DDTP®

Advance Performance

QUALITY. PERFORMANCE. VALUE.

Diesel Engine Components & Heavy-Duty Truck Parts

An OEM alternative built around quality materials, dependable performance, and competitive value.

Quality Materials

Top-grade materials and manufacturing guided by OEM specifications.

Performance & Durability

A commitment to product quality, fit, and equipment performance.

Service & Value

Competitive pricing, customer support, and a comprehensive standard warranty.

USA COMPANY

Quality you can count on. Value that keeps you moving.

Backed by a comprehensive standard warranty and liability insurance.

Diesel Engine Oil

DDTP synthetic blend engine oil is formulated to meet or exceed API diesel engine oil specifications, as well as the warranty and performance requirements of most diesel engine manufacturers. Advanced API CK-4 additive technology is backward compatible with service categories CJ-4, CI-4 Plus, and earlier categories.

This oil is recommended for naturally aspirated and turbocharged four stroke diesel engines that require API- CK-4 oil. It is formulated for engines operating under severe service conditions and across a wide range of cold and hot temperatures.

Filters

DDTP
Advance Performance

As we continue to expand our aftermarket product range, we proudly introduce DDTP Filters. Our line includes fuel, lube, coolant, and air intake filters for diesel engines, as well as transmission and hydraulic filtration applications.

Made by OEM companies using high quality materials, advanced manufacturing processes, and proven filter media technologies, our filters deliver high levels of efficiency and contaminant retention under dynamic conditions.

Why Choose the DDTP Brand?

DDTP offers an excellent value for your investment, to help keep your equipment operating at peak performance. Through our private label, you get quality, performance, service, and durability at competitive prices, backed by a comprehensive standard warranty and liability insurance.

& Electronics

DDTP
Advance Performance

Wiring Harness & ECM

Dependable engine control starts with quality components. DDTP wiring harnesses and ECMs connect engine sensors with the electronic control system, supporting fuel injection control, performance monitoring, and fault diagnostics.

Quality wiring, durable protective coverings, and secure connections are essential for consistent signal transmission in demanding heavy-duty applications. The ECM processes sensor information to help manage engine operation and support engine protection.

Air Compressors

The air brake system of a truck is complex, with many components essential for safety and performance. Building and maintaining sufficient compressed air pressure is both challenging and critical. Our air compressors are brand new and built to OEM specifications by leading manufacturers, using the latest technology. Fully automated production and strict quality control processes help ensure reliable performance and durability. We also offer repair kits and cylinder head kits for various applications, including Detroit Diesel, CAT, Cummins, Volvo, Mack and more.

Air Dryers

DDTP
Advance Performance

As part of our air brake system product range, we offer new air dryers, air dryer cartridges, and air valves for various applications, including Freightliner, Kenworth, Peterbilt, Mack, Volvo, and International. Keeping Air brake lines free of contaminants is essential to the performance of the system's critical components. Built from high quality materials to OEM specifications, our units are individually tested under strict quality control procedures to ensure reliable performance.

Radiators & CAC

DDTP
Advance Performance

Radiators and charger air coolers are key components of a vehicle's cooling system. Radiators dissipate excess heat from the engine coolant, while charger air coolers lower the temperature of the compressed intake air. Both transfer heat to the air passing through the vehicle's front grille.

DDTP offers heavy duty radiators and charger air coolers for light and heavy duty trucks and off-highway equipment. Built to withstand demanding operating conditions and prolonged heat exposure, our range includes applications for Freightliner, Kenworth, Peterbilt, Volvo, Mack, and International.
