Overview

The Art of Brain Dynamics

The unconscious is the driver of ALL creativity, and innovation .

The duality of the unconscious and conscious brain and self has been at the epicenter of all of my Art and Science over half a century.

The brain, the cosmos between our ears, speaks two languages: the unconscious language of patterns, cues, and symbols, and the conscious language of words and numbers.

Art is my bridge that HARMONIZES those worlds.

My unconscious emerges onto the canvas through abstract patterns, color scrapes, tree-like brushstrokes reflecting neural networks, and symbolism. I am always amazed by how automatic abstract painting is.

Above all, and most of the time, my art is simply unbridled, exploratory, & deeply fun.

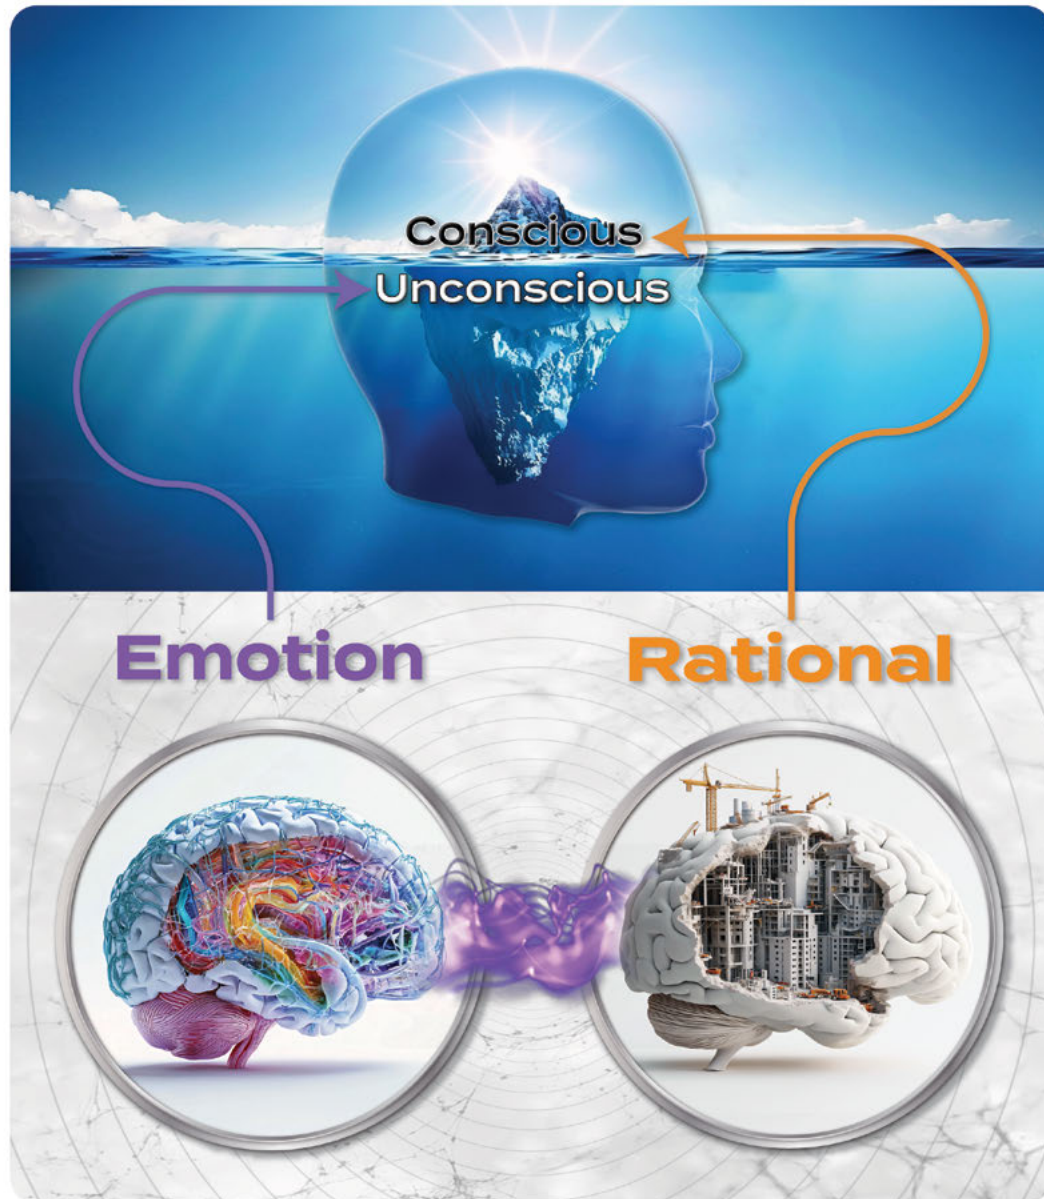

Brain Dynamics Meets Art

Over 90% of our thoughts and decisions come from the unconscious. We risk stumbling through life if we don't align our unconscious emotions with conscious rational thought. My paintings feel like a fragile balance between harmonization and fracture of these dynamics.

Since I was 19, my Saturday afternoons have been dedicated to this deep fun, and opening my mind to these unconscious insights. Art and science have been my inseparable companions for over five decades, two sides of the same coin.

Art has reflected my flaws, and mirrored the areas of my scientific work. It has also captured the challenges of my scientific mission, which has felt akin to a Sisyphus addiction.

*"Until you make the unconscious conscious, it will direct your life,
and you will call it fate." - Carl Jung*

Recurring Themes in My Art

1. Symbols: As Brain Metaphors

I was determined not to be a “shadow artist”, copying others. I developed my own style, symbols, and abstract expression. What did inspire me in other artists wasn’t technical brilliance but deep meaning, emotional impact, and the core ideas behind their art.

The innovation and symbols of two of my favorite artists, Salvador Dalí and Pablo Picasso, inspired this AI recreation project.

- **Dalí’s** metaphors: Melting clocks (mortality), ants (decay), & eggs (hope).
- **Picasso** metaphors: Disjointed faces and shark heads reflected the turmoil of his relationships with his seven lovers, who he painted in idealized then demonized forms.

Art mirrors life.

Decades of brain science shaped the visual language in my paintings. My symbols represent core brain dynamics, including: safety first, unconscious emotions and intuition, bias, conscious rational and feeling functions, harmonization, fracture, self, and above all, purpose.

The patterns in my paintings have a big picture theme juxtaposed with tiny details and embedded symbols.

2. Masks: The Personas We Project

Masks in my work symbolize the roles we play to adapt and survive, the inauthentic selves we present to conform and seek acceptance. The flow around the masks represents the struggle to harmonize the unconscious and conscious self, peeling back layers to reveal authenticity.

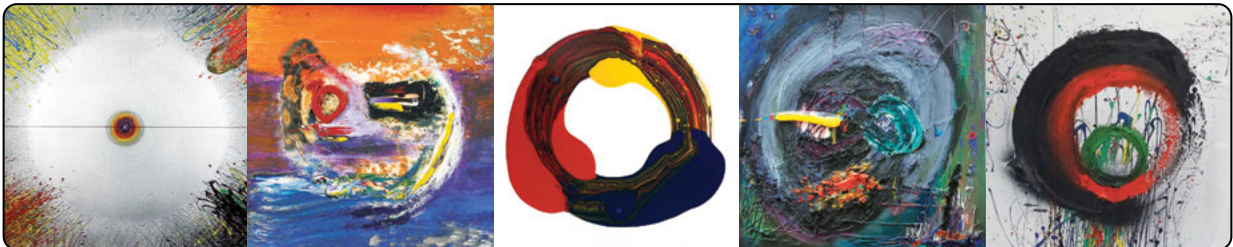

Symbols of Brain & Self

	The Big Bang		Brain Dynamics
UC→C	Unconscious-Conscious Dynamics		Fight - Flight (FF) vs Vagus (10)
	Circle of Safety & Check of Reward		Divergent - Convergent Thinking
	Unconscious-Conscious Insight		Brain Function Continuum
	Emotion		Habit Generation Milestones
	Feeling		Integration
	Cognition		Purpose

Masks

Circles

3. Circles: Energy, Unity, and Authenticity

From the cosmic energy of the Big Bang to Self-Discovery, circles in my art capture my search for authenticity. Shedding masks embraces wholeness.

The New Dialogue: AI, Brain, and Art

AI brings profound risks, from misinformation to workforce upheaval. But it also expands creativity, putting the entire history of human knowledge and images at our fingertips. Creativity has been humanity's driving force for millennia. AI adds a new layer to "possibility thinking" in creativity, and innovation.

This book documents my first Brain-AI Experiment.

I used AI to recreate my original abstract artworks of Brain Dynamics in the style of Salvador Dalí and Pablo Picasso. The results were a joy, mind expanding, and somewhat startling.

Art Presentation Framework

Each painting in this book is presented alongside two AI recreations:

1. In the Style of Salvador Dalí

Surreal dreamlike symbols of the unconscious mind's fluid and abstract essence.

2. In the Style of Pablo Picasso

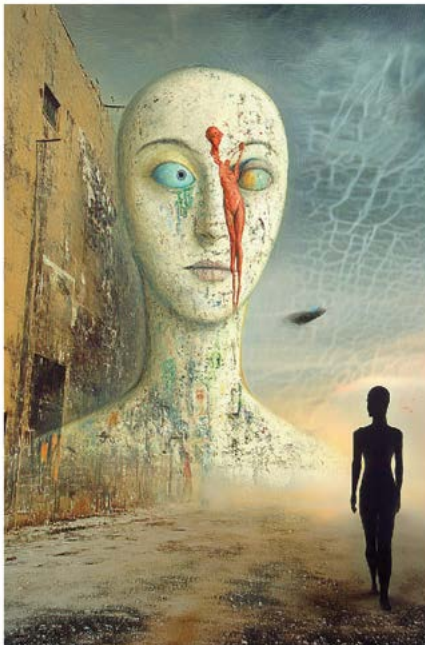

Fragmented forms, mirroring the interplay of chaos and structure.

Each left page in the book features my original artwork. The right page presents AI recreations: **Dalí's** interpretation (left), **Picasso's** (right).

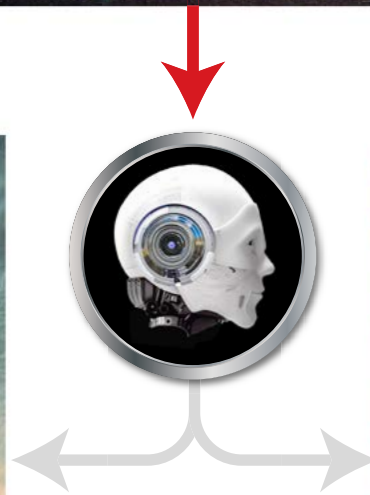

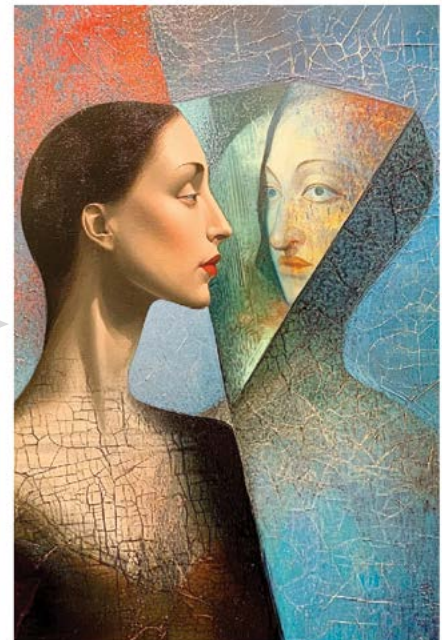

Evian Gordon - Original Painting

AI - Salvador Dali

AI - Pablo Picasso

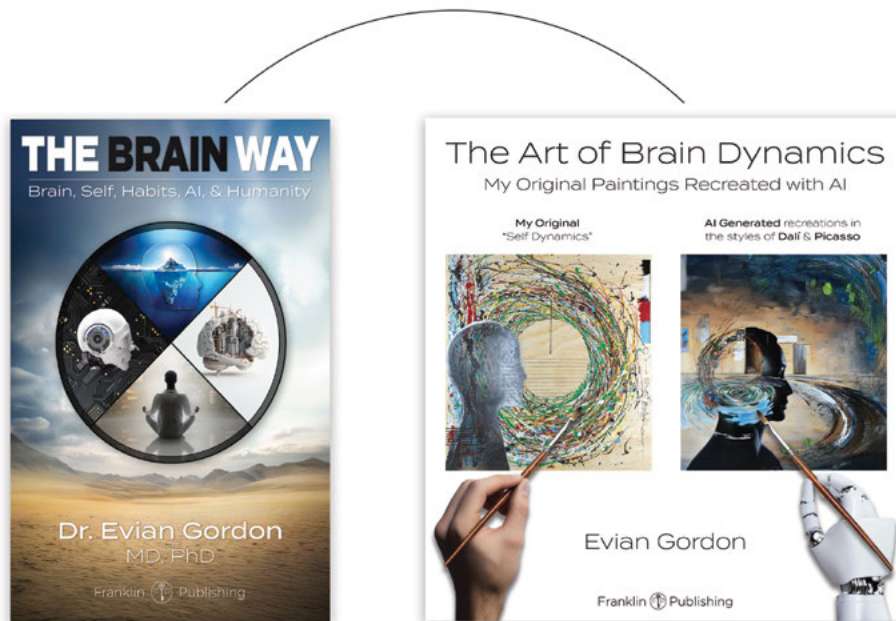

A Journey of Duality

This book, *The Art of Brain Dynamics*, complements my previous Brain books, and my most recent, *The Brain Way: Brain, Self, Habits, AI, & Humanity*.

Together, the books explore the intersection of art, brain science, and self-discovery.

Through art, science, and now AI, I continue to seek awe, innovation, enlightenment, and purpose. I am grateful to share this ongoing dialogue between my unconscious brain and possibility thinking with you.

Thank you for joining me in my first Art-AI experiment.

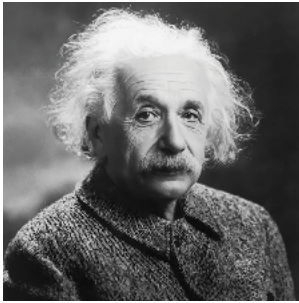

Principles for the Development of a Complete Mind:

"Study the science of art. Study the art of science.
Develop your senses- especially learn how to see.
Realize that everything connects to everything else."

- Leonardo Da Vinci

Imagination and Knowledge:

"Imagination is more important than knowledge.
Knowledge is limited. Imagination encircles the world."

- Albert Einstein

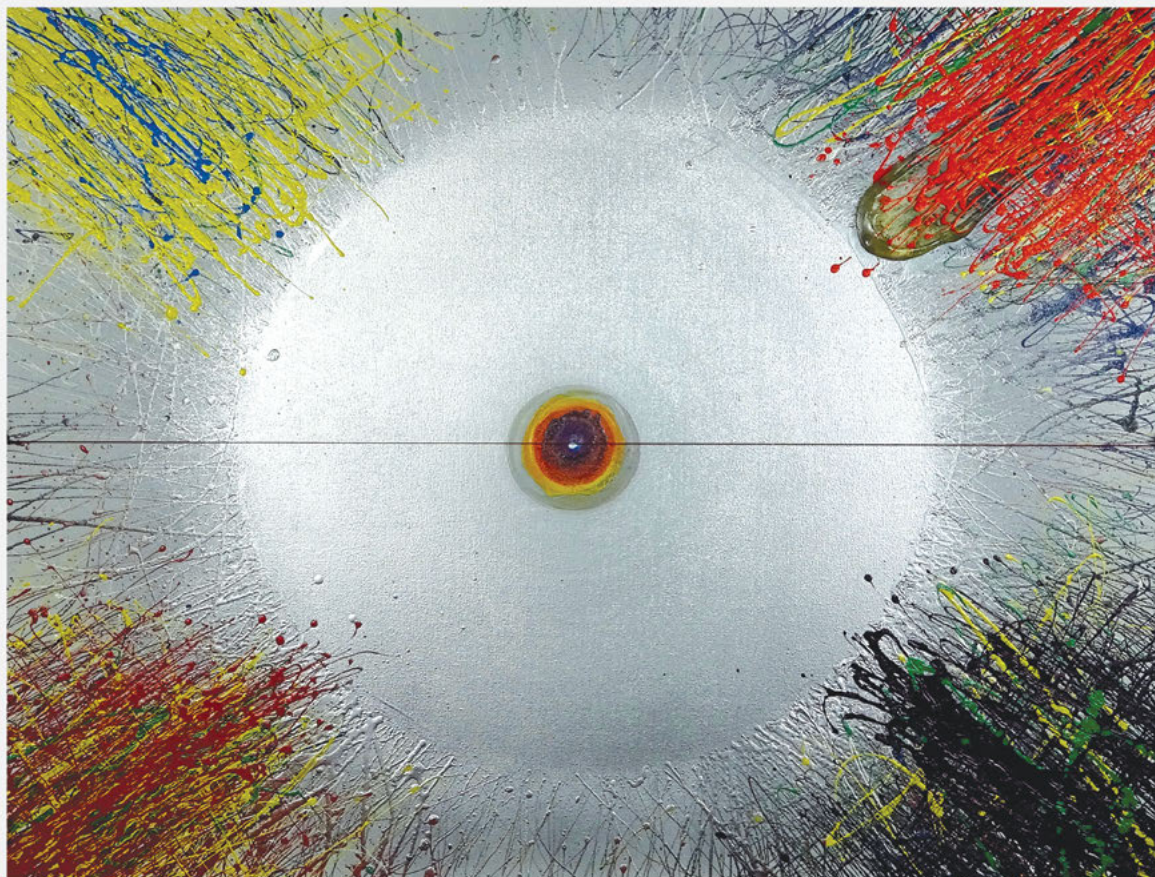

Art-Creativity-Innovation:

"Symbolic and abstract thought shaped the brain's
capacity to produce art -the Art Imperative - facilitating
human cultural resilience up to the present day."

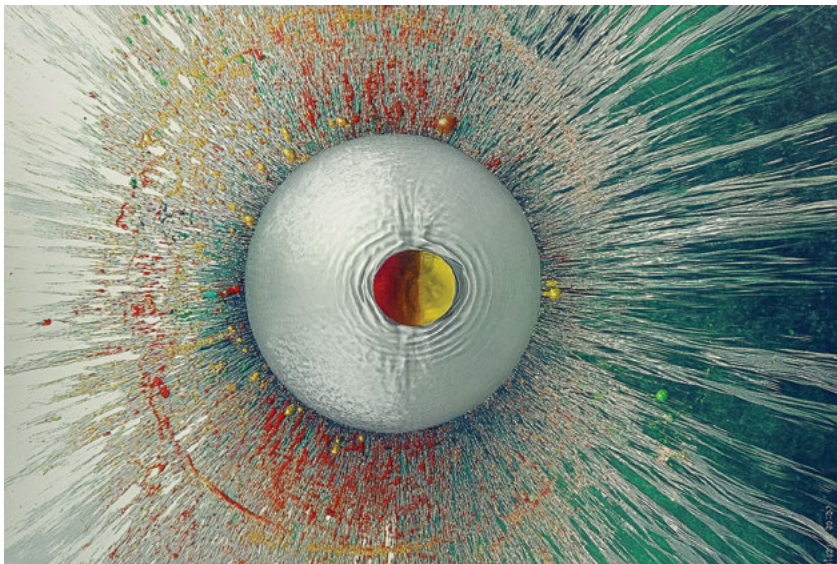

- Phillip Romero
