HAMMAM/STEAM

Known as a Turkish bath, Hammam offers a holistic approach to health and well-being, such as relaxation, improved circulation, and a social experience. Ice Fountain provides a refreshing experience after using steam and sauna or other heated spa facilities. Scoop up handfuls of ice to cool down the body and refresh the senses. Shower Bucket Drench is a traditional method to cool you down after using a sauna or steam room, quickly lowering body temperature and refreshing the skin.

FAR SAUNA

Uses special heaters to release far infrared light waves, which are absorbed directly by the body's tissues, providing gentle, soothing heat. It is good for relaxation, detoxification, muscle recovery, improved circulation, and skin health. However, it is not recommended for people who are pregnant, have heart disease, or have recently consumed alcohol.

GYM

Our gym, open 24 hours a day, provides a complete selection of high-quality fitness equipment, allowing you to maintain your fitness goals during your stay.

VICHY SHOWER

Unique spa treatment involves lying on a padded table with multiple shower heads positioned overhead. It is combined with a body scrub and body wrap with natural ingredients, which are good for relaxation, exfoliation, and improved circulation.

HYDRO POOL

The hydrotherapy pool is specially designed for therapeutic purposes, including jets and bubbles to provide massage-like effects. Warm Pool helps to relax the muscles, increase blood circulation, and prepare your body for further therapy or exercise. Cold Pool helps to reduce inflammation, improve recovery after intense exercise, and provide a refreshing sensation.

BEAUTY SALON

A large and beautiful beauty salon for spa manicures and pedicures, as well as hair treatments with comfortable chairs. We also offer Balinese-style makeup.
