WELCOME

Welcome to AUSJET26 & Liquid & Environmental Waste (LEW) Expo 2026 and, for the first time, welcome to Sydney.

This year marks an exciting new chapter as AUSJET joins forces with LEW Expo in Australia's largest city, creating a powerful industry platform that brings together professionals from the water jetting, drain cleaning, liquid waste, plumbing, municipal works and environmental services sectors.

The move to Sydney reflects both the continued growth of AUSJET and the introduction of LEW Expo, providing greater opportunities for attendees, exhibitors and industry stakeholders from across Australia and New Zealand to connect, learn and do business. Whether you are here to discover new technology, explore emerging trends, gain practical knowledge or strengthen your professional network, there is something for everyone. Across the exhibition floor, you will find leading suppliers showcasing the latest equipment, products and services designed to improve safety, productivity, sustainability and operational performance. Be sure to visit the LIVE Demonstration Arena, where cutting-edge equipment and technology can be seen in action.

The Contract Resources Education Hub returns with a comprehensive program of free industry-led presentations, delivering practical insights, technical expertise and fresh perspectives on the opportunities and challenges shaping our industries today. We also encourage you to visit the Career Corner, highlighting pathways for attracting, developing and retaining the skilled workforce our industries need for the future.

Most importantly, AUSJET26 & LEW Expo is about bringing people together. We encourage you to make the most of the many networking opportunities available throughout the event, reconnect with industry colleagues and establish new relationships that can support the future growth of your business.

A special thank you must go to the AUSJET Board and Committee members, who generously contribute their time, knowledge and expertise throughout the year to develop the education program and industry content showcased at this event. Their commitment to sharing knowledge, promoting best practice and advancing professional standards plays a vital role in strengthening our industry and ensuring AUSJET remains a valuable learning and networking experience for all.

We also thank our exhibitors, sponsors, industry partners and supporting associations for their continued commitment to the event and their investment in the future development of our industries.

We are delighted to welcome you to this landmark Sydney edition of AUSJET26 & LEW Expo and hope you enjoy everything the event has to offer. It all shapes up as a great event, so please enjoy the AUSJET26 experience.

LIVE DEMONSTRATION ARENA

20-minute LIVE Demonstrations Timetable

Day 1 – Wednesday October 28

Starts at	Exhibitor
2:15pm	BLASTONE
2:35pm	BUCHER MUNICIPAL
2:55pm	HAMMELMANN AUSTRALIA
3:15pm	KOR EQUIPMENT SOLUTIONS
3:35pm	WOMA AUSTRALIA

Day 2 – Thursday October 29

Starts at	Exhibitor
11:00am	WOMA AUSTRALIA
11:20am	KOR EQUIPMENT SOLUTIONS
11:40am	HAMMELMANN AUSTRALIA
12:00pm	BUCHER MUNICIPAL
12:20pm	BLASTONE

What you'll see!

	BlastOne will showcase live UHP water jetting and robotic technology at AUSJET26, demonstrating solutions designed to make surface preparation, hydro demolition, and industrial cleaning safer, cleaner and more productive. See the VertiDrive V400 and V700, NLB 15405D trailer-mounted high-pressure water blasting unit, and NLB Model VPU-1000 Compact Diesel Vacuum System in action and see why these technologies are used in demanding industrial applications.
	See the Kroll Combination Unit on display at Ausjet 2026 and discover the industry leading solution for high-volume sewer and drainage cleaning. As the official Kroll distributor across Oceania, Bucher Municipal provides expert technical support, national service coverage and genuine parts supply, delivering maximum productivity, reliability and operational efficiency.
	Hammelmann Australia will showcase innovative technology never seen in Australia before, highlighting the performance, safety and productivity benefits of Hammelmann Australia's water blasting solutions, including the xPRO intelligent safety module for high-pressure blasting guns which redefines occupational safety and operator comfort for high-pressure blasting, alongside the new twin head high-pressure 600HP pump and new ultra-high-pressure twin 200HP pump trailer.
	KOR will be showcasing the Gerotto remotely operated cleaning system, designed to remove operators from high-risk environments such as confined spaces, tanks, pipelines, and other hazardous areas. By combining advanced robotic technology with powerful cleaning performance, Gerotto helps improve safety while delivering exceptional results.
	WOMA Australia will demonstrate high-pressure and ultra-high-pressure water jetting technology, including automated and semi-automated surface preparation and industrial cleaning equipment. The demonstration will showcase the safe, efficient, and environmentally responsible use of high-pressure water for industrial applications, highlighting the performance, precision, and productivity benefits of automated water jetting systems.

NETWORKING DRINKS

Catch up with industry peers, exchange ideas, and build meaningful connections in a relaxed and welcoming setting. Enjoy complimentary drinks and make the most of this opportunity to expand your network.

Wednesday October 28,
from 4:30pm

TRADIES TOOL BOX BBQ

Round off day two with the Tradies Toolbox BBQ. It's a great opportunity to network, share stories, and enjoy a traditional sausage sizzle with industry professionals.

Thursday October 29,
from 1:30pm

Founded in 1974, Abdex is a family-owned hose assembly manufacturer with over 50 years of fluid transfer experience and branches in Perth, Melbourne, Brisbane and the UK.

Abdex is a certified Hydraulic, Water Jetting and Oil and Gas hose assembler to 4,000 bar (58,000 psi), holding Parker Polyflex certification and NATA accreditation for pressure testing to 5,000 bar (72,500 psi).

The water jetting range spans ultra-high pressure blasting, hydro-demolition, drain and sewer cleaning, tube-cleaning flex lances and hydrovac services, backed by full hose management with RFID traceability and in-house pressure testing under an ISO 9001 quality system.

**MANAGING THE WASTE YOU
CAN'T AFFORD TO GET WRONG.**

WHO WE ARE
A Sydney-based waste management solutions company specialising in hazardous, liquid and regulated waste. One turnkey provider – from sampling and testing through to collection, transport, treatment and compliant disposal.

WHO WE SERVICE
Waste disposal facilities, construction & infrastructure, industrial sites, councils, manufacturers, third-party logistics and facilities management companies.

WHAT WE DO

🔄 Turnkey waste management	🧪 Sampling & NATA accredited testing
🚨 Emergency spill response	🧼 Tank, pit & shutdown cleans
💧 Liquid waste – WPCG accredited	📦 Packaged, DG & hazardous goods
🦠 Biosecurity – DAFF transport	🏥 Medical, pharma & destruction

All Waste Management delivers comprehensive waste management – a full turnkey solution for all your waste requirements. Expert technical advice covers sampling, waste classification, NATA-accredited testing, EPA negotiations and regulatory compliance.

Services include emergency spill response; site shutdown and maintenance, including tank and pit cleans; treatment and disposal of packaged, liquid, medical, pharmaceutical and biosecurity waste; and secure product destruction. We are WPCG accredited for fuel-site liquid waste and DAFF approved for biosecurity transport.

Trusted by clients including Sydney Metro. Reliable, responsive, compliant – managing the waste you can't afford to get wrong.

Contact: Peter Bradford | p: 03 9588 0361
e: sales@aquaprep.com.au | w: www.aquaprep.com.au

Aqua Prep is a leading Australian specialist in hydro demolition, hydro scabbling, coating removal, cold cutting and on-site water treatment.

Established in 2012, we have completed more than 1,400 projects nationally with a team of over 50 and 200 years of combined experience.

Operating from offices in Victoria, New South Wales, Queensland and South Australia, we deliver precision concrete removal using Aquajet robotics, Vertidrive coating removal systems, hand lancing, and a fleet of vacuum trucks. Our on-site water treatment plant processes over 100,000 litres of water daily, enabling recycling and reducing environmental impact.

INDUSTRY TRAINING

Industrial Courses

- MSMSS00017 Use high pressure water jetting equipment
- MSMSS00018 Operate a high pressure water jetting system
- MSMSS00019 Operate a drain cleaning system
- MSMSS00020 Operate a vacuum loading system
- MSMSS00021 Operate a hydro excavation system

CCTV Courses

- Operator - NWPNET037 Inspect sewer or stormwater assets
- Supervisor - NWPNET059 Supervise and report on conduit inspections
- CCTV Combined - NWPNET037 & NWPNET059

Other Courses

- Refreshers - MSMSS00017, MSMSS00018, MSMSS00019, MSMSS00021
- Class A - High pressure water jetting awareness course

SYDNEY SHOWGROUND

BAT INDUSTRIAL | STAND C32

A trade show stand graphic for BAT Industrial. It features a black background with a white dashed border. At the top center is the BAT Industrial logo, with 'BAT' in a stylized orange and white font and 'Industrial' in a smaller white font below it. Below the logo, the text 'BUILT FOR THE INDUSTRY' is written in large, bold, white capital letters. Underneath this, a line of smaller white text reads: 'High-pressure hose, nozzles, couplings and vacuum fittings for water jetting, drain cleaning and hydro excavation - in stock, ready to ship.' Further down, on the left, it says 'Visit us at' in white, followed by 'Stand C32' in bold orange. On the right, it shows a globe icon followed by 'batind.com.au' and a telephone icon followed by '1300 228 725'. At the bottom of the graphic is a large, coiled grey high-pressure hose with red handles and red text markings, resting on an orange surface.

DRAINCHEM
URBAN MAINTENANCE PRODUCTS AND SOLUTIONS

STOP PAYING TOO MUCH FOR PACKERS.

Drainchem are proud to introduce an exciting range of Packers, Pillow Plugs, Cone Plugs and Lifting bags, now available in Australia.

Packers Drainchem now offer high quality pipe packers with or without Bypass that are flexible for ease of installation. These high quality packers are available to suit pipe sizes 25mm up to 2000mm in diameter.

Topknot Packers: Drainchem have also introduced packers that allow the installation of top knots to lateral from mains and are available in 100x100mm, 150x100mm and 150x150mm.

Cone plugs: Also new to the Drainchem range are inflatable cone plugs to suit multiple pipe diameters (30mm to 150mm) and are reinforced with vulcanized rubber. The Cone plugs fold down much smaller than a traditional rubber plug and the enables ease of access into pipes and manholes.

Pillow plugs: Another exciting product is the inflatable pillow plugs. Ideal for larger pipes. These are fold like a mat and can be rolled up to help installation into the pipe. Available in sizes 600-1000mm up to 1800-2800mm.

Vacuum Truck Supplies is an Australian specialist in practical vacuum trucks, trailers and portable vacuum equipment. Since 1998, VTS has helped customers choose the right unit for the work they do, from compact portable units through to high-capacity vacuum truck and trailer solutions.

Our equipment is designed for liquid waste, hydro excavation, drain cleaning, slurry recovery, industrial services and site clean-up work.

What makes VTS different is our focus on simple operation, easy maintenance, practical support and equipment built for real operators.

VTI is a leading Australian manufacturer of specialised vacuum trucks, proudly based on the Gold Coast, Queensland. Australian-made and engineered for the demanding conditions of the civil construction, utilities, mining, infrastructure and industrial sectors, our trucks are trusted by customers across Australia and New Zealand.

Our extensive range includes hydro excavation vacuum trucks, high-pressure drain cleaning jetter trucks, liquid waste vacuum trucks and custom-engineered solutions.

Available in various tank capacities, blower configurations and performance options, every VTI truck is purpose-built to maximise productivity, enhance operational efficiency and deliver long-term reliability and value.

The Waste Contractors & Recyclers Association of NSW and ACT (WCRA) is the leading industry association representing the commercial waste and recycling sector across NSW and the ACT. Established in 1948, WCRA advocates for practical regulation, safer workplaces and a more sustainable and productive industry. Our members include waste collectors, recyclers, processors, equipment suppliers and service providers.

WCRA delivers industry advocacy, training, technical guidance, member support, networking and major events. What sets WCRA apart is our practical, industry-led approach and our strong relationships with government, regulators and stakeholders across the waste and recycling supply chain.
