# THE BELBAGNO STANDARDS

---

## **SUSTAINABILITY**

A lot of time, effort and research goes into our Belbagno range. We do this to ensure that not only are our products suitable and functional, but to allow room for product sustainability. To ensure our products are sustainable, we test our products based on 6 contributing factors. These include: Resource Base, Life Cycle Impacts and Benefits, Human and Ecological toxicity, Socio-Economic Impacts and Benefits, Total Costs and Life Cycle Costs, and Technical Performance. The end result here at Belbagno is simple, we are driven by the desire to consistently measure sustainable

performance of our products and drive a competition to continually improve them. We understand the importance of providing a space to relax, unwind and rejuvenate so it is only right that we deliver to you sustainable and quality products to make your house a home.

## **CERTIFICATIONS**

BelBagno products are Watermark Certified, WELS registered and comply with all relevant Australian plumbing standards.

## **QUALITY COMMITMENT:**

Here at BelBagno, we believe that product sustainability plays

a crucial part in making our products the best of the best. That's why, all Belbagno products are tested for quality to ensure we provide not only product satisfaction but also customer satisfaction.

BelBagno is committed to achieving the highest of standards, whether that is perfecting in our quality or simply, everything we do. This is a genuine act to provide the best customer satisfaction we can deliver.

# GLI STANDARD BELBAGNO

---

## **SOSTENIBILITÀ**

Noi di Belbagno dedichiamo molto tempo, impegno e ricerca nella nostra gamma. Lo facciamo per garantire che non solo i nostri prodotti siano adatti e funzionali, ma per lasciare spazio alla sostenibilità del prodotto. Per garantire sostenibilità, testiamo i nostri prodotti in base a 6 fattori contribuenti. Questi includono: risorse di base, impatti e benefici del ciclo di vita, tossicità umana ed ecologica, impatti e benefici socio-economici, costi totali e costi del ciclo di vita e prestazioni tecniche. Il risultato finale qui a Belbagno è semplice, siamo guidati dal desiderio di misurare costantemente le prestazioni

sostenibili dei nostri prodotti e guidare una competizione per migliorarli continuamente. Comprendiamo l'importanza di fornire uno spazio per rilassarsi, distendersi e ringiovanire, quindi è essenziale offrire prodotti sostenibili e di qualità per rendere la tua casa una casa.

## **CERTIFICAZIONI**

I prodotti BelBagno sono certificati Watermark, registrati WELS e conformi a tutti gli standard idraulici pertinenti australiani.

## **IMPEGNO PER GARANTIRE QUALITÀ**

Noi di BelBagno crediamo che la sostenibilità del prodotto

svolga un ruolo cruciale nel rendere i nostri prodotti il meglio del meglio. Ecco perché tutti i prodotti Belbagno sono testati per la qualità per garantire non solo la soddisfazione del prodotto ma anche la soddisfazione del cliente. BelBagno si impegna a raggiungere i più alti standard, sia che si tratti di perfezionare la nostra qualità o semplicemente in tutto ciò che facciamo. Questo è un atto genuino che offriamo per soddisfare al meglio i nostri clienti.

# OUR MATERIALS

---

## ACRYLIC BATHS

We pay great attention to material selection as only carefully processed best ingredients together with innovative design result in top quality product with added value. Cast acrylic (PMMA) is used for the production of bath tubs. It retains its shape in the long term and there is no danger of cracks or distortion. We can therefore provide our baths with extended warranties.

## SOLID SURFACE BATH

Our solid surface bathtubs are manufactured through a continuous casting process, creating a smooth, fully homogeneous material. This gives us bathtubs that are highly resistant and easy to maintain, while also non-porous and hygienic. Their luxuriously soft finish and heat retaining properties have quickly made them firm favourites. Solid surface is a

compact, non-porous material which is a homogeneous mix of 1/3 resin and 2/3 aluminium hydroxide, a natural mineral with which many people are in daily contact as it constitutes, for example, an important ingredient of toothpaste. Completely non-toxic and recyclable. The surface is smooth, silky to the touch, durable and easy to clean.

## CABINETS

BelBagno furniture is yet another example of the use of exceptional materials. Our vanity is manufactured using quality chipboard treated by high-quality moisture impregnation AMT (Anti Moisture Treatment) from leading European manufacturers.

## TOILETS

Our toilets are made of Vitreous China, a material with a reduced environmental impact and has been conceived while paying

particular attention to water saving: its flushing system uses only 3.5 liters of water. The plaster molds that shape, the toilet bowls are made by hand. Nano glaze enamel guarantees a perfectly smooth and easy to clean surface abrasions and external agents. The extreme ease of cleaning also allows a lower consumption of water and detergents in respect of the environment.

## ALUMINIUM

Our shaving cabinets made of aluminium, which is a soft, light metal, with a bright silver colour due to the thin oxide layer which quickly forms when it is exposed to the air. It is extremely resistant to atmospheric corrosion and therefore does not require any protective varnish. Aluminium is neither magnetic, nor toxic, nor flammable.

# CARE

---

All our products are manufactured with carefully selected materials, undergo strict quality controls and are designed to last. The minor alterations in colour or shade of the various items are the result of manual and not industrial production and guarantee a unique product. They should therefore be considered as precious features and not defects to complain about. Careful maintenance and several simple actions ensure that sanitary ware remains as good

as new and retains the visual and functional features that guarantee the uniqueness and craftsmanship of BelBagno products. We suggest always using a damp sponge to clean the basins and sanitary ware. Avoid using abrasive, caustic or aggressive products that could damage or dull the ceramic. To ensure perfect hygiene and remove any traces of limescale or soap, it is recommended to clean them thoroughly every now and then, although again using

a non-abrasive detergent. Wash our bathroom products regularly with warm water and soap and dry the surfaces thoroughly with a soft cloth after use, and also avoid using sharp or particularly rough objects, to ensure they remain in perfect condition.

# I NOSTRI MATERIALI

---

## **VASCA ACRILICO**

Prestiamo grande attenzione alla selezione dei materiali poiché solo i migliori ingredienti lavorati con cura, insieme a un design innovativo si traducono in un prodotto di alta qualità con un valore aggiunto. L'acrilico colato (PMMA) viene utilizzato per la produzione delle vasche da bagno. Mantiene la sua forma a lungo termine e non c'è pericolo di crepe o deformazioni. Possiamo quindi fornire le nostre vasche da bagno con garanzie estese.

## **SUPERFICI SOLIDE**

Le nostre vasche da bagno con superfici solide, sono prodotte attraverso un processo di colata continua, creando un materiale liscio e completamente omogeneo. Questo ci permette di avere vasche da bagno altamente resistenti e di facile manutenzione, ma anche non porose e igieniche. La loro finitura lussuosamente morbida e le proprietà di mantenimento del calore li hanno rapidamente resi i preferiti.

La superficie solida e' un materiale compatto e non poroso, composto in modo omogeneo da 1/3 di resina acrilica e da 2/3 di idrossido di alluminio, un minerale naturale con il quale molte persone si trovano quotidianamente a contatto, poiché costituisce, ad esempio, un componente importante dei dentifrici. Completamente atossico e riciclabile. La superficie si presenta omogenea, setosa al tatto, durevole e facile da pulire.

## **MOBILETTI DA BAGNO**

I mobili BelBagno sono l'ennesimo esempio di utilizzo di eccezionale materiali. I nostri mobili da bagno vengono prodotti utilizzando truciolare di qualità trattato da impregnazione di umidità di alta qualità AMT (trattamento anti-umidità) da principali produttori europei.

## **WC**

Il nostro bagno è realizzato in Vetrochina, materiale ceramico a basso impatto ambientale

ed è stato concepito ponendo particolare attenzione al risparmio idrico: il suo sistema di scarico utilizza solamente 3,5 litri di acqua. Gli stampi in gesso che plasmano la forma del vaso sono realizzati manualmente. Lo smalto Higherglaze garantisce una superficie perfettamente liscia e facile da pulire. L'estrema facilità di pulizia consente inoltre un minor consumo di acqua e detergenti nel rispetto dell'ambiente.

## **ALLUMINIO**

I nostri armadietti da barba sono realizzati in alluminio. L'alluminio è un metallo morbido e leggero con un colore argenteo vivo, dovuto ad uno strato sottile di ossidazione che si forma rapidamente quando è esposto all'aria. È estremamente resistente alla corrosione atmosferica: per tale ragione non richiede nessuna verniciatura di protezione. Inoltre, l'alluminio non è magnetico, tossico o infiammabile.

# CURA DEL PRODOTTO

---

Tutti i nostri prodotti sono realizzati con materiali accuratamente selezionati, sottoposti a severi controlli di qualità e progettati per durare nel tempo. Le piccole alterazioni di colore o tonalità dei vari articoli sono il risultato di una produzione manuale e non industriale e garantiscono un prodotto unico. Vanno quindi considerati come pregevoli caratteristiche e non difetti da lamentare. Un'attenta manutenzione e poche semplici azioni assicurano che i sanitari

restino come nuovi e conservino le caratteristiche visive e funzionali che garantiscono l'unicità e l'artigianalità dei prodotti BelBagno. Si consiglia di utilizzare sempre una spugna umida per la pulizia delle vasche e dei sanitari. Evitare l'uso di prodotti abrasivi, caustici o aggressivi che potrebbero danneggiare o opacizzare la ceramica. Per garantire una perfetta igiene e rimuovere ogni traccia di calcare o sapone, si consiglia di pulirli accuratamente di tanto in

tanto, con un detergente non abrasivo. Assicuratevi di lavare regolarmente i nostri prodotti per il bagno con acqua tiepida e sapone e asciugare accuratamente le superfici con un panno morbido dopo l'uso. Evita inoltre di utilizzare oggetti appuntiti o particolarmente ruvidi, così che rimangano in perfette condizioni.

Per informazioni complete sulla cura del prodotto, sulla garanzia e sui resi, visitare il nostro sito Web **[www.belbagno.com.au](http://www.belbagno.com.au)**

# VANITY

LAVABI Mobile da bagno

Our vanity collection adapts to the most diverse styles and contemporary living trends. BelBagno cabinets offer a balanced combination of sophisticated materials and attractive colours, with every single detail perfectly in line with the style of the home and those who live in it. Our bathroom furniture comes fully assembled, is easy to install and is built to last. Whichever products you choose, BelBagno is proud to offer a range that is the perfect combination of beauty, quality and performance.

La nostra collezione di lavabi si adatta agli stili più diversi e alle tendenze dello stile contemporaneo. I mobiletti BelBagno offrono una combinazione equilibrata di materiali ricercati e colori accattivanti, con ogni singolo dettaglio perfettamente in linea con lo stile della casa e di chi la abita. I nostri mobili da bagno vengono forniti completamente assemblati, sono facili da installare e sono costruiti per durare. Qualunque prodotto scegliate, BelBagno è orgogliosa di offrire una gamma che è la perfetta combinazione di bellezza, qualità e prestazioni.
