More than a catalogue

A planning tool

Waterplay's Product Playbook is built to move ideas forward. It's a structured visual and technical reference designed to support exploration, comparison, and early-stage planning—without slowing you down.

Every Waterplay product is engineered for real-world performance. From ground sprays to Activity Towers and water management systems, each feature works as part of an integrated ecosystem built for safe operation, water efficiency, and long-term durability.

Nothing stands alone. Everything works together.

When you're ready to go deeper, detailed specification sheets, CAD files, and technical data are available to support the design process and validate every decision.

Start here. Explore with clarity. Design with confidence.

Understanding the data

Smart choices start here

Every metric in this document serves a purpose. Each product listing includes key performance indicators to support informed selection, system performance, and responsible water management.

- 1

Product name
The designated feature name.
- 2

Product code
Unique reference number for ordering and specification.
- 3

Low flow icon 
Identifies products designed to use less water without sacrificing play value or performance.

Misting icon 
Identifies products with fine misting spray or optional misting nozzles.
- 4

Product image
3D visual of the feature.
- 5

Dimensions (L x W x H)
Overall size in metric and imperial units to support layout coordination.
- 6

Flow (LPM / GPM)
Operational water demand for system sizing and budgeting.
- 7

Impact spray zone
The primary area where water lands with force. This is where peak interaction and play value occurs.
- 8

playPHASE™
Waterplay's flush-to-grade anchoring system, including size and quantity required for freestanding features.
- 9

Pressure (kPa/PSI)
Minimum operating pressure required for intended spray performance.
- 10

Affected spray zone
The broader area influenced during operation, including splash, mist, deflection and user interaction. Essential for containment and drainage planning.

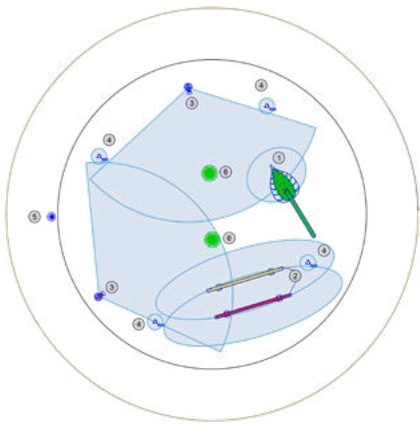

Spray zones explained

Where water lands matters—where it travels does too

Spray behaviour is a critical factor in splash pad design. Waterplay defines two distinct spray measurements to support accurate planning and system performance:

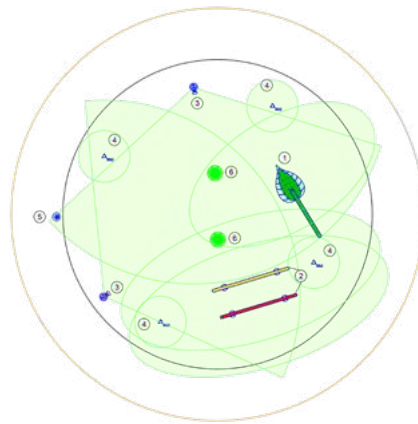

Impact spray zone

The area where water lands with force and peak interaction occurs.

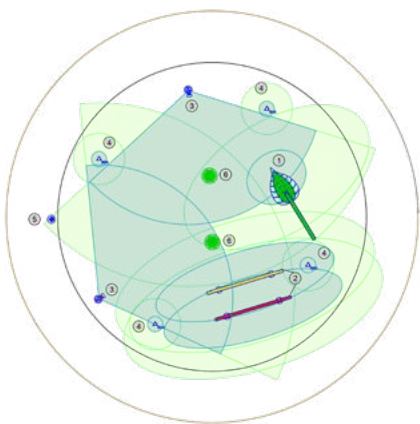

Affected spray zone

The broader area influenced during operation, including spray, splash, mist, movement and dynamic water behaviour.

Water doesn't always stay in its lane. Designing with impact zones alone can push spray beyond intended boundaries. Considering both zones keeps water where it belongs—protecting surrounding surfaces, supporting drainage, and preserving long-term performance.

IMPORTANT:

All spray measurements are captured in controlled testing environments. Actual performance may vary based on:

- Wind conditions
- Surface slope
- Operating pressure
- Flow rate
- System calibration
- User interaction

These measurements are planning guides, not guarantees. Clarity early protects performance later.

Mounting systems

playPHASE™

Flush, flexible, future-ready

A flush-to-grade, tamper-resistant anchoring system supporting accessibility, simplified installation, and long-term adaptability. Designed to evolve with your space—install now, upgrade later, and swap features anytime without breaking concrete or starting over.

playPHASE™
Small

playPHASE™
Medium

playPHASE™
Large

flexPHASE
Flexible concrete-mounted base with simple hose connection.

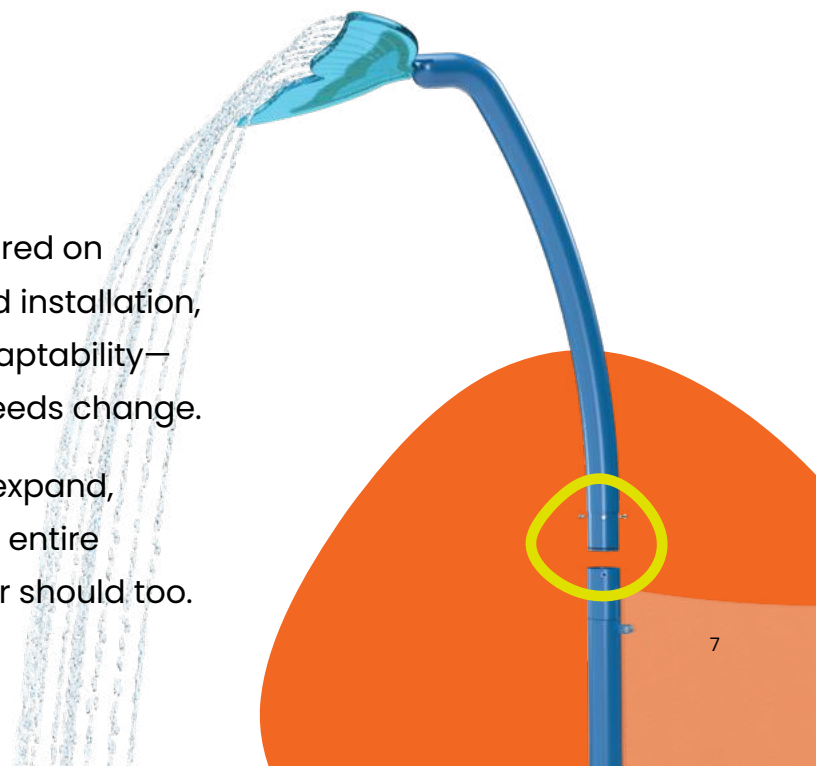

ePHASE Small
Tamper-resistant, flush-to-grade anchoring for Waterplay activators.

playCONNECT™

Built to evolve

An interchangeable modular system featured on Waterplay Activity Towers, allowing phased installation, simplified maintenance, and structural adaptability—making it easy to swap post features as needs change.

Designed for flexibility over time—update, expand, or refresh your tower without replacing the entire structure. Because play evolves. Your tower should too.

Splash pad

The essential elements that shape interaction, movement, and flow—from statement features that anchor the space to supporting components that keep it balanced and inclusive. Each one plays a defined role in how water behaves and how the experience unfolds.

If it actively shapes the experience, it belongs here.

Buckets

Built for anticipation and release

Elevated tipping features that draw attention and build anticipation. Water rises slowly, signaling what's coming next.

People gather, glance up, and inch closer. When the bucket tips, everyone reacts at once—then scatters and regroups for the next cycle.

Whether small and surprising or big and bold, buckets create predictable, shared moments that pull people together and move energy across the splash pad.

Watch it fill or wait for the surprise.

Cannons

Aim, react, repeat

Cannons are directional spray features designed for active, Waterplayer-controlled interaction. This category is defined by choice, aim, and instant reaction.

With adjustable targeting and rotating movement, cannons create a shared game where spray is directed, redirected, and constantly in motion. The result is fast movement, loud laughter, and continuous back-and-forth.

Cannons reward curiosity, coordination, and connection—no instructions required.

Controlled aim. Uncontrolled fun.

Freestyle

Distinct by design

Some features aren't defined by a single type of play. They blend behaviours, challenge expectations, and bring something different to the space.

This collection brings together features that move beyond fixed categories—yet still play a clear and valuable role in the overall experience. Their strength comes from how they complement, contrast, and elevate everything around them.

Great play spaces make room for flexibility.

Freestyle features add range, surprise, and personality. They expand what's possible and reinforce a simple truth: play doesn't follow one path—and neither should the features that shape it.

Designed to stand apart.

Playmakers

Hands-on features driven by curiosity

Interactive elements that respond instantly to touch, movement, and experimentation. Turn something. Block something. Change the flow. Water reacts in real time, rewarding exploration without pressure or performance.

Not every entry into play starts at full speed. These features create space for confidence, imagination, and self-directed interaction—welcoming different comfort levels without pushing anyone to the edges.

Because there's no right way to play.

Spinners

Continuous movement, constant change

Rotational spray features that never settle. Patterns shift continuously, drawing movement across the splash pad without instruction or setup. The experience changes with every turn, keeping play fresh and energy circulating.

Spinners add visual energy and encourage repeat interaction, helping the space stay dynamic even when no single feature takes centre stage.

Spin it and see what happens.

Tunnels

Built for movement not hesitation

Features that turn straight-line running into a splash-filled challenge. Arched sprays and enclosed paths surround from all sides, pulling movement forward, soaking everything in their path, and sending it right back for another pass.

These features keep momentum high. They reward speed, repetition, and shared laughter, helping move energy across the splash pad instead of letting it stall.

Ground sprays

The foundation of active play

Ground sprays activate the splash pad at full scale. Water bursts, bubbles, and shifts from underfoot, turning the entire surface into a space for movement, reaction, and play.

There's no waiting and no fixed path. Movement flows through, around, and across each feature as patterns change and games take shape in real time.

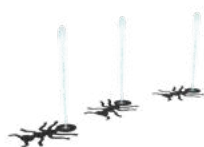

Ground sprays distribute play across the entire space. They support inclusive movement, constant energy, and shared use—making them a core building block of splash pad design.

Poolside

More ways to stay in the water

Poolside features add interaction, comfort, and relief to aquatic environments without taking over the experience.

Placed in and alongside pools and leisure areas, these elements enrich the experience by introducing moments of variation, interaction, and recovery—transforming static water into a more dynamic and engaging environment that keeps people in the water longer.

Lazy rivers

Flow stays easy, interest stays high

Features that add moments of interaction without interrupting the current. Overhead sprays and playful effects appear as people drift past, creating quick reactions and light engagement before the water carries them on.

The pace remains relaxed, but the experience becomes more dynamic—turning a simple float into something to look forward to on every loop.

Therapy sprays

Targeted relief at your own pace

Therapy sprays are designed to support relaxation and muscle relief through controlled streams and gentle pressure.

They introduce calm, restorative moments within active aquatic environments—adding balance without slowing the overall energy of the space.

A moment of calm among the action.

Activity Towers

Vertical play layered with movement, surprise, and action

Activity Towers are where Waterplay goes vertical.

These multi-level structures combine climbing, spraying, sliding, and interaction into one shared experience. Movement happens up, across, and around the tower, with new reactions at every turn. There's no single path and no predictable outcome.

Play unfolds everywhere at once—above, below, and in between.

And once people arrive, they don't just pass through. They stay. They explore. They challenge each other and create new experiences with every visit.

More ways to move, more ways to play.

Activity Tower features

Pick your play

Activity Tower features are the moments that make every tower unique. From big splashes to interactive surprises and dynamic water effects, each feature adds movement, excitement, and discovery to every play experience.

Built for flexibility, many features utilize the playCONNECT™ system, making maintenance easier and allowing towers to be refreshed, reconfigured, or enhanced over time. Whether supporting a unique theme or evolving with the needs of a community, Activity Towers are designed for adventure that lasts.

Start with a proven structure, then customize the moments that matter.

Signature designs

Proven layouts with no guesswork required

Great Activity Towers don't happen by accident. That's why we created 11 signature designs: pre-configured layouts that deliver high-impact play from day one. Each structure layers movement, interaction, and water effects across multiple levels. Choose a layout, pick a theme, and let the experience take shape.

Waterplay's curated themes each bring a distinct visual identity.

Classic: bold, timeless colours for a wide range of environments

Wildflowers: bright, nature-inspired colours in full bloom

Oceana: water-inspired design that brings the ocean to life

Start with a proven design. Customize where it matters. Build something communities return to again and again.

Water management

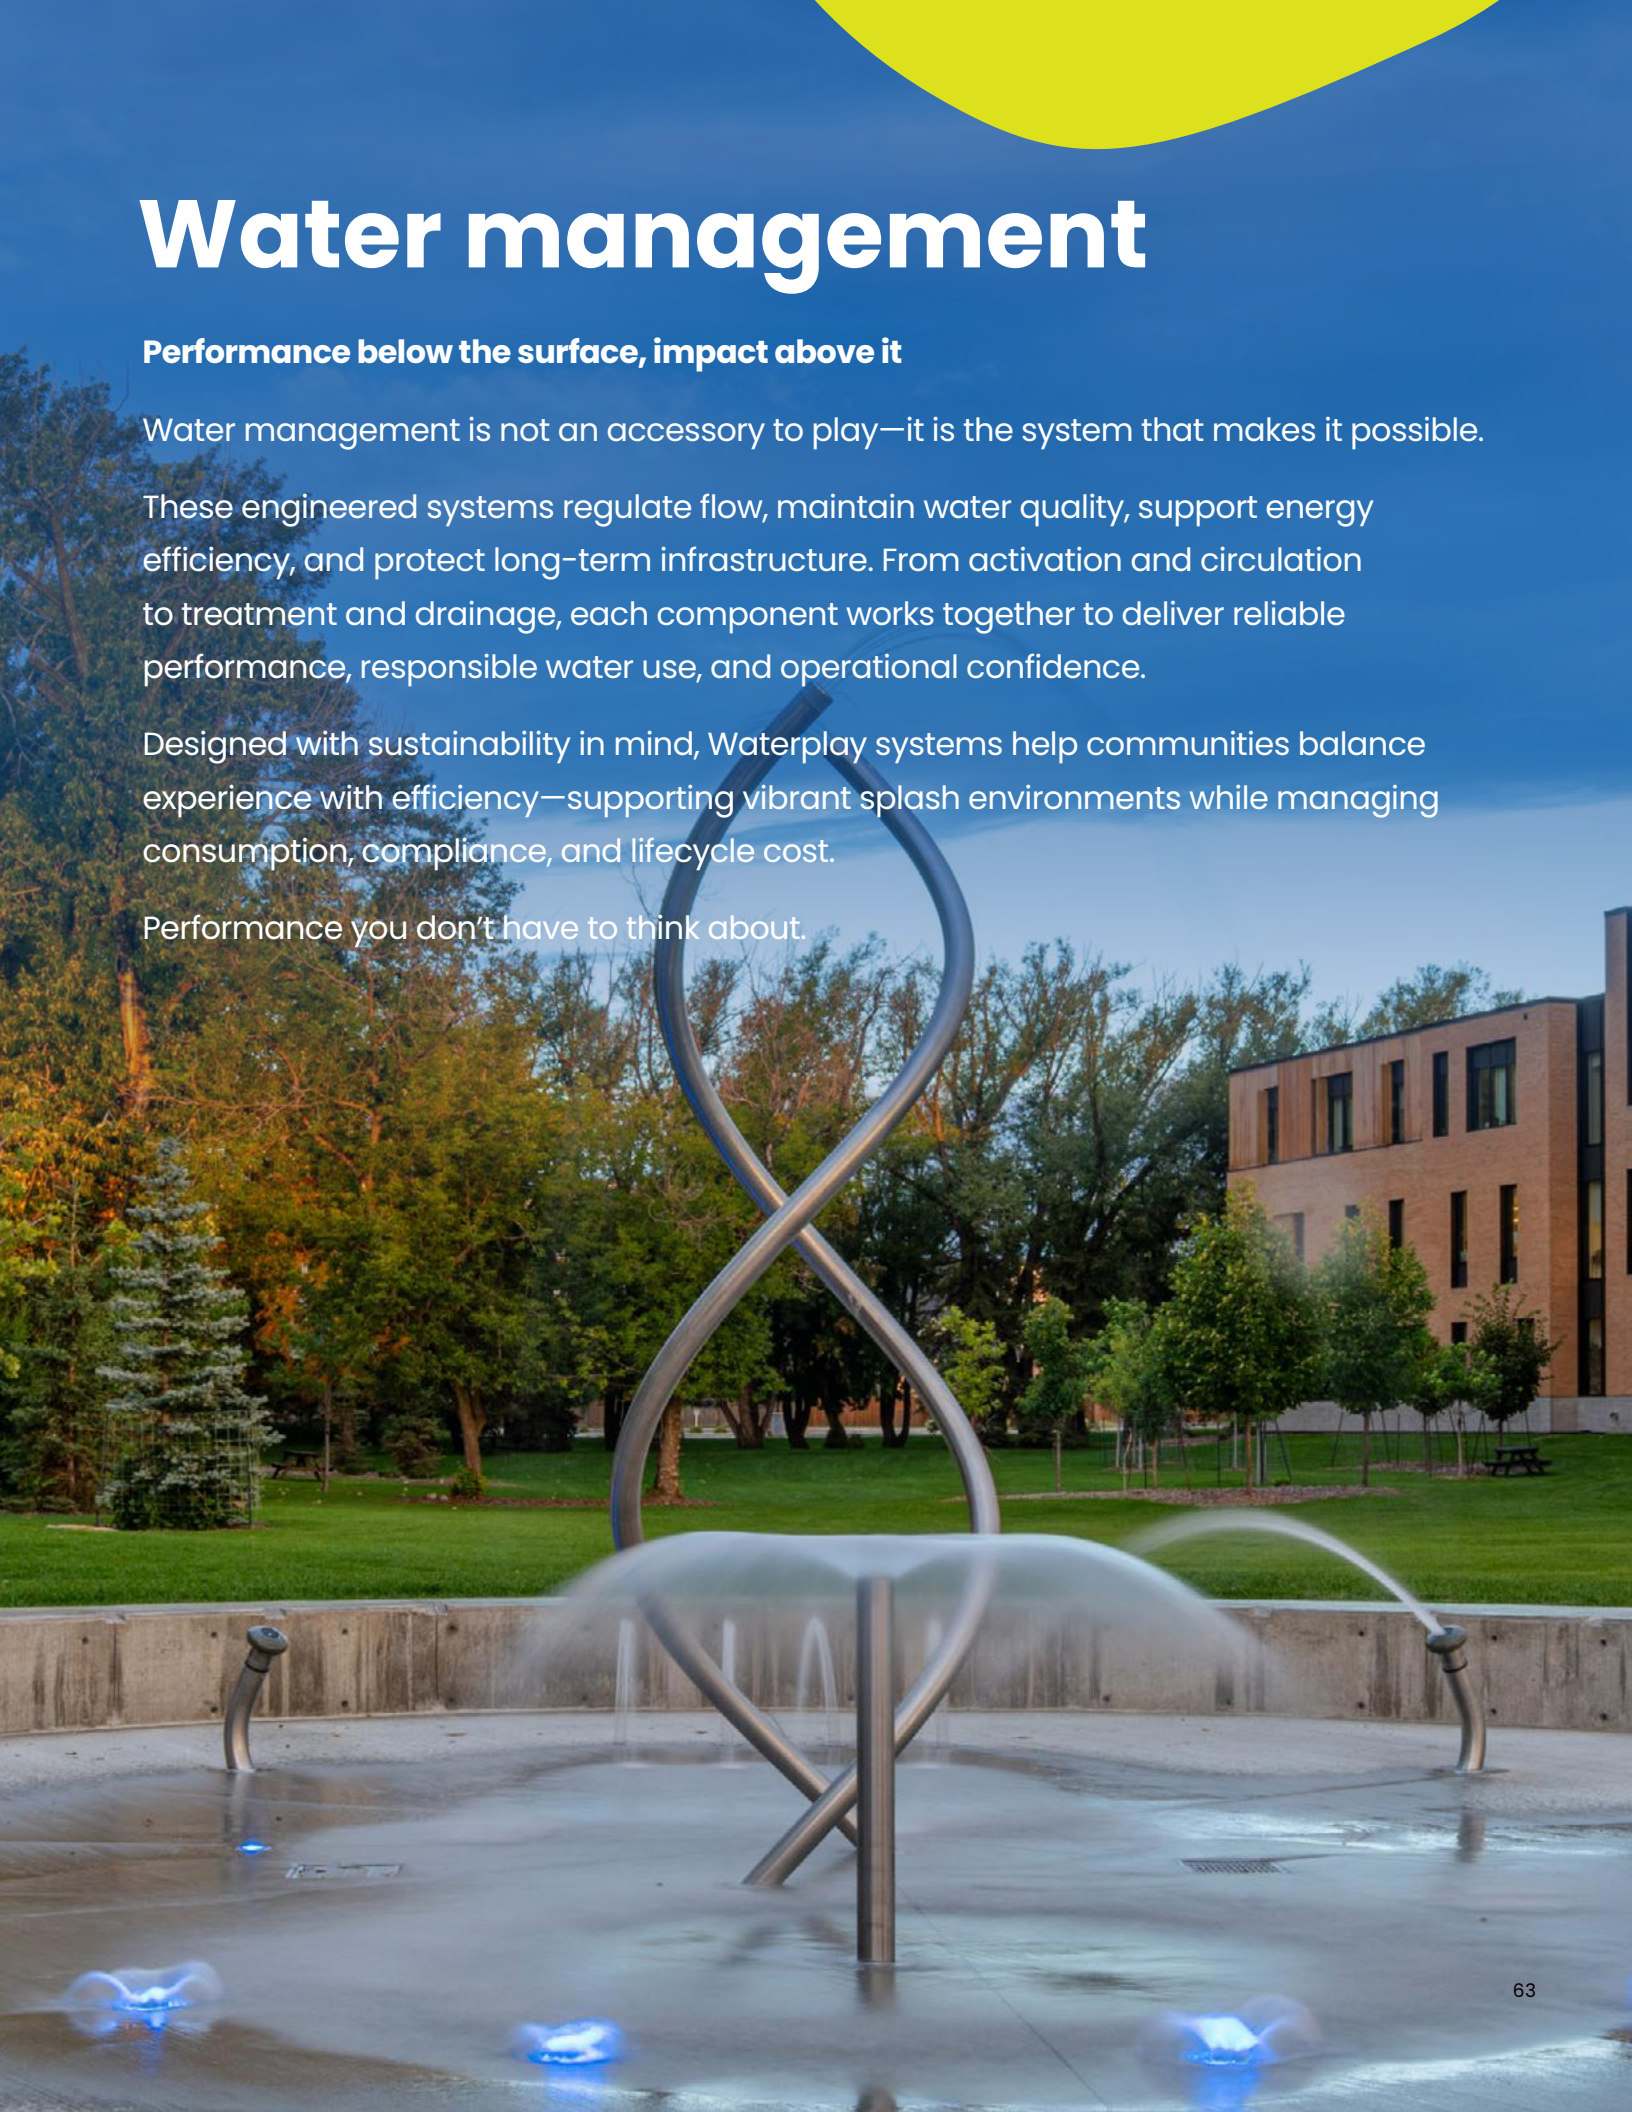

Performance below the surface, impact above it

Water management is not an accessory to play—it is the system that makes it possible.

These engineered systems regulate flow, maintain water quality, support energy efficiency, and protect long-term infrastructure. From activation and circulation to treatment and drainage, each component works together to deliver reliable performance, responsible water use, and operational confidence.

Designed with sustainability in mind, Waterplay systems help communities balance experience with efficiency—supporting vibrant splash environments while managing consumption, compliance, and lifecycle cost.

Performance you don't have to think about.

Activators

Every moment starts here

Play begins with a single action.

With a simple press, turn, or step, the splash pad comes to life. Water responds instantly, creating clear cause and effect that feels intuitive and satisfying.

Activators put control at the surface while supporting efficient water use behind the scenes.

Simple on the surface. Smart underneath.

Water management

Activators

ECO ACTIVATOR

0011-6497

Dimensions

122 x 51 x 30 cm

48 x 20 x 12 in

A compact, flush-to-grade unit that combines an activator, manifold, and controller into one water management solution. (Activator sold separately)

Controllers

Trusted to keep everything aligned

Controllers are not meant to be seen or felt. They are meant to be trusted. While the play unfolds, controllers quietly keep the system in sync.

They manage timing, sequencing, and system logic so features operate as intended—together, consistently, every day.

When everything turns on and off exactly when it should, the controller is doing its job. Invisible by design, essential by function.

Drains and tanks

Water managed, performance protected

Drains and tanks help keep the splash pad operating safely and as intended.

They work together to move, collect, and manage water efficiently, supporting proper drainage, system performance, and overall site usability. While they may stay behind the scenes, they play an essential role in safety, comfort, and reliable operation.

Always working beneath the surface.

Kiosks and vaults

Critical systems housed and protected

Kiosks and vaults provide a dedicated space for mechanical systems when a utility building is not present.

They house critical components, keeping them secure, organized, and accessible for maintenance. Built to withstand environmental conditions and integrate with their surroundings, they support long-term reliability without competing visually with the play space.

Out of sight but always working.

Water management

Kiosks and vaults

ABOVE GROUND CABINET

C06-AG006, C06-AG010, C06-AG018

HYDROVAULT

0011-7927

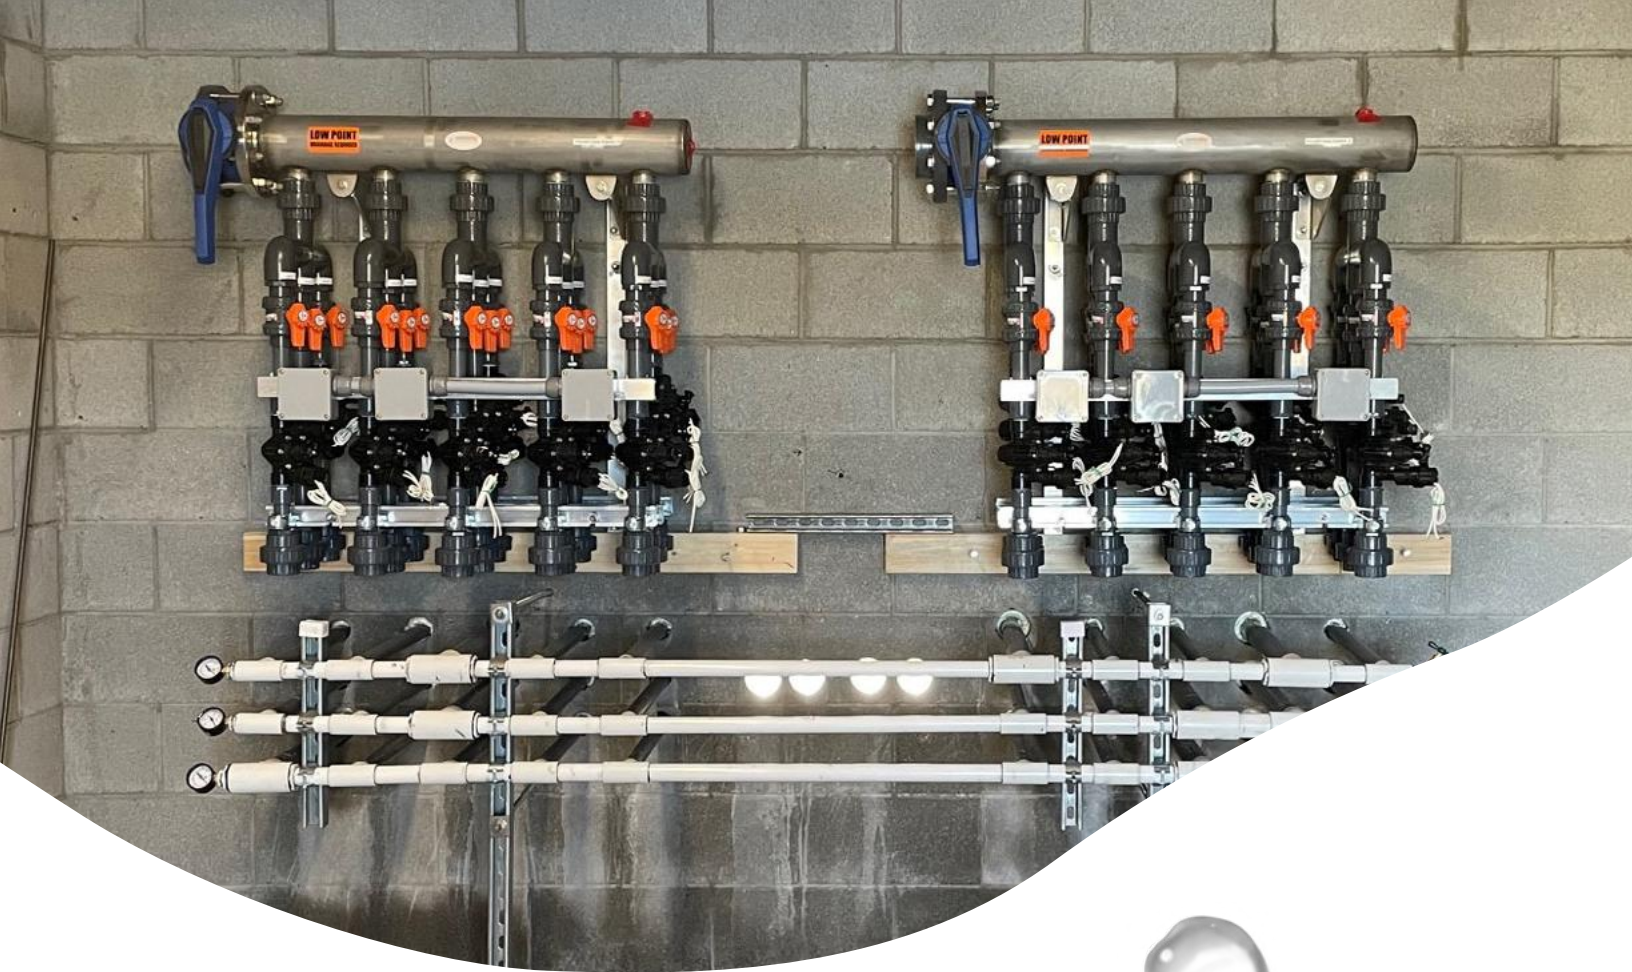

Dimensions

3.8 x 2.6 x 2.4 m

12.3 x 8.4 x 8 ft

Pre-assembled aluminum enclosure for the WTS150, with space for secondary disinfection like Clear Comfort or UV, and up to 18-valve manifolds.

Wall mounted manifolds

Balanced flow across every feature

Water has to go somewhere, and it has to get there evenly.

Manifolds split, balance, and direct flow so every feature performs as intended. They prevent one spray from overpowering another and help the splash pad feel coordinated instead of chaotic.

Manifolds are the quiet overachievers. They're the silent MVP of every splash pad. Because balance makes everything better.

Water treatment systems

Powerful protection made simple

Water treatment systems keep splash pad water clean, clear, and ready for play. They are essential in recirculating splash pads, where water is filtered, disinfected, and reused to maintain safe and reliable operation.

These systems treat and manage water to support smooth operation, meet local regulations, and help protect both people and equipment.

Clean water you can count on.

Water management

Water treatment systems

WATER TREATMENT SYSTEM 150

WTS150

Dimensions

3.9 x 1.8 x 1.8 m
12.8 x 5.8 x 6 ft

Flow

Up to 568 LPM
Up to 150 GPM

Single loop.
For small to medium splash pads.

WATER TREATMENT SYSTEM 300

WTS300

Dimensions

5.2 x 2 x 1.9 m
16.9 x 6.4 x 6.1 ft

Flow

Up to 1137 LPM
Up to 300 GPM

Single loop.
For medium to large splash pads.

WATER TREATMENT SYSTEM 450

WTS450

Dimensions

4.2 x 2.6 x 2.1 m
13.7 x 8.5 x 6.8 ft

Flow

Up to 1703 LPM
Up to 450 GPM

Double loop.
Best for large splash pads.

ULTRA VIOLET (150, 300, 450)

0011-5554, 0011-5555, 0011-5556

Disinfection add-ons:

UV Low pressure

Enhance your water purification
by adding secondary disinfection
to your water treatment system.

CLEAR COMFORT (150, 300, 450)

0011-2750, 0011-2751, 0011-2752

Disinfection add-ons:

Hydroxyl-based advanced
oxidation (AOP)

Enhance your water purification
by adding secondary disinfection
to your water treatment system.

Waterplay's Product Playbook brings clarity to complexity—helping you explore options, refine ideas, and move forward with confidence.

Every product, every system, every detail is designed to work together—so what you build performs as beautifully as it plays.

Everything you need to plan with clarity.
Everything you need to build better play.
