Our Mission

CRYOPDP aims to improve the health of people around the world by providing global innovative temperature-controlled logistics solutions to the Clinical Research and Cell & Gene Therapy communities.

Specialised Healthcare Logistics

What we offer

- Specialised cold chain logistics for life sciences and healthcare
- Custom packaging and handling, including dry ice and cryogenic (LN2) solutions
- End-to-end temperature visibility and real-time monitoring with proactive alerts
- Reliable international network covering 150+ countries
- Regulatory compliance support across all global regions
- Personalised service with a dedicated point of contact
- Efficient, cost-conscious solutions without compromising quality

Quality

Our commitment

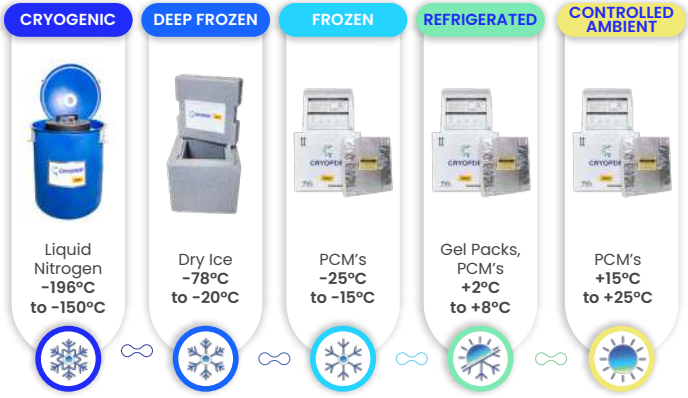
CRYOPDP maintains exacting standards and meticulous quality controls to not only meet but consistently surpass customer expectations, delivering industry leading success on every shipment.

Our Business Solutions & Added Value Services

Temperature Controlled Range and Packaging

As a global specialist, CRYOPDP provides a full range of high standard, qualified temperature controlled packaging solutions, both active and passive, available as single use or reusable options.

CRYOPDP provides a complete range of temperature-controlled logistics, services and qualitative cold sources:



Our Added Value Services include:

- Direct-to-Patient *DtP*
- Control Tower
- Customs & Brokerage
- Onboard Courier
- Lab Move
- White Gloves
- Pick-Pack
- Lane & Service Assessment
- Streamline Clinical Trials
- Consultancy

How do we do this?

At CRYOPDP, our global teams deliver added-value services by applying in-depth operational expertise to every shipment.

We balance budget and quality requirements to ensure your goods arrive in peak condition and on schedule.

CRYOPDP stands for Experience and Dedication.

For over 25 years, we have partnered with the life sciences industry to deliver tailored global transport and logistics solutions for high-value, time and temperature sensitive shipments.
