compact mini polishing machine for polishing small surfaces and hard-to-reach places. Equipped with a powerful Li-ion battery for cordless and professional use on various paint surfaces. Can be used both centric and eccentric for a versatile finish.

- Mini polisher with powerful brushless motor
- Ideal for hard-to-reach places
- Suitable for both rotary and random orbital polishing
- Spindle lock for quick pad changes
- Ergonomic design for optimal user comfort
- Includes 2 batteries, charger and 2 pads of 75 mm

VERSION	PACKAGING
Centric/eccentric	Per piece

POLISHING

Professional polishing products for every step of the polishing process, from correction to high-gloss finish. The range includes foam pads in various hardnesses and finishes such as smooth and waffle pads, combined with polishing pastes for both advanced cut and anti-hologram applications. Complemented with high-quality microfiber and polishing cloths for a perfect and streak-free final result.

ADVANCED CUT FOAM PAD (ART. POL90)

Advanced Cut foam pad for powerful paint correction and removing deeper scratches, oxidation and sanding marks. Provides a high cutting capacity with efficient, even processing of the surface.

- Specially developed for use with Gerko Advanced Cut polishing paste (ART. POL130)
- Quickly removes scratches and paint defects
- Ensures an optimal and time-saving polishing result

DIMENSION
ø 150 - 20 mm

PACKAGING
2 pieces

BESTSELLER

ADVANCED CUT POLISHING PASTE
(ART. POL130)

Powerful compound for removing sanding marks and usage marks on painted surfaces. Effectively removes sanding scratches up to grit P1500 and combines high cutting power with an excellent level of gloss. Suitable for all paint types.

- Polishes and creates high gloss in one step
- Heavy cut, medium cut and finish in one product
- Time-saving and highly efficient 1-step polishing process
- Water-based, silicone- and solvent-free
- Low dust formation and easy to clean
- Ideal in combination with the Gerko Advanced cut foam pad (ART. POL90)

CONTENTS	PIECES/ OUTER BOX
1 kg	10 pieces

ANTI-HOLOGRAM FOAM PAD
(ART. POL100)

Anti-hologram foam pad for fine finishing and removing holograms, light haze and micro-scratches. Combined with a fine polish, it ensures an even, high-gloss end result.

- Specially developed for use with Gerko Anti-Hologram polishing paste (ART. POL140)
- Ensures an optimal high-gloss finish
- Ensures a smooth, hologram-free final result

DIMENSION	PACKAGING
ø 150 - 20 mm	2 pieces

ANTI-HOLOGRAM POLISHING PASTE
(ART. POL140)

Fine polishing paste for permanently removing holograms, light scratches and sanding marks up to grit P3000. Provides a deep high-gloss finish without masking the surface. Easy to apply, economical in use and suitable for all paint systems.

- Effectively removes holograms and micro-scratches
- Ensures a high-gloss final result
- Water-based, silicone- and solvent-free
- Low dust formation and easy to clean
- Ideal in combination with the Gerko Anti-Hologram foam pad (ART. POL100)

CONTENTS	PIECES/ OUTER BOX
1 liter	10 pieces

ORANGE FOAM PAD (ART. POL10 | POL50)

Orange foam polishing pad for correcting coarser to medium paint defects. Suitable for removing swirl marks, light scratches and oxidation on painted surfaces. Combined with a polishing compound, it delivers an even, glossy final result.

- Suitable for coarser polishing and correction work
- Open structure for optimal control and performance
- Ensures an even and professional final finish
- Widely usable in various polishing steps

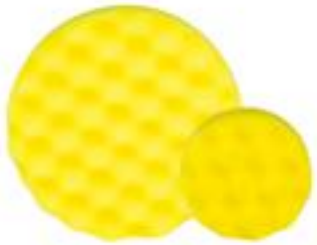
DIMENSION	PACKAGING
ø 150 - 30 mm (POL10)	2 pieces
ø 80 - 25 mm (POL50)	5 pieces

GREEN FOAM PAD (ART. POL20 | POL60)

Green foam polishing pad for medium polishing work and refining paint surfaces. Suitable for removing light haze, micro-scratches and holograms. Combined with a fine polish, it delivers a deep, glossy and even final result.

- Ideal for polishing dull and weathered paint
- Removes medium and small scratches and refines the surface
- Increases gloss and depth in the paint
- Open structure for controlled, smooth working
- Ensures an even final finish

DIMENSION	PACKAGING
ø 150 - 30 mm (POL20)	2 pieces
ø 80 - 25 mm (POL60)	5 pieces



YELLOW FOAM PAD (ART. POL30 | POL70)

Yellow waffled foam polishing pad for more intensive polishing work and correcting visible paint defects. The waffled structure reduces heat build-up and ensures even processing. Suitable for removing swirls, scratches and oxidation.

- Ensures a high gloss and mirror-like final finish
- Waffle foam structure for optimal heat control
- Removes light scratches and oxidation
- Supports even distribution of polish
- Suitable for gloss optimization and controlled paint correction

DIMENSION	PACKAGING
ø 150 - 30 mm (POL30)	2 pieces
ø 80 - 25 mm (POL70)	5 pieces

BLACK FOAM PAD (ART. POL40 | POL80)

Black waffle-textured foam polishing pad for fine finishing and bringing painted surfaces to a high gloss. The soft waffle structure limits heat build-up and ensures even application. Ideal for removing light holograms and fine imperfections.

- Soft foam pad for removing holograms
- Ensures a deep high gloss and mirror-like finish
- Waffle structure reduces heat build-up during polishing
- Ideal for finishing with fine polish
- Refines the surface without aggressive correction
- Ensures a smooth and even final result

DIMENSION	PACKAGING
ø 150 - 30 mm (POL40)	2 pieces
ø 80 - 25 mm (POL80)	5 pieces

SUPERIOR MICROFIBER CLOTH (ART. SMC40)

High-quality microfibre cloth with extra-long fibres for absorbing polishing compounds, polish and wax. The ultrasonically cut edge helps prevent scratches on sensitive surfaces, while the cloth efficiently attracts and retains dust and dirt.

- High-quality microfibre cloth, 550 g/m^2
- 80% polyester / 20% polyamide
- Ultrasonically cut edges for scratch-free use
- Ideal for removing polish residue and cleaning interior/ exterior
- Ensures a high gloss and attracts dust and dirt

DIMENSION	PACKAGING
40 x 40 cm	3 pieces

POLISHING CLOTHS (ART. PD10)

Silicone-free polishing cloths with a soft texture for use in and around the spray booth. Suitable for cleaning painted and plastic parts, as well as removing polishing residue, dust and fingerprints without scratching.

- Silicone-free and suitable for paint preparation
- Soft, low-lint structure for scratch-free cleaning
- Suitable for degreasing and removing polish residue
- Removes dust, fingerprints and stains
- Also suitable for interior cleaning

DIMENSION	PACKAGING
32 x 36 cm	400 pieces

MULTI FOAM CLEANER (ART. MFC750)

Multifunctional foam cleaner for cleaning soft and hard surfaces, both indoors and outdoors. Leaves a fresh scent and ensures a stain- and residue-free finish. Silicone-free and safe to use on most surfaces.

- Powerful foam cleaner for various surfaces
- Effectively removes dirt, grease and stains
- Suitable for interior, plastic, glass and paintwork
- Fast-drying and easy to use
- Leaves a streak-free result

CONTENTS	PIECES/ OUTER BOX
750 ml	12 pieces

CLEANING PAPER (ART. PB30 | PW20)

Versatile 2-ply (white) and 3-ply (blue) cleaning paper with high absorbency for fast and efficient cleaning. Ideal for controlled preparation and maintenance without reusing cloths.

- Strong and highly absorbent wiping paper
- Suitable for water, oil, grease and dirt
- Low-lint and tear-resistant
- Ideal for daily and intensive cleaning tasks
- Available in 2-ply and 3-ply versions

DIMENSION	PACKAGING
38 x 37 cm - blue (PB30)	500 pieces
38 x 28 cm - white (PW20)	1000 pieces

CLEANING CLOTHS (ART. RD10 | RD20)

Cleaning cloths with high absorbency and a soft structure for comfortable use. Ideal for degreasing and cleaning with solvents, oil and other contamination in the workshop and bodywork.

- Low linting and soft in use
- High absorption of water, oil and solvents
- Usable wet and dry
- Silicone-free and solvent-resistant
- Chamois effect with absorption up to 8x its own weight

DIMENSION	PACKAGING
38 x 32 cm on a roll (RD10)	500 pieces
42 x 40 cm on sheet (RD20)	12 packs x 35 pieces

CELLULOSE THINNER
(ART. CT01 | CT05 | CT25)

Powerful thinner for diluting cellulose paint and cleaning spray guns, brushes and tools. Suitable for removing paint, glue and other stubborn residues.

- Specially developed for cleaning paint spray guns
- Compatible with manual and automatic gun cleaners
- Ensures fast and thorough cleaning

CONTENTS
1 liter (CT01)
5 liter (CT05)
25 liter (CT25)

SOLVENT

PREMIUM CELLULOSE THINNER
(ART. PCT24)

Professional cellulose thinner for diluting cellulose paint and cleaning spray guns, paint brushes and tools. Suitable for removing glue and paint residue. Based on aromatics and ketones.

- 100% pure cellulose thinner
- Suitable for thinning paint and coatings
- Ideal for cleaning guns and tools
- Effectively removes adhesive residue
- Helps reduce orange peel

CONTENTS
24 liter

H^2O GUN SHAMPOO (ART. GS20)

Water-based cleaning shampoo for automatic and manual cleaning of spray guns used with waterborne paints. Ensures low consumption, strong waste reduction and cost-efficient operation. Coagulable up to 10 times and environmentally friendly without compromising on cleaning performance.

- Specially developed for cleaning guns used with waterborne paints
- No coagulation required
- Suitable for manual and automatic gun cleaners
- Ensures fast and efficient cleaning within 5 minutes

CONTENTS
20 liter

WATER

HEADLAMP RESTAURATION KIT (ART. HRK600 | HRP600)

Headlight repair kit for professionally restoring and refreshing weathered, yellowed or dull plastic headlights. Helps restore the clarity and original appearance of the headlight. Suitable for bodyshops, detailing and garage workshops.

- Restores dull, yellowed and oxidized headlights
- Removes light scratches and restores clarity
- Easy and quick to apply
- Protects against UV radiation
- Extends the service life of headlights and can be used preventively

- Refill headlamp restauration polymer 600 ml also available separately (ART. HRP600)

1. **DEGREASING** Clean the headlight with Gerko degreaser and dry with Gerko degreasing wipes.
2. **MASKING** Use masking tape to protect nearby painted surfaces.
3. **SANDING AND CLEANING** Sand with Gerko sanding discs. Follow the steps below: P320/P500/P800/P1000/P1200/P1500. Clean the surface to ensure the entire headlight is sanded evenly.
4. **ADD POLYMER** Add headlight restoration polymer up to half of the evaporator and cover with the cap.
5. **CONNECTING AND HEATING** Connect the cup and heat for approximately 5 minutes until steam comes out of the cap.
6. **EVAPORATE** Start evaporating at 1 cm distance from the headlight, applying from the bottle towards the top until the headlight becomes clear. Make sure the nozzle opening is pointed upwards to prevent steam from turning into water droplets. Keep your face at least 40 cm away from the nozzle opening.
7. **SWITCH OFF AND COOL** Switch off after use. Wait 5 minutes for the polymer to cool down, then pour the remaining liquid back into the bottle.

CONTENTS

1 x headlight repair fluid
1 x spray cup
1 x hose spray cap
1 x curved spray cap
2 x sealing ring
1 x 200 cm power cord

PACKAGING

Per piece

PAINT TOUCH-UP STICKS (ART. PTUS10 | PTUS15 | PTUS20)

Paint touch-up sticks for retouching small paint damage. Available in 3 different thicknesses.

- 100 touch-up sticks in a convenient dust-free dispenser tube
- Ideal for small paint repairs and touch-ups
- Suitable for basecoat, clear coat and primer
- Lint-free, non-absorbent tip for precise work
- Also suitable for cleaning small parts and removing dust

VERSION

Very fine - 1,0 mm (PTUS10)
Fine - 1,5 mm (PTUS15)
Regular - 2,0 mm (PTUS20)

PACKAGING

100 pieces

DUST NOZZLE SET (ART. DNS10 | RDN10)

Dust nozzle set for precisely removing dust inclusions and small imperfections in painted surfaces. The fine needle tips allow local corrections without damaging the surrounding paint surface. Ideal before polishing the surface.

- Dust nozzle set with pen holder and 10 dust needles
- Microscopic hooks remove dust without damage
- Ideal for removing dust particles from wet paint
- The paint flows and seals itself automatically due to surface tension
- Packed in convenient blister packaging

- Refill set dust needles 10 pieces in blister pack also available separately (ART. RDN10)

CONTENTS

1 set of dust needle refills
1 x aluminium pen for dust removal
1 x pencil box

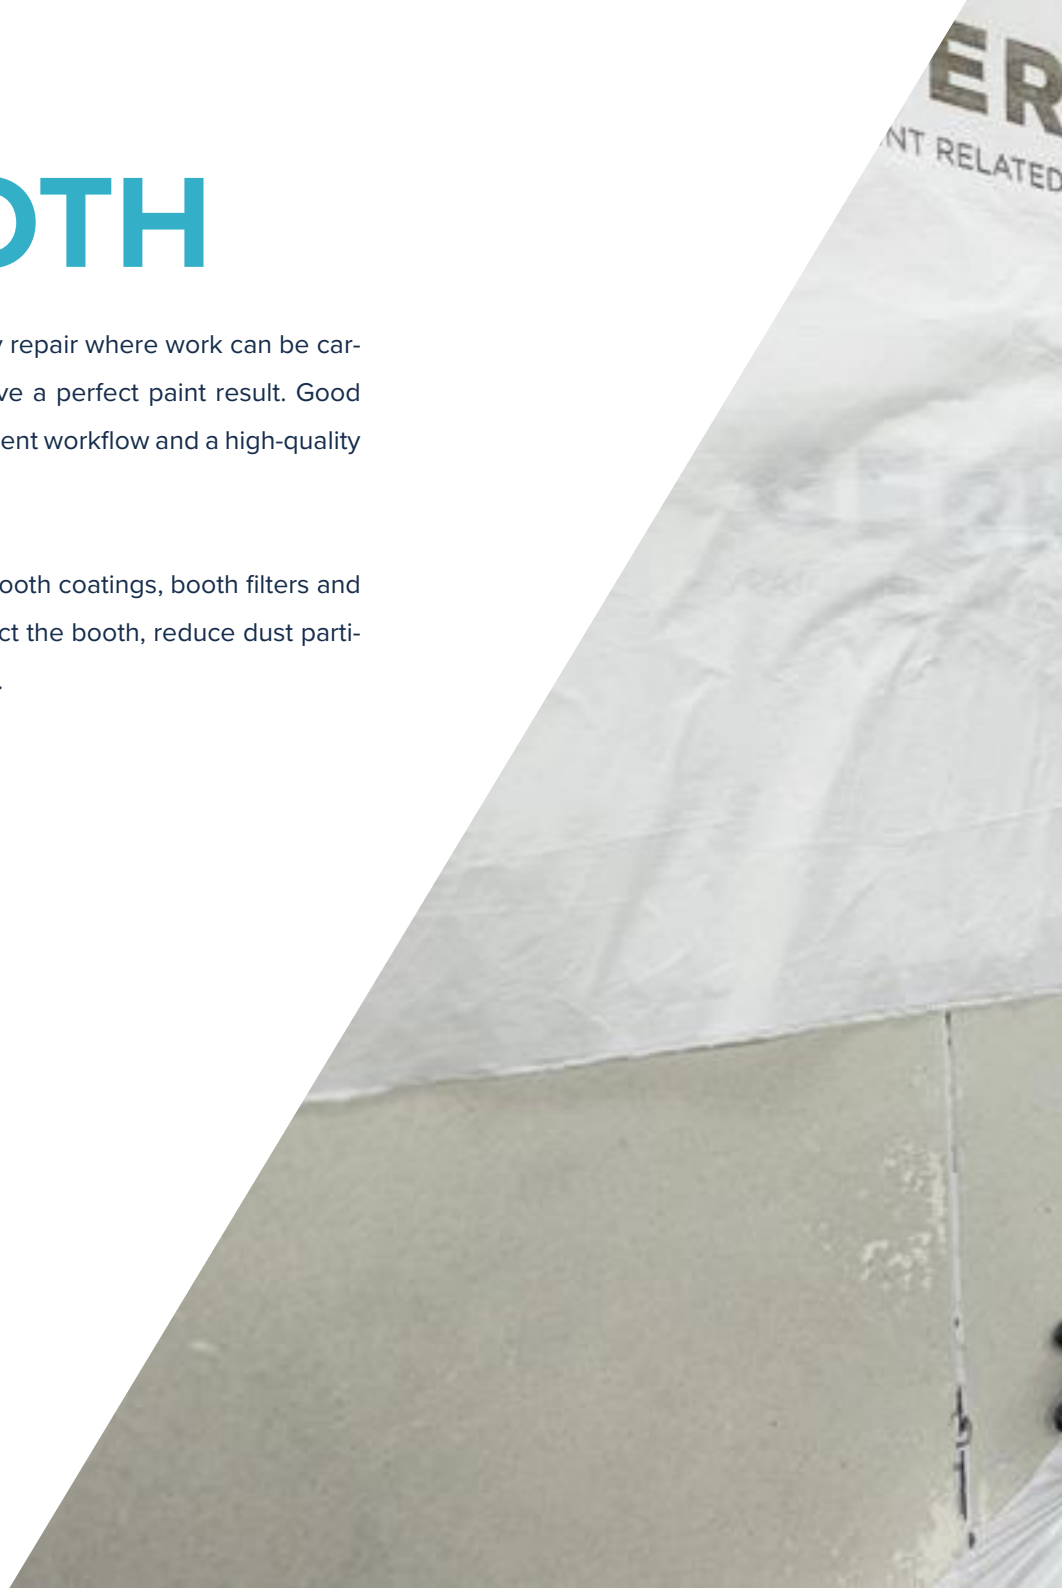
PACKAGING

Per piece

SPRAY BOOTH

The spray booth is a crucial environment in automotive body repair where work can be carried out dust-free and under controlled conditions to achieve a perfect paint result. Good preparation and protection of the booth contribute to an efficient workflow and a high-quality finish.

Within this category you will find products such as trestles, booth coatings, booth filters and masking film for the spray booth. These products help protect the booth, reduce dust particles and optimally position parts during the painting process.



GERKO
PAINT RELATED PRODUCTS

TRESTLES

Professional trestles and stands for safely positioning parts during painting and preparation work. The range includes butterfly trestles, X-trestles, portal rotating panel stand, telescopic universal stands and rim holders for an efficient and stable working position.

WHEEL RIM HOLDER (ART. WRH)

TELESCOPIC UNIVERSAL STAND (ART. TUS10)

Telescopic universal stand for stable support of body parts during preparation, painting and drying. Height-adjustable and suitable for various parts and applications in automotive body repair.

- Ideal for car windows and panel repairs
- Easy to move around the workshop
- Vertically and horizontally adjustable
- Rubber cover plates protect parts during repair
- Ensures comfortable and efficient working

PACKAGING
Per piece

BUTTERFLY TRESTLE (ART. PS10)

Robust butterfly trestle with PU foam protection for supporting doors, wings, bonnets and bumpers. Ideal for preparation work, sanding and painting without damaging the surface.

- Foldable trestle with adjustable height and width
- Equipped with 2 chains for easy adjustment
- Extra bar for stable attachment of the feet
- High quality and durability

PACKAGING
Per piece

X-TRESTLE (ART. PS20)

Adjustable X-stand for supporting and storing bumpers during preparation and painting work. Thanks to the extendable arms, suitable for various bumper types and sizes.

- Universal trestle with adjustable height
- Includes bumper supports
- Foldable for easy storage
- Sturdy K/D construction

PACKAGING
Per piece

PORTAL ROTATING PANEL STAND (ART. PS30)

Rotating gantry stand for supporting doors, bonnets, bumpers and other body parts. Equipped with adjustable and rotatable supports for flexible positioning during preparation and painting work.

- Mobile panel stand with rotating and lockable central axis
- Adjustable to different working angles
- Includes extensions for mounting 2 doors
- Sturdy construction and easy to move

PACKAGING
Per piece

SPRAY BOOTH CEILING FILTER (ART. CF)

Premium ceiling filter with progressive build-up for professional filtration in spray booths. Ensures high filtration efficiency and stable dust particle capture thanks to the treated synthetic fibers with durable adhesive strength.

- High-quality filter material made of break-resistant synthetic fibers
- Ensures even air distribution and filtration
- Essential for a dust-free and flawless paint process
- Filter class EN779 / UL900: M5-M6
- Thickness: 25 mm – 600 g/m^2
- Initial resistance: 25 Pa / final resistance: 400 Pa

DIMENSION

0,5 m x 20 m (CF50
1 m x 20 m (CF100)
1,5 m x 20 m (CF150)
2 m x 20 m (CF200)
Price per m^2 (CF)

Per piece

PAINTSTOP FILTERS (ART. PTS)

High-quality Paintstop filter for efficiently capturing overspray and dust in spray booths. The progressive fiberglass structure ensures high capture capacity, low pressure drop and a long service life. Made of non-flammable material and suitable for professional use.

- High capture capacity for overspray and dust
- Prevents rapid clogging of the ventilation system
- Average mist capture efficiency of 93 – 97 %
- Temperature-resistant up to 170 °C
- Compliant with DIN53438-F1 standard
- Thickness of 76 mm, rolls of 20 m

DIMENSION

0,5 m x 20 m (PTS50)
0,6 m x 20 m (PTS60)
0,7 m x 20 m (PTS70)
0,76 m x 20 m (PTS76)
0,8 m x 20 m (PTS80)
0,9 m x 20 m (PTS90)
1 m x 20 m (PTS100)
1,2 m x 20 m (PTS120)
1,5 m x 20 m (PTS150)
2 m x 20 m (PTS200)

PACKAGING

Per piece

SPRAY BOOTH MASKING FILM 4 IN 1 (ART. SBMF4)

Keep your spray booth clean for longer with this innovative 4-in-1 masking film. Thanks to its four protective layers, a single application provides long-lasting protection against paint mist and overspray.

- 4 protective layers for 4x longer protection
- Protects spray booth walls against overspray and paint mist
- Can be applied by one person in just 10 minutes
- High-quality masking tape, heat-resistant up to 140°C
- Electrostatic for easy placement and dust binding
- Corona treatment for optimal paint adhesion
- Pre-cut layers for quick and tear-free removal
- Less maintenance, less downtime and lower labour costs

DIMENSION

2,40 m x 18 m

PACKAGING

Per piece

CABINE COATING PRO (ART. CCP05 | CCP25)

Transparent, temporary and washable adhesive coating for protecting spray booth walls against overspray. Ensures a clean working environment and helps limit contamination in the booth.

- Binds airborne dust particles thanks to its adhesive properties
- Contaminated coating easily removed with warm water
- Biodegradable and silicone-free
- Temperature-resistant up to 65 °C

CONTENTS
5 liter (CCP05)
25 liter (CCP25)

PACKAGING
Per piece

DUST CONTROL (ART. DC05 | DC10 | DC25)

Transparent, water-based coating for floors in spray booths and preparation areas. Binds dust and dirt so that dust particles stay close to the ground. Ready to use and easy to apply with a pressure spray atomiser.

- Ionising action instantly attracts dust and holds it in place
- Suitable for walls and floors
- Water-removable and water-borne
- Biodegradable, non-toxic and silicone-free
- Saves cleaning time and is economical in use
- Temperature-resistant up to 80 °C

CONTENTS
5 liter (DC05)
10 liter (DC10)
25 liter (DC25)

INFRARED PAINT DRYER WITH 1 CASSETTE (ART. ICL10)

Speed up the drying and curing process of putty, primer, basecoat and clear coat with powerful short-wave infrared technology. The direct heat transfer ensures faster curing, lower energy consumption and higher productivity.

- Single 1 kW short-wave infrared cassette
- Compact, ideal for SMART repair
- Drying surface up to 600 × 500 mm
- Suitable for putty, primer, basecoat and clear coat
- Shortens drying times and increases productivity
- Height-adjustable and easy to position
- 230 V, ready for immediate use

PACKAGING

Per piece

INFRARED PAINT DRYER WITH 2 CASSETTES (ART. ICL20)

Speed up the drying and curing process of putty, primer, basecoat and clear coat with powerful short-wave infrared technology. The direct heat transfer ensures faster curing, lower energy consumption and higher productivity.

- Dual 2 kW short-wave infrared cassettes
- Drying surface up to 1000 × 1200 mm
- Adjustable temperature from 0–100°C
- Height-adjustable (250–2500 mm)
- Easy to position above the vehicle
- Suitable for putty, primer, basecoat and clear coat
- Even heat distribution for optimal drying
- 230 V, ready for immediate use

PACKAGING

Per piece

BESTSELLER

INFRARED PAINT DRYER WITH 3 CASSETTES (ART. ICL30)

Speed up the drying and curing process of putty, primer, basecoat and clear coat with powerful short-wave infrared technology. The direct heat transfer ensures faster curing, lower energy consumption and higher productivity.

- Three-head 3 kW version for large body panels
- Drying surface up to 2000 × 2000 mm
- Adjustable temperature from 0–100°C
- Height-adjustable (400–2500 mm)
- Intelligent LCD display with drying programmes
- Automatic distance and temperature control
- Robust, mobile design
- 230 V, ready for immediate use

PACKAGING
Per piece

INFRARED LAMP 1000 WATT 33 CM & 48 CM (ART. ILF33 I ILF48)

Replacement infrared lamps for Gerko paint dryers. Ideal for replacing worn lamps and maintaining optimal drying performance.

- Replacement lamps 33 cm for ART. ICL10
- Replacement lamps 48 cm for ART. ICL20 and ICL30
