Sires

2026 - 2027 DIRECTORY

www.showboxsires.com | info@showboxsires.com

All sires included in the directory are available exclusively
through Select Sires and World Wide Sires.

Founded in 2023 by Holstein breeders Mike and Julie Duckett and Tim and Sharyn Abbott, Showbox Sires was created with a clear purpose: use modern breeding tools to develop sires that produce the stylish, eye-catching cows breeders value, while still delivering strong production and health. Strong maternal lines remain the foundation of our program, and we continue to emphasize strength over stature. As we reflect on another year of growth, we are thankful for the breeders around the world who have placed their trust in our genetics and become part of the Showbox family.

The greatest reward of building our program has been witnessing the success of our customers worldwide. This year, daughters of Showbox sires earned recognition in the showing and sales ring alike, while countless photos, messages and conversations with customers highlighted the excitement surrounding the next generation of cattle created with Showbox genetics. These relationships brought us to several countries throughout the year, where we strengthened longstanding friendships, forged new connections and witnessed the growing influence of the Showbox Sires lineup and female embryo program firsthand. We are grateful for the enthusiasm breeders around the world have shown for our genetics and are excited to continue growing these partnerships in the years ahead by co-hosting sales, attending shows and visiting customer herds.

One of the experiences that sets our program apart is the opportunity for breeders to see the cow families behind the sires in person. Each year at World Dairy Expo, many of the bull mothers and maternal sisters connected to our lineup can be found competing in the ring and on display in our show string, allowing customers to evaluate the genetics that they are amplifying in their breeding programs, connect with us, and learn more about what's on the way.

As we look ahead, we remain committed to identifying exceptional cattle, building meaningful relationships and providing genetics that create opportunities for breeders everywhere. Thank you for your support, trust and belief in our program. We look forward to continuing this journey together.

Gratefully,

Mike, Julie, Sharyn, Tim
