Sustainable Elegance

Welcome to the world of Handle Bags, where style and sustainability come together to create unique tote bags. Our brand stands for quality and respect for the environment, offering a wide range of designs made from natural and recycled materials.

Our Collections

Our collection consists of tote bags, gift bags, and drawstring backpacks, divided by the materials they are made from:

- Recycled Cotton
- Carbon Neutral Cotton
- Organic Cotton
- Fairtrade Cotton
- Cotton
- Poly-Cotton
- Jute & Juco
- Bamboo & Cork
- Paper
- R-PET
- Polyester & Polypropylene
- Non-Woven (TNT)

Giving Fibres a New Life

Recycled cotton is a sustainable alternative to traditional cotton: it is made from recovered textile waste, maintains quality and strength, yet uses fewer natural resources and helps reduce waste and environmental impact.

For all our tote bags and all our gift bags made from recycled cotton, we have calculated the percentage of CO_2 saved compared to the same product made with virgin cotton.

GRS: the value of a certified commitment

The GRS (Global Recycled Standard) certification attests the use of verified recycled materials throughout the entire production chain. It ensures transparency, traceability, and compliance with strict environmental criteria, promoting sustainable, low-impact manufacturing.

All recycled cotton items in the Handle Bags collection are GRS certified, ensuring consumers a sustainable, high-quality product.

What Are Its Benefits?

Reduction of Environmental Impact

It promotes recycling and the use of recycled materials, reducing dependence on resources such as water and energy.

Responsible social, environmental, and chemical practices

It requires restrictions on the use of chemicals and compliance with environmental and social criteria at every stage of the production chain.

Traceability of the Production Process

It ensures full traceability throughout the entire production process, guaranteeing that recycled materials are present in the finished products and have been processed responsibly.

Create unique shoppers with handle bags

Do you need customized tote bags that reflect your brand's identity? With Handle Bags, you can create exclusive bags tailored to your specific needs. Thanks to our expertise in producing high-quality tote bags, we offer OEM solutions for companies looking to stand out with sustainable and fully personalized products

1 YOUR LOGO
(screen printing, embroidery, raised ink, transfer, etc.)

2 The Material
(cotton, polyester, non-woven, PP, etc.)

3 The Handles
(long, short, double, etc.)

4 The Colors
Choose the colours that best reflect your identity

5 Your Bag Size
Width x Height x Gusset

6 Finishing Options
(velcro closure, zip closure, hangtag, etc.)

7 Custom Packaging
(polybag, barcode, customized label, etc.)

A high-quality special production service, shaped by listening to our customers' needs and always at the forefront!

Your 100% customized order with direct import

Carbon neutral shopping bags

Carbon Neutral products do not contribute to global warming: their overall CO_2 and greenhouse gas emissions are reduced to zero!

To make our products carbon neutral, we have invested in reforestation and renewable energy projects, removing the same amount of carbon dioxide emitted during production.

How We Made Our Products Carbon Neutral

1. Calculating the Carbon Footprint
We mapped all CO_2 emissions related to the product life cycle:
- Production processes
- Transportation
- Use
- Product disposal

2. Reducing Emissions
We apply a series of measures that significantly reduce the CO_2 emissions associated with our products:
- Certified recycled materials
- 85% energy from renewable sources
- Plastic-free materials

3. Neutralising Residual Emissions
The CO_2 emissions that cannot be reduced are offset through internationally certified compensation projects

Fairtrade® cotton shopping bags

Fairtrade® for a Sustainable Future

Fairtrade® is both a certification system and a global movement that promotes fair and equitable trade. Its main goal is to improve the living and working conditions of producers and workers in developing countries, ensuring fairer and more sustainable treatment.

By purchasing the products in this section, you support Fairtrade®'s efforts to help Fairtrade® cotton farmers access significant new market opportunities, with the potential to generate greater social impact and lower environmental impact in their fields and communities.

Organic cotton shopping bags

La certificazione Global Organic Textile Standard (GOTS)

The Global Organic Textile Standard (GOTS) certification is an internationally recognized standard for the sustainable production of textiles made from organic natural fibers. GOTS guarantees the entire production process, adhering to strict environmental and social criteria. To achieve certification, at least 70% of the fibers must be organic, and toxic or hazardous chemicals are prohibited.

GOTS promotes fair working conditions, protects workers' health, and reduces environmental impact, ensuring transparency and traceability throughout the supply chain.

Cotton shopping bags

Cotton bags are a valid alternative to single-use plastic bags, significantly contributing to waste reduction.

Choosing cotton bags helps promote responsible and sustainable consumption, supporting environmental protection and reducing pollution

A Guarantee of Safety and Sustainability

The OEKO-TEX® Standard 100 certification represents a commitment to quality and safety in textile products, ensuring they are made without the use of harmful substances.

Its main objective is to guarantee that products are safe for direct skin contact, reducing risks to both health and the environment. Products certified under this standard are therefore considered safe and compliant with environmental and safety regulations.

All our cotton bags are OEKO-TEX® Standard 100 certified.

Printed to be carried

Our tote bags are the ideal way to express your brand identity in a tangible and creative way. Each model is designed to maximise customization, offering high-quality printing results. We offer two printing techniques to meet every need:

Screen printing: perfect for logos and graphics with up to 5 colours, it guarantees sharpness and long-lasting durability.

DTF (Direct To Film): Ideal for full-colour images and complex gradients, it offers total chromatic freedom.

Choose from three print positions to make each tote bag unique

Front*

Back*

On pocket*

With our tote bags, every detail becomes an opportunity to turn an idea into a distinctive signature of your brand

*You can check the available printing techniques, positions, and respective print areas for each item on our website.

OCEAN Collection

oceancycle CERTIFIED

Oceancycle™

OceanCycle™ is a social enterprise focused on preventing plastic pollution in the oceans and aims to improve the living conditions of coastal communities through direct social initiatives and certification.

Through certification, OceanCycle™ partners have achieved:

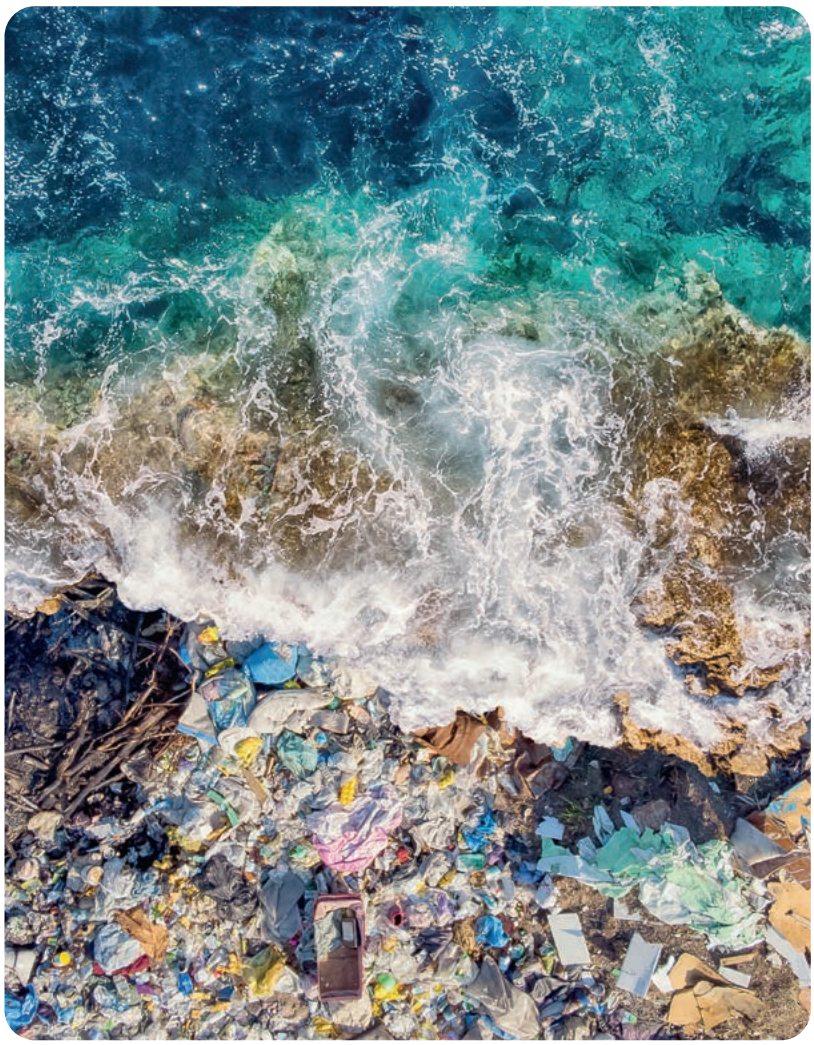

926,000,000
bottles diverted from the ocean

31,300,000
kg of CO_2 avoided

4,600,000
income for coastal communities

The Ocean collection is OceanCycle™ certified. Learn more at oceancycle.co

oceancycle

Prevention is essential

Over 80% of the plastic found in the oceans originates on land, and research shows that plastic that sinks to the seabed is difficult to recover.

Most ocean plastic cannot be recycled

Because in water—combined with salt and light that attract toxins and microorganisms—it degrades. It also breaks into small pieces and mixes with other plastics, making cleanup and sorting difficult and expensive.

The problem is serious and getting worse

Every year, more than 11 million tons of new plastic enter the oceans—an amount that, according to projections, is expected to triple by 2040.

People are the answer

In the countries most at risk of ocean plastic pollution, plastic is collected by hand. To solve the problem, it's necessary to understand the needs of collector communities and provide them with the tools to take effective action.

Print solutions for your business

Bring your message to life with caps designed to maximize customization. We offer two printing techniques to suit every communication need:

Screen printing: ideal for logos and graphics up to five colours, ensuring precision and long-lasting durability

DTF (Direct To Film): Perfect for full-colour images and complex gradients, with no colour limits.

Choose between 5- or 6-panel caps to determine the print position you want.

5-panel cap*

6-panel cap*

Whatever your style, our caps are the ideal way to transform an idea into a distinctive mark.

*You can check the printing techniques, positions and the corresponding print areas available for each item on our website.

Utopic

Utopic

A sustainable future is a utopia which is achievable with the commitment of all of us.

Utopic is the clothing brand that has chosen to do its part. Change starts from our mind and then becomes real with daily individual choices.

What will your choice be?

Utopic recycled

Garments made of regenerated fabrics (recycled cotton and recycled polyester).

Utopic organic

Garments made from organic cotton, grown with respect for the environment.

We use 100% renewable energy for the production of Utopic garments.

Utopic recycled

recycled fabric

Why recycled?

Choosing recycled materials is essential to reduce our impact on the environment and is one of the most effective solutions to address the growing amount of waste globally.

Utopic items in the Recycled section are made from recycled materials. By mixing recycled cotton with recycled polyester, we wanted to create a fabric that combines the best performance properties of both fibers: cotton is a highly breathable material, while polyester is a durable and resistant fiber[1]. In this way, we were able to ensure, through the use of recycled materials, the reduction of our environmental impact[2] and, through the blend of fibers, durable and high-quality materials..

Global Recycled Standard

The Global Recycled Standard (GRS) certification is a recognition of excellence in the field of sustainability and responsible resource management. By guaranteeing a transparent production process that complies with stringent environmental standards, the GRS certifies that the materials used in a product are obtained from recycled sources, thus reducing the negative impact on the environment

The garments in the Utopic recycled collection (zip-up hoodie, hoodie with kangaroo pocket, crewneck sweatshirt, polo shirt, t-shirt) are all GRS certified.

Global Recycled Standard
Intertek 158606

1 https://www.fibre2fashion.com/industry-article/5001/cotton-or-poly-cotton-fabric.

2 in the production phase, compared to a product made with virgin materials, based on our carbon footprint.

The benefits of recycled fibres

1. Gas reduction and greenhouse effect
Recycled fibres use widely reduces greenhouse effect gas emissions compared to conventional fibres

2. Less water and resources consum
Recycled fibres production requires less water compared to virgin cotton cultivation.

3. Reduced use of pesticides and chemicals
Using recycled materials reduces strongly pesticides and harmful chemical substances addiction.

4. Energy saving and waste
The materials recycle process asks for less energy compared to the production of new fibers..

Calculating the Product Carbon Footprint as a mark of credibility and transparency

The garments of the 'Utopic recycled' line were subjected to Product Carbon Footprint analysis of t-shirts, polos and sweatshirts realised in 100% regenerated tissue.

The Product Carbon Footprint represents the greenhouse gas emissions quantities produced during the product's cycle of life. By the definition it cannot be perfect, but it remains a key element to value the production environmental impact.

On every clothe "Utopic Recycled" are written the sustainability information of the item.

Recycled cotton

Recycled cotton can be generally defined as converting cotton fabric into cotton fiber that can be reused in textile products.

The majority of recycled cotton is produced through mechanical recycling: fabrics and materials are sorted and classified; after sorting, the fabrics pass through a machine that tears the fabric into threads and subsequently transforms them into raw fiber[1].

In 2021, the market share of recycled cotton represented only 1% of total cotton production[2]: by choosing to use it, we want to promote its expansion in the market

Reduction of the potential impact index of recycled cotton compared to the virgin equivalent[4]

-67,15%
Eutrophication

-96,32%
Water scarcity

-11,68%
Resources depletion - fossil fuels

-23,82%
Chemistry

-64%

For the production of each of our Utopic items, we saved 64% of CO2 emissions[3]

Recycled polyester

Polyester (PET) is the most widely used fiber in the apparel industry, accounting for approximately 52% of the total volume of fibers produced globally. Currently, only 14% of this is made from recycled content, even if recycled polyester has a significantly lower carbon footprint than its conventional counterpart.

To keep the industry on track toward its climate targets, Textile Exchange has launched the "2025 Recycled Polyester Challenge", which has a long-term vision of bringing the percentage of recycled polyester up to 90% by 2030[5].

recycled fabric

Global Recycled Standard
Intertek 158606

Knitted fabric is made up into a sweatshirt

The yarn is then knitted into fabric

The blended fibres are then spun into yarn

Recycled cotton and recycled polyester fibres are mixed togheter

Used plastic bottles are shredded into small pieces, melted down and made into a recycled polyester yarn

Used cotton textiles are sorted based on type and colour and cleaned; then re-spun into a new yarn

Organic cotton

Organic cotton is obtained from a type of cultivation that does not involve the use of artificial fertilizers and chemical pesticides. Organic farming systems have the potential to sustain and promote the health of soils, ecosystems, and people by relying on ecological processes, biodiversity, and cycles that are adapted to local conditions, rather than using external inputs that could have adverse effects on the environment and on people[1].

The fabric, therefore, has the same quality as conventional cotton but the impact on the environment is much lower[2].

Global Organic Textile Standard (GOTS)

The Global Organic Textile Standard (GOTS) certification is an internationally recognized standard for the sustainable production of textiles made from organic natural fibers. GOTS guarantees the entire production process, adhering to strict environmental and social criteria. To achieve certification, at least 70% of the fibers must be organic, and toxic or hazardous chemicals are prohibited.

GOTS promotes fair working conditions, protects workers' health, and reduces environmental impact, ensuring transparency and traceability throughout the supply chain.

Print solutions for your business

Bring your message to life with t-shirts designed to showcase customisation at its best. We offer two printing techniques to adapt to every communication need:

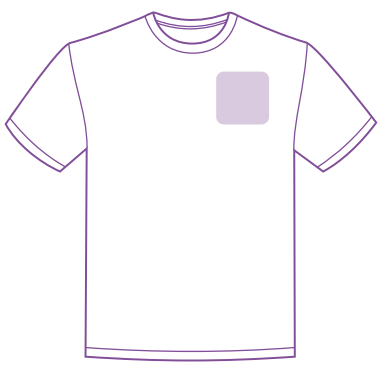

Screen printing: ideal for logos and graphics up to five colours, ensuring precision and long-lasting durability

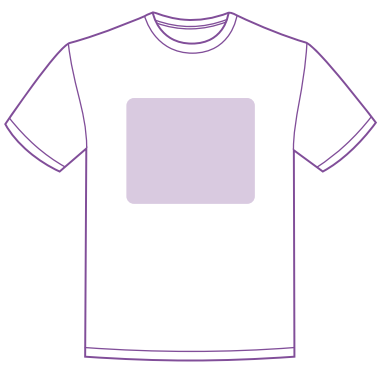

DTF (Direct To Film): Perfect for full-colour images and complex gradients, with no colour limits.

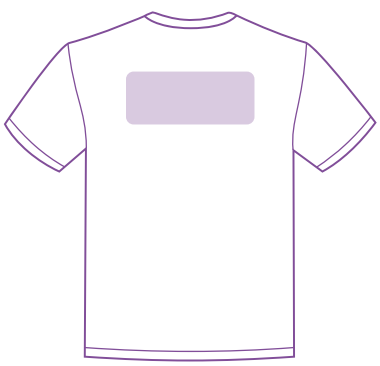

Choose from three print positions to make each T-shirt unique:

Heart side*

Front*

Back*

Whatever your style, our T-shirts become the perfect medium for turning an idea into a distinctive mark.

*You can check the printing techniques, positions and the corresponding print areas available for each item on our website.

12468

8GB rotating USB stick in rubberized ABS and metal. • Clé USB rotative de 8 Go en ABS caoutchouté et métal.

Material: ABS, Metal
Dimensions: 2 x 5.7 x 1 cm
Packaging: 25/600
Customization: Laser, Pad printing

01 02 03 04 05 06 07 44

24432

16GB rotating USB stick in rubberized ABS and metal. • Clé USB rotative de 16 Go en ABS caoutchouté et métal.

Material: ABS, Metal
Dimensions: 2 x 5.7 x 1 cm
Packaging: 25/600
Customization: Laser, Pad printing

09

15454

4GB metal USB flash drive. • Clé USB en métal de 4 Go.

Material: Metal
Dimensions: 2.2 x 5.5 x 0.3 cm
Packaging: 25/300
Customization: Laser

01

12454

4GB USB stick, card-shaped, made of ABS. • Clé USB de 4 Go, en forme de carte, en ABS.

Material: ABS
Dimensions: 5 x 8.5 x 0.2 cm
Packaging: 25/300

Customization: Screen printing, Uv Digitale

01

23458

8GB USB stick, card-shaped in ABS. • Clé USB 8 Go, format carte en ABS.

Material: ABS
Dimensions: 5 x 8.5 x 0.2 cm
Packaging: 25/300

Customization: Screen printing, Uv Digitale

09

24431

16GB ABS card-shaped USB stick. • Clé USB de 16 Go en ABS au format carte.

Material: ABS
Dimensions: 5 x 8.5 x 0.2 cm
Packaging: 25/300

Customization: Screen printing, Uv Digitale

09

20417

8GB USB stick, shaped like a metal card. • Clé USB de 8 Go, en forme de carte métallique.

Material: Metal
Dimensions: 5.4 x 8.5 x 0.3 cm
Packaging: 25/600

Customization: Laser

USB flash drives

24

21404

4GB USB stick in the shape of a wheat straw and PP card. • Clé USB de 4 Go en forme de paille de blé et carte PP.

Material: Wheat straw, PP
Dimensions: 5.3 x 8.4 x 0.1 cm
Packaging: 25/600

Customization: Laser, Screen printing, Uv Digitale

24

21408

8 GB USB card-shaped made of wheat straw and PP • Clé USB de 8 Go en forme de carte fabriquée à partir de paille de blé et de PP.

Material: Wheat straw, PP
Dimensions: 5.3 x 8.4 x 0.1 cm
Packaging: 25/600

Customization: Laser, Screen printing, Uv Digitale

22

20416

4GB USB stick in the shape of a wooden card. • Clé USB de 4 Go en forme de carte en bois.

Material: Wood
Dimensions: 5.6 x 9 x 0.6 cm
Packaging: 25/600

Customization: Laser, Screen printing, Uv Digitale

22

16487

4GB bamboo USB flash drive with metal keychain. • Clé USB en bambou de 4 Go avec porte-clés en métal.

Material: Wood, Metal
Dimensions: x 6.5 x 0.7 cm
Packaging: 25/600

Customization: Laser, Pad printing, Uv Digitale

24

21414

4GB Bamboo Swivel USB Flash Drive. • Clé USB pivotante en bambou de 4 Go.

Material: Bamboo
Dimensions: 5.7 x 2 x 1 cm
Packaging: 25/600

Customization: Laser, Screen printing, Uv Digitale

24

21418

8GB Bamboo Swivel USB Flash Drive. • Clé USB pivotante en bambou de 8 Go.

Material: Bamboo
Dimensions: 5.7 x 2 x 1 cm
Packaging: 25/600

Customization: Laser, Screen printing, Uv Digitale

09

22455

4GB Bamboo and Metal Rotating USB Flash Drive. • Clé USB rotative 4 Go en bambou et métal.

Material: Bamboo, Metal
Dimensions: 5.7 x 2 x 1 cm
Packaging: 25/600

Customization: Laser, Pad printing

09

24406

8GB Bamboo and Metal Rotating USB Flash Drive. • Clé USB rotative 8 Go en bambou et métal.

Material: Bamboo, Metal
Dimensions: 5.7 x 2 x 1 cm
Packaging: 25/600

Customization: Laser, Pad printing

Writing

In this chapter you will find a complete selection of pens, pencils and long-lasting pencils, available in many models and a wide range of colors.

The collection ranges from classic materials such as metal, plastic and aluminum to more innovative, eco-friendly solutions, including bamboo, wheat straw, cork, R-PET and recycled aluminum.

Bamboo pens

02 03 04 09 10

25807

Bamboo and metal retractable pen. Burnished details. • Stylo rétractable en bambou et métal. Détails polis.

Material: Bamboo, Metal
Dimensions: Ø 1 x (h) 14.5 cm
Packaging: 50/500
Customization: Laser, Pad printing, Digital Uv

01 02 03 04 05

24813

Plastic retractable pen with 3 refills. Bamboo grip. • Stylo rétractable en plastique avec 3 recharges. Manche en bambou.

Material: ABS, Bamboo
Dimensions: Ø 1.2 x (h) 15 cm
Packaging: 50/1000
Customization: Pad printing, Digital Uv

Bamboo and metal pens

01 02 03 04 05 07 15

24823

Rubberized metal click pen with bamboo button and burnished details. • Stylo à clic en métal caoutchouté avec bouton en bambou et détails polis.

Material: Metal, Bamboo
Dimensions: Ø 1 x (h) 14 cm
Packaging: 50/500

Packaging: 50/500

Customization: Laser, Digital Uv

Elegance and indelible personalisation

Laser engraving is one of the most refined and long-lasting customization techniques. Thanks to an ultra-precise light beam, the logo is engraved directly onto the surface, ensuring an elegant, permanent result that won't wear off over time.

On pens, laser engraving enhances even the smallest details: the logo appears with a tone-on-tone or metallic effect, depending on the material. It's the ideal choice for a discreet, professional finish with strong visual impact.

A laser-engraved detail that tells your brand's identity, built to last.

A simple pencil? No, it's much more.
Sprout was born from the idea of turning something that seems finished into something that can be reborn. When the pencil becomes too short to use, it doesn't get thrown away. You plant it in a pot, water it carefully and, with a bit of light, it turns into a little plant.

Made from natural wood and featuring a biodegradable capsule at the end, these pencils hold a small seed and a big message. There are fifteen varieties to choose from, from flowers to aromatic herbs, all the way to the most loved vegetables. **Each pencil is unique, just like the nature it comes from. That's why they may show slight color variations and different wood grains**, highlighting their authenticity and connection to the environment.

An eco-friendly, creative gadget that speaks of respect for nature.

1
Use the pencil until it becomes too short

2
Plant it with the tip facing up in a pot with soil

3
Water carefully and place it in a bright spot

4
In just a few days, your little plant will sprout!

190T pongee polyester automatic golf umbrella. Straight plastic handle with colored insert.
• Parapluie de golf automatique en polyester pongé 190T. Poignée droite en plastique avec insert coloré.

Material: 190T polyester pongee
Dimensions: Ø 130 cm - 30"
Packaging: 12/24

Customization: Dtf, Screen printing

Customization

The Sipec customisation service is designed to enhance each item with tailor-made processes, carried out by qualified personnel using cutting-edge technology. We offer maximum precision, excellent finishes and great versatility in the techniques we use, to meet every graphic and production requirement. The processes are optimised to ensure efficiency, quality and reliable delivery times, in full compliance with environmental regulations and sustainability principles.

Pad Printing: Precise Printing on Every Surface and Shape

Pad printing is an extremely versatile indirect printing technique, ideal for personalizing small to medium-sized promotional items, especially those with irregular, curved, or complex surfaces. This process uses a soft, flexible silicone "pad" that picks up ink from an etched plate (cliché) and transfers it onto the object to be printed, perfectly conforming to its shape.

Screen Printing: The Classic for Customization

Screen printing is one of the most established and widely used textile printing techniques, renowned for its ability to produce high-quality, durable results with intense colors. This method is based on the "pochoir" or stencil principle, where ink is pushed through a mesh (screen printing frame) in which non-printing areas have been blocked.

DTF Printing: The New Frontier of Customization

DTF (Direct to Film) printing represents one of the most recent and revolutionary innovations in textile customization, offering a versatile, durable, and visually striking alternative for creating unique garments and promotional items. This technique stands out for its ability to print on any type of fabric—cotton, polyester, blends, and even dark materials—ensuring bright colors, sharp details, and excellent wash resistance.

Laser Engraving: Indelible Elegance and Customization

Laser engraving is a high-precision customization technique that uses a focused laser beam to remove surface layers of material, creating a permanent and indelible image, logo, or text. Unlike printing techniques, laser engraving does not add color, but rather removes the product's own surface color, revealing its underlying layer or creating a visual contrast through depth.

Digital UV Printing: Advanced Customization for Any Material

Digital UV printing is one of the most cutting-edge technologies in the field of customization, offering a versatile and high-quality solution for direct printing on an extremely wide range of materials, both rigid and flexible. This technique uses special inks that are instantly cured (hardened) by UV (ultraviolet) lamps immediately after being deposited on the material's surface.

Sublimation Printing: Vibrant Color and Total Customization

Sublimation is a technique that allows for the transfer of full-color images onto specific materials, primarily synthetic fabrics (like polyester) or objects pre-treated with a polymer coating. The process is based on the phenomenon of sublimation, where a special ink, when heated to high temperatures, transforms directly from a solid to a gaseous state, penetrating the material's fibers or surface coating and permanently bonding to it.

Hot Stamping: Elegance and Refinement

Hot stamping, also known as hot foil stamping, is one of the most elegant and impactful embellishment techniques in the world of promotional item customization. It's not a true printing process, but rather a dry transfer method that, through the application of heat and pressure, imprints a metallic or pigmented foil directly onto the product's surface, creating a glossy, metallic, or matte effect of great value.

Doming: The 3D Effect That Elevates Your Brand

Doming, also known as "resin drop" or "3D resin," is an embellishment technique that adds an unmistakable three-dimensional and glossy effect to logos, labels, and text. This method involves applying a transparent layer of polyurethane resin, which, once hardened, creates a convex "lens," slightly magnifying the underlying design and giving it a unique visual depth.

Color Printing for Labels: Visibility and Color Impact

La stampa etichetta è la soluzione ideale per chi cerca la massima visibilità e un impatto cromatico elevato nella personalizzazione dei propri articoli promozionali. Questa tecnica permette di riprodurre con fedeltà immagini complesse, grafiche dettagliate, loghi sfumati e fotografie.
