Expert aviation online training, designed for modern aviation teams...

At Bostonair Group, we deliver high-quality aviation training that drives safety, efficiency and compliance across the industry.

As a Part-147 Approved organisation under both EASA and UK CAA, Bostonair Technical Training Ltd provides certified Type Training for B1 and B2 Engineers, as well as an extensive portfolio of online training courses including industry essentials such as Human Factors, EWIS, Fuel Tank Safety and our new Aircraft General Familiarisation (Gen Fam) courses.

We also offer bespoke, blended training solutions that combine online learning with instructor-led delivery, tailored to meet specific client needs and operational requirements. With expert instructors, flexible delivery options and global accessibility, Bostonair equips aviation professionals and organisations with the skills, knowledge and confidence to perform at the highest standards.

Bostonair have been great to work with, always quick to respond and really easy to deal with. They have really made a huge contribution to help us make our training more effective.

CITYJET

We've been working with Bostonair for over a year now, and it has been a great experience. They have always been quick to respond and proactive in helping us find the right solutions to improve our staff training. The content is great.

HeliService
Offshore | Maintenance | HEMS

Bostonair is one of our best solutions to obtain online trainings for our Part 145 personnel. Their quick and responsive customer service provides a comfortable and convenient experience to me.

SKYWAYS TECHNICS

Training That Supports Your Operational Goals and Compliance Requirements

Bostonair Technical Training delivers interactive online courses for aviation professionals, covering Part 145 Maintenance, Ground Operations, and key regulatory topics like Fuel Tank Safety, EWIS, and Human Factors. Specialist training includes Fatigue Risk Management, Dangerous Goods, and SMS. As a Part 147 Approved Organisation (EASA & UK CAA), we ensure full regulatory compliance and provide instant, globally recognised certification.

Courses are accessible 24/7 with flexible scheduling, scalable delivery, and integration options via white-labelling or API. We also provide tailored training solutions based on your specific needs or audit findings—backed by dedicated support for both learners and administrators.

Aircraft General Familiarisation courses

The newest addition to our training portfolio, Bostonair's new range of Aircraft General Familiarisation (Gen Fam) Courses set a new standard in aviation training, combining technical excellence with unmatched flexibility.

Designed and delivered by experienced aviation professionals, each course provides a comprehensive understanding of aircraft systems, structures and operations, helping learners build confidence and capability from the ground up.

Accessible anytime and anywhere, these online courses make it easy for individuals and organisations to upskill without disrupting busy schedules. With immediate certification on completion and full alignment to the latest regulatory standards, Bostonair's Gen Fam training gives your team the competitive edge to perform with precision, safety and confidence in a rapidly advancing industry.

Created in line with EASA & UK CAA Regulations our courses include:

- ✓ A320 CEO/NEO General Familiarisation
- ✓ B777-200/300 General Familiarisation
- ✓ B737-600/700/800/900 General Familiarisation

Bespoke Blended Training

Bostonair's blended training solutions offer a flexible and highly effective approach to developing your team's skills while maintaining operational efficiency. Each bespoke programme is designed around your specific requirements, combining the convenience of online learning with the depth and engagement of instructor-led sessions.

Participants complete an online course and final assessment at their own pace, followed by structured discussions with a certified instructor. These interactive sessions explore real-world scenarios, industry best practices, and risk management strategies, ensuring knowledge is applied confidently and effectively in the workplace.

Whether delivered virtually or on-site, Bostonair's blended training provides a seamless, high-quality learning experience that enhances competency, supports compliance, and drives continuous improvement across your organisation.

Instructor-led Training

Bostonair Technical Training Ltd offers a comprehensive portfolio of instructor-led courses designed to deliver high-quality, flexible and cost-effective training worldwide. Each course is developed and delivered by experienced industry professionals and can be fully customised to meet your organisation's specific operational and regulatory requirements.

Flexible:

- Training is available in-person or virtually through synchronous distance learning.
- Sessions can be blended with our 24/7 online learning platform for a seamless training experience.
- With instructors located globally, we can deliver training at a time and place that suits your schedule

Cost-Effective:

- Train teams across multiple locations remotely, reducing travel and accommodation costs.
- Competitive pricing and discounts available for group bookings and multi-student enrolments.

Customisable:

- Courses tailored to your exact needs, ensuring relevance and maximum value.
- Target specific focus areas identified through internal audits, reporting or performance reviews.

Speak to our Training Experts...

Whether you're rolling out mandatory training across multiple locations, managing recurrent compliance or developing bespoke learning programmes, Bostonair provides the tools and expertise to keep your workforce trained, compliant and operationally ready.
