PWP 05T

Self-Adhesive Protection Film

PRF 600 is a white polypropylene adhesive film, designed to protect most surfaces from most chemical products. Protect mixing tables and floors from getting contaminated by overspray, paint spill, oil, etc.

Skid proof, even when wet.

\$180

PRF 600

Boothmask Wall Protection Film

PLA 32 is a static and paint absorbent white film that can be cut to size in order to be used to protect spray booth walls against overspray.

Use with magnetic strips (PLA 45)

\$144

PLA 32

Dust Control - 5L

DUC 05 is the most original and efficient formula for suppressing dust circulation inside a spray booth, workshop and warehouse. Dust Control ionizes the dust so it is being drawn together in clusters which makes it too heavy to circulate in the air. For best results, apply on a weekly basis.

\$59.00

DUC 05

Liquid Masking - 5L

CLM 05 dries completely and doesn't remain tacky. Apply it with a spray gun (1.5mm nozzle) in a single thick coat and remove with water and a sponge. It's biodegradable and a water-based product, making it environmentally friendly and efficient for wall protection.

\$50.00

CLM 05

Cabin Protect Peelable - 17L

CPP 17 is a white, peelable coating offers effective protection for spray booth walls against overspray. For optimal results, add an extra coat after contamination to save time and facilitate easy removal in one piece as it thickens. It's biodegradable and a water-based product, ensuring eco-friendly protection for your spray booth.

We've Got All Your Painting Needs Covered!

Hempel Yacht Range

Hempel Yacht provides high-performance marine coatings, antifoulings, and maintenance products for both DIY boat owners and professional marine yards.

Product Range

- Antifoulings: Prevents marine growth, protects propellers, and improves hull speed.
- Primers & Undercoats: Seals substrates and ensures strong topcoat adhesion.
- Fillers & Fairing: Smooths hull lines for enhanced performance.
- Fouling Release Systems: Advanced non-biocidal silicone options like Silic One.

The future of antifouling is here!

Hempel's Silic One gives the coating surface water-like properties making it difficult for fouling organisms to attach to the hull and easy for them to be removed when the boat is in motion.

Hempel's Silic One is a foul-release coating that:

- Is completely biocide-free
- Reduces fuel consumption and other emissions over the entire service interval
- Cuts CO₂ emissions
- Can be used on any vessel, even on vessels currently using conventional antifouling
