Choose Your Finish

Our Standard Range features traditional single-skin steel wall cladding with 25mm roof insulation to help reduce condensation and heat loss. For additional comfort and versatility, our Superior Range features insulated composite panels in both the roof and walls. Choose from Horizontal Flat Panel for a contemporary look or Vertical Box Profile for a more traditional finish. We recommend heating all Superior Range units for optimum dry storage conditions.

Superior Insulated Composite Panels

Our Superior Range features high-quality insulated composite panels in both the roof and walls, available in a choice of thicknesses, colours and exterior finishes.

Each panel consists of three bonded layers: a durable, coated steel exterior, an insulating foam core and a smooth white metal interior finish.

This construction provides excellent thermal insulation, strength and durability.

All buildings are manufactured using Shanette's heavy-duty, fully galvanised CE-certified steel framework, designed for strength and long-term performance.
