My Little Brother's Musical Evolution

Summary:

- The speaker introduces his younger brother, affectionately called "2 official," as a talented musician.
- He recalls encouraging his brother to take music seriously and produce full-length projects.
- The brother has since released two albums, demonstrating significant growth in his skills.
- The speaker expresses deep pride and admiration for his brother's passion, determination, and artistic progress over the years.

I can't express how much I been waiting for this album. I LOVED the first one so much, so being there for the recording and release process means alot me to. I watched Mula go thru so many phases of his art and he has come a really long way. The contrast between the first album and this one stands out to me so much compared to most artist because you can really hear how much my bro has matured. Not only musically but mentally. He is really expressive and transparent in his music and is not afraid to let you into his mind. Not only he does this, he does it in a BEAUTIFUL manner as he melodically and lyrically delivers this instant classic! If you don't know Mula 2 Official then you will certainly feel like you know him personally after finishing this album. His music is so raw and relating to most where I come from in the slums of North Philly. The young guys especially love Mula. They respect his realness and unmeasurable talent over his heartfelt and sometimes hard and aggressive beat selection. Mula 2 Official's growth as an artist is something you want to be tuned in to. He's a star in his neighborhood and soon to be a star all over the world.!

From Classic Beginnings to Timeless Legacy

Summary Note:

- The speaker expresses deep excitement and admiration for the artist's first album, emphasizing its groundbreaking beats, impactful lyrics, and overall classic appeal.
- The anticipation for the artist's second album is high, as it seems to uphold the high standards set by the first.
- Both albums are celebrated as classics, showcasing the artist's enduring talent and confirming that he remains at the top of his game over time.

Evolution of Sound: A Journey from Youth to Mastery

Summary Notes:

- The album represents a significant evolution in the artist's growth, both mentally and musically.
- It contrasts his earlier, younger work with his current, more mature state of mind and sound.
- His musical style has evolved toward a unique, refined direction that fits his voice and flow seamlessly.
- The musical progression is likened to an artist painting vibrant, beautiful artwork, symbolizing the creative process.
- The result is a compelling piece of art that reflects his personal and professional development.

When you listen to Mula's music you can tell he is different from most. His art isn't just flexing and flashing, his words and past experiences are poetry when paired with his melodic style and flow. It's so vivid at times its like your in a movie and Mula is the main character. Mula 2 Official's music feels more like a memoir or a timestamp in his life, rather than a display of unrelating lyrics over trap and drill beats. This is special, artist like him are much more engaging and personal making his music more immersive than normal. It's interesting because he is one of those artist that when he have something to say plain words just isn't enough. Music is like a second language to him and he will use it without a second thought to paint you the picture you didn't know you wanted to see!

IS MAKING HIS
WAY TO PHILLY !!!

BREAKING
NEWS

Red.I.Customz and Graveyard Media have formed an alliance earlier this year and they are planning something HUGE! A collaboration from Cali to Philly, Red.I.Customz will make his way to town sometime towards the end of this year. Juice Skywalker 1684' is rumored to drop a surprise EP on Halloween and we may be getting a music video from that project featuring the 2. What we do know is that the music video will be entirely visually designed by Red.I.Customz himself! Down to the music video set location and exclusive custom made wardrobe. This is a legendary collaboration mainly because this production will be the very first of many. Red.I.Customz is a very skilled all around craftsman and creator based out in the city of Fullerton in California. He is truly a 1 of 1 artist and visionary specializing in crafting custom made goods and digital arts.

One of my favorite creations by Red.I.Customz is his signature custom cards. They are always well made and carefully crafted while being entirely wrapped by a gorgeous sparkling holographic like finish. I always LOVED collecting cards growing up whether it be, sports, Pokemon, Marvel, DC, ect. This is a great gift or just something to treat yourself to.! Highly recommended.

These custom chain are to die for! Anything you can picture or imagine, Red.I.Customz can bring your vision to life in a very stylish fashion with his sturdy, long lasting, gleaming chains! There are a lot of people that make custom chains but let's face it, NOBODY does it like Red.I.Customz. Why? Because for one, they don't care as much as him. When it comes to creating with care, passion, and attention to detail there is no one better! Your satisfaction is his pleasure in every custom item he makes.

Another great thing is his custom tables. Super slick and clean design fit for ANYTHING. Weather you want to show your team pride in your mancave or want a really cool conversation piece in your office, this is the way to go for sure!

And his custom masks are FIREEE. I seen all kinds of designs by him and the stuff he comes up with is just unbelievable! These masks are perfect for photoshoots, music videos, film, plays, cosplay, ect. Again whatever you can imaging or come up with, he can make it into a super dope mask!

Reach out to Red.I.Customz on instagram
"@red.i.customz" and let this passionate artist use his
wizardry to help bring life to your visions and creations!
We are very excited to express the alliance of
Red.I.Customz and Graveyard Media and are very proud
of the future collab that we can't wait to share with you!

Kid Lightning: The Rising Lyrical Prodigy

Summary Note:

The passage highlights Kid Lightning, a young and talented artist from the UK. Emphasizing his lyrical style and emerging status, it portrays him as a rising force in a rapidly changing world.

Rising Star: The Unstoppable Talent of Kid Lighting

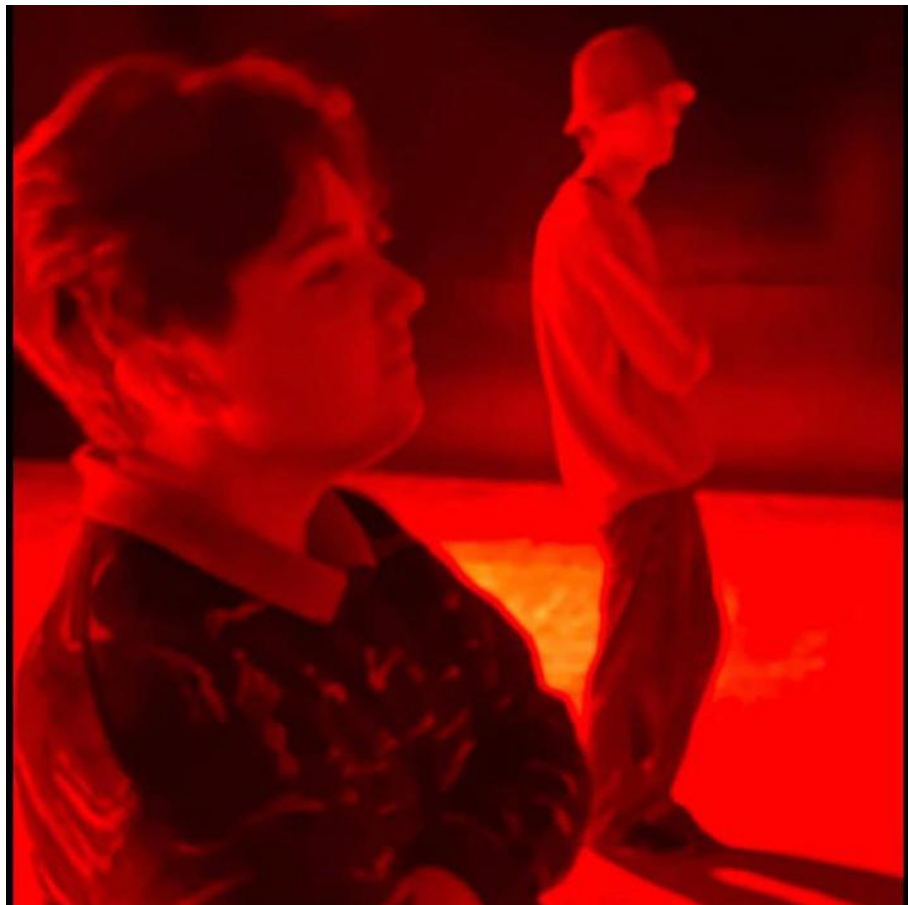

Summary:

An acquaintance recalls discovering Kid Lighting's music on Instagram after a friend's recommendation and was immediately impressed by his rapid-fire lyrics, consistently rhyming, and uniquely engaging flow. His tracks feature dynamic, fun beats paired with creative, subliminal messages in his music videos. The speaker is convinced that Kid Lighting's innovative style and exceptional delivery will eventually lead him to megastar status and widespread fame.

A Visionary Fusion: Blending Unique Hip-Hop Styles on Tour

Summary Note:

The speaker expresses deep admiration for Kid Lightning's originality and creativity. They believe that Kid Lightning's distinctive approach to hip-hop perfectly complements their own abstract and unconventional sound. Envisioning a historic tour together, the speaker is excited about the prospect of combining their two unique styles into a remarkable and memorable show that challenges norms and leaves a lasting impression on the music scene.

Beyond the Beat: A Genuine Artist and Friend

The passage praises an individual who is not only an exceptionally talented artist but also a kind, humble, and genuine person. His deep knowledge of hip hop, creative vision, and outstanding writing skills are highlighted alongside his warm personality. More than just a musician, he is portrayed as a reliable friend and a true reflection of passion and creativity in every aspect of his life.

Kid Lightning – The Future Megastar of the UK

Summary:

The speaker envisions Kid Lightning as a shining star in the United Kingdom. They predict that he will become a major, influential figure, comparable to blending the unique styles of MF Doom and Mac Miller. Kid Lightning is seen as not just a current talent but the stalwart representative of tomorrow's music scene in the UK.

Kid Lightning highlights one of the big reasons I love hip-hop/rap. The sound and culture influences all kinds of artists to rise and you never know what fate is gonna cook up. And comes along Kid Lightning. I don't even know where to start with him, he is SOOOO fun to listen to! I didn't know what to expect going into his new released album this year "Luna 2" but man did I come out a fan afterwards. His ability to rhyme and flow is criminally underrated, and his beat selection is very different from most I must say. Like his track "Ryu vs. Ken" for example, it feels like you're in a video game and he's the final boss rapping over his own fight theme music with rapid fire paced lyrics. Lyrics that are perfectly delivered with this unique cadence and flawless rhyme structure. One of my favorite songs on this album is "Cherry Red" where he incorporates all of these tricks in his deep bag of skills in this dope ass almost mystical trance like instrumental. He obliterates this beat as lyrically as possible in true KL fashion, the track has very well put together rhymes, style, originality, unique vibes, and perfect execution. Songs like this are the defining raw sound of Kid Lightning. He is far from ordinary when it comes to your average hip-hop/rap artist for SURE!

KL is like a lyrical acrobat to me. His complex rhyme patterns and cadence is like watching someone perform difficult, twisty, turny, skilled moves that are both graceful and beautiful to watch, you're just in awe most times. He is simply really good at what he does, his skillset is so polished yet I feel like the best is to come in this stage of his artistry. I feel like artist like him doesn't hit a ceiling because they are always looking for different ways to

create. Always testing his limits, never shy on being experimental and always looking for new inspiration in so many different places. You just don't know what he will do next each and every album. I feel this way about his music videos too, they are sometimes seemingly simple but yet very elaborate at the same time. It feels like there is always a hidden message or bigger picture in plain sight.

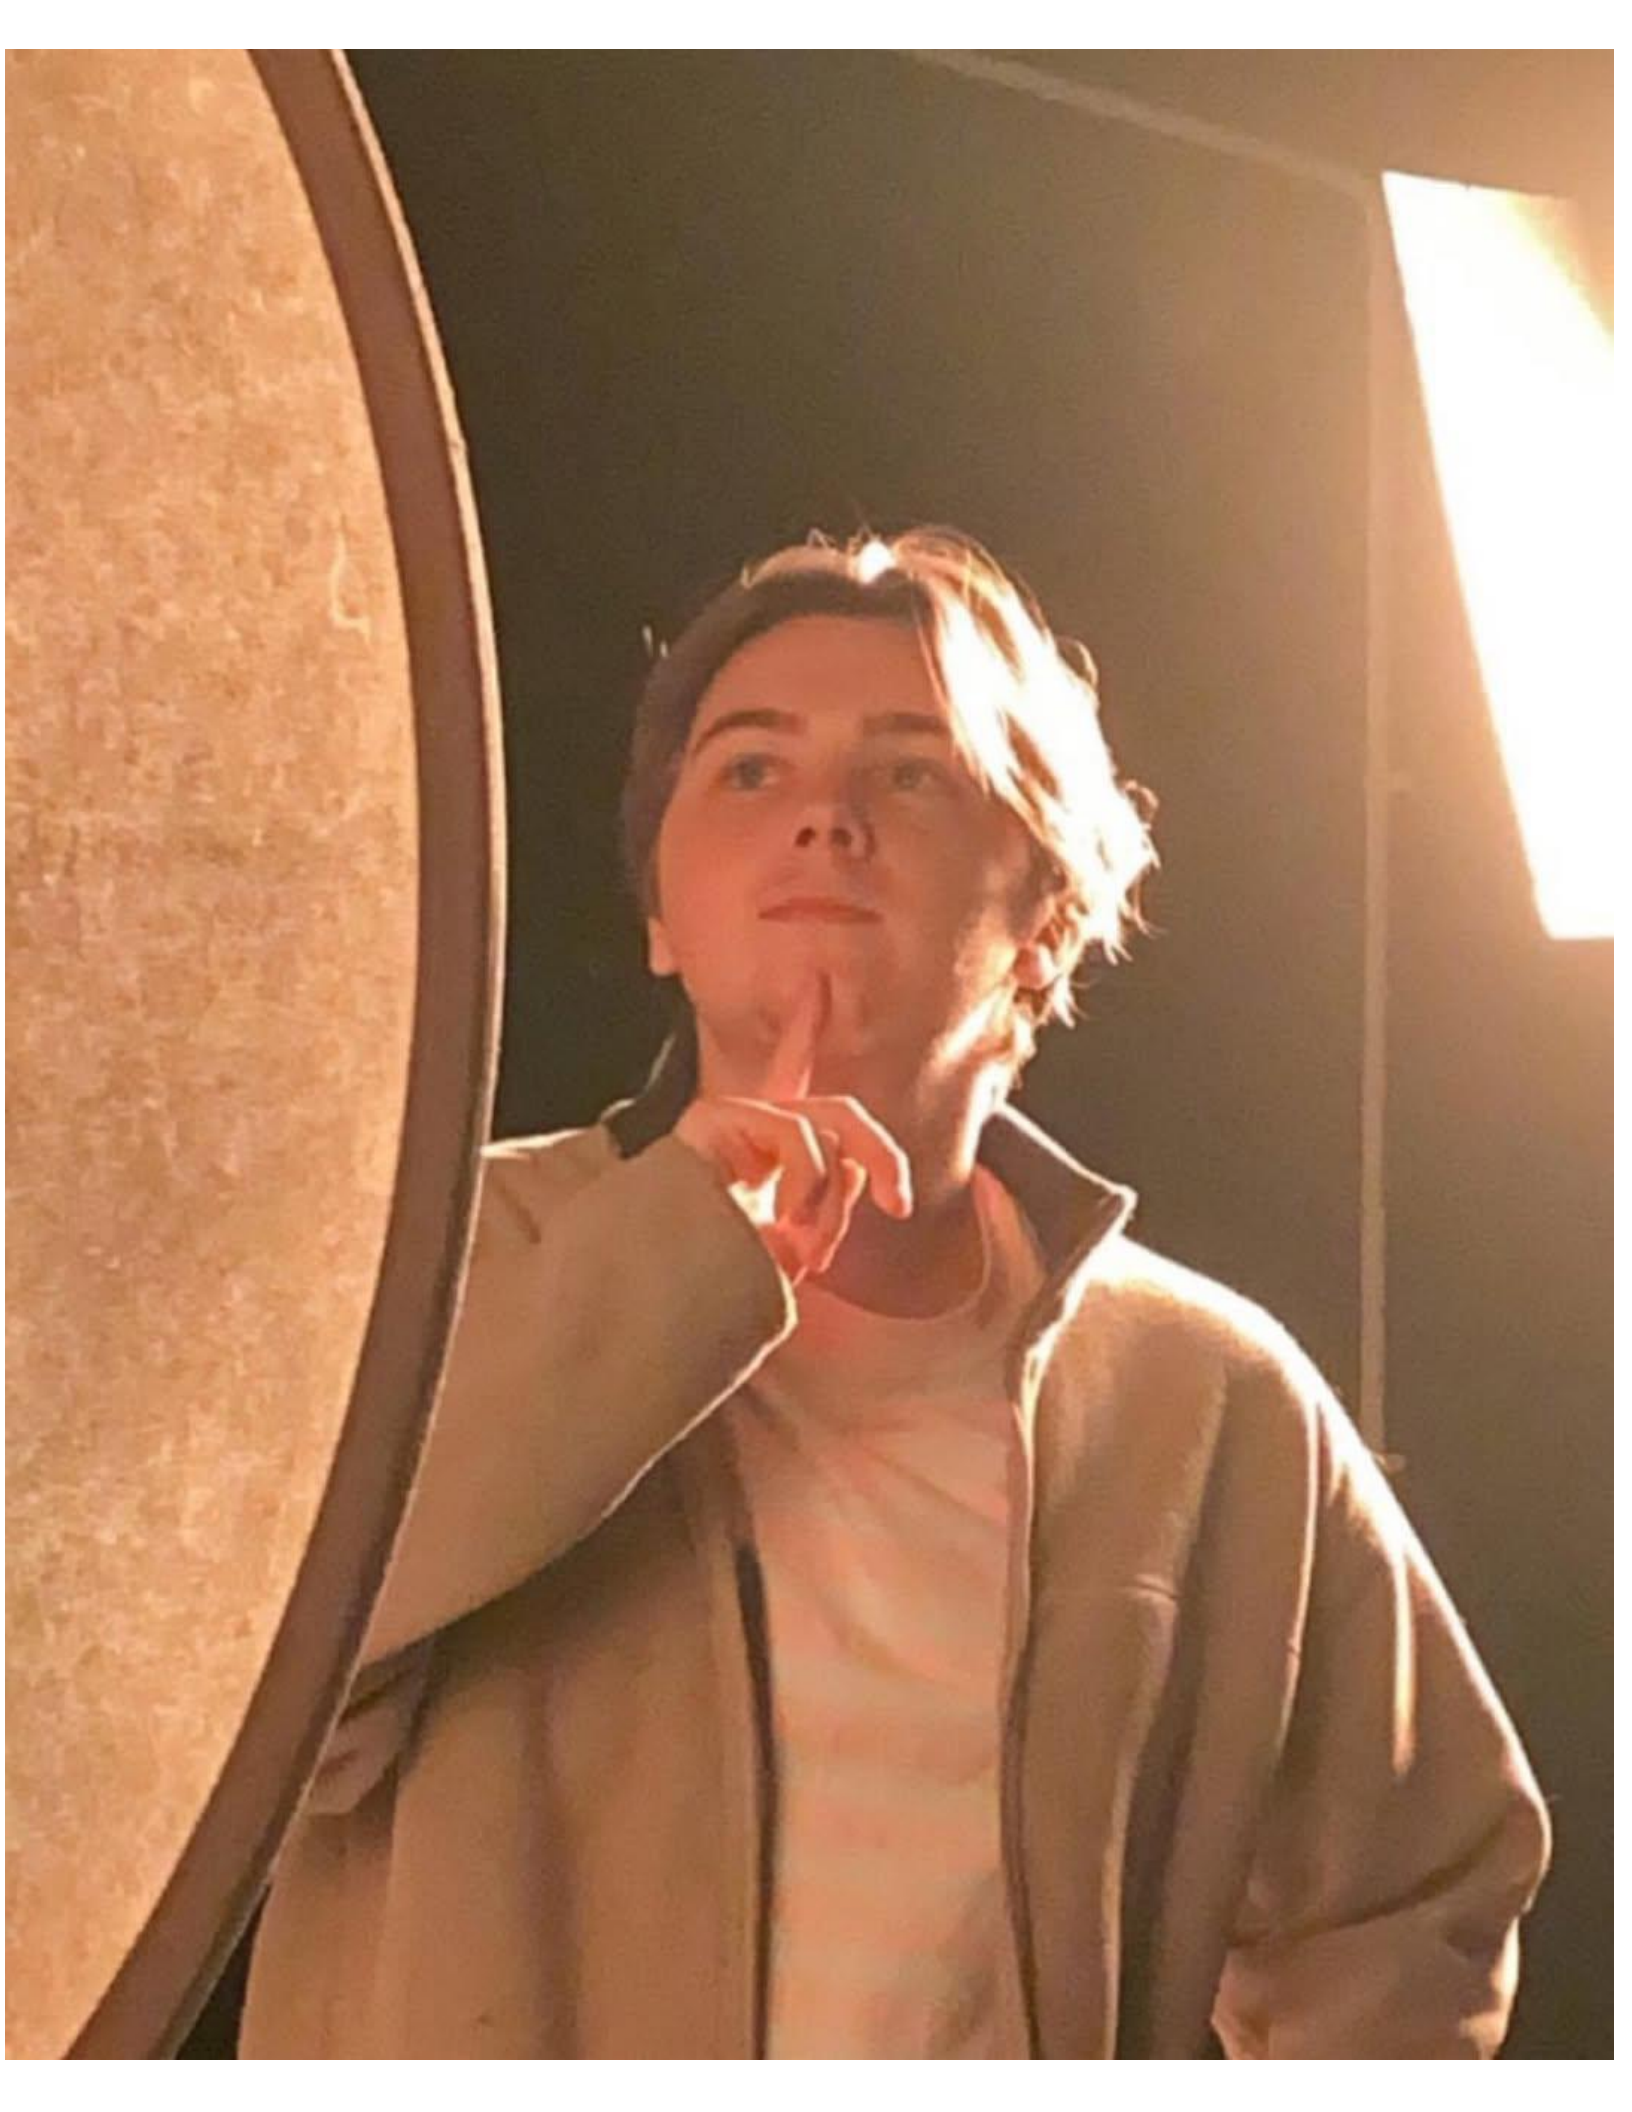

When I think of KL I think of how DOPE it would be to do a tour with him! Blending styles in a show is always exciting but KL is literally the definition of blending styles. I can just imagine how entertaining his stage setting alone would be just based on his creative nature and out of the box thinking. He is always looking to put on a show not just rap and that's the special thing about him. Everything he vision and does comes off as bigger than life!

He is someone you want to check out if you love coming across underground artist that are just hidden gems. KL to me is a MEGASTAR! I see it even though we are in his early stages of his art. You don't come across guys like him and to top it all off he is just literally the CHILLEST guy you will EVER meet. He's smart, creative, kind, and a jedi master all across the board!

#4 - He is an ELITE gamer! I once seen him online on PS5 just sitting at the main menu. I almost sent him an invite to play Madden 25 but I winded up playing BO6 instead. The next day I realised he was the NUMBER 1 Madden player in 2023. I said to him "damn I ain't know you was that heavy, glad I didn't try to play you." He simply replied "lol, im glad you didn't either." I dodged a bullet on that one.....

#3 - DP is sponsored up!

When watching one of his streams you never know what kind of sweet deal or discount you can get on miscellaneous products.

#2 - DP is a dope hiphop artist. You never know when your gonna get a random freestyle while watching him game. It has been times where I saw DP just serving up an ass whooping all while busting out some dope ass rhymes. I don't agree with it.... it's nothing short of disrespectful. BUT it's cool as hell to hear his witty on the spot lyrism.

Also by him being an emcee and hiphop lover, he is ALWAYS playing and reviewing dope ass songs! He really has an ear for the sound and culture and has put me on to some songs that I didn't know about countless times just by watching him vibe out and game.

#1 -He is crazy as hell. DP is just absolutely underratedly hilarious. His humorous reactions, gaming antics, and sometimes outright trolling nature is both funny and entertaining to watch. You see DP isn't just some clout streaming gamer streaming for views. He creates a really cool and friendly community with his elite gaming skills paired with big brother like charisma. Even though he is an extremely fierce competitor, he is very welcoming and friendly and has built a reputation of being a huge pleasure to work and or game with. If you like gaming, hiphop, and laughing, his streams are for you! I strongly recommend you check him out when you can, he streams everyday so you can't miss him. Just don't play him in Madden. No seriously. Don't do it...He'll just destroy you....
