Australia's favourite outdoor fitness equipment

For more than 15 years we have been creating outdoor fitness equipment to help enable people of all ages and fitness levels to achieve greater well being.

- More than 1000 outdoor gyms in operation
- Proudly designed and manufactured in Australia
- Complaint to AS16630
- Quality certified ISO9001

We're passionate about helping more Australians get outdoors and active, creating spaces where communities can move, play and connect. From working alongside peak bodies on design guidelines to helping shape the Australian Standards for outdoor gyms, safety and quality sit at the heart of everything we do, from concept through to installation.

Every piece of equipment is proudly made right here in Australia, backed by a team dedicated to supporting councils, schools and developers at every stage of their project. It's this commitment to quality and community well-being that sets us apart.

The confidence of experience

Creating the right outdoor fitness facility to meet the needs of each location

Each location has unique attributes. Differences may include the demographics of intended users, their fitness levels, the space available or budget. We work with our customers to understand their needs and design spaces and configurations specifically to suit.

Engineered and built to last in any environment

Understanding the intense use and exposure to the elements of equipment in open space, all our outdoor fitness equipment is designed, engineered and manufactured to be fit for purpose. We have also developed a robust Marine Grade option for harsh coastal locations.

Built to last with uncompromising safety

All of our equipment is with the Australian Outdoor Fitness Equipment Safety Standard AS16630.

Designed for users to love!

We collaborate with exercise physiologists to ensure the design of our equipment is ergonomically sound and fit for purpose. Each item of equipment is supported with simple instructional signage containing QR codes linking to product demonstrations.

Free design service

Our hands-on design process brings your vision to life. We work closely with you, from concept to completion, with the support of our trusted network of playground installation specialists.

Whether it's a simple playground or a large-scale landscape project, our skilled project management team ensures a seamless delivery, coordinating trades, maintaining quality, and keeping you in the loop every step of the way.

Standards ready

All PlayCo fitness products and designs are compliant with AS 16630:2021.

This includes the design and manufacture of individual components as well as the layout of combinations to ensure safety for all users.

To find out more about our design service or to contact your local design consultant, visit our website playco.com.au

The PlayCo Difference

What sets PlayCo outdoor fitness equipment apart? It's simple.

- Australian made
- Made from superior materials suitable for extreme Australian conditions
- Design versatility for endless options
- The range caters for seniors, everyday users and high-intensity athletes
- Very low maintenance required
- Above industry-average warranty
- Unique sleek design
- Multiple finishes available

Column configurations

Each item of PlayCo outdoor fitness equipment is designed to attach to a central column. Columns are available in Double (2 sided), Triple (3 sided) and Quad (4 sided) options.

The Triple and Quad offer the benefits of increased social interaction as well as greater space efficiency limiting the cost of associated site works.

Double

Triple

Quad

Single fitness station

Our Single Fitness Stations provide targeted workouts in a simple, space friendly format. Ideal for adding strength, balance, or cardio moments to parks, trails, and community recreation areas.

Park Warrior

Our ninja course circuits are designed and manufactured in Australia, creating challenging obstacle experiences that test agility, strength and speed while encouraging confidence, movement and active play.

Each configuration provides a carefully planned sequence of obstacles testing each user's strength, agility, co-ordination and problem solving ability.

Softfall Area: 295m²
Softfall Perimeter: 70m

Mega Course

No. of Obstacles: 16
Age Suitability: 12+ years
Max Equipment Height: 3800mm
Max Free Height of Fall: 2950mm

Area Required: 19.9m x 18.5m
Softfall Area: 375m²
Softfall Perimeter: 78m

Adding dimension to Park Warrior the app!

Enhance the experience

The Park Warrior App enables users to record and save their course times, access video instructions and check the rules for each obstacle. The App sets a new standard for the industry. While the obstacle course equipment on its own is exciting, the App really brings it to life!

Ongoing support

We provide support in setting up and running events. This includes training to become 'official referees' to supervise and time competitors.

What a great way to drive greater community engagement!

User Features

- Educates, motivates & engages users.
- Records and posts times.
- Enables friendly competition.

Council Features

- Create 'official' events at defined times and locations.
- Register participants.
- Upload 'official' times for those events.
