Home Access

Home Access provides a wide range of mid-to high-end products for our customers. Our product ranges from sanitary ware, kitchenware, office furnitures, water treatment to lighting & covering (Tiling).

Here at Home Access we value our customers feedback to refine our services. We have designed a total solution concept which promotes efficiency and effectiveness in our workforce. Implementing this concept ensures that home owners, contractors and architects are able to work with an experienced professional team from inspection to installation.

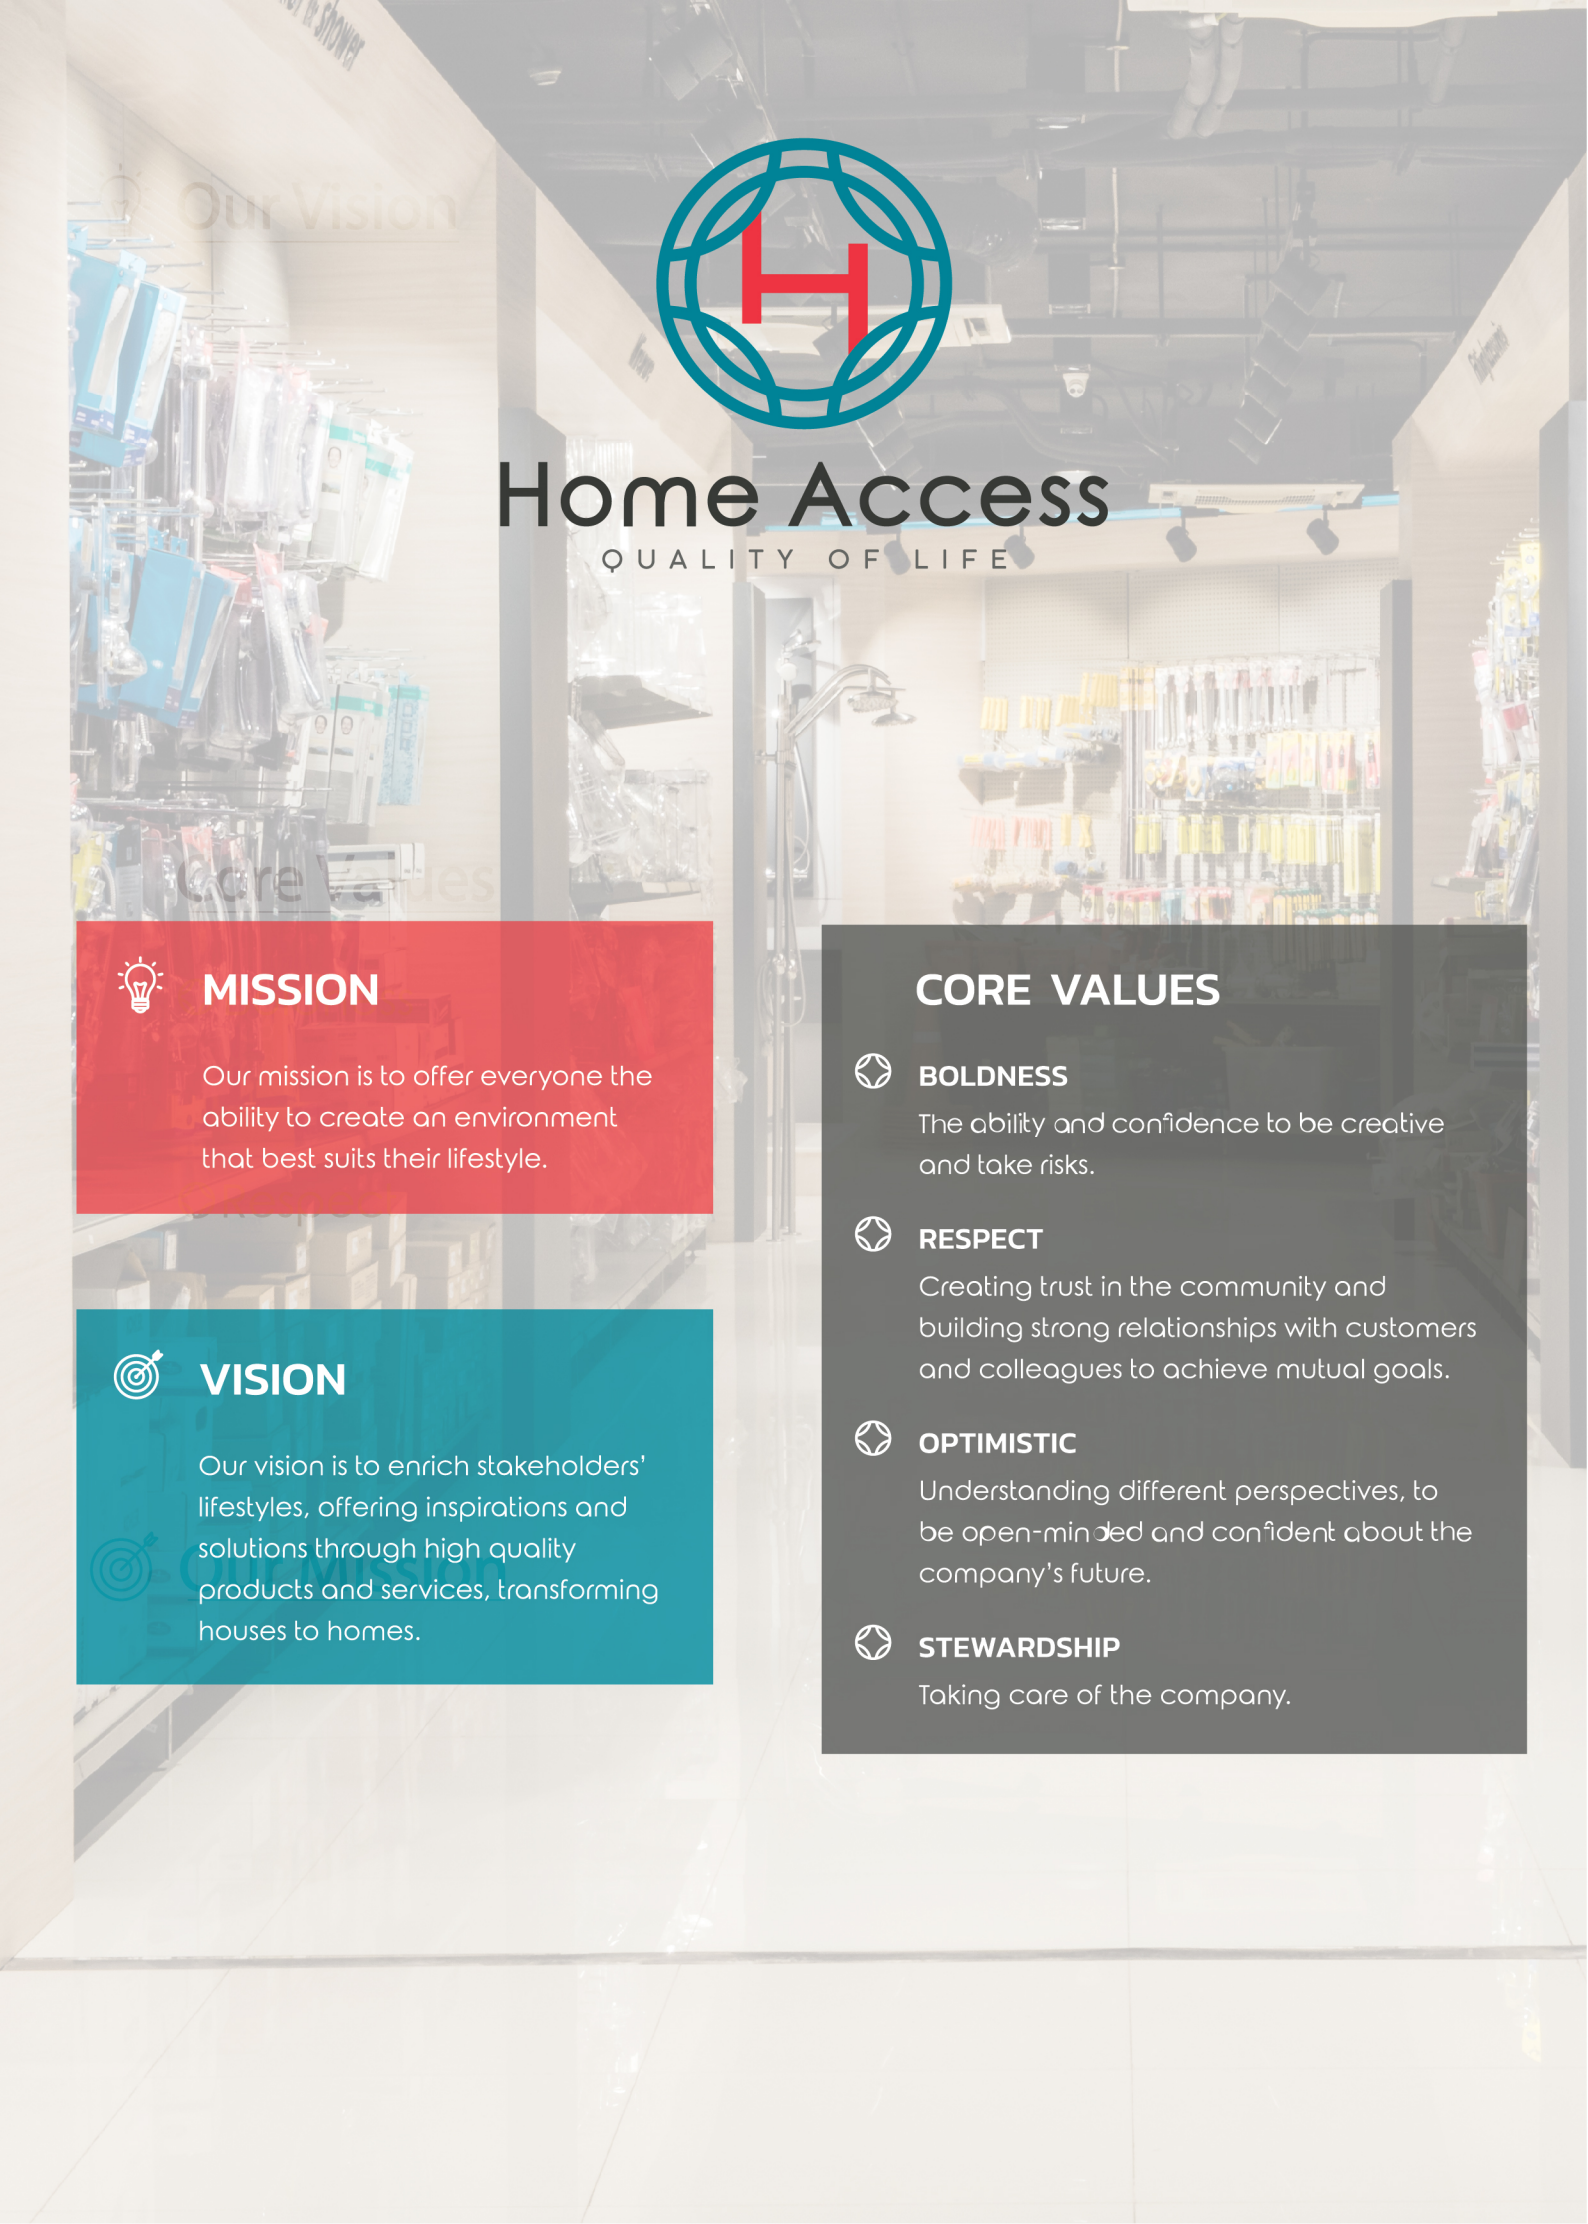

With a well built support chain from our suppliers, we are able to communicate our products knowledge before sales. This ensures proper usage and maintenance of the products. Our professional team is highly committed to providing the most efficient advice and outcome to build trust and maintain a long-term relationship with our customers.

Our Believes

Here at Home Access we believe in making a difference by influencing our customers lifestyle. By listening and understanding our customers wants and needs, we ensure to deliver customer-focused products and services.

We demonstrate integrity by respecting, trusting, and empowering our employees. The company focuses on protecting the environment and quality of human welfare in our communities, by being actively involved as a company, giving time and resources to contribute to the sustainability of the places we operate in.

Home Access

QUALITY OF LIFE

MISSION

Our mission is to offer everyone the ability to create an environment that best suits their lifestyle.

VISION

Our vision is to enrich stakeholders' lifestyles, offering inspirations and solutions through high quality products and services, transforming houses to homes.

CORE VALUES

BOLDNESS

The ability and confidence to be creative and take risks.

RESPECT

Creating trust in the community and building strong relationships with customers and colleagues to achieve mutual goals.

OPTIMISTIC

Understanding different perspectives, to be open-minded and confident about the company's future.

STEWARDSHIP

Taking care of the company.

WALL + FLOOR

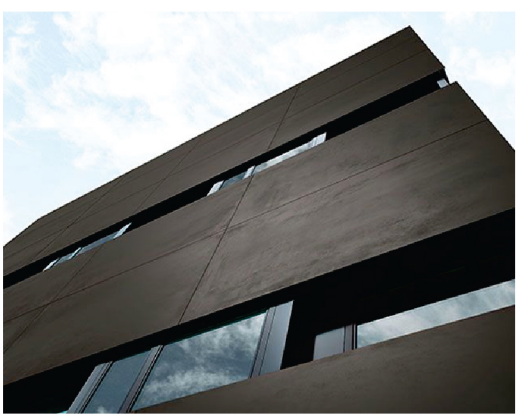

Facade

All Italgraniti Group Project Department systems can be used on both new and existing buildings, the latter to improve the thermal/ aesthetic characteristics of the building.

There are two main types of system, depending on the type of mounting used:

Systems with visible anchoring
Systems with hidden anchoring

BENEFITS

- elimination of all cold bridges
- strong barrier against weather
- effective barrier against direct sunlight
- chimney effect
- soundproofing
- lower energy consumption
- smog and dirt reduction
- rugged and inexpensive structure

OUTFLOOR 20

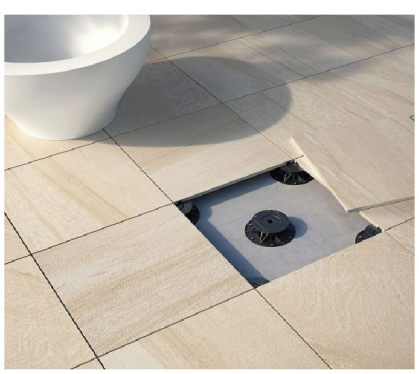

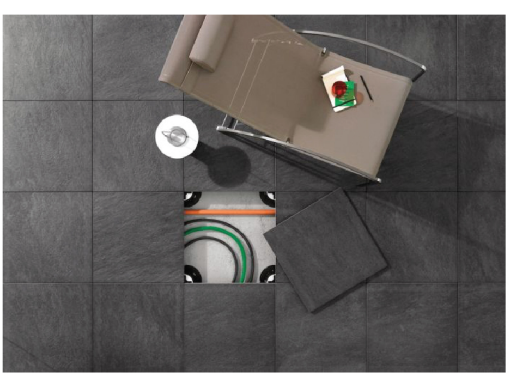

The Visual continuity is an aesthetic advantage that characterises the most exclusive architectural solutions. **Loft ensures outstanding technical preformance for indoor and outdoor spaces wth a skilful mix of comfort**

ONDUVILLA

LIGHTWEIGHT:

- Weighting only 4kg per square meter or 1.27kg per tile.
- Easy handling on the jobsite.
- Saving cost of transportation.
- Particularly suited for roofing onto lightweight pitched roof structures and renovation projects.

LIMITLESS OF DESIGN:

- ONDUVILLA tiles are highly flexible, can take in many forms such as; hip roof, gable roof or lean-to roof. Over roofing reduces to a minimum the disruption to a building function and allows
- the thermal and vapour control characteristics of a roof to be upgraded to improve the environmentalperformance of the building to conform to the latest energy conservation requirements.
- Easy to cut, shape and fix.

MECHANICAL RESISTANT:

Backed by exclusive SealSmartTM Technology the elasticity of ONDUVILLA's

- composite material allows it to shrink firmly around eachscrew/nail, creating permanently leak-resistant barrier. And the waterproofing is secured.
- Strength and impact loading, flexibility, unbreakable.
- Toxicity and resistance to chemical, ONDUVILLA cannot rust. Resistance to all climatic conditions, no heat deformation. Onduline
- can be used effectively in temperatures up to 70 degree Celsius (Tested at Yarsley Research Centre UK).

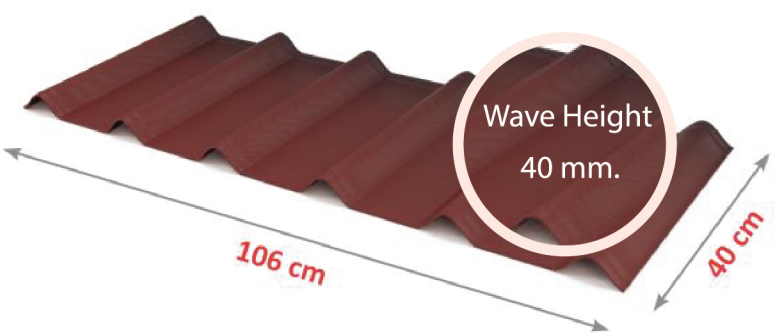

SECURE AND ECO RESPONSIBILITY:

- ONDUVILLA has achieved a low carbon footprint (4kg eq CO2/m2) and recycles some 200,000tons of material each year.
- Natural pigments are used for coloration.
- Products contain no traces of asbestos.
- Materials composed of recycled fibers, verified by a third party (ICC_ES), whose certificates can help for LEED.
- Ecological lifecycle performance.

THERMAL AND NOISE INSULATIONS:

- ONDUVILLA can reduce temperature under the roof, low coefficient of thermal conductivity.
- No problems caused by noise of rain hitting the roof.

KOHLER®

KITCHEN CABINETS

KOHLER KITCHEN CABINET

A Creative Tradition of Inspired Design

2012- Kohler started another initiative in cabinet industry-the launch of Kohler Cabinet Artist Edition, which has invited famous artists in its design and creation.

International Quality and Customized Design Concepts for the Chinese Kitchen

Kohler designers are valuable creativity sources, feeding the US-based Kohler head-quarters. Meticulously harnessed and perfectly integrated by designers at the HQ, the creative ideas are turned into global classic kitchens in various styles. "Human being" is the first element to consider when designing a kitchen. We listen attentively to opinions from Chinese households, study in-depth the Chinese user's habits and innovate in terms of functionality, space utility and lighting, material and new art forms. The professional R&D team helps make our design idea a reality step by step.

Kohler production facilities meet stringent international standards-guaranteeing safety, quality and reliability.

Kohler is the only international brand with a kitchen cabinet production facility in China. The facility operates under Kohler's 'Global Quality System. Kohler's Changshu plant is spread over nearly 10,000M2 and is equipped with state-of-the-art imported manufacturing technology. The Changshu facility operates to European standards including advanced dust removal and other environmental technologies that exceed European green factory requirements by 15%. All plates and paints meet European environmental protection standards, making Changshu the first plant to receive SGS ISO 14000 certification in China. Independent laboratories are also invited to test moisture content, hinge fatigue and other key measure ensuring the

Wear-Resistant Textured Series

- The inspiration of this product came from Kuranda,
- This product focuses on wood grains, to create a natural environment for family members to communicate
- Humanistic and symmetric design.

Lacquer Series

Design Style

- Use new material and craftsmanship and pursue unique space using and structure features.
- Unreservedly and boldly using colors to pursue dramatic contrast, either gorgeous-colored or strong white-black contrast.
- Free plane composition with full use of all art ways such as exaggeration, deformation, breaking, refraction and distortion to break the horizontal and vertical limits in internal room. Using mixtures of abstract patterns, curves, curved surfaces, straight lines and planes to get a unique effect.

Q10 Series

Crafts and technology features

- This product uses imported environmental friendly products, no heavy metal like lead.
- The craft of this series is to do an additional calculation. Firstly put the frames with profiles, then use high temperature to attach the membrane onto door panel.

Rigid Series

- Use roller to press special rigid film onto MDF base material to make special rigid door panels. PUR glue temperature will be controlled around 40°C.

Advantage: High glossy and flat surface, wearand scratch-resistant, durable for long time use. Surface hardness can be 4H. And because temperature is controlled around 40°C during production, which is close to normal temperature, avoid many problems caused by expansion and contraction of temperature differences.

Solid Wood Series

Solid wood door panels are made by selected wood after several processes such as steaming, drying and humidity conditioning. Solid wood door panels have natural wood grain, which are beautiful and luxury.

Core boards can be made by solid wood or by wood veneer MDF. Divided by painting types, there are clean paint and colored paint.

Wood Veneer Series

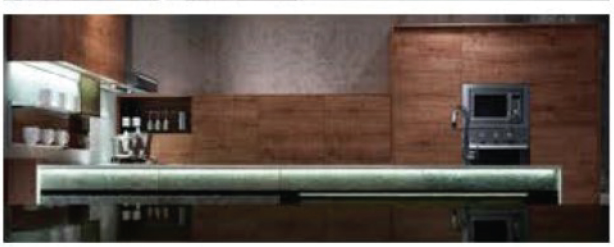

Usually, Wood Veneer uses mid-density board as substrate material, then paste a coat of wood about 0.2-0.5mm.

It can keep the special visual effect of wood and protect it from crack. (but daily maintenance is necessary)

Crestone™

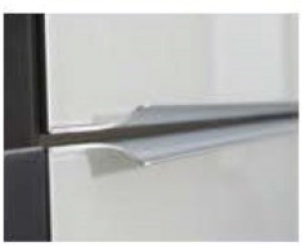

Natural rough rock is combined with neutral-tone wood, make a realistic touch sense on the door surface. LED light works together with rock as covering the rock like cascading water. Incomparable natural concave-convex surface to dramatically present the vivid grain and texture of the rock surface. It brings us into a world of serenity and harmony.

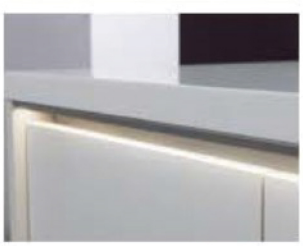

KOHLER®

NATURAL STONE SERIES

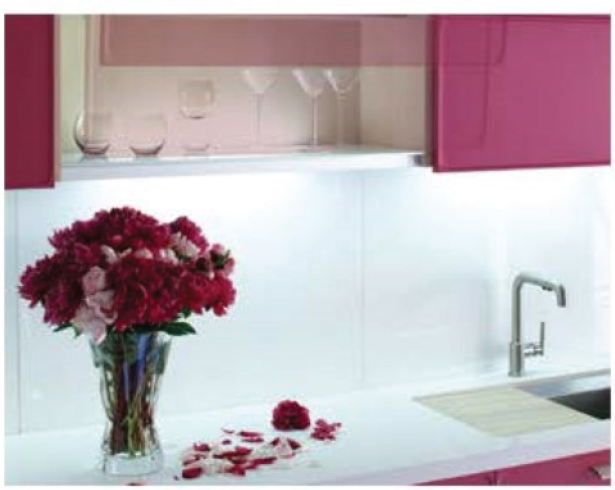

Purist™

Pleasing minimalist designs expressed in soothing and elegant tones. A simple, understated style that combines refinement with perfection, right down to the finest details. Pure colors that convey a sense of luxury a poetic expression of purity designed for your pleasure.

KOHLER®

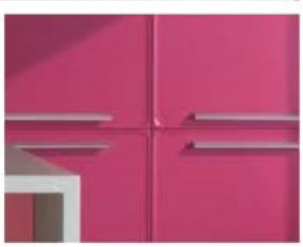

MIRROR SERIES

Jadore™

The rare blooming "R. Centifolia" the rose among kitchens, graceful yet daring in tones of pink and burgundy, Jadore™ is coziness and warmth, a place you will want to retreat to after a long day, truly a haven in your home.

KOHLER®

LACQUER SERIES

Ipswich™ / Valmont

Named after a small city in England, this timeless design turns the kitchen into a uniquely romantic space, at once graceful and elegant. The details and finishing remain modern but are balanced with subtle echoes of more classical styles.

KOHLER®

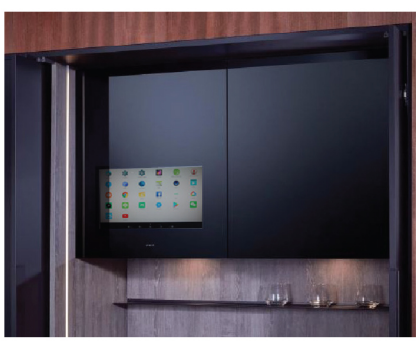

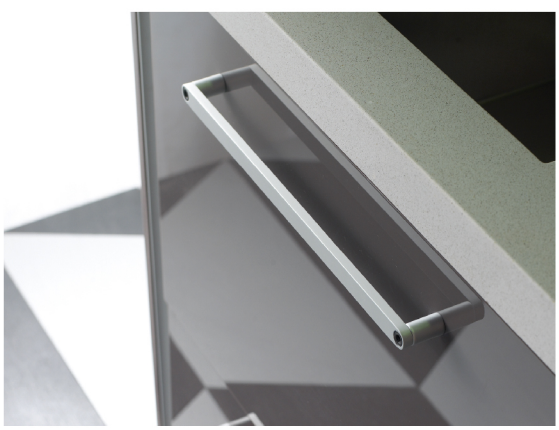

Karess™

Combines an all-over metal surface with robust lines of futurism. This is the first kitchen infused with Kohler's exclusive Oil-Resistant Finish (ORF) patented for oil-free cooking enjoyment.

KOHLER®

METAL SERIES

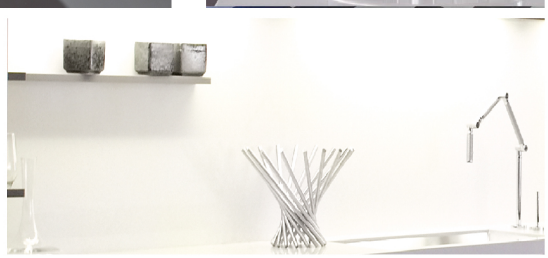

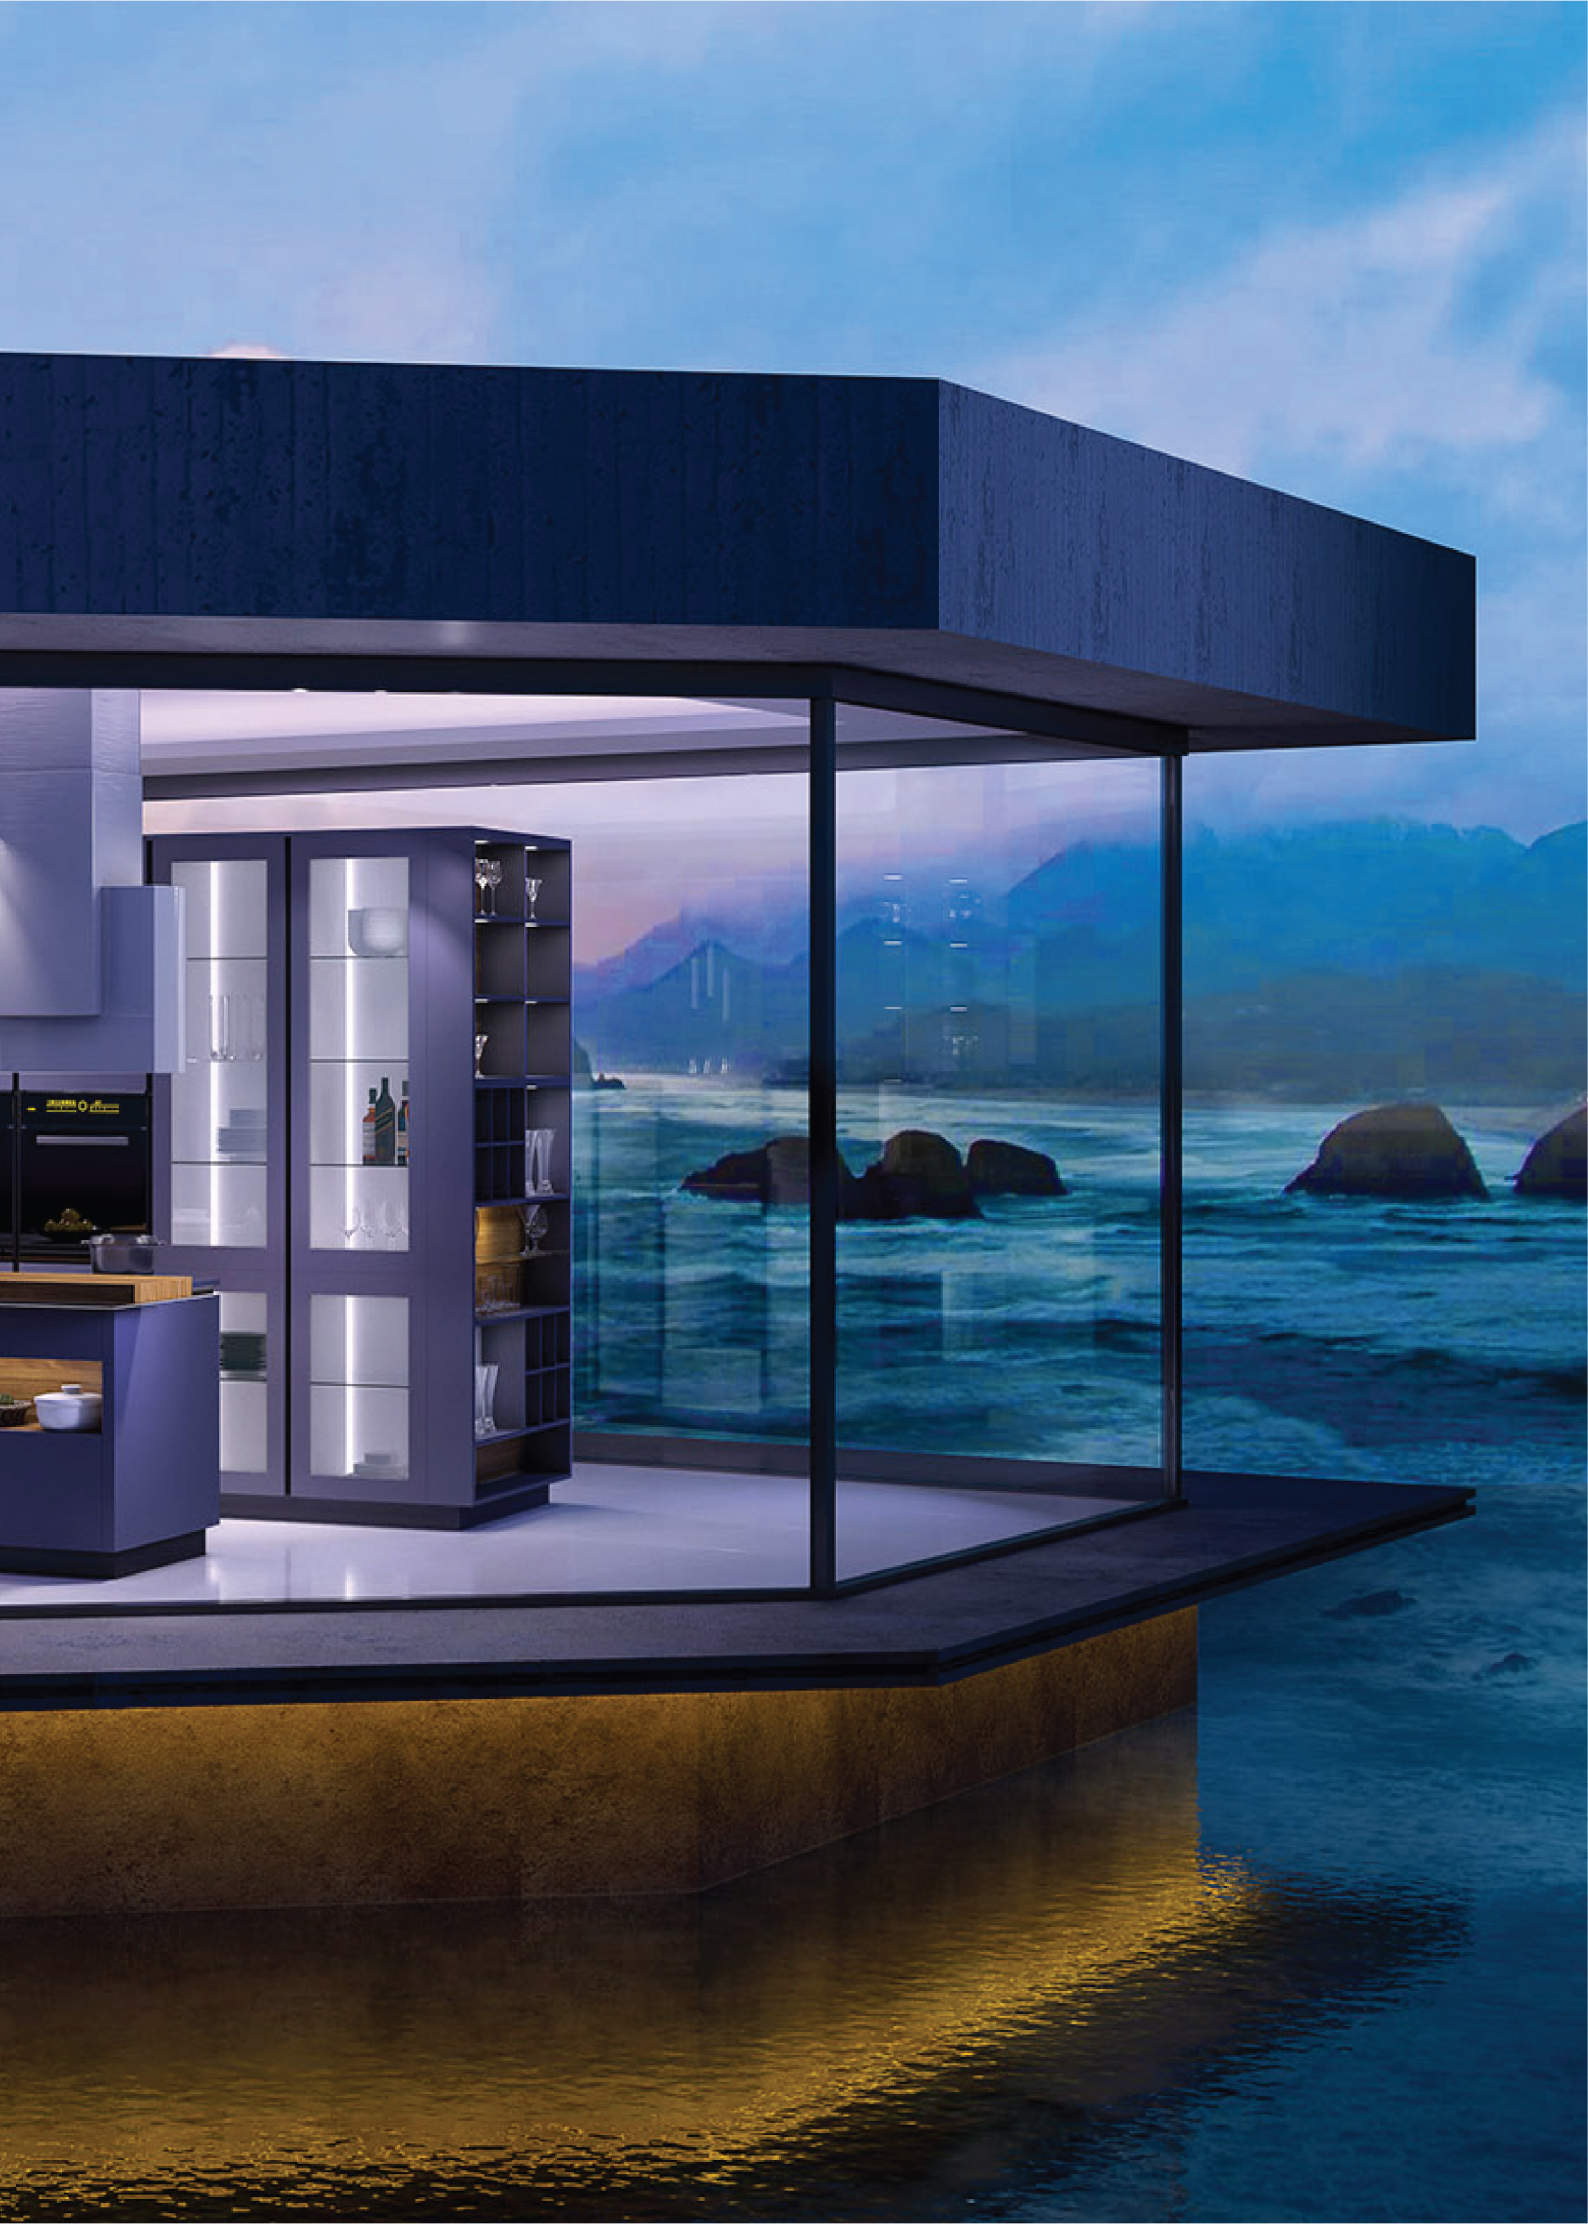

Notiz™ C

The fusion of beauty and function is an expression of perfection and harmony. The art lies in finding balance between aesthetic forms that lift the soul and features that make being in the kitchen a sheer pleasure. The secret lies in the details: clever but discreet storage, durable easy-to-maintain surfaces and pure clean lines.

KOHLER®

Wood Venner Series

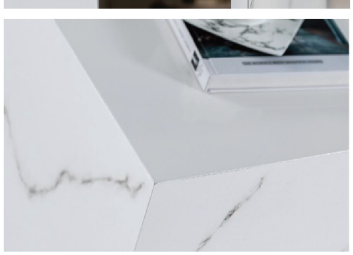

BORCCI柏厨

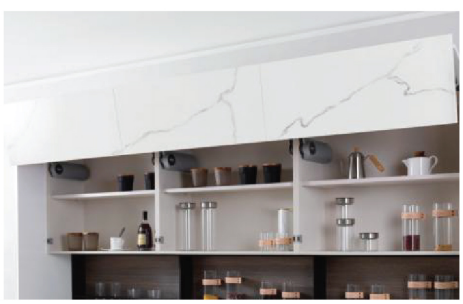

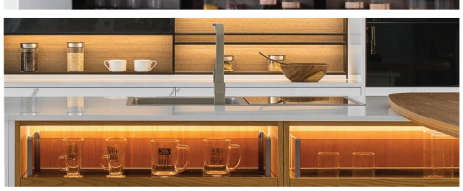

PURE 礼白

BORCCI PRODUCTS
IN 2019

The combination of marbella and red oak incoprotates the natrual life of people. Simple and elegant design full of life and energy for a simple life.

BORCCI柏厨

时光印象
OCA TIME

The Simple and rigorous design creates a natural and comfortable space. Every minute detail, focus on quality and care. This project was in collaborations of German & Chinese design has won the red dot award and the IF Award many times.

BORCCI柏厨

曼哈顿 Manhatt

Wonderful life in Manhattan is day and night. People, who live in this city, like urban living.

BORCCI柏厨

原色地带 Colourful City

According to the cooking habit of Chinese people, BORCCI combined with ergonomic research to issue a gold storage system

BORCCI柏厨

醉花间

Drunk In A Dream

The stone grain door panel has a strong three-dimensional effect, natural texture and sense of depth, which give you the feeling of being in nature. There are two colors to choose. One is black and the other is white.

BORCCI柏厨

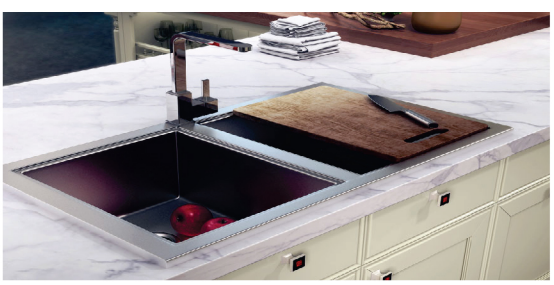

Modularity means being flexible. According to different functional requirement and decorative styles, you will find out the most suitable plan.

柏厨

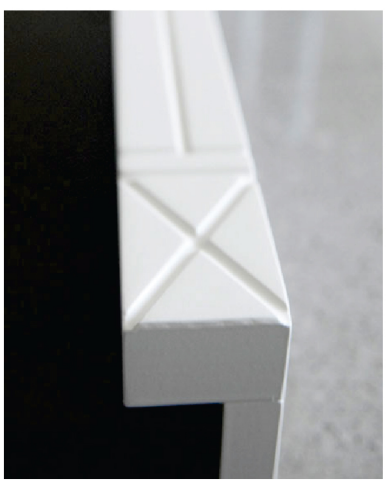

BORCCI Style

BORCCI Style is not only carries the humanistic spirit, but also has a lot of innovative functions. Designers combine different elements to bring out the harmony of Chinese ancient and modern culture, which let Chinese people enjoy the cooking time.

BORCCI柏厨

Big City Mini Love

大-城-小-爱

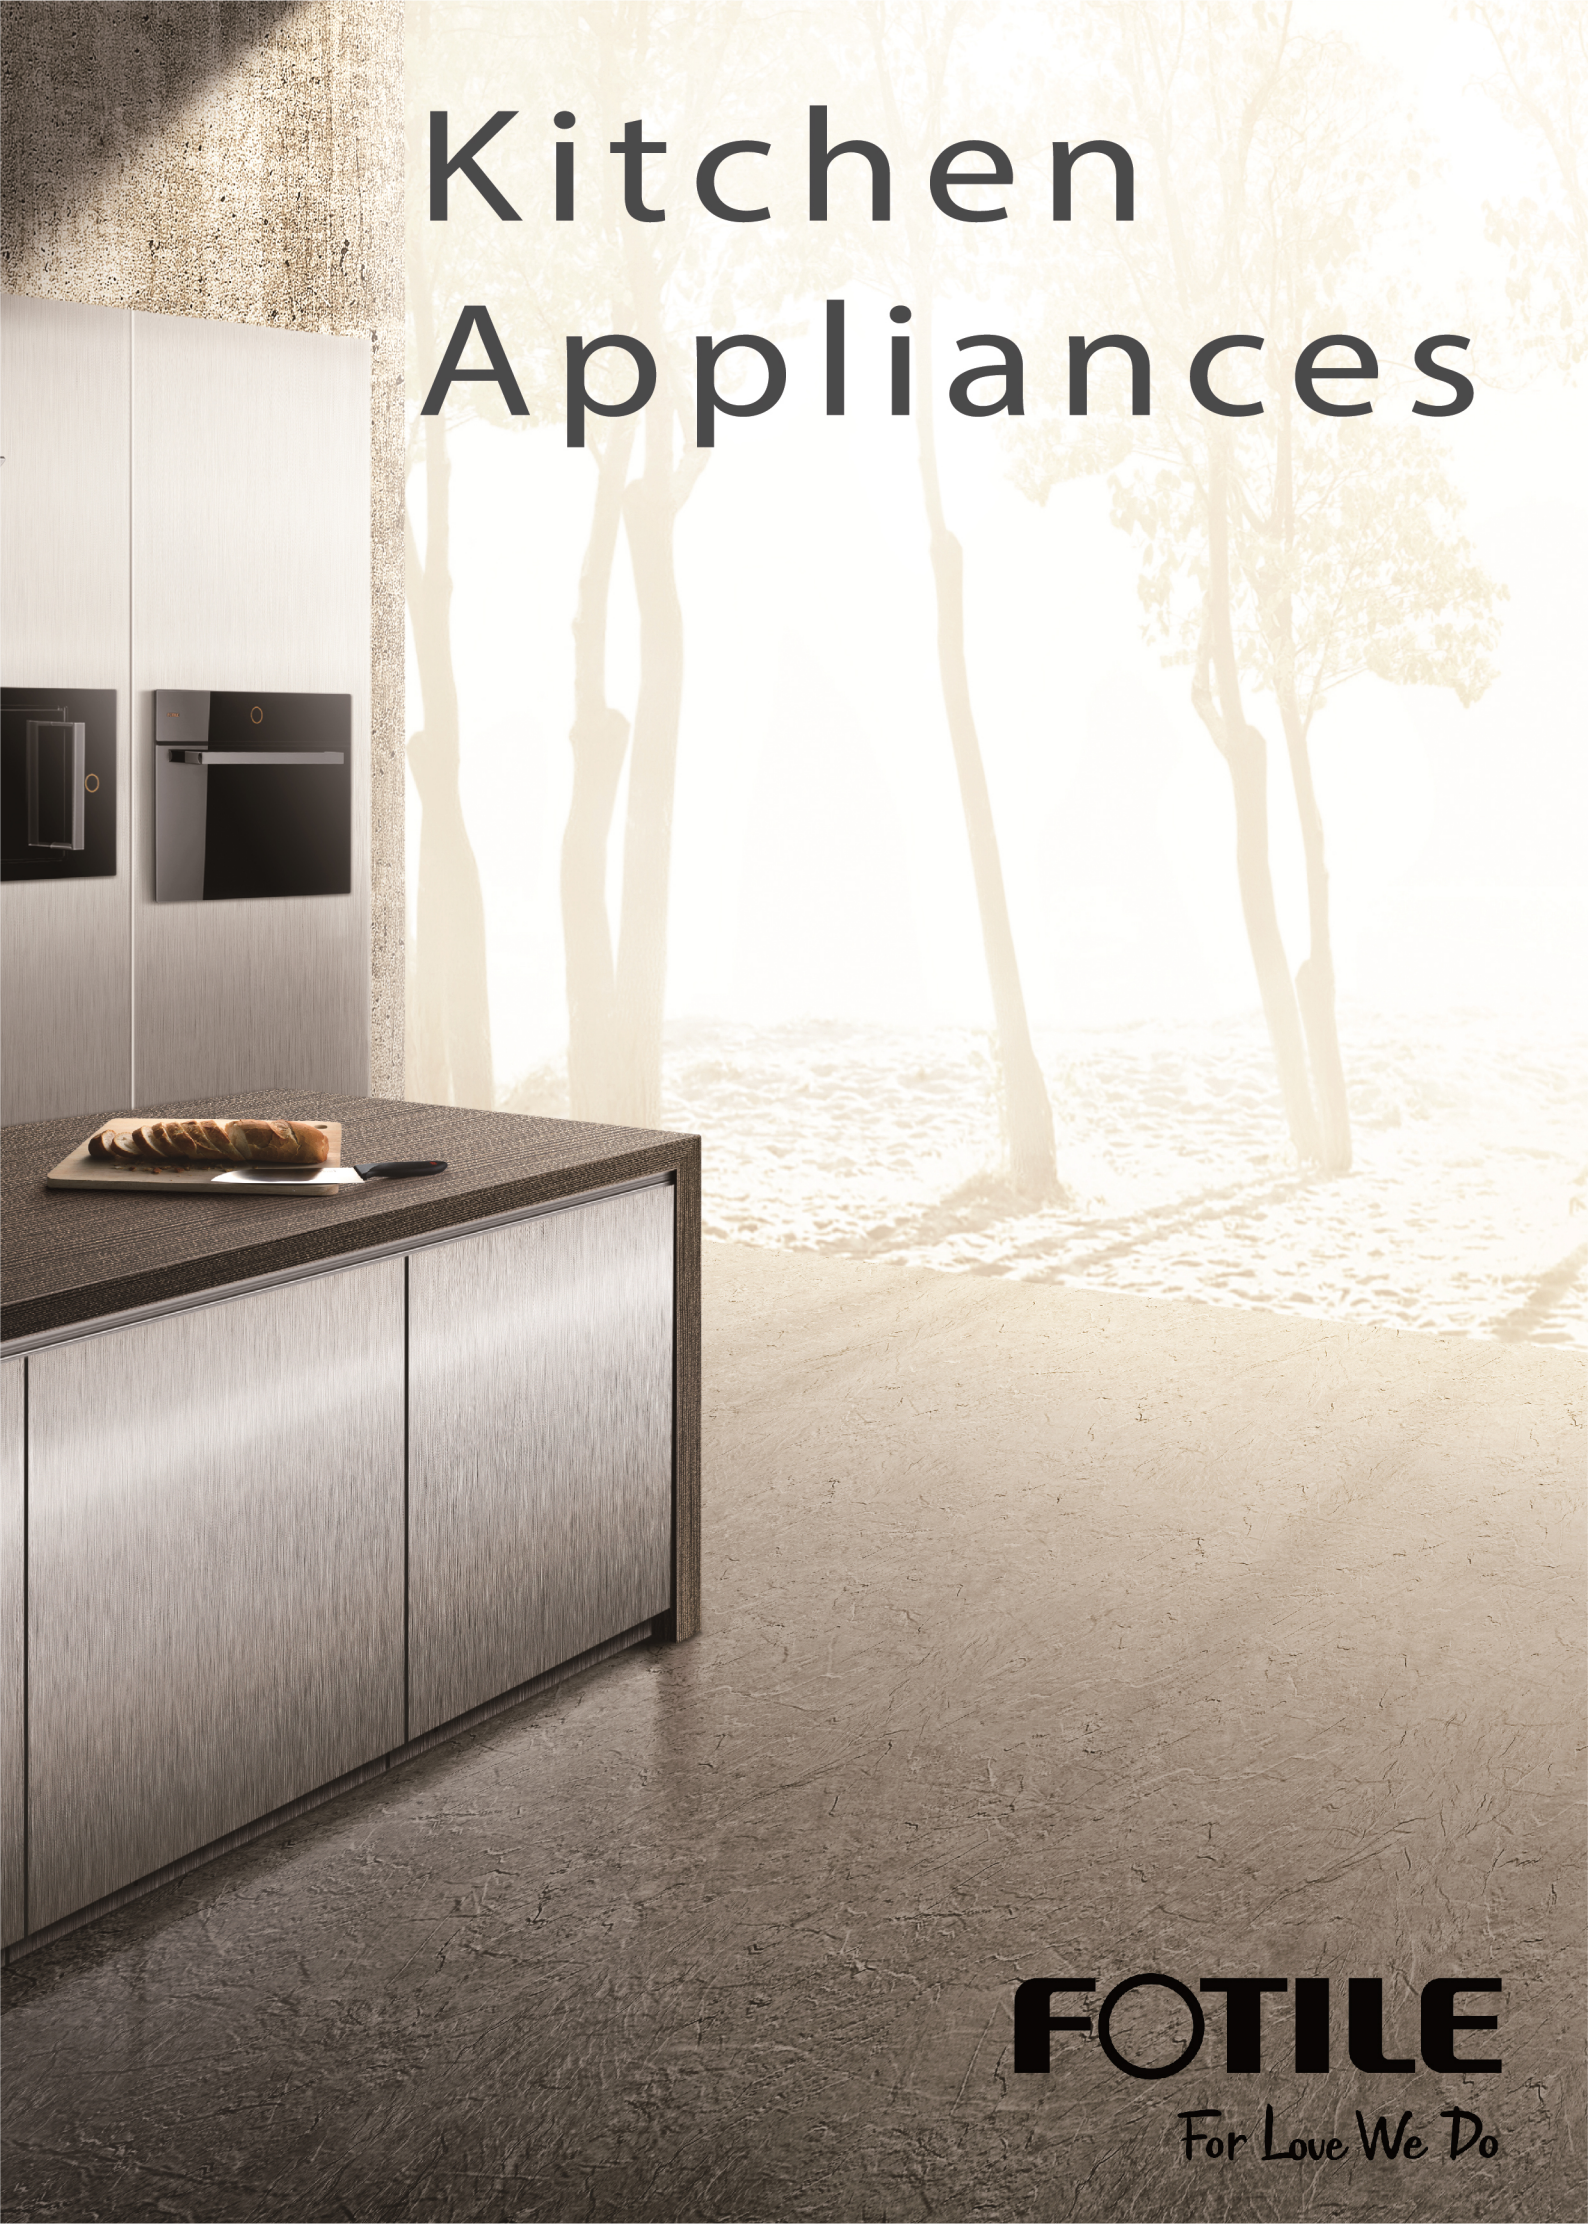

Love in City

The design of the Roman column is simple, which has natural and rural feelings. Good design never separates the connection of detail and whole. The high-end life can't coarse. People can't control everything in the whole life, so it is important for people to improve the quality of the life

Stainless Steel Kitchen Sinks

Anti-Bacterial Drain Pipe
Anti-Bacterial Drain Pipe prevents growth of bacteria.

Faster Drainage
Water drains faster with double swirl strainer and larger drain pipe. Additional strainer basket prevents clogging.

Durable and Sturdy
Using 304 Stainless steel with maximum thickness of 2.0 mm. for durability.

Reduce Noise and Coagulation
Special coating and rubber layer at bottom of sink reduces noise and prevents coagulation.

Fabricated Kitchen Sink
Hand-crafted from premium gauge stainless steel with thickness ranging from 1.2 - 2.0 mm.

Oil Resistance Finish (ORF)
Kohler's exclusive Oil-Resistant Finish (ORF) patented for oil-free cooking enjoyment

Total Office Solutions

Rockworth®
Working progress

EXECUTIVE Design

taste simplicity sturdiness

A Forward-thinking collection of Zen's executive desks that provides the freedom to create innovative, appealing private office solutions with unsurpassed performance in scale, function & aesthetic range. If the meaning of Zen is calm and neat, Zen is Luxury design with simplicity and sturdiness.

DESKING SYSTEMS

The components are designed with a purpose. It easily accommodates changes in configuration, changes to cabling requirements, and changes in height. Their range of sizes, configurations, worksurface shapes, and finishes, allow them to be adapted to the design and finish of any space from contemporary to transitional.

FILING & STORAGE

To harmonize with the new trend of hot desking, one desk shared between several people who use the desk at different times, a mobile cabinet is created to keep each user documents and belongings.

SEATING & LOUNGES

Our soft seating ranges are the bridge between formal clarity, elegance and comfort. Our ranges have what it takes to become classic, timeless and prestigious design whether in a private area, a lounge or a reception area. There are different designs for different applications.

Ideal for a swift change the workspace to myriad collaborative pattern.

New mobile freestanding table, connectable with ganging set for more sturdiness. Complete the innumerable forms with trapezoid and hexagon table to upgrade the standard row configuration. With trapezoid shape table at the middle, a sine wave configuration is created, hence an effective training atmosphere are in your control. Personal belongings are finely organized in belonging shelf.

Experiencing Our Seating Unfolded

Folding as a process in architectural design is essentially experimental.

Rockworth interest lies on the process in which the sequence of human behavior transformation that affect the functionally of object. Considering this an open and dynamic developing process where the design evolves with alternate periods of imbalance. We can appreciate the function of folding as a design generator by phase transitions and as power to reveal.

This experiment allows us to understand how human being interacts with a chair at different space and time at work, we responds to these differences by carefully study the harmony among seating, supporting and synchronizing.

S1 Seating

Our chairs are assembled with high quality material and components, featuring high density molded foam seat cushion that conforms to your body movement. This providing excellent stress relieving comfort and enhance better blood circulation. Wide range of fabric is available for selection to match your overall color scheme.

S2 Supporting

Our chairs provide comfortable, full body sedentary support of which you can sit in at least eight hours without encountering back strains, neck pains or overall body aches. Our chair design was inspired by the simple fact that each of users is unique. The position we sit and move in our chair are subtly different too. We constantly find a better way to provide individual comfort and support.

S3 Synchronizing

A fully adjustable chair is indisputable the must features in which a decent chair should have. Back height adjustable, seat depth and arm support should all be adjustable to better support you in any position. An ergonomic chair should have pneumatic lever adjustment to adjust the seat height. A tension knob allows you to adjust reclining back rest to proper with your body weight. Also an adequate back rest for curvature your spine while providing lumbar support. An appropriate ergonomic designed chair, hence, should accommodate people with a wide range of body size and posture.

Arti An artistic design

combines with articulated flexible ergonomic functions, provides an excellent comfort and correct seating for individuals.

QM

Innovative seating

design with maximum ergonomically comfort for any postural position.

Aqua Nishihara Corporation Limited

A leader of water professional and water utilization

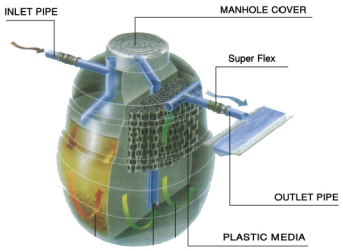

- ***Water***, one the most important natural resource which is indispensable for the existence of life and all living organism.
- *Even* though circulation of water plays a major role in maintaining the balance of the natural environment, clean water is not an inexhaustible natural resource.
- *Water,* which have been used by households and various industries, is so contaminated that it is beyond redemption by natural means. And it should be noted that the more a country is developing, the more wastewater is produced.
- *Without* control or proper management of the water, there will be less and less water for consumption and on the contrary, there will be more and more wastewater.
- *Undoubtedly,* the task of minimizing environmental pollution demands highly professional personnel, expert in applying appropriate technologies to

WASTWATER TREAMENT TANKS
SEPTIC TANKS

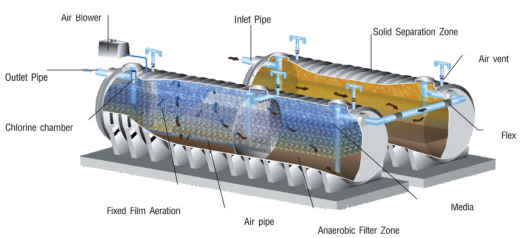

AQUA ST-BF

A new product designed to combine the functions of the Aqua PAC and Aqua Biofilm into one tank. This cost-effective treatment is ideal for sites with limited space and is also efficient at reducing odor and effluent BOD

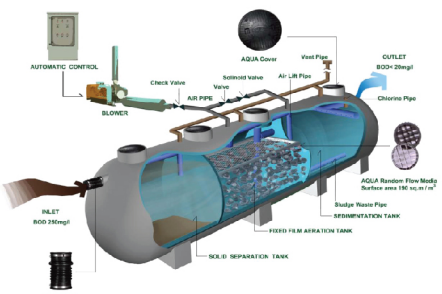

AQUA PAC

2-in 1 treatment tank designed to have the dual funtion of Aqua ST and Aqua filter. Aqua PAC that is an ideal treatment unit for any site with a limited installation area

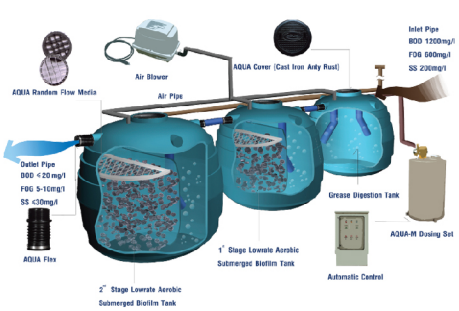

AQUA Bio Compact (ABC Series)

The extremely Compact Wastewater treatment system designed to specifically treat domestic wastewater from public buildings.

AQUA NBF Seriea (Fibrglass)

The most practical and effective system perfectly designed to serve the domestic wastewater

AQUA Aerokit Enzyme Tank (AKZ)

AQUA-AKZ series uses aerobic treatment process with bio-augmentation Sludge process. it consists of greasedigestion tank followed by low Rate Aerobic Submerged Bio-film. This combination ensures the quality of effuentstandard.

AQUA Greasw Trap

Ideal for efficent, low-cost separation of grease and food scraps in the discharge from kitchens, restaurants, canteens, fast-food kichens and mess-halls

MAXA

AQUA
Water Quality For Life

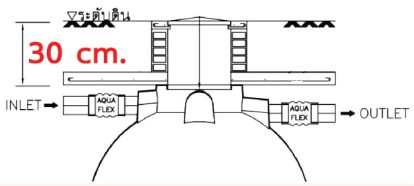

Quality with Economy

Anaerobic wastewater treatment tank
Suitable for housing and village project

MAXA is a complex wastewater treatment tank that contain septic zone and special anaerobic filtration together, which will provide maximum wastewater treatment. With very thick tank wall and robust structure that passed AQUA's testing standard. This tank is a perfect one that offer to you in very economy price!

an be install at depth
30 cm.

Aqua Cover (PE)
Strong for receiving load, easy for open, also never rust

Aqua Flex
Premium quality flexible jointing that come with belt, to help protect a pipe from broken from shrinking of building's foundation.

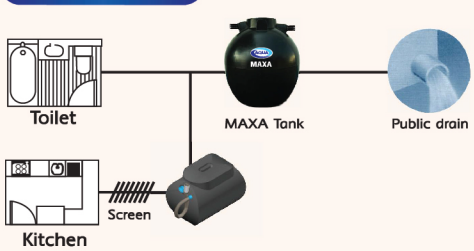

Pallring media
Making from PE material that provide long life time. This media is designed as a house of microbial cell to adheres its cell with the rough surface

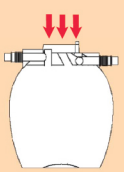

Aqua Seed
Selected strain of microbial that provide the maximum efficiency for treatment in tropical climate

• WORKING PROCESS •

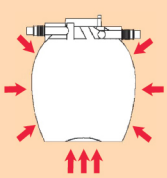

HE NEW CHOICE THAT VERY ECONOMY

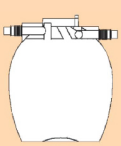

- Robust structure guaranty by our advanced standard testing.
- Wastewater full tank volume design, so the tank will smaller than another tank.

WATER TANKS

AQUA NISHIHARA CORPORATION LIMITED
A leader of water professional and waste utilization

Turbid Polyethylene (Opaque)

Turbid Polyethylene was developed to prevent light from passing through the tank walls to prevent moss build up inside the tank. In addition the tank lid is aslo made from the same material and has sufficient thickness to ensures that sunlight will not pass through the walls and cause moss build up inside the tank.

AQUA NISHIHARA CORPORATION LIMITED
A leader of water professional and waste utilization

Linear Low Density Polyethylene

High density, shock resistance made from cheap materials. It is suitable for the Storage of water. Typical installed inside or buried underground or covered on the roofs protected from sunlight.

AQUA NISHIHARA CORPORATION LIMITED
A leader of water professional and waste utilization

Granite Polyethylene

An alternative to bucketless tanks. The colors are usually granite or sandstone to match the atmosphere of the house. In addition, the tank lid is made of the same material as the tank and has a sufficient thickness to ensures that sunlight will not pass through the wall and cause moss build up inside the tank.
