THE KABBALAH OF QUANTUM PHYSICS

Bridging Ancient Wisdom and Modern Science from Isaac Luria to Erwin Schrödinger

Shemer Keydar

What if quantum physics and Kabbalah are describing the same reality in different languages? After forty years as a geophysicist and a parallel lifetime studying Lurianic Kabbalah, Shemer Keydar traces the remarkable parallels between wave-function collapse and tzimtzum, the quantum vacuum and ayin, information theory and Maimonidean providence. Neither reducing science to mysticism nor mysticism to science, this disciplined, illuminating exploration proposes that the universe may be fundamentally informational — and that two ancient and modern traditions have been mapping the same hidden architecture all along.

TURNING ARTIFICIAL

Moral Reckoning in Four Movements

Eli Bruderman

What kind of human being are we becoming through our relationship with AI? Turning Artificial is a philosophical inquiry in four movements, tracing how artificial intelligence has shifted from a tool to a presence that quietly reshapes our sense of self, desire, creativity, and freedom. Drawing on Hegel, Buber, Levinas, and Borgmann, the book examines the ideologies of Big Tech and transhumanism, proposes an original ethical framework called hypo-modernism, and asks what we must never hand over to machines. Urgent, rigorous, and accessible, it is a moral reckoning for one of the most consequential technological developments of our time.
