Chairman's Corner

Recent Notable Heavy Haulage

The Big Church Move

Follow the unique move of Kiruna church, from the old town center to its new location, five kilometers away.

The large church move took two days and is part of the extensive urban transformation.

The iconic church is 40 meters wide, 35 meters high and weighs 672 tons.

The work required extreme precision.

Chairman's Corner

Shipping Line Contacts

Dear Network Members. Listen up. Yangming Line in Taiwan (sail with ONE AND HMM) are also strong in Breakbulk and OOG cargo via container vessel. I asked for their regional reps for this but they have centralised it in Taiwan. They are forwarder friendly normally. So here is a copy of the email exchange I have had on behalf of our network. Read it and contact Brian in future if you got OOG/BBK inquiry to place on Yangming Line.

Begin quote:

Dear Drewsen,

It's pleasure to receive your mail by showing your great interests in cooperating the OOG/BB shipment with YML. And thanks to Nelson, he is introducing you the right team, Commercial Special Dept., who is dedicated to handle those products in global of active reefer, DG, and all kinds of special equipment.

YM provides global services to those mentioned markets for OOG/BB shipments. You may access the Long Term Schedule of each service by following <https://e-solution.yangming.com/e-service/schedule/LongTermSchedule.aspx#ASI-AUS> The operations of loading/discharging ports will be quite varied depending on the dimensions of the shipments, which will be led the decisions to take or not.

Please let me know if you need of any further assistance or information. Hope to receive your further inquiry in near future.

Best Regards,

Brian Su

Total Movement Delivers A 375-tonnes Vacuum Tower from Western to Eastern India

Vacuum Tower Transported from Western to Eastern India via Multimodal Route

A 375-ton Vacuum Tower was moved from the western to the eastern coast of India using a combination of road and coastal shipping.

Key Facts:

Cargo Size: The Vacuum Tower measured 55.73 meters long, 10 meters wide, and 9.45 meters high.

Electric Line Shutdowns: 16 overhead power lines were temporarily shut down along the route to allow cargo movement.

Civil Works: Over 100 steel plates were laid at key turning points to support weak road sections and allow safe turning.

Coastal Shipping: A Super Heavy Lift vessel was chartered and converted to an Indian-flagged vessel to comply with regulations for coastal movement.

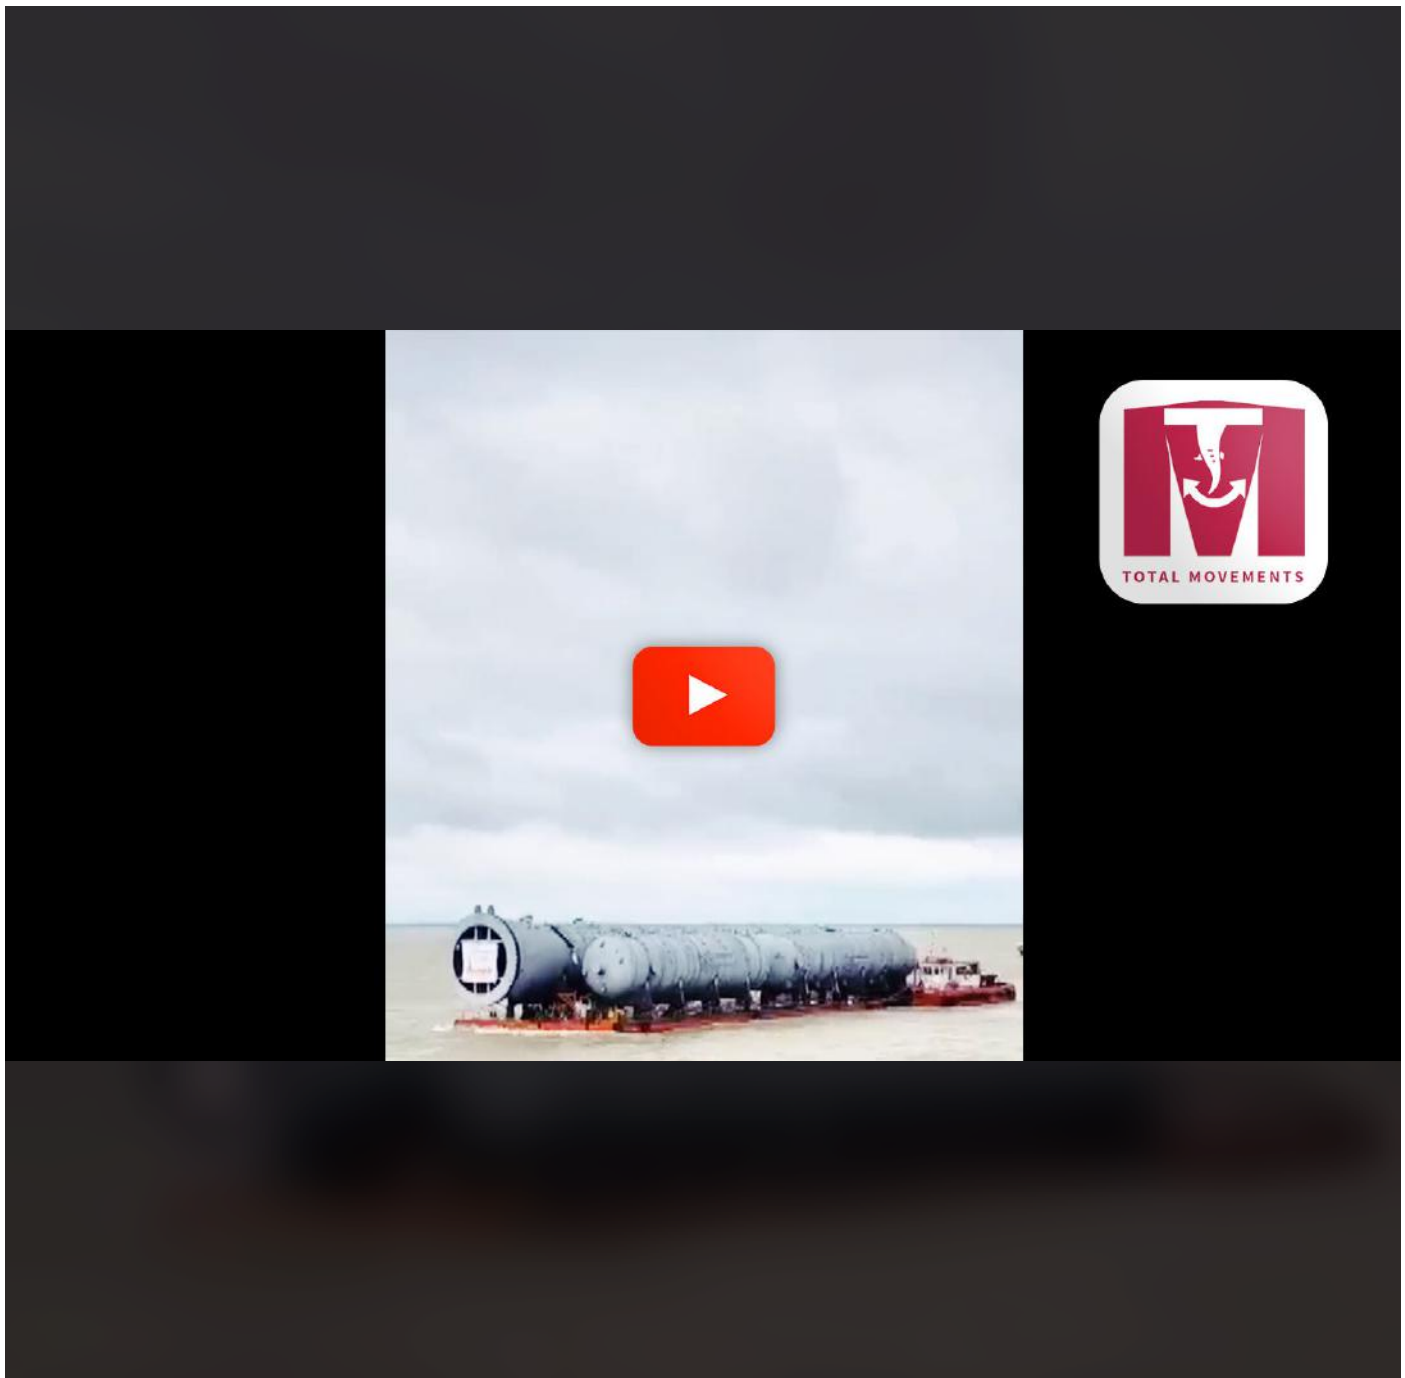

Discharge Port Operations: Double banking operations were carried out under the supervision of a Marine Warranty Surveyor to safely offload the cargo.

Star Shipping Pakistan Transported an Industrial Module from Port Qasim to Site

Abnormal & Heavy-lift Cargo Movement onto Multi Axle Hydraulic Trailers within Karachi City Urban Limits

Delivery of an industrial module from Engro Site in Port Qasim Eastern Industrial Zone to Shershah/SITE Area, Karachi

Star Shipping Pakistan has proudly been the leading one-window integrated project logistics solutions provider in Pakistan for over 20 years. We serve both our national and international clients with a friendly, cost-effective approach,

backed by a global network, 24/7 available equipment, and a dedicated team of experts always ready to assist you.

Star Shipping Pakistan specialises in managing comprehensive turn-key projects and oversized heavy-lift cargo with top-notch machinery and a highly skilled technical team that brings a wealth of experience in logistics. The company prides itself on a strong history of successfully delivering integrated projects and is well-regarded as a leader in handling large break-bulk and heavy-lift project cargo shipments.

Our hardworking operational team recently took on the impressive task of loading and delivering a large, heavy industrial module weighing 140 tons. This module, with its extraordinary length exceeding 149 feet, was transported from Engro Site in Port Qasim Eastern Industrial Zone to the Shershah Salvage market near the SITE area in Karachi (PAKISTAN). We're proud of their dedication in handling such a remarkable project!

The relatively short distance of 80 KM turned out to be the most challenging part of the journey because the destination was located within the bustling, densely populated city of Karachi. Thanks to an early route survey for technical analysis of the roads, we were able to deliver the large and heavy module safely and securely to its destination.

Star Shipping Pakistan is delighted to share the wonderful news of successfully delivering an oversize heavy-lift within the vibrant districts of Karachi City, the bustling heart of Pakistan. We are grateful for the grace of the 'ALMIGHTY' that made this achievement possible.
