Who am i?

Keila Kumakura

- Entrepreneurial mother of 4 children, I began this journey over 20 years ago;
- History teacher at a public school in Ubatuba for over 10 years;
- Alchemist at Made in Gaia for more than 10 years;
- I love nature, the forest, and honor all the medicine that is born from our Mother Gaia;
- Facilitator of courses in Aromatherapy, Cosmetology, Soap Making, and Feminine Ecology.

*Nice to meet you, this
is who I am! Now,
I have an INVITATION
for you:*

From the next pages on, you will walk with me into an enchanted forest, filled with sounds and magic. For a **complete experience**, turn on the sound of your device and let yourself be embraced by this moment.

Feel the call. Breathe deeply.

From now on, you are not just discovering products you are *stepping into a living forest*, where each essence carries the ancient power of Mother Gaia.

Here, there is *no rush*. Walk through the pages as if you were traveling a *sacred trail*.

Turn each page as if you were caressing a leaf. Listen to the *whisper of the wind between the trees*, it brings all the information about each product.

More than presenting products, this is *an experience with Mother Gaia* where each item is a gift gathered with respect, care, and love for nature.

Welcome to *Made in Gaia*.

Here, you do not consume:
you harvest, heal, and bloom.

A drop that has the power to transform your moment into pure well-being. Essential oils, in Aromatherapy, are a complement to your health. They are derived from substances extracted from the leaves, roots, seeds, flowers, fruits, and trunks of plants through specialized extraction techniques.

The active compounds in essential oils stimulate nerve cells, activating brain areas related to emotions. You just need to choose the right essential oil to transform your moment, bringing more health, beauty, and well-being into your life!

There are 3 ways for our body to respond to Aromatherapy:

- Smell (*the human body's sense of smell*)
- Skin (*through skincare products*)
- Breathing (*through diffusion or inhalation*)
