WHY ZOZIMUS DRAMA?

Zozimus Drama is a story led drama programme designed to help children build confidence, creativity and communication through imaginative adventures and immersive play.

Children do not sit and rehearse scripts or work towards performances. Instead, they step inside stories, solve problems, become characters and build confidence through drama sessions they genuinely love.

Now, you can bring the Zozimus approach to your own area with a proven system, ready made resources and ongoing support behind you.

Whether you are looking for a fresh creative direction, greater flexibility or the opportunity to build something meaningful around your life, Zozimus Drama gives you the structure and support to get started with confidence.

MORE THAN A DRAMA CLASS

“Zozimus Drama was created to give children a space to build confidence, explore their imagination and express themselves without the pressure of performance.”

Over the years, I have seen first hand how powerful story led drama can be in helping children grow in confidence, creativity and self belief.

As a mum of two young children myself, I also wanted to create something that gave people the freedom to build a meaningful business around their life while making a genuine difference in their community.

*This is not just about running drama classes.
It is about creating spaces where children feel safe to imagine, belong and grow.”*
