AM804 Black Pearl Metallic

AM811 Glossy Iron Black

AS302 Gloss Red

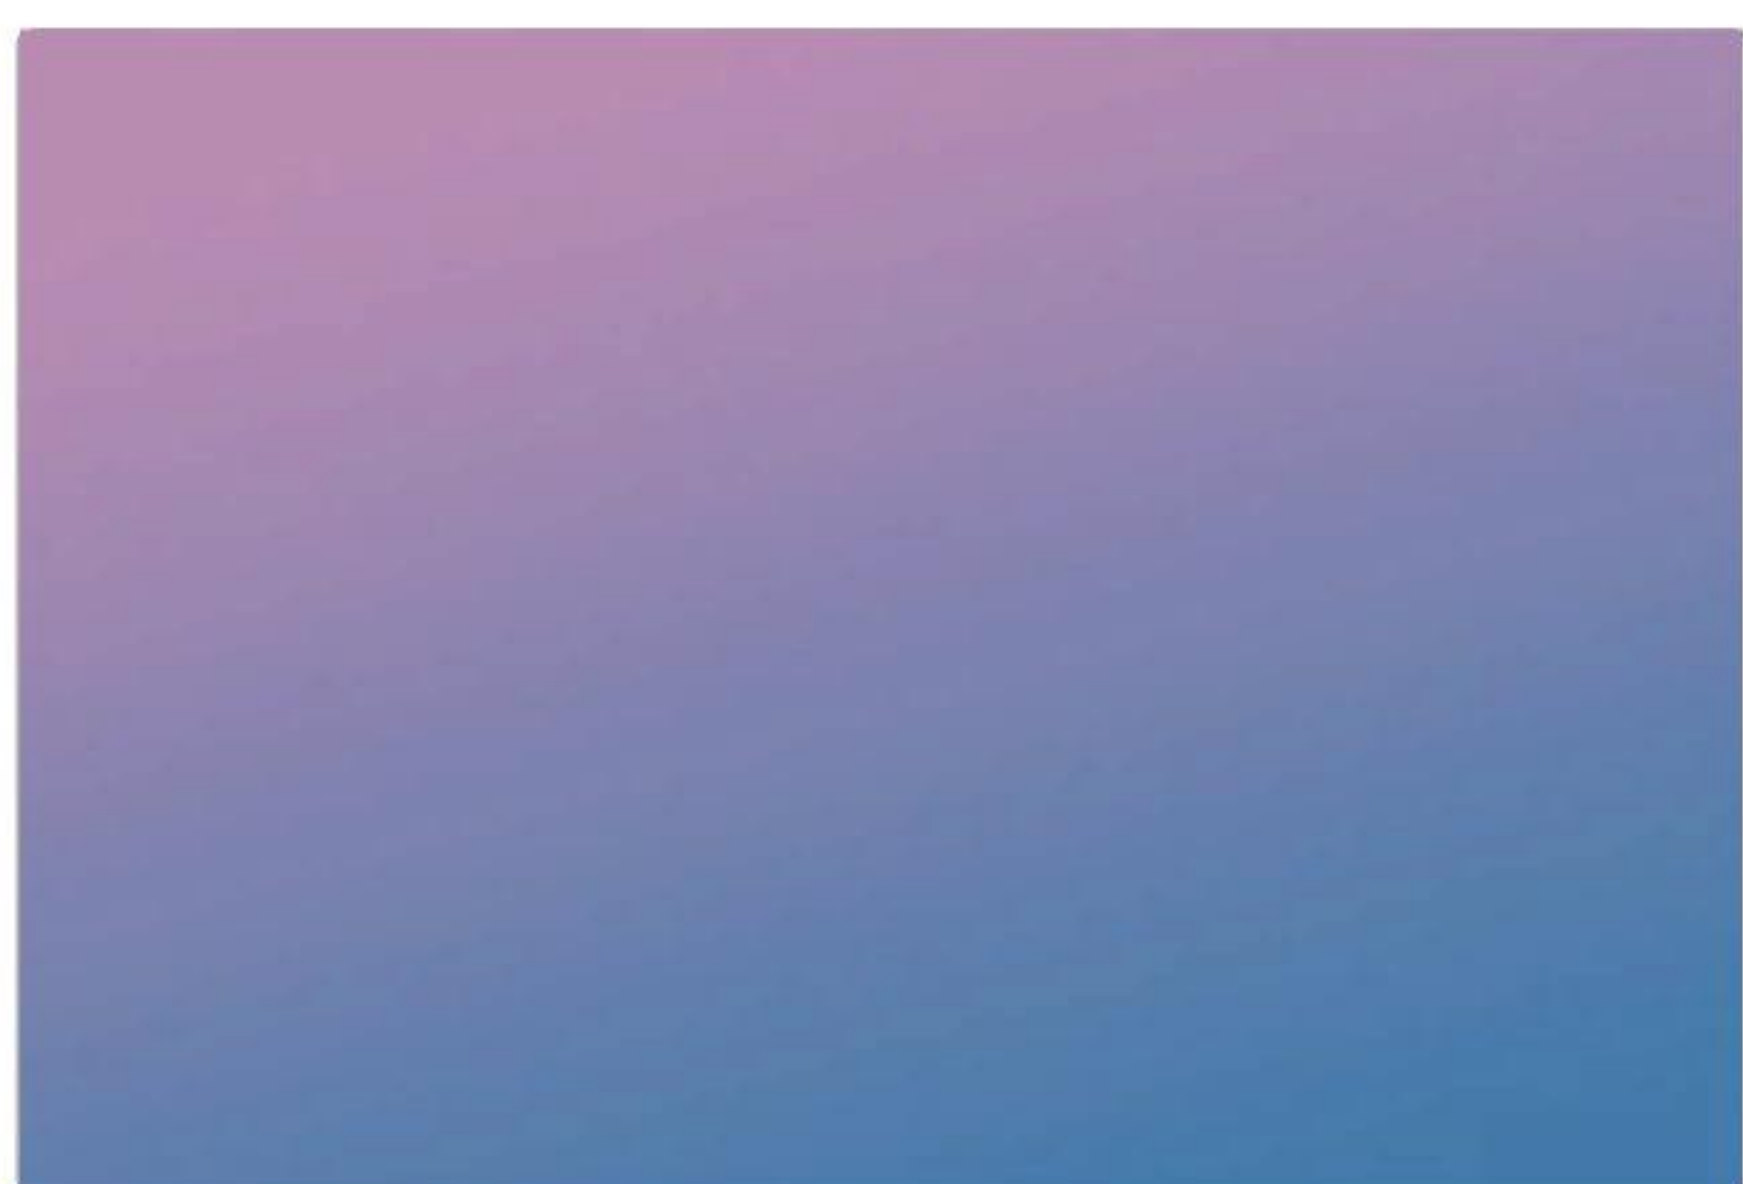

AS311 Glossy Telemagenta

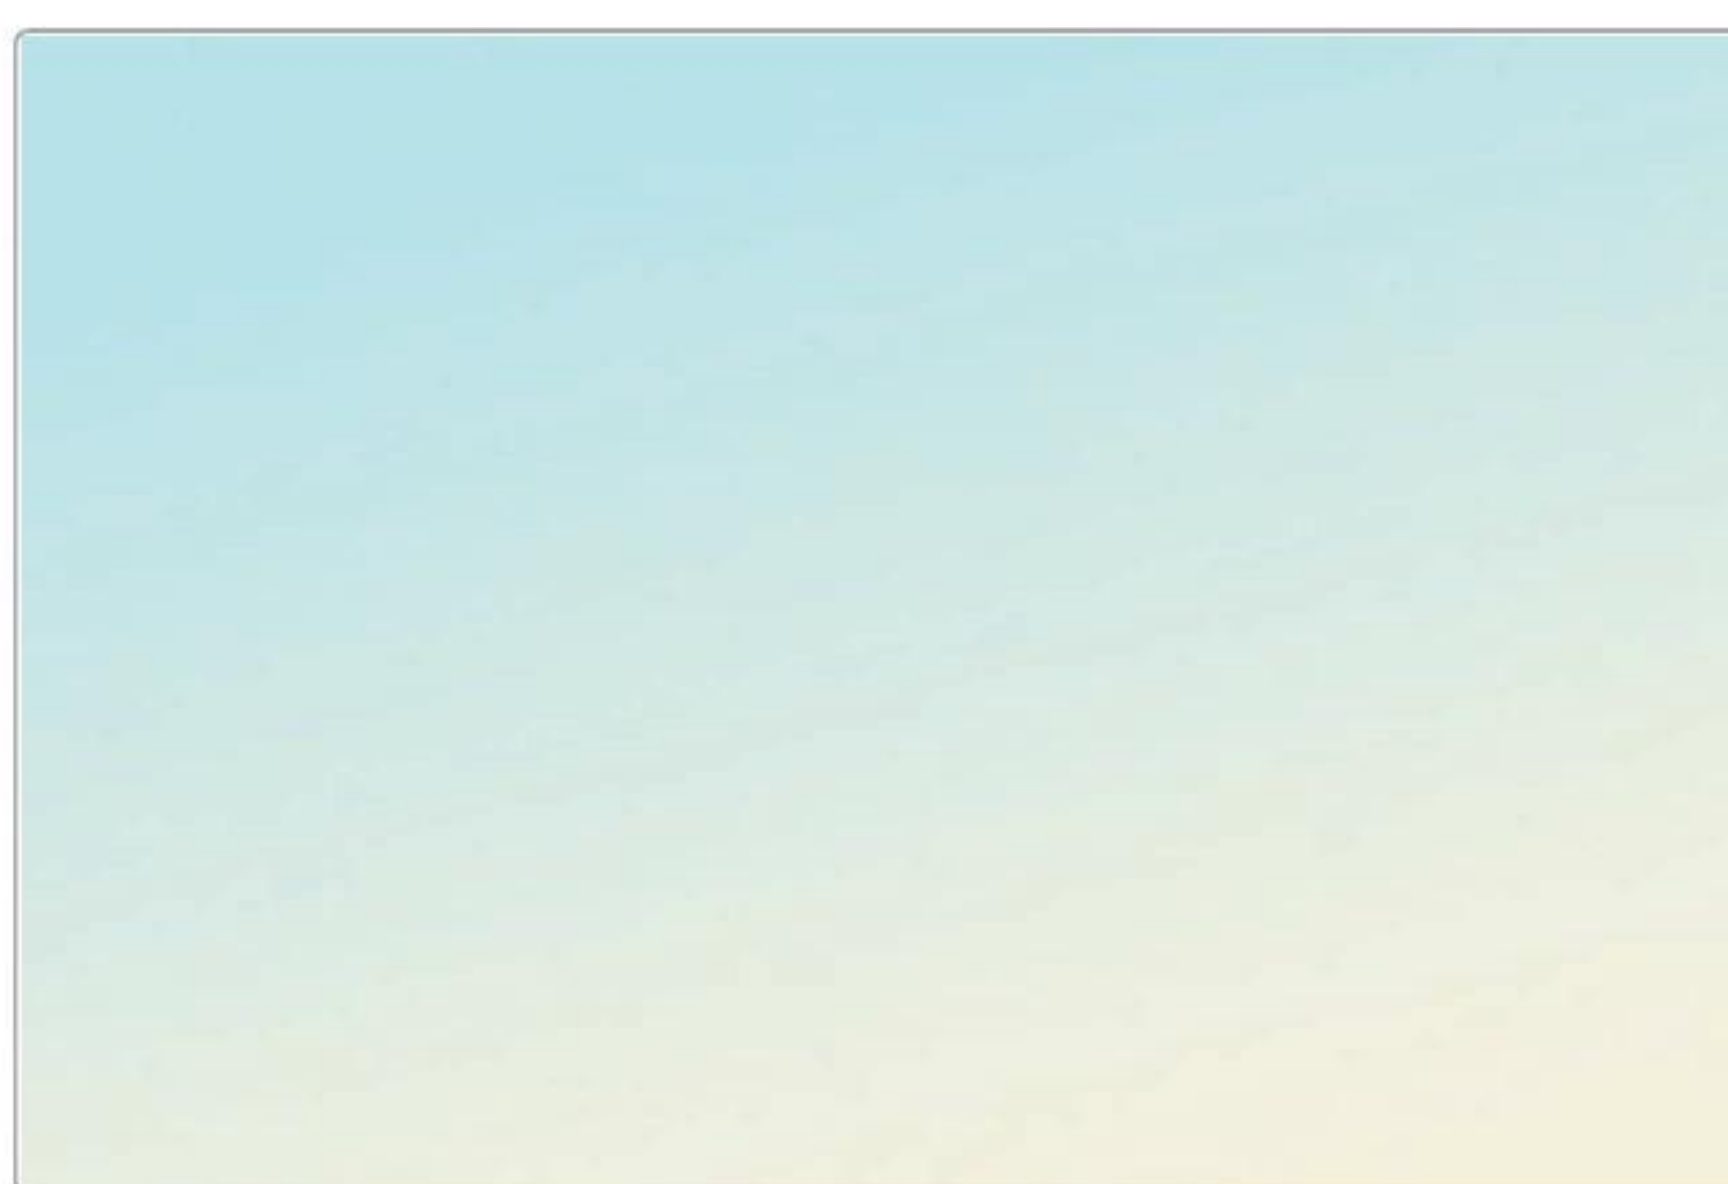

Chameleon Colors

The AATIS® Chameleon series were inspired by the ever changing colors in the landscape. Light will play with every angle of these surfaces to add dynamic depth to the building designs. High quality, high gloss pre-paint aluminium coil from Europe.

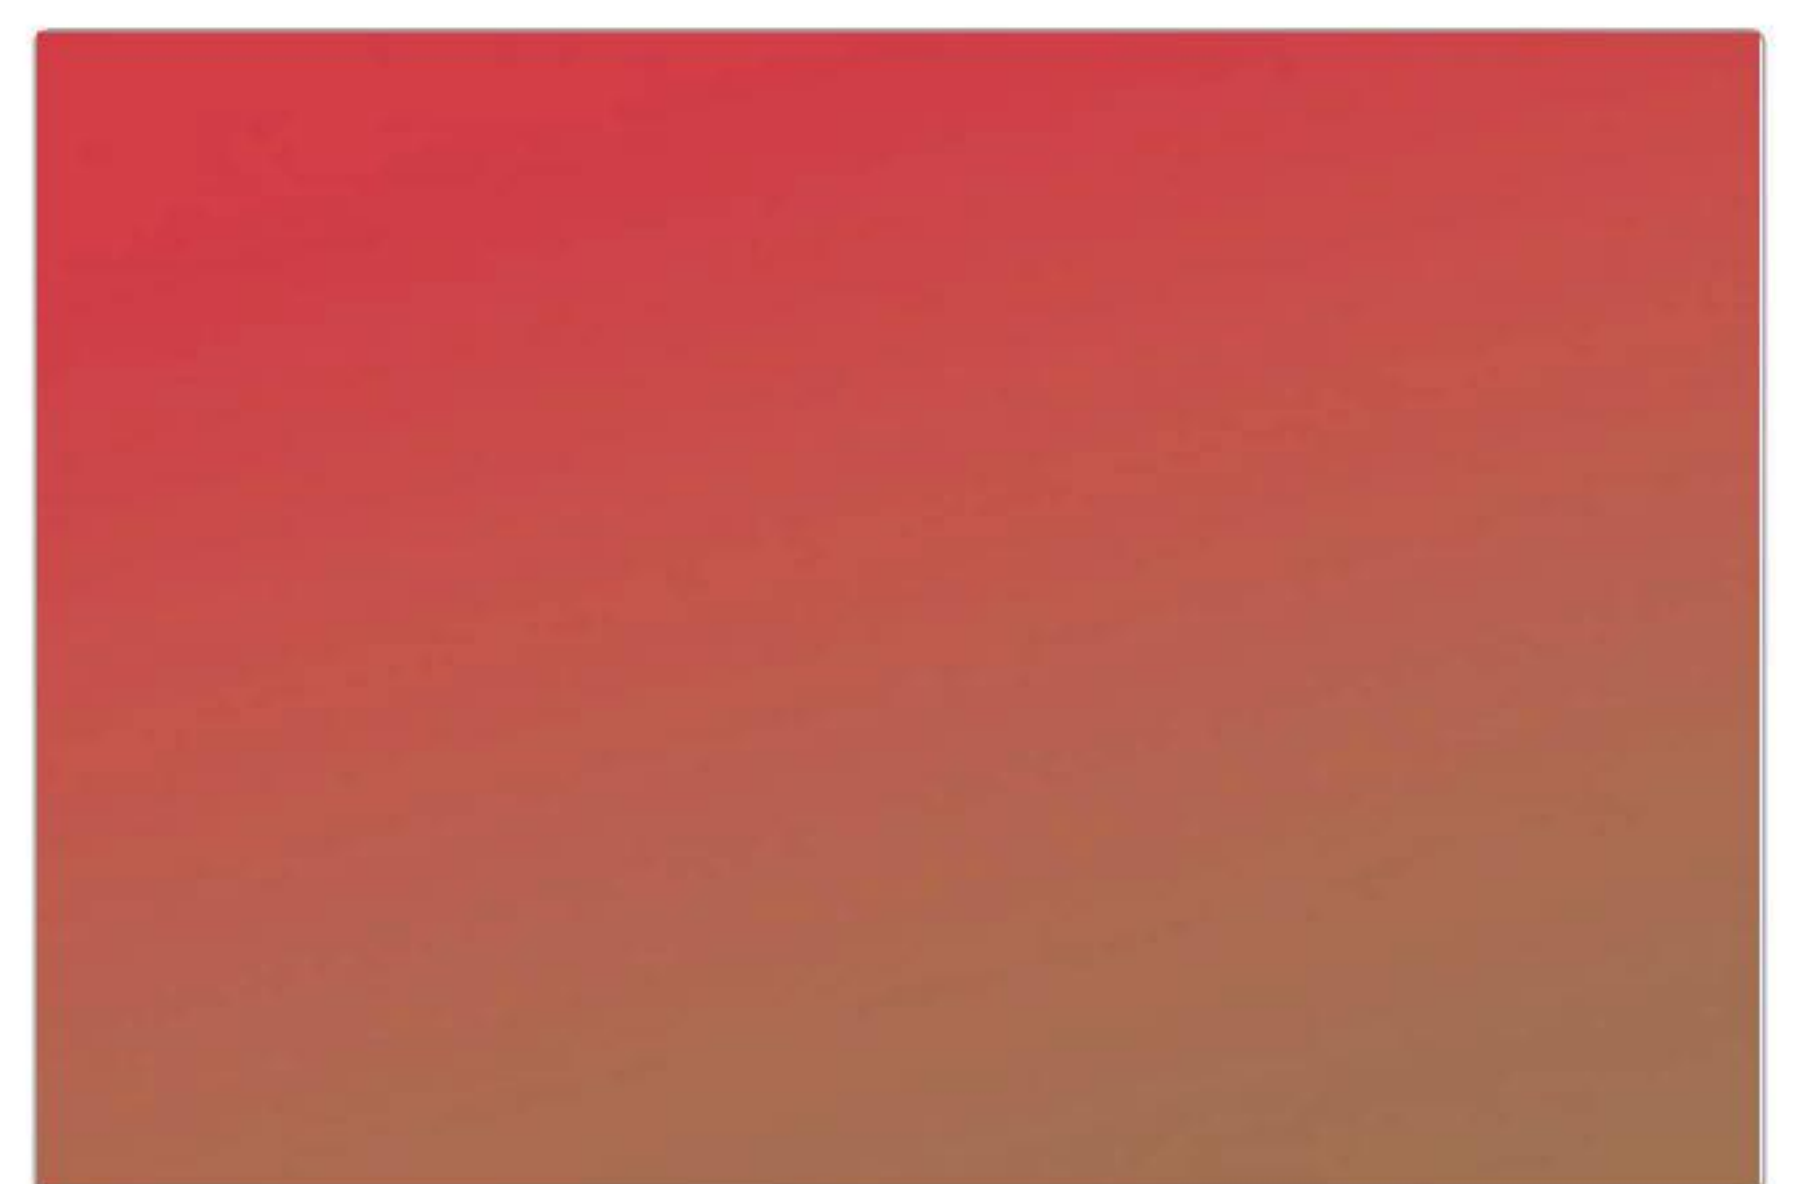

The majority of AATIS® colors are stocked in 4 mm thick sheets measuring 1,250 mm in width and 2,440-3,200 mm. in length. Color samples are available upon request.

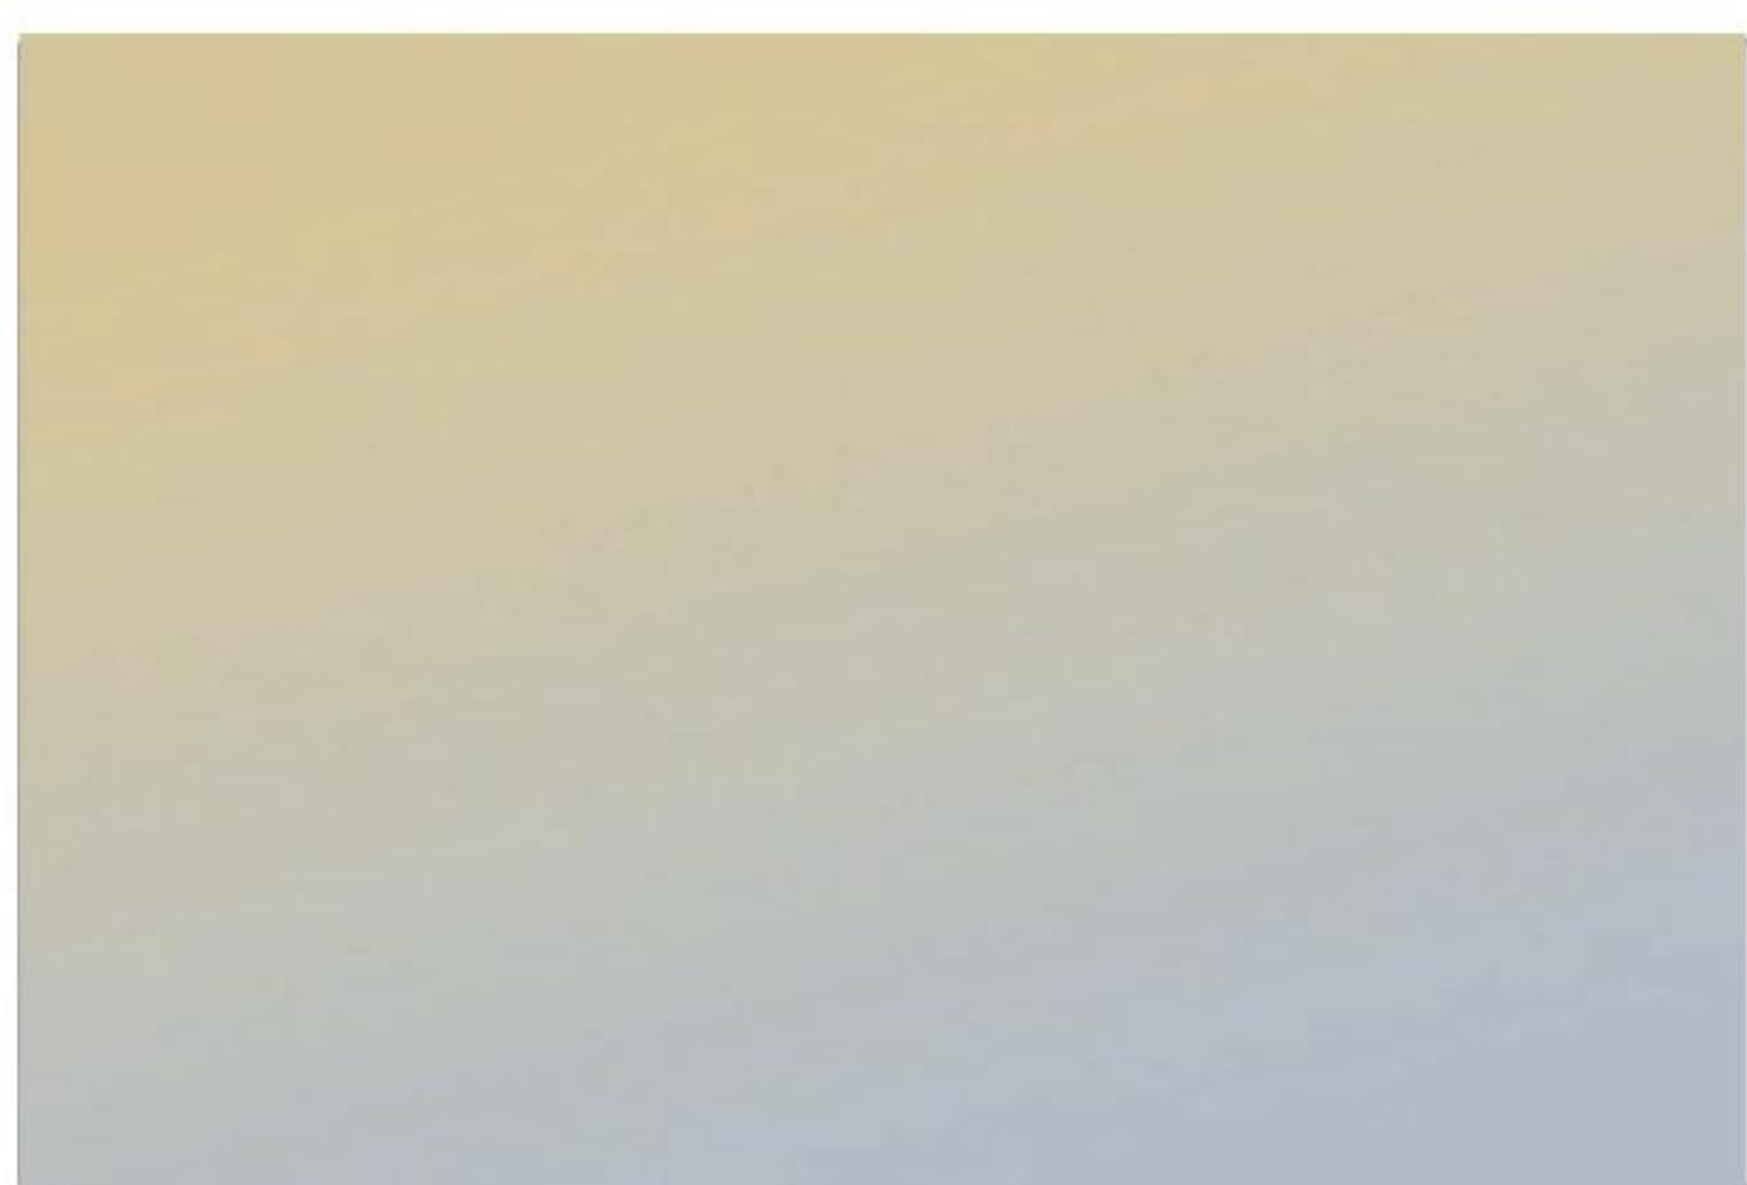

AC911 Steel Violet

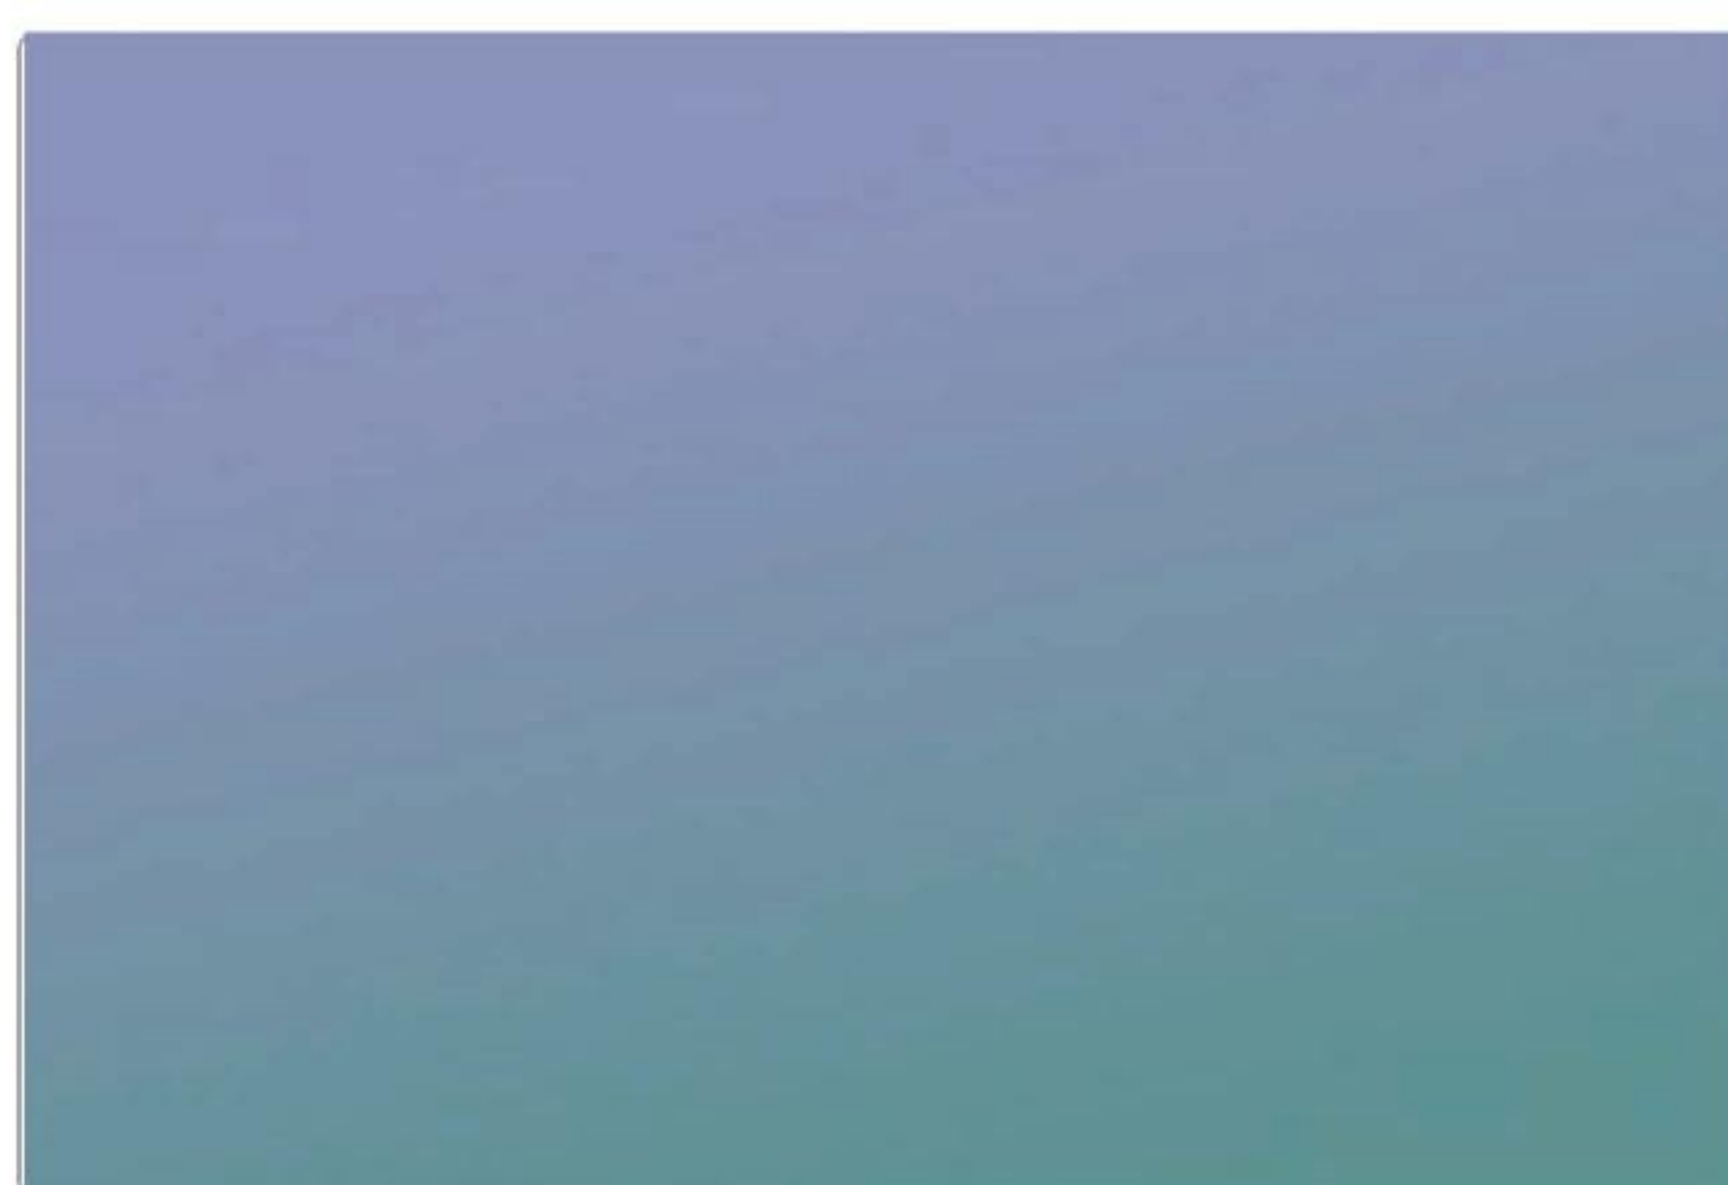

AC912 Arctic Blue

AC913 Autumn Wind

AC914 Silver Gold

AC915 Indian Summer

Coil coating process complies with all major international norms and quality standards.

Coating Systems

PVDF 70/30 Coating: The standard for high performance coatings with over 40 years of proven durability and weatherability. AATIS® surfaces can be treated with 70% PVDF Kynar® 500 which passes the American Aluminium Manufacturer Association (AAMA) Standards, or Hylar® 5000 which passes the European Coil Coating Association (ECCA) Standards.

HDP and MVP Coatings: High performance coating based on either the polymer resin or poly-fluoroethylene/vinyl ether formula. Please contact your agent to help you chose the right color and gloss system for your project.

Aluminium Alloy

Standard Alloy: AA 3XXX

High purity, Excellent corrosion resistance, Good workability, Moderate strength, Good decorative finish.

European Alloy: AA 5XXX

Bright, Durable finish, Excellent corrosion resistance, Good formability.
