

PHOENICIAN 1983

HEADMASTER'S MESSAGE

To The Class of 1983:

Each graduating class at P.C.D.S. is distinctive, and the class of 1983 is no exception. You are members of the first graduating class to inhabit the new Peter S. Firestone Memorial Upper School Complex and the Douglas A. Bean Computer Center. I trust that these buildings have served you well. More important than the buildings, however, is the strong sense of community and Upper School identity created by them. You have been a vital part of this community.

Every senior class has identified three outstanding strengths of our Upper School: high academic standards, excellent teaching, and close relationships between faculty members and students. Although you will soon forget the buildings, you will always remember the personal relationships and the desire for further learning which were forged in our Upper School.

I wish you luck in your future endeavors and hope that you will come back to see us from time to time.

Sincerely,

Joel C. Monell

Headmaster

UPPER SCHOOL MOVES INTO NEW COMPLEX

The fall of 1982 marked the Upper School's first year in the new Peter S. Firestone classroom complex, with its much needed classrooms, artrooms and computer facility. Decorating offices and classrooms, developing a network of paths to the central campus, constructing gathering spots tucked away under nearby palo verdes, all have been a part of the moving-in process.

With a few months, a stronger sense of an Upper School community became apparent. The new campus provided students with an identity of their own, separate from the Lower and Middle Schools.

I know that we will never change, cause we've been friends through rain or shine for such a long long time.

A DREAMER LIVES FOR ETERNITY!

Love is patient, love is kind, it does not envy, it does not boast, it is not proud, it is not rude, it is not self-seeking, it is not easily angered, it keeps no record of wrongs, it always protects, always trusts, always hopes, always perseveres. And now these three things remain faith, hope, and love, but the greatest of these is love.

I gotta admit that I'm a little bit confused.
 Sometimes it seems to me as if I'm just being used.
 Gotta stay awake, gotta try and shake off this creeping
 malaise.
 If I don't stand my own ground, how can I find my own
 way out of this maze?

Deaf, dumb and blind. you just keep on pretending.
 That everyone's expendable and no one has a real friend.
 And it seems to you the thing to do would be to isolate
 the winner.
 And everything's done under the sun,
 And you believe at heart, everyone's a killer.

There is unrest in the Forest
 There is trouble with the trees
 For the Maples want more sunlight
 and the Oaks ignore their pleas

The trouble with the Maples
 (And they're quite convinced they're right)
 They say the Oaks are just too lofty
 And they grab up all the light
 But the Oaks can't help their feeling
 If they like the way they're made
 And they wonder why the Maples
 Can't be happy in their shade?

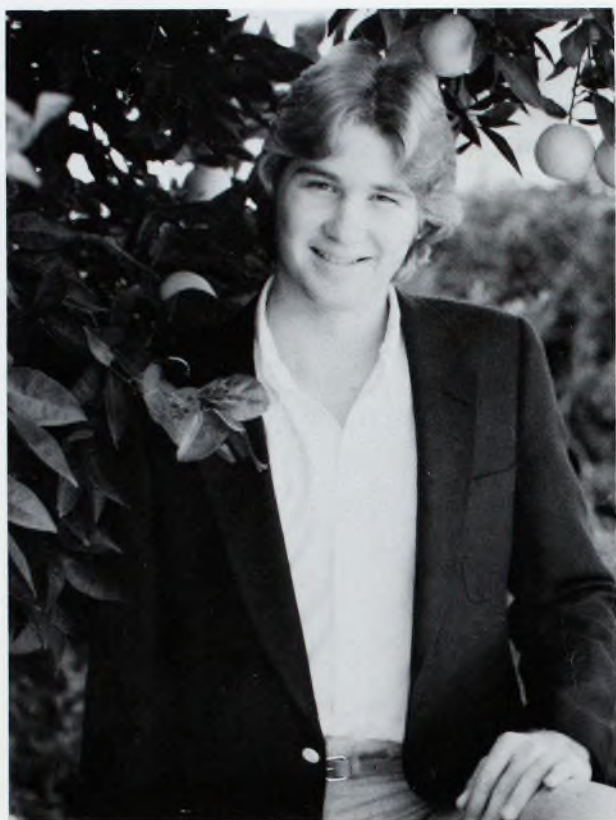

There is trouble in the Forest
 And the creatures all have fled
 As the Maples scream "Oppression!"
 And the Oaks, just shake their heads

So the Maples formed a Union
 and demanded equal rights
 "The Oaks are just too greedy
 We will make them give us light"
 Now there's no more Oak oppression
 For they passed a noble law
 And the trees are all kept equal
 By hatchet,
 Axe,
 And saw . . .

Why?

Why is the day short?
The night long and dark,
Why are these moments of Joy so brief?
Happiness is ephemeral,
Why is music bright?

Thunder deafened me,
Why are the heavens grey?
A cloud of smoke passed by me,
Why do I keep on asking?
I do not know the secret of life.

ACADEMICS

VISUAL ARTS

The Art Department seeks to provide students with a broad curriculum in two and three dimensional studio courses, as well as, Art History. The new upper school complex has given the department appropriate facilities for the first time in the schools history. A new darkroom, painting and drawing studio, ceramic and sculpture studio, and an inclosed patio provide students with space and equipment to visually express their ideas.

Independent thinking, creative expression, and a willingness to experiment are encouraged. Students also participate in regional and national scholastic art competitions. This year the department invited its first guest artist to teach an intensive water color workshop during the New Horizons Program.

MUSIC

The Upper School music program consists of a jazz ensemble, choir, and guitar instruction. The jazz ensemble participates in regional, state, and university festivals, as well as Solo and Ensemble, and Regional All-State. The jazz ensemble performed at special functions such as the P.C.D.S. auction, 1983 Senator Cup Tennis Match at the John Gardner Tennis Ranch, Scottsdale Art Walk, and the Power Plaza Ice Show. They also will visit and play in five countries during a twenty day tour of Europe.

The choral group is taught the basic concepts of breath control, correct posture, diction, and tone control in addition to music theory and sight singing. A variety of literature is sung in several languages from the Baroque Period to contemporary music. The group participates in Solo and Ensemble, various choral festivals, and workshops. Selected students take part in Regional and All-State choruses.

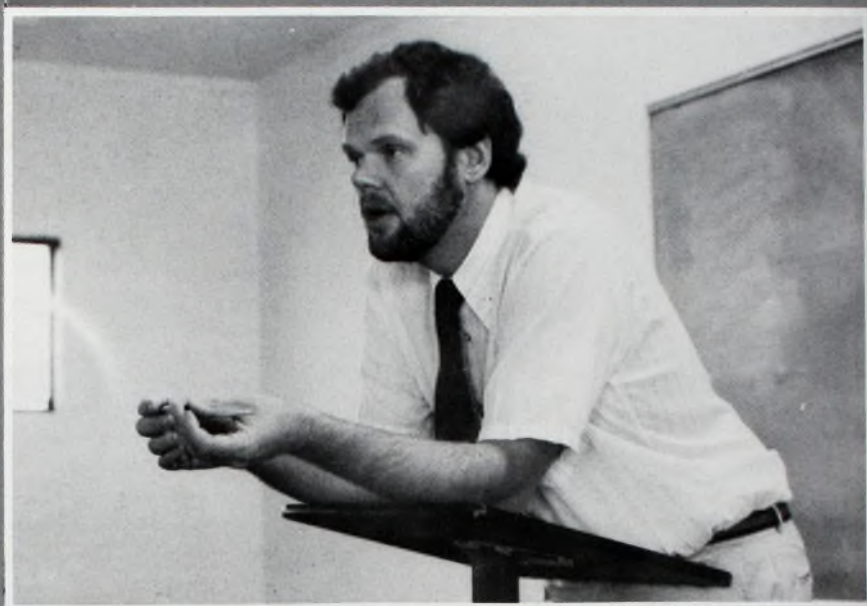

The newcomer to the music curriculum is guitar in which students learn the basic music skills and guitar techniques. Speakers and guest artists from the community have appeared throughout the school year.

ENGLISH

The English department program in the Upper School begins with the study of grammar, composition, and literary genres in the ninth grade, continues with a survey of American literature in the tenth grade, and culminates in an elective system offering a variety of literature and writing courses.

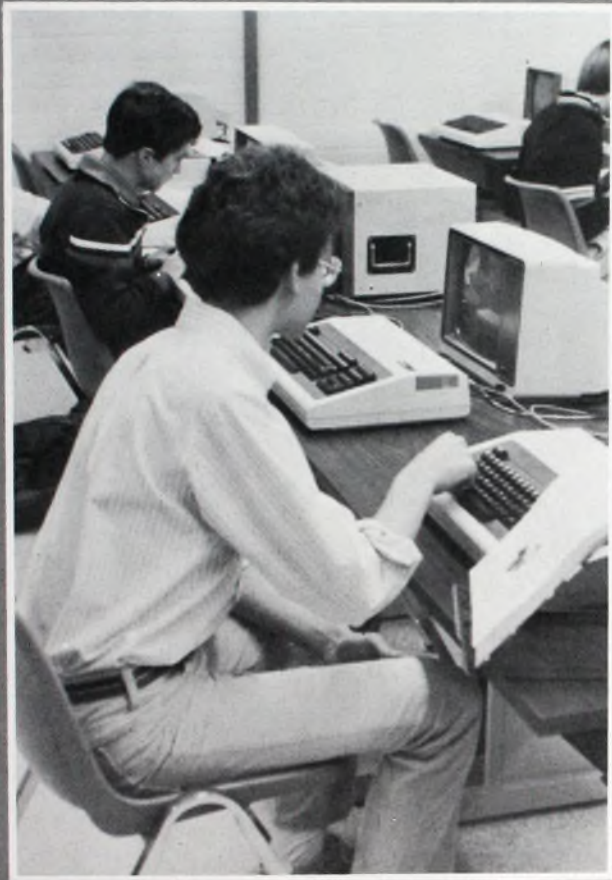

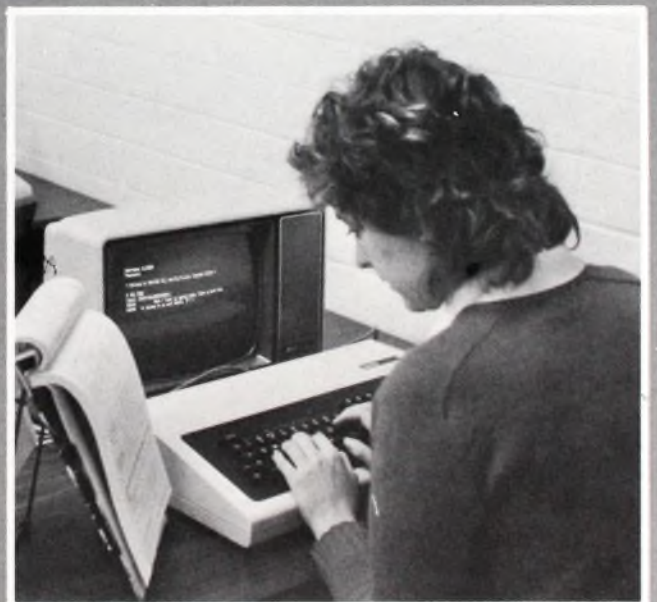

An offshoot of this year's program was the sophomore class play, Arthur Miller's *The Crucible*, which they had originally studied in English class.

COMPUTER SCIENCE

The newly created Computer Department has moved into its expanded facility and computer equipment has been arriving throughout the year. Students are using Digital Equipment's GIGI graphic terminals which contain a microcomputer based BASIC language. These terminals are connected to the school's minicomputer, VAX11/730. This minicomputer is available to all students.

Programming courses in the BASIC, Pascal, and COBOL languages are offered in the Upper School as semester electives. Courses in BASIC programming are also offered to Middle School students in grades 6-8, as well as, Lower School students in grades 2-5.

HISTORY

The history department seeks to provide students with a broad historical perspective of the origins and development of western civilization from prehistory to the present. The department also strives to encourage student awareness and understanding of the interdisciplinary nature of learning through an elective program of courses drawn from the arts, humanities, and the social sciences. Courses in sociology, anthropology, speech and debate, and politics and law for example, complement the core curriculum in traditional history.

This year the department has provided a number of experiences to enliven the study of history. The Society for Creative Anachronism visited the campus this fall to demonstrate the manners and mores of Medieval Europe. A series of "issues" assemblies have been initiated to bring debates on current controversial issues such as abortion, nuclear energy and ecology to the campus.

FOREIGN LANGUAGE

Understanding and appreciating cultures, other than our own, is an important feature of the foreign language program. When studying a language, the student becomes familiar with the art, religion, politics, geography, history and social issues of that country. Courses in French, Spanish, and Latin are offered.

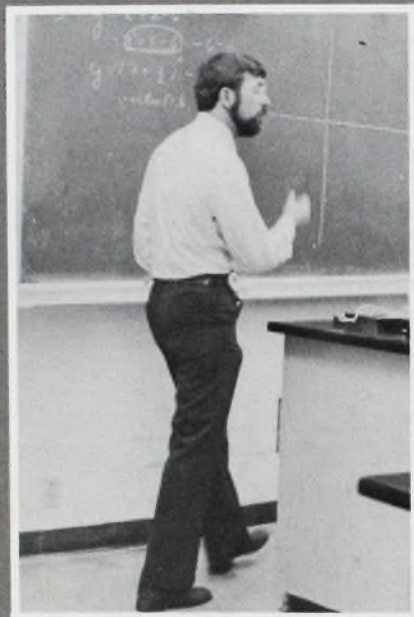

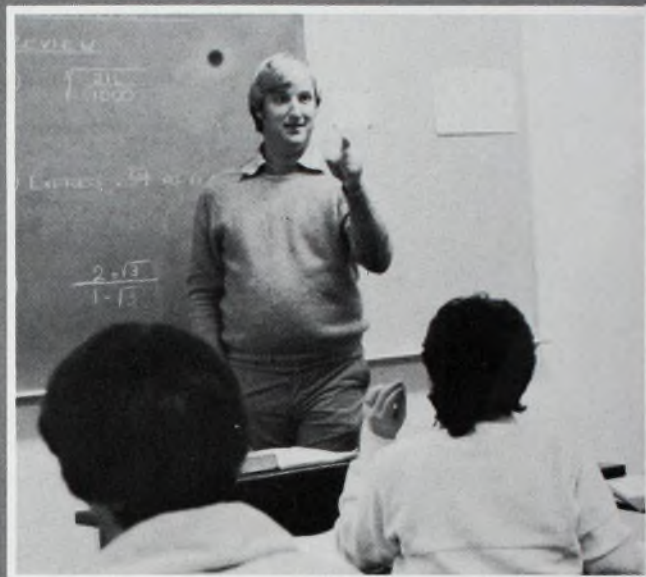

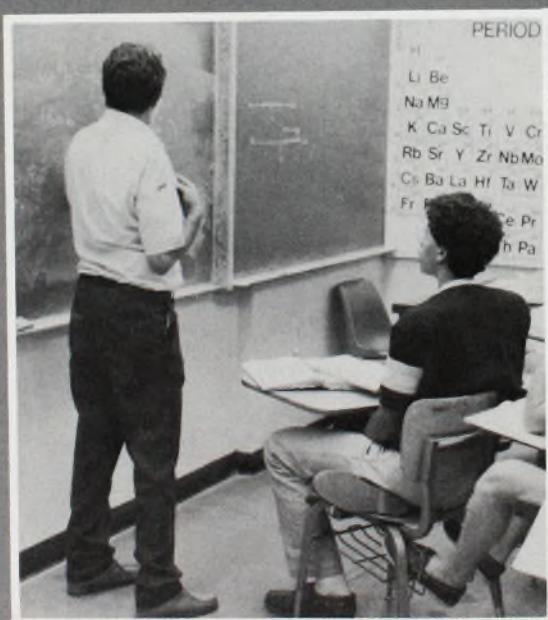

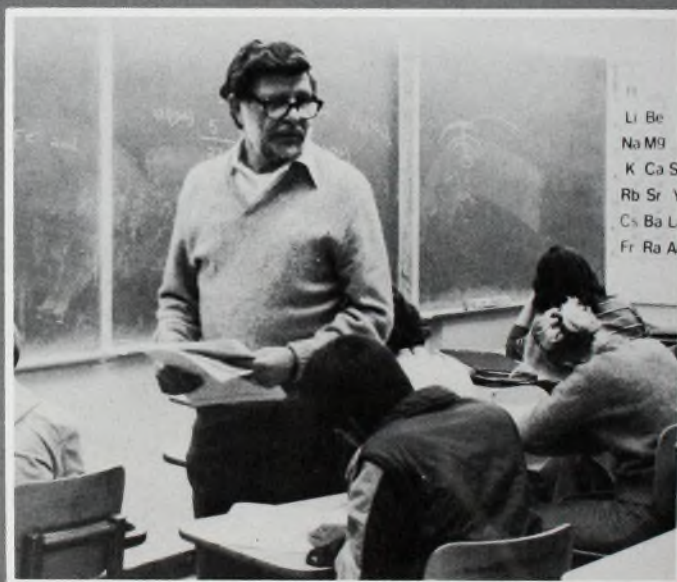

MATHEMATICS

"Neglect of Mathematics works injury to all knowledge, since he who is ignorant of it cannot know the other sciences of the things of this world."

Roger Bacon

The Mathematics Department seeks to avoid the neglect of which Bacon speaks by offering courses from Algebra I through The Calculus. In addition, it seeks to apply the knowledge gained to areas in science and "the things of this world."

SCIENCE

"Science is an essentially artistic enterprise stimulated largely by curiosity, served largely by disciplined imagination, and based largely on faith in the reasonableness, order and beauty of the universe of which man is a part."

STUDENT SENATE

Sally Pechstein, Will Kellogg, Kari Bookbinder, Mr. Chuck Toll, Amy Dussema, Rob Portnoy, And Ms Chris English.

In the spring of 1982 the student body ratified a new and dramatically different constitution for the Upper School student government, to be called the Student Senate. Springing from the recognition of the importance of student involvement in the activities of the school and the broader community, this constitution encourages active and constructive participation.

This year's Student Senate has met frequently to consider ways to foster involvement and promote activities of all sorts. The Senate members have taken first steps toward instilling comradery and a stronger sense of community. Many exciting opportunities remain for the Student Senate in years to come, of course, but these will be opportunities built upon the foundation established by the new constitution and this year's Senate.

On the first day of training or even by the fifth game of the season with a record of 0-3-2, who would have thought the soccer team would come so close to playing in the state championship. The team was full of potential and demonstrated a volatile combination of effort and skill. However, due to some bad luck and a few too many mistakes, the team was unable to secure a place in the playoffs against Judson.

Many of the team members made great improvements throughout the season. Special mention must be made of our senior players, Captain Laurence Schreiber, Pete Snegireff, Eric Hagstrom, and Pat Boskon, all of whom provided a solid base and excellent leadership qualities. Despite the loss of Cliff Smith to injury, sophomores Peter Cove, Rob Portnoy, and John Snead amply represented their class. Finally, freshmen Andy Shanken and Chuck Bain showed much maturity of judgement and skill.

The team is young. However, it has great potential; P.C.D.S. soccer fans can look forward to a promising future.

SEASON RECORD 6 wins- 12 losses

This year the Eagle Girls Varsity Basketball team was a very young team. Made up of mostly underclassmen. The hustling Eagles showed improvement as the season progressed. Learning the fundamentals of basketball was an important part of their season.

Next year, with most everyone returning, the future looks bright for the Eagles. The team was coached by Tom Cove.

The Eagles basketball team finishes the season on a positive note by winning two of their last three games. The Eagles were a young team, consisting mostly of freshmen and sophomores. Early in the season, starter Cliff Smith suffered a knee injury which took him off the team for the remainder of the season.

Highlights of the season were a 33 point game by Senior guard, Ken Snodgrass. Another Senior member who put forth super effort was Neal Alagia.

Next year's team will be more experienced, as well as, more competitive in conference play.

CHEERLEADERS

The 1982-83 school year was the dawn of a new era of spirit at P.C.D.S. With uniforms donated by Mrs. Snodgrass and nine energetic young ladies interested in promoting spirit, Country Day cheerleading was renewed.

The P.C.D.S. cheerleaders have proved to be a real asset to our school. The squad has worked hard to promote pep and enthusiasm for the success of our Varsity Sport Teams.

Our cheerleaders are well-trained, hard working, and have a winning attitude.

HALLOWEEN

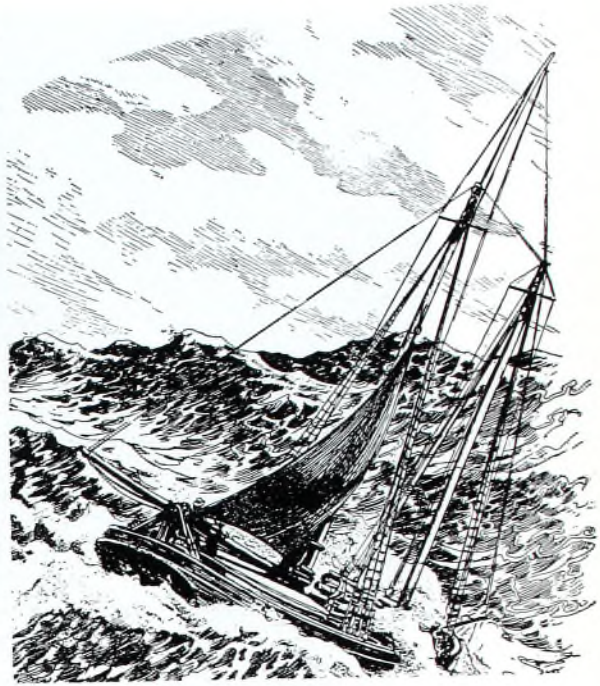

NEW HORIZONS

P.C.D.S.'s annual exercise in experiential education- New Horizons- extended from March 4 to March 14 this spring. "Learning-by-doing" guides the content and format of the program.

This year a number of experiences highlighted the ten-day event. Off-campus opportunities to participate in an archeological dig in southwestern Colorado and a mule pack in the Superstition Wilderness joined the whale trip off Baja and the congressional seminar in Washington, D.C. as popular offerings. In addition, New Horizons on-campus featured the Upper School's first visiting artist-in-residence, Mr. David Lang, Art Department chairman of the Middlesex School in Concord, Massachusetts. Mr. Lang conducted a week-long workshop in watercolor painting.

The Westerner

By Badger Clark

My fathers sleep on the sunrise plains;
And each one sleeps alone.
Their trails may dim to the grass and rains,
For I choose to make my own.
I lay proud claim to their blood and name,
But I lean on no dead kin;
My name is mine, for praise or scorn,
And the world began when I was born
And the world is mine to win.
