

DUA SOLUSI ITI

PT DUA SOLUSI ITI

IN PEOPLE WE TRUST

Why PT DUA SOLUSI ITI?

PT Dua Solusi ITI was established on October 13, 2024, by two founders with extensive experience in system and website development. It began with frequent requests for website creation from individuals, communities, and institutions which revealed an opportunity to offer reliable and professional technology solutions.

Guided by the slogan "In People We Trust," we place trust at the heart of our working relationships both within our team and with our clients. Supported by a well-defined divisional structure and organized business processes, we are committed to delivering the highest quality service in every project we undertake.

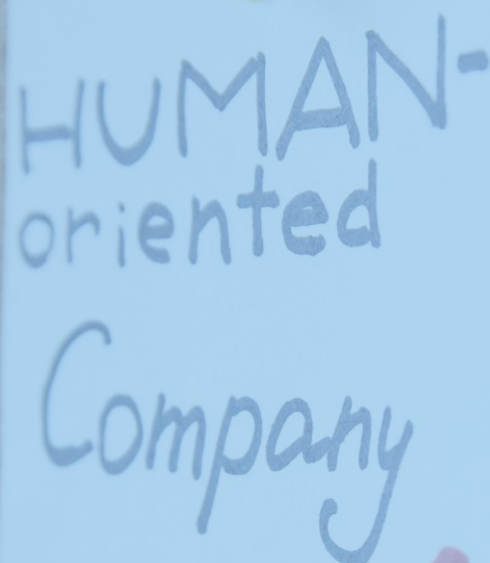

Our logo symbolizes collaboration, care, trust, and professionalism, reflecting our vision to be a dependable partner that provides high-quality technology solutions.

VISI

To become a trusted partner in impactful technology solutions, contributing to societal progress at both national and international levels.

MISI

- Prioritize Collaboration and Trust with Partners
- Develop Technology with Positive Social Impact
- Uphold Ethics and Social Responsibility

HUMAN-oriented
Company.

PEOPLE
FIRST.

OUR SERVICES

Custom Website & Application Development

We create websites and applications tailored to your specific needs—whether for small businesses, communities, or corporations. Each design is unique, responsive across all devices, and built using the latest technologies to ensure speed and ease of use. We can also integrate smart features such as product recommendations, user behavior analytics, or automated chatbots to enhance the user experience.

Information Systems, CRM & Smart Technology

We develop online systems to manage data and customer relationships (CRM), ideal for schools, businesses, and small to medium enterprises (SMEs). With these systems, you can organize customer data, monitor sales, and improve operational efficiency. Enhanced with smart technologies like sales forecasting and customer behavior analysis, our solutions help your business grow faster and more effectively.

IoT Solutions and Business Applications

We offer smart solutions ranging from connected home devices (smart home) and automated sensors to business applications for inventory and logistics management. Powered by intelligent technology, these systems can analyze data in real-time, detect issues, and automate workflows to improve efficiency and productivity.

Booking Systems & E-Commerce Solutions

We build online booking systems for hotels, restaurants, clinics, and more—as well as e-commerce platforms for selling products digitally. With features like product catalogs, online payments, and delivery management, these platforms simplify your business operations. Smart technologies also enable product recommendations, customer shopping pattern analysis, and inventory optimization.

UI/UX Design & API Integration

We design user interfaces that are visually appealing, intuitive, and user-friendly. In addition, we can integrate your system with other services—such as online payments or third-party applications. Smart technology enables personalized user experiences, in-depth analysis of user behavior, and improved interface performance.

Digital Portals & Digital Transformation

We develop online portals such as digital communities and e-learning platforms. We also assist in modernizing your legacy systems with the latest technologies, making them more efficient and relevant in the digital age. With smart technology, these portals can deliver content recommendations, personalized learning experiences, and member data analytics to boost user engagement.

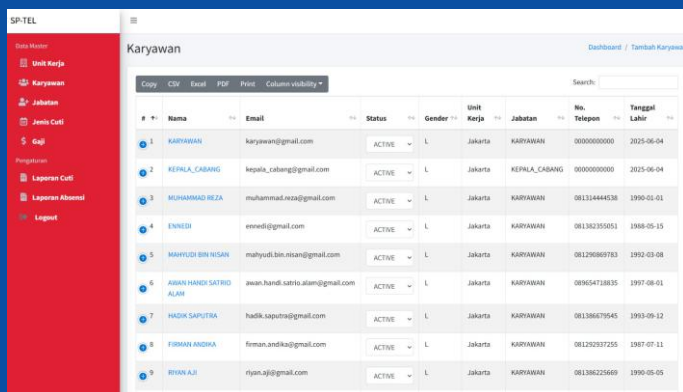

Training, Technology Assistance & Data Analysis

We offer training to help you understand and navigate new systems, support small businesses (SMEs) in their digital transformation journey, and provide data analysis services. Powered by smart technology, our analytics can forecast business trends, uncover new opportunities, and automate reporting—enabling more accurate and informed decision-making.

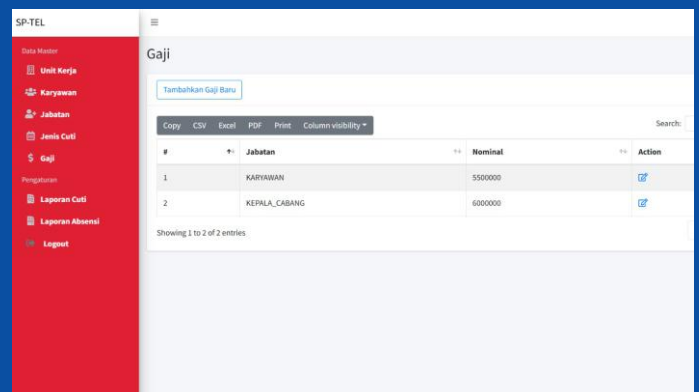

OUR PROJECTS

Employee Attendance and Payroll System

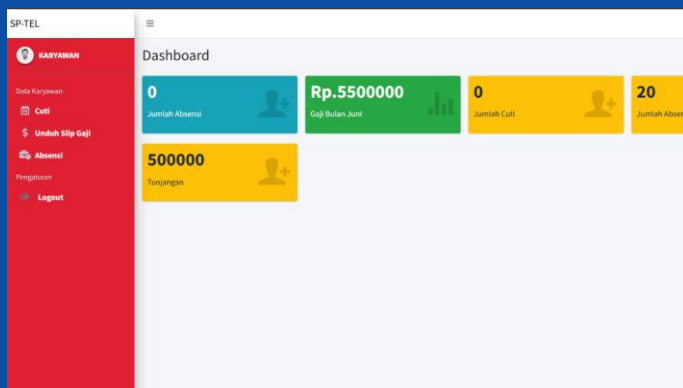

The Employee Attendance and Payroll System is a digital platform designed to manage and monitor employee working hours, attendance records, and salary calculations. This system automates the tracking of employee check-in and check-out times, calculates total working hours, handles leave records, and processes monthly salaries based on predefined rules. By integrating attendance data with payroll features, the system ensures accuracy, reduces manual work, and improves overall efficiency in human resource management.

OUR PROJECTS

PioneerProduction

PioneerProduction provides equipment rental services for events and parties, offering complete and reliable solutions to help make your event successful, whether it's small or large. Since the beginning, we've been committed to helping individuals, companies, and communities hold events without the need to buy expensive equipment. With quality products, professional service, and a flexible approach, we're here to help you create a smooth and memorable event.

OUR PROJECTS

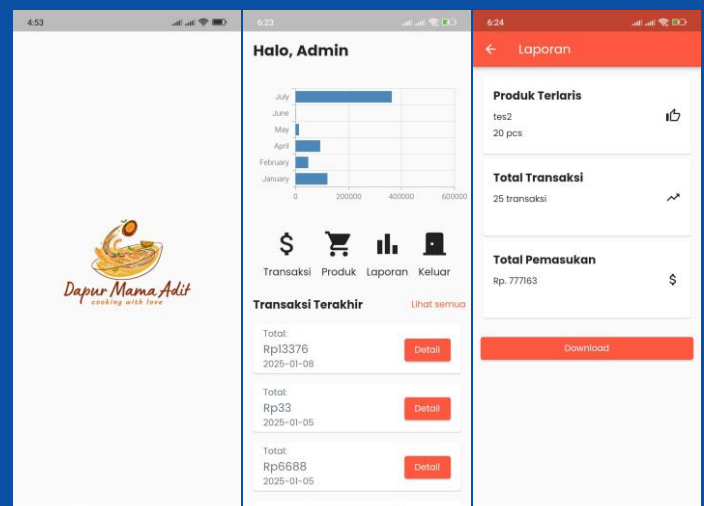

Online Parking Reservation Prototype via Website

This is a prototype of an online parking reservation system developed through a website. The system allows users to search for available parking spots, make reservations in advance, and manage their bookings easily through an online interface. The goal is to reduce time spent finding parking, efficient parking experience for both drivers and parking lot operators.

Dapur Mama Adit

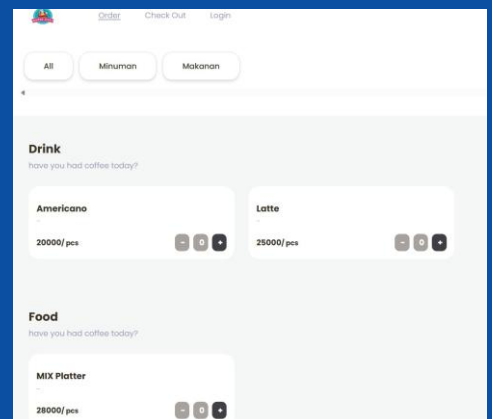

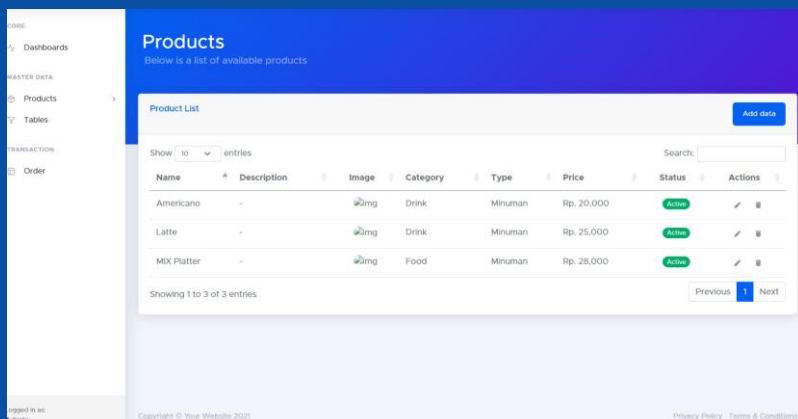

Dapur Mama Adit is an application designed to record food-related income and expenses, including pricing and transaction reports. It also functions as a point-of-sale (POS) system, making it easier to manage food sales, track financial data, and generate reports all in one place. The app is ideal for small food businesses or home-based sellers who want a simple and efficient way to manage their daily operations.

OUR PROJECTS

Lampaoe Coffee – Online Ordering System

Lampaoe Coffee uses an online ordering system that allows customers to browse the menu, place orders, and make payments through a website or mobile platform. This system is designed to improve customer convenience, speed up the ordering process, and help the business manage orders more efficiently.

Coffee Purchase Prediction with Python

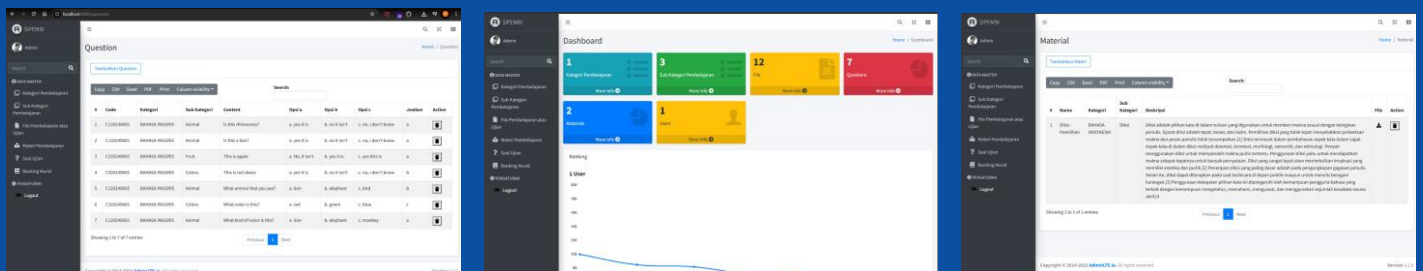

This project uses Python to predict coffee purchasing behavior based on historical sales data. By applying machine learning or statistical analysis, the system can forecast future demand, helping businesses make informed decisions about inventory, marketing, and supply planning. It's a useful tool for optimizing sales strategies and reducing waste in coffee-related businesses.

OUR PROJECTS

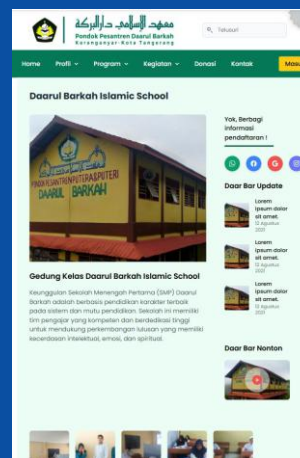

E-Learning System

An E-Learning System is a digital platform that allows students to access educational content or exams online. It provides a flexible and interactive learning environment, enabling both students and teachers to connect and manage academic activities anytime and anywhere. This system is especially useful for remote education, self-paced learning, and blended learning models.

Pesantren Darul Barkaah

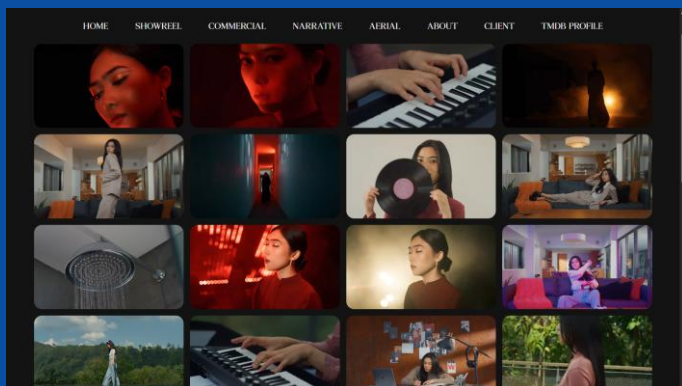

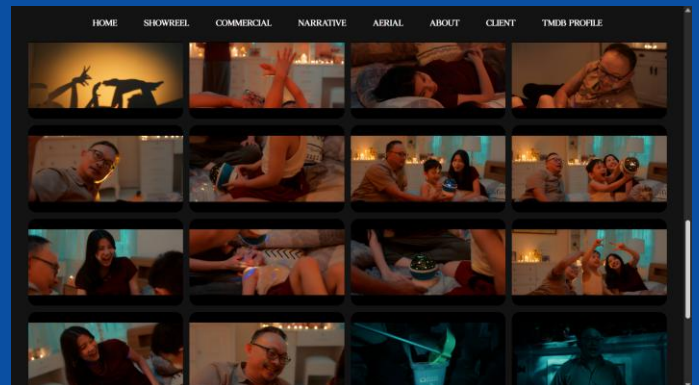

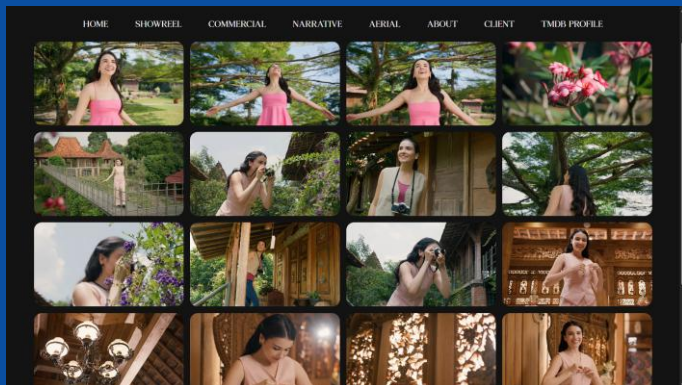

Official document or presentation that introduces the pesantren, its vision, mission, programs, facilities, and unique values, which the project still running until Now.

OUR PROJECTS

Eki Hakiki - Portfolio

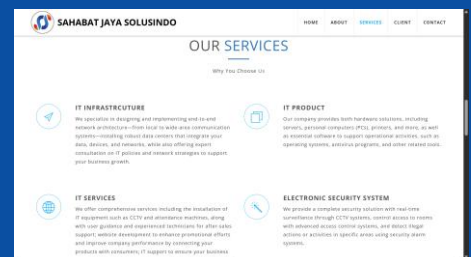

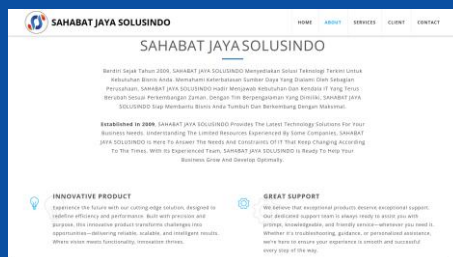

Eki Hakiki is a professional portfolio website created for Eki Hakiki, a cinematographer and Director of Photography. The site showcases his visual storytelling skills through curated sections featuring showreels, commercial projects, narrative films, aerial cinematography, and personal background details.

OUR PROJECTS
