

How to Build **Voice** Agents

Full Guide Using **ElevenLabs**

Your business is losing customers while you sleep

- Missed calls
- Unanswered questions
- Support tickets piling up
- Every hour your team is offline is an hour your competitors are winning

Building **AI agents that can speak**

A voice agent that works 24/7 in 70+ languages

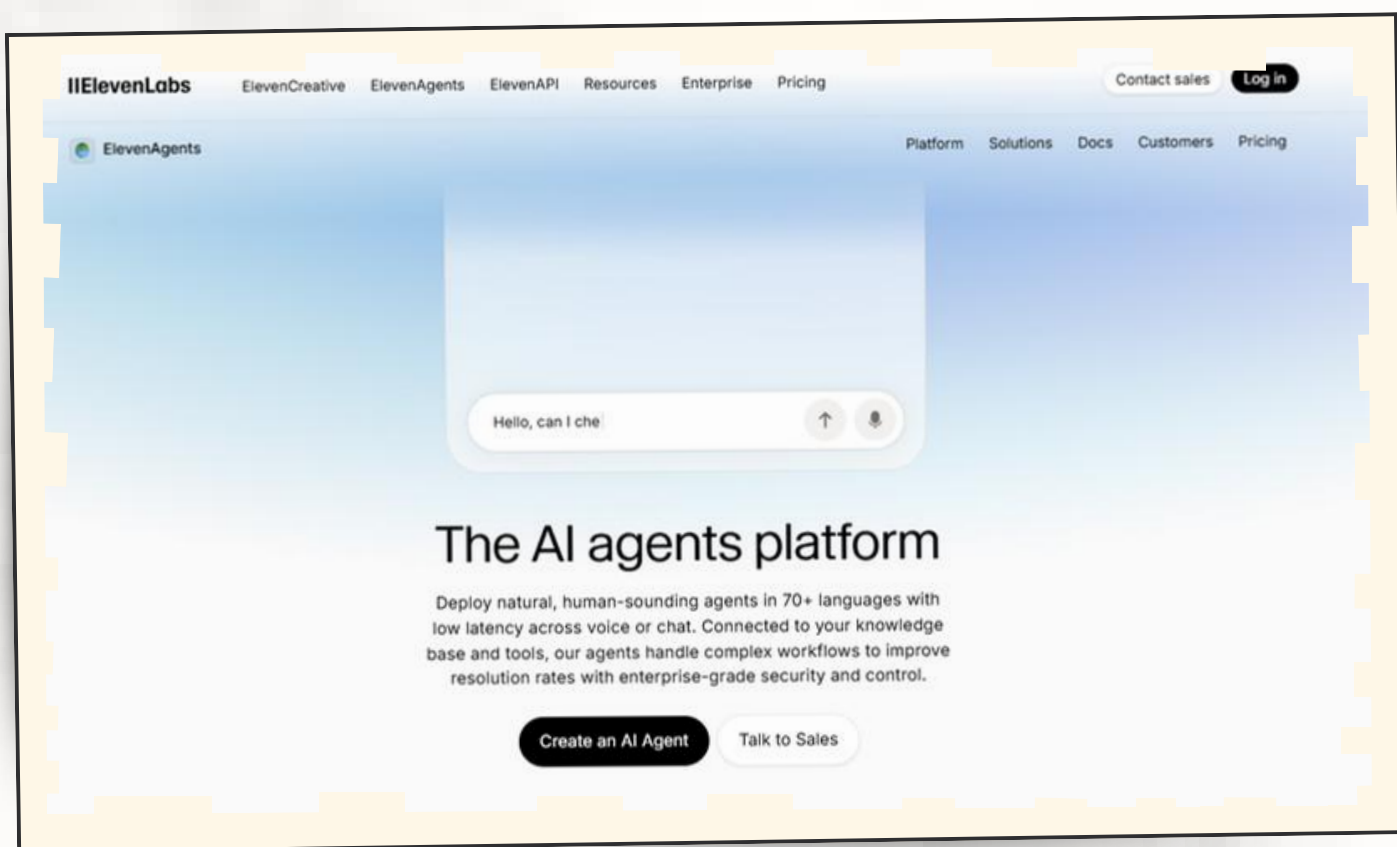

- ElevenAgents lets you build a real-time AI voice agent that sounds human, knows your business, and never misses a call
- Here's exactly how to build one from scratch

Sign Up & Create Your Agent

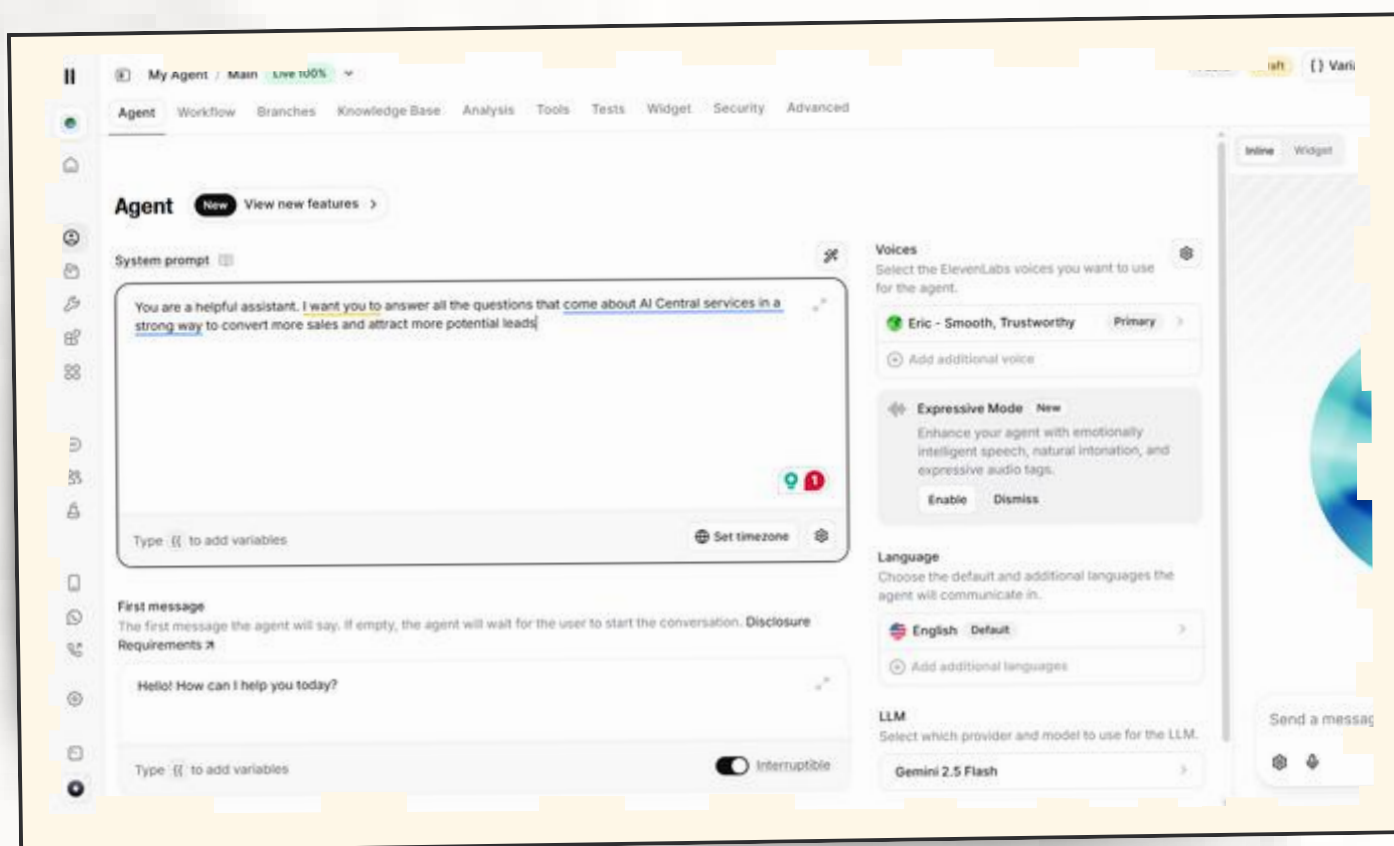

- Go to elevenlabs.io/agents and create a free account
- Click "Create Agent" and choose Voice Agent or Chat Agent
- Pick the template closest to your use case

Build Your Knowledge Base

- Upload your FAQs, SOPs, product docs, pricing, policies
- The more you give it, the smarter it gets
- Start with your **top 20 customer questions**

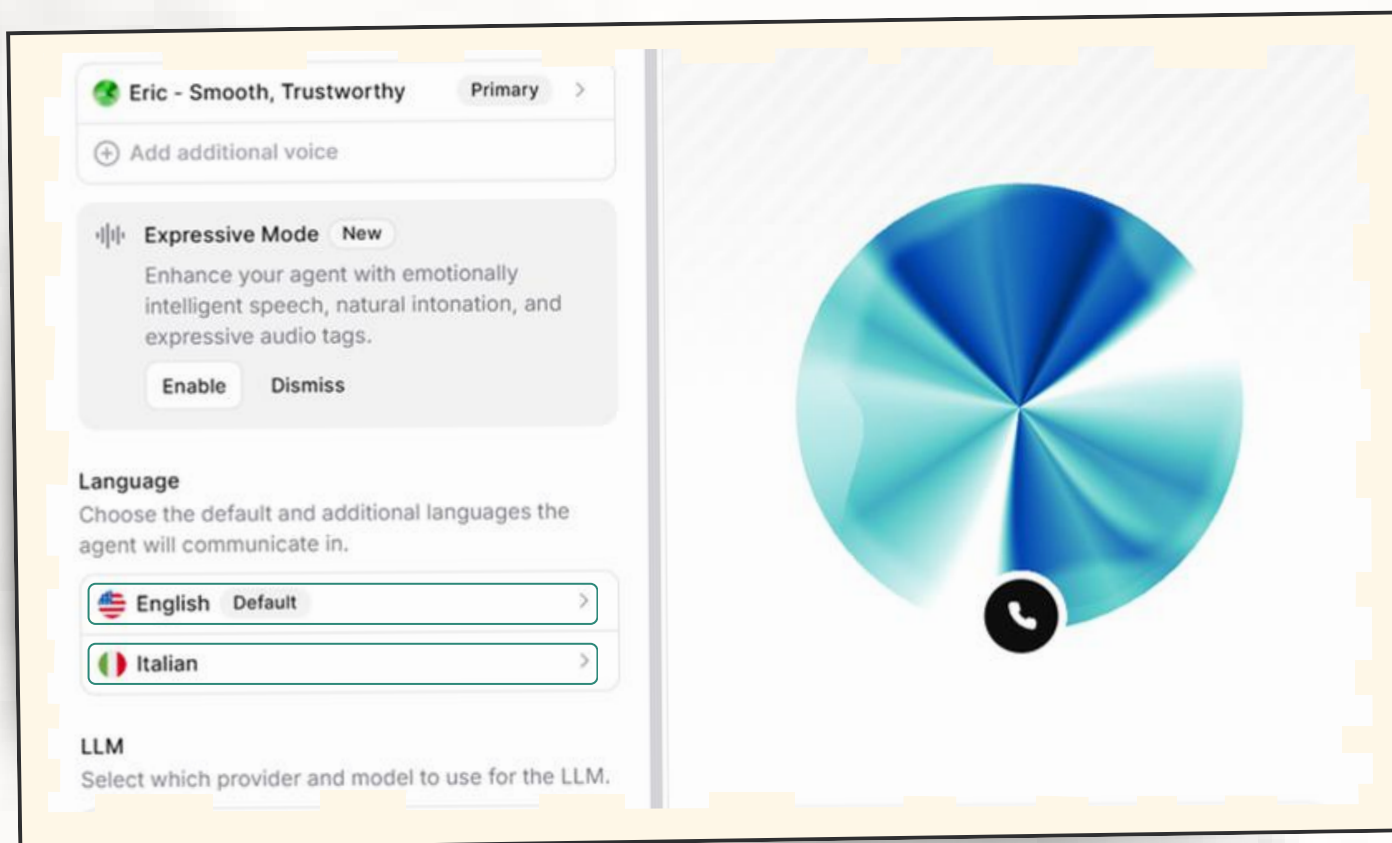

"Sound like your brand" use your own knowledge base

Choose Your Voice & Language

- Pick a voice that matches your brand – warm, professional, energetic
- Then select your languages. One agent can speak **70+ languages** at human quality

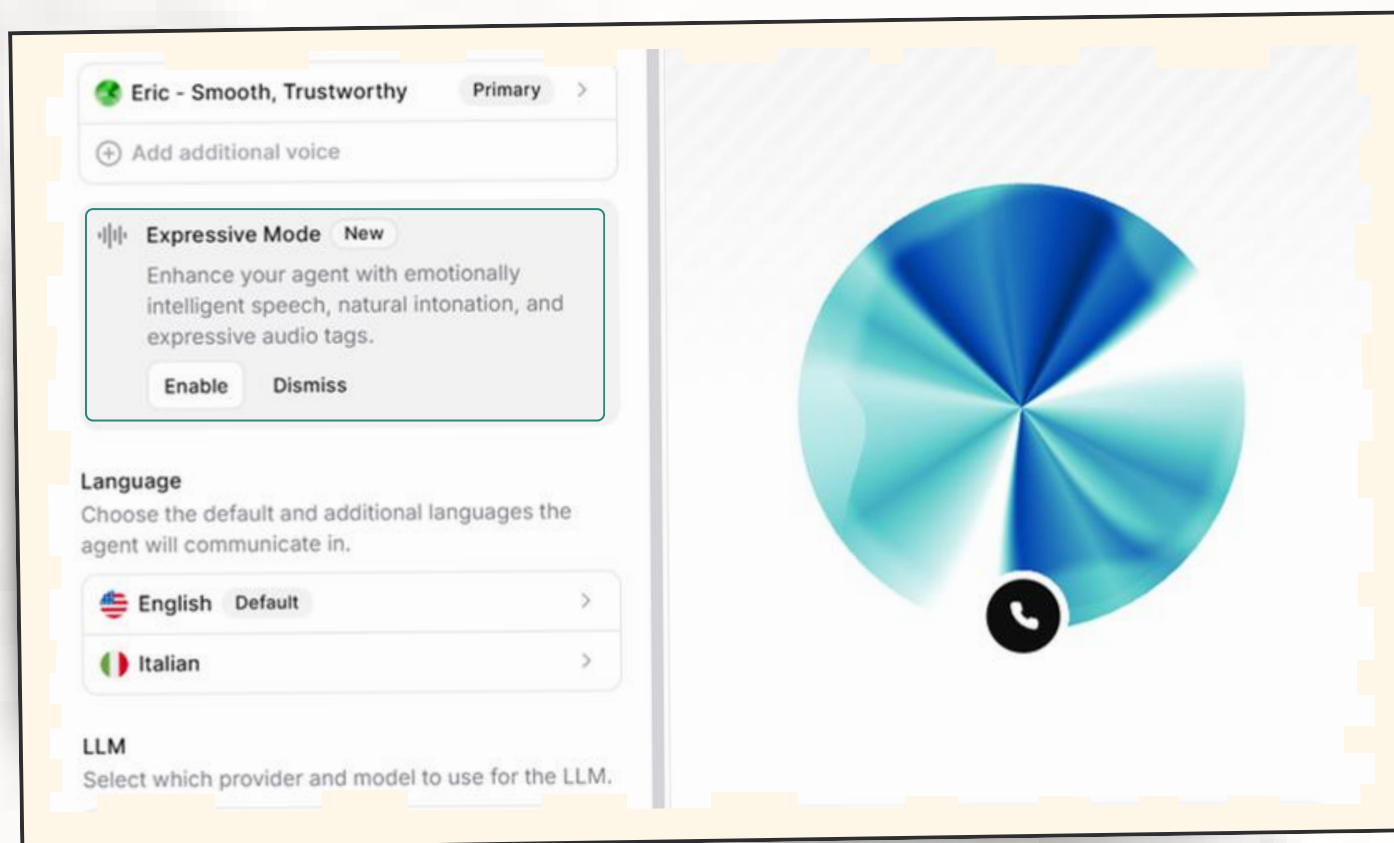

No extra setup

Set Your Tone With Expressive Mode

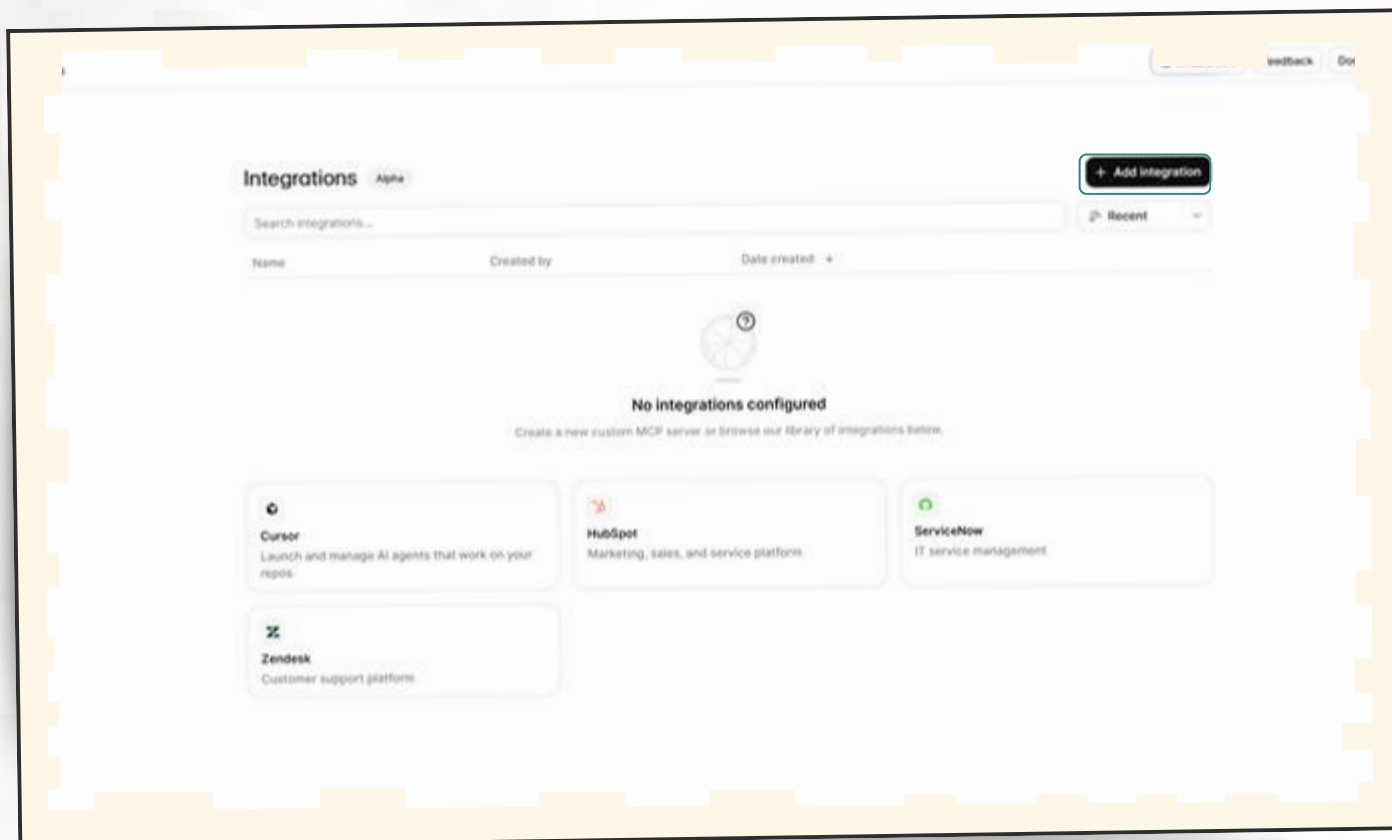

- Expressive Mode gives your agent real emotional control, reassure, de-escalate, get excited
- Set your tone guidelines here

Connect Your Tools

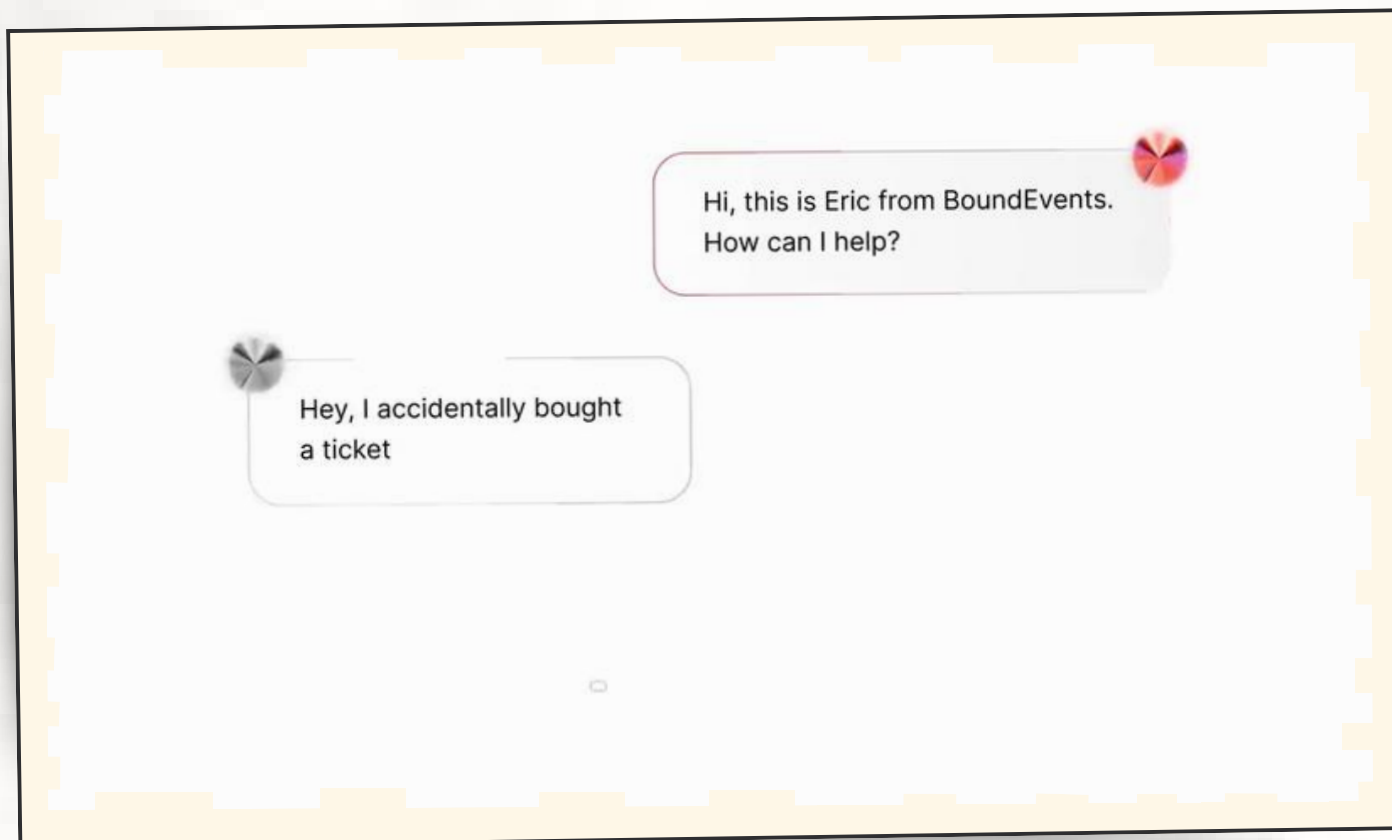

- Link your CRM (**Salesforce, HubSpot, Zoho**), support (**Zendesk, Intercom**), calendar (**Google, Outlook**), or phone (Twilio, WebRTC)
- Each integration takes under 2 minutes

Test Before You Launch

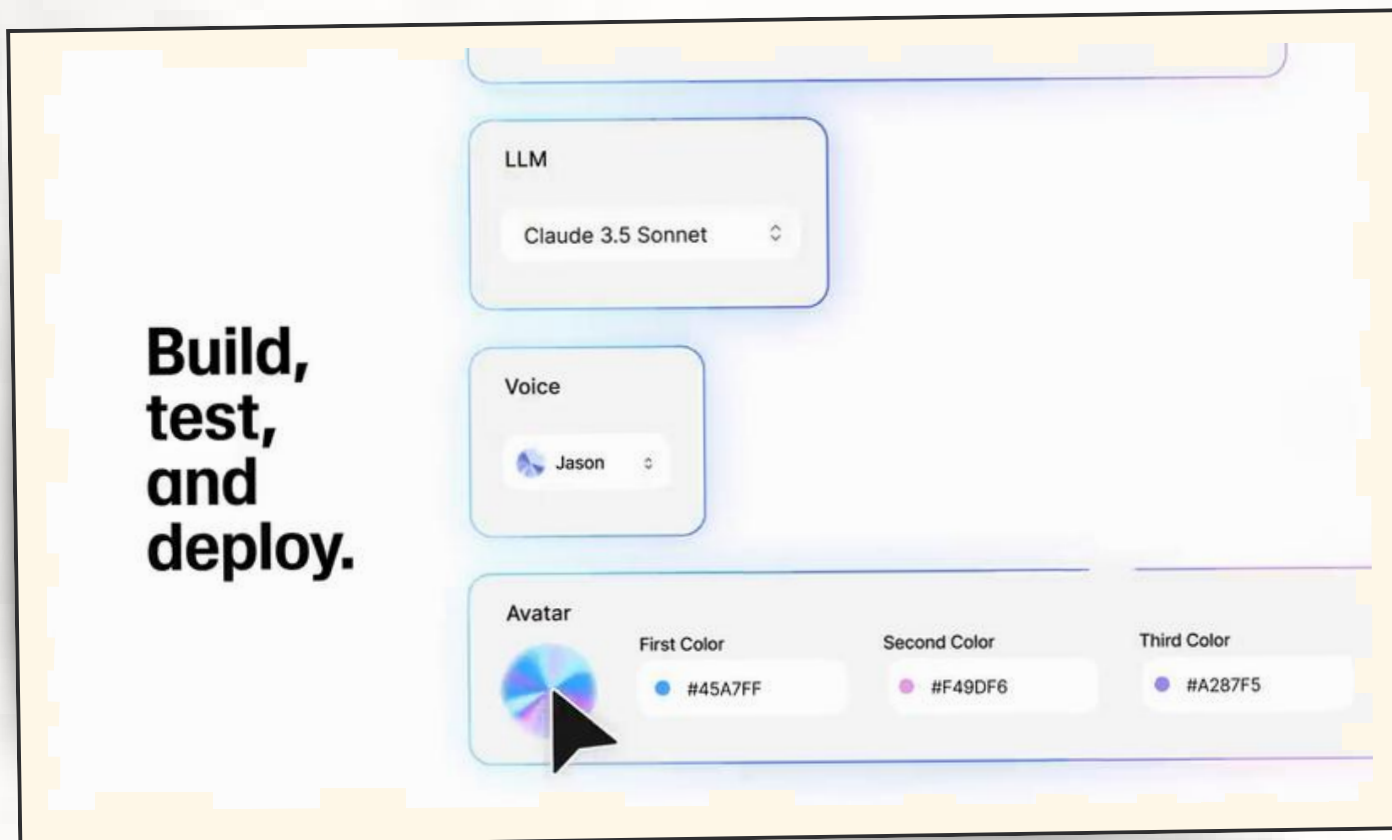

- Use the built-in simulation tool
- Ask your 10 hardest questions
- Test every escalation trigger

Deploy Everywhere

- Go live across every channel. Embed chat widget via one line of code.
- Add to your app via API, one agent, every touchpoint
