VISION:

Leading design that delivers better solutions, inspiring and equipping outdoor enthusiasts to explore the world.

OUR BRANDS

MOMENTUM FOR THE SEASON AHEAD

Building on strong momentum with new product, continued brand investment, new leadership, and an important milestone for our business.

As we move into Spring and Summer, we're seeing strong momentum across our portfolio and remain focused on working closely with our retail partners.

There's plenty to look forward to, with new ranges and key product launches arriving in market, headlined by the Sea to Summit Sentinel Tent – built and tested for demanding conditions and showcasing the innovation and performance behind the brand.

We're also pleased to welcome Dick Stanger as our new Commercial Director, Australia. Dick brings 20 years of senior commercial and marketing leadership across the outdoor, sports and lifestyle industries, with experience across brands including Arc'teryx, Salomon, Garmin and NNormal.

Dick will lead our Australian sales, brand, ecommerce, customer service and marketing teams, with a strong focus on commercial strategy and retail partnerships. His appointment reflects our continued investment in the Australian market, and one of his first priorities will be getting out on the road to meet our retail partners and understand where we can support you better.

You can reach Dick directly at dstanger@seatosummit.com.au to introduce yourself or raise any questions.

We're also incredibly proud to share that Sea to Summit is now a Certified B Corporation. It's an important milestone for our business and independent recognition of the work we continue to do across our people, communities, environmental practices, governance and the way we operate.

Across the broader portfolio, we'll continue investing in our brands and activating in market, with plenty more to come as we head towards summer.

Thank you, as always, for your continued partnership and support.

Scott Greasley
General Manager APAC & CCO

WE'RE NOW A CERTIFIED B CORPORATION

HERE'S WHAT IT MEANS

We've always put a big emphasis on the details. Those small things you do that amount to something greater than the whole. Not just for our products, but for how we operate as a business too. Now, we have an independent body that verifies just how much of an emphasis we place on those things that matter.

WHAT'S B CORP CERTIFICATION

It's a company level certification for social and environmental performance, transparency and accountability. It isn't a claim about any individual product. It reflects how we operate as a business; our governance, our people, our supply chain and our environmental practices, all of it. And it's verified by B Lab™, a global non-profit, against standards across five impact areas: governance, workers, community, environment and customers.

[LEARN MORE AT B Corp.COM](https://www.bcorp.com)

TESTED BY AUSTRALIA

The gear you carry becomes part of your story, ours began in Australia. For 35 years, we've tested our gear in our own backyard, where reliability isn't optional, it's essential.

"Sea to Summit presents 'The Endless Pursuit'. A short film about designing, refining and testing gear in Australia's toughest conditions, so it performs wherever you take it."

NEW PRODUCT DEVELOPMENT

THE FORT KNOX OF TENTS

EXPLORE THE SENTINEL

Sentinel Tent

06

FIELD NOTES | ISSUE 4 | SEPTEMBER 2026 - FEBRUARY 2027 | STSDISTRIBUTEDBRANDS.COM.AU

WHY CHOOSE THE SENTINEL TENT?

Breathes in Any Conditions

Cross-flow AirLift vents keep air moving even when the fly is sealed tight - wake up dry, not damp, whatever the weather.

A Home Away From Home

Steep walls and generous internal volume give you real space to sit up, sort gear and wait out a storm. The frosty green canopy is intentionally light to keep the interior bright.

All-weather Performance

Tested in winds over 80 km/h . When conditions turn, the Sentinel stays put.

Built to Take a Beating

A 25,000mm waterproof floor and Ultra-Sil LS rainfly that absorbs less water and holds a tighter pitch when wet. When the sky opens up, the Sentinel is ready.

2026 LIGHTING UPDATES ARE LANDING!

New Storm, Storm+
and Stella'R in stock now

STORM+ HEADLAMP

The Storm+ is a powerful headlamp engineered to light the way when it matters most, featuring a robust waterproof/dustproof housing and 750 lumens of bright, long distance light. The compact body is ergonomic, with large, easy-to-operate buttons. One button turns the lamp on and off and adjusts brightness of the light, while the other swaps easily between three set modes (low, medium, and high). The Storm+ also has red, green, and blue coloured night vision modes and peripheral white lighting for close-range activities like rigging rappels on drawnout descents, in addition to a powerful spotlight providing long range illumination. The headlamp has our Mode Memory feature, allowing you to turn the light on and off at a chosen brightness. The Storm+ rechargeable battery is powered via USB-C.

FEATURES

- 750 lumen max output
- 2 oversized buttons for ease-of-use in all conditions and with gloved hands
- Modes: RGB, low/medium/max and adjustable brightness, SOS, and strobe
- Mode memory: turn the light on and off at your designated brightness
- Patented Digital Lockout: prevents accidental illumination in your pack or pocket
- 1 flood lens (Onsight lens), one spot (Icon 700) lens, one Red-Green-Blue(RGB) spot lens
- Recycled PET internal structure and recycled headband material

STELLA-R HEADLAMP

Elevate your outdoor adventures with the Stella-R headlamp, the ultimate blend of versatility, style, and sustainability. Perfect for camping, cooking, or socializing, this compact, rechargeable light transforms any campsite into a vibrant gathering space. Crafted a recycled, wildly comfortable, infinity headband, it's a sustainable choice for the next generation of outdoor enthusiasts who value reliability, durability, and a little extra flair. With its playful design, optimized focal and ambient lighting, full colour, campfire and colour vortex modes, the Stella-R offers hands-free illumination that's as fun as it is functional.

FEATURES

- 350 lumen max output
- Optimized lens design for all-around use: 30-degree focal beam angle for hands-free camp lighting
- Rechargeable: built in and serviceable 3.6V 1200mAh (4.32Wh) battery with USB-C charge port
- Oversized, two button UI for easy on/off, brightness adjustment and switching between different lighting modes
- Modes include focused and ambient lighting, full color, campfire and color vortex modes
- Patented digital lockout prevents accidental illumination in your pack or pocket
- IPX4 water resistance for worry free outdoor use

Built for Every Day, Ready for Anything

All Gerber products are designed and engineered in Portland, OR where many are produced. We also tap our global supply chain to create a wide range of activity specific gear for wide variety of consumers. And no matter what, every product that bears the Gerber name is backed by our famous lifetime warranty.

**Built for Every Day,
Ready for Anything**

Keychain skus range from \$14.95 to \$49.95, spanning multi-tools, folding knives, and utility tools — a complete lineup that meets consumers wherever their day takes them.

**One Message, Zero
Compromise**

"Upgrade your keychain" isn't just a tagline, it's a promise. Every tool in the range delivers real, field-tested function in a form factor that goes where you go.

More Tools. Less Bulk

The Armbar Mini packs six functions into a slim, keychain-ready silhouette. Because the best tool is the one you have on you.

Designed for the Hunt

The Broadhead and Hatchet tools aren't just shaped for the field — they're built for it. Purpose-driven design that speaks the language of the hunting consumer, right out of the packaging.

Legacy in Your Pocket

The LST revolutionized the pocket knife market in the 1980s. The Mini brings that same DNA to a new generation — ultra-light at just 14g, built tough in 440A stainless, and ready to earn its place on your keys.

Celebrating the iconic Adventure Hat

The iconic Adventure Hat isn't just a sun hat —it's the style that started it all.

Celebrating its 30 year anniversary, this original silhouette set the standard for full-coverage outdoor hats. With UPF 50+ protection, a 4" brim, and a 7½" neck cape, it keeps you covered while staying cool and comfortable. Lightweight, packable, and water-resistant, it moves as fast as your day does.

Tried, tested, and trusted for three decades and still going strong.

RRP \$59.99

ORDER NOW

Features:

- UPF 50+ sun rating
- 7½" (19.5 cm) neck cape
- Strategic crown ventilation
- bluesign® main body fabric (solids only) and mesh
- Floats in water
- PFAS-free durable water repellent (DWR)
- 100% recycled bluesign® wicking sweatband
- Adjustable chinstrap
- Adjustable sizing

Trangia Gas Burner

Cook with Confidence

The Gas Burner Storm is purpose-built for Trangia stoves and the Triangle, featuring an optimised design for improved performance and ease of use. A horizontally positioned valve and bioplastic control knob allow for comfortable one-handed operation, even while wearing gloves. The slimmer valve fits easily through the windshield, while the wide flame control offers precise simmering without the risk of the flame going out.

RRP \$149.99

Which sock is best for trail running?

*Both are great — the right choice
depends on how and where you run.*

Merino Wool: versatile, all-year comfort

Merino handles changing conditions, wicks moisture, retains warmth when temperatures drop and naturally resists odour. It's a great choice for long days, variable weather and multi-day adventures.

Choose merino when you're:

- Running in changing conditions or humidity
- Going long — ultras, all-day efforts or fastpacking
- Prone to hot spots or blisters
- Heading into remote areas
- Packing light and wearing the same pair for multiple days

Synthetic: fast-drying for heat and speed

Synthetic socks excel when sweat, humidity and wet conditions are the challenge. They wick moisture efficiently and dry quickly — ideal for Australian summer running.

Choose synthetic when you're:

- Racing or running tempo sessions
- Training in hot or humid conditions
- Running back-to-back days
- Travelling light and washing as you go
- Running through water crossings or wet trails
- Sweating heavily during summer sessions
