QUINTELL™ STABILITY

When it comes to stability, Quingo scooters are literally in a class of their own and the secret of their success is Quintell™ technology. This unique patented system takes the best features of both 3 and 4 wheeled vehicles and then improves upon them significantly.

Combining 5 wheels with Quintell™ technology means the best possible anatomical driving position combined with stability that exceeds even the most competent 4 wheeled scooters.

Climb and descend kerbs **safely** and confidently, even at 45°.

Three and four wheel scooters must climb kerbs head-on, but Quingo's five-wheel system allows you to climb or descend kerbs smoothly even at a 45° angle without toppling.

The wheels lift and drive the others over the kerb, making it ideal for narrow pavements and allowing you to turn tightly and continue your journey with ease.

KerbMaster™

Anti-beach Anti-tip System

KerbMaster™ is a patented Quingo scooter feature that solves a common problem with traditional anti-tip wheels, which can leave scooters stranded on high kerbs.

It automatically powers the scooter over obstacles, preventing this issue. KerbMaster™ also reduces shock when descending kerbs and provides full anti-tip protection.

Make your journeys even more comfortable, enjoyable and safe with a wide range of accessories available for your Quingo Scooter.

ALL WEATHER REMOVABLE CANOPY (ARC)

Weatherproof your Quingo scooter with this fully removable canopy. Featuring a strong frame, sealable side panels and a strong, rigid front screen you are protected from the elements, and also from exposure to airborne pathogens. (You should not use the scooter fitted with a canopy in high wind conditions.)

HEATED HANDLEBARS

Ideal for those who suffer with Carpal Tunnel syndrome or Rheumatoid Arthritis; and of course for those who would like extra heat on their hands, these handlebars are equipped with easy to adjust temperature controls.

REAR VIEW CAMERA

The rear view camera is continuously on so that you can always see exactly what is happening behind you. This is extremely convenient and adds a layer of safety when storing your scooter, reversing or in busy traffic situations.
