

Whatever the application

Think **iD9**

Imageperfect iD9, a series of high-performance printable films

imageperfect
ANZ **ip**

Imageperfect iD9 Series

A range of high-performance polymeric films with 9-year durability designed to suit any digital application. From signage to vehicles, walls to windows - **the series covers it all.**

THERE'S MORE

The iD9 range is carbon reduced and manufactured with 28% less PVC than comparable Imageperfect products, making it ideal for companies looking to reduce their environmental impact. In addition, all products in the range come in environmentally-responsible packaging.

And that's not the best bit!

The series is designed with the same face film and multiple adhesive options, so you can apply the same graphic to multiple surfaces with the same colour accuracy.

The same bright white face film means you can print in vivid colours and apply to virtually any surface. All without changing printer settings between films, making your workflow fast and simple.

iD9

Engineered for performance Affordable by choice

Imageperfect iD9 Air

The most versatile film in the series. Imageperfect Air technology offers easy repositioning and air release for bubble-free application, so you can work at speed. Its good initial tack means you can confidently install in lower temperatures. From signage to walls, windows to vehicle wraps, iD9 Air is engineered to cover the majority of projects that come your way.

Imageperfect iD9 Air has a verified Environmental Product Declaration (EPD).

Imageperfect iD9 Slide

A revolution in digital wrapping. This polymeric film is engineered for full and partial wraps on vehicles with single-step recesses. With low initial tack and Slide technology, the film glides smoothly along the surface for easy repositioning and bubble-free installation. iD9 Slide makes even the largest graphics easy to install on your own.

Imageperfect iD9 Laminates

Protect and prolong the life of your graphics with these gloss and matt laminates. Both materials are printable, so you can use them as colourful window graphics. They also include UV stabilisers to ensure the prints stay vivid over the long term.

Meet SiD, the iD9 mascot

Octopuses are known for being adaptable, chromatic and intelligent. Their tentacles grip to anything, their camouflage is vibrant, they move fast and their resourcefulness helps them thrive.

**Versatile, flexible, clever and efficient
- just like the iD9 series.**

With the versatility of the iD9 series, you can confidently reduce the range of products you stock, saving money and space. All iD9 films come with a super soft, 50 micron film as standard, making them highly conformable for fast, easy installation on any surface.

All of these benefits come at affordable prices, helping you stay competitive!

But don't just take our word for it ...

For the past few years, Dimas Brasil, one of our lead Wrap Institute trainers, has been delivering workshops for Imageperfect throughout the world.

Dimas, who has installed the iD9 Slide and iD9 Air digital products many times, says

"I find it very easy to install and conform to compound curves and channels in various graphics and wrap applications. The customers we've met in all of our Imageperfect workshops have been impressed at how the iD9 film performs. If you are looking for a line of high-quality, versatile films at a competitive price point, Imageperfect iD9 could be the perfect solution for you."

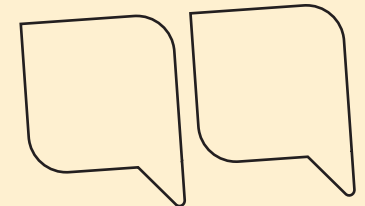

The Wrap Institute team

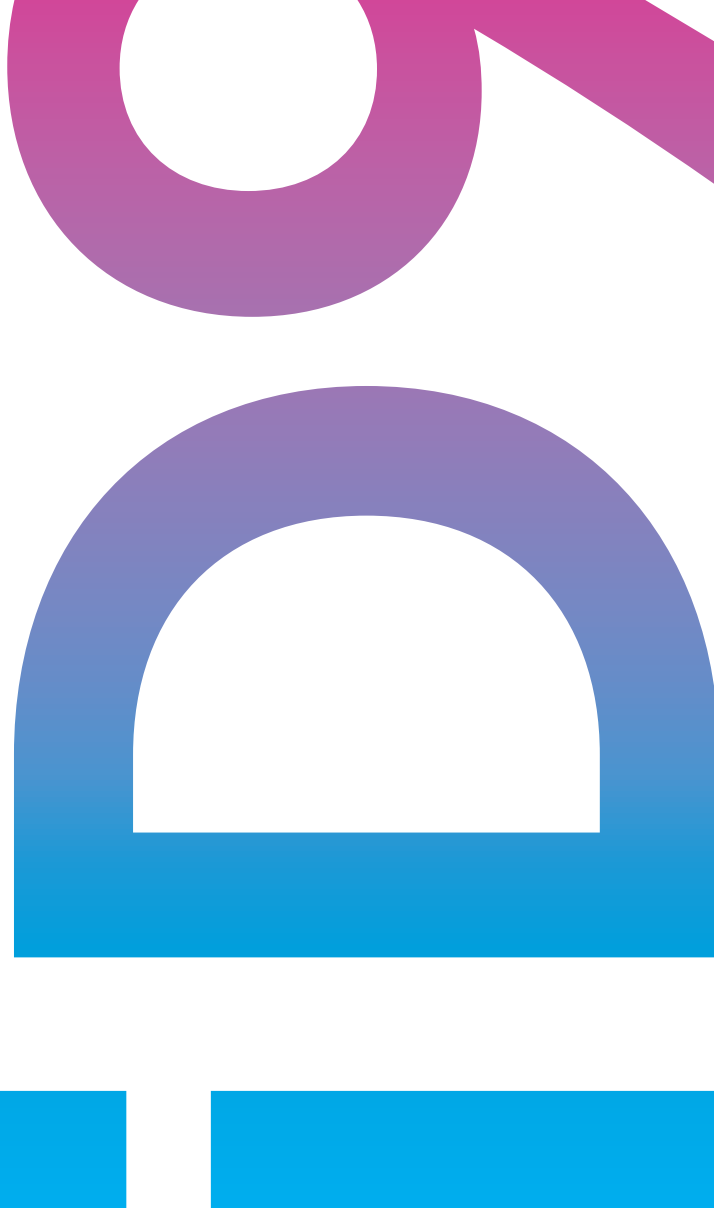

"The quality and flexibility of iD9 really open up new possibilities, and I'm genuinely looking forward to working with it in the field. You've definitely raised the bar."

Jens Francois - Motief print & sign

"We tried iD9 for applying signs and windows, and we're absolutely thrilled! The film's handling is excellent. It's very easy to position, apply bubble-free, and adjust if necessary. The film has a beautiful, even surface and ensures a clean and professional end result."
