CELEBRATING 30 YEARS OF INNOVATION

More than three decades after pioneering the Splashpad®, our innovative approach to aquatic play has helped communities, businesses, and families around the world grow.

Today, our award-winning installations span over 50 countries and 5 continents.

WATER MOVES US

We understand how every drop, stream, and splash shapes the world around us. Our diverse background in engineering, creative design, and water choreography makes us the best in the business at creating imaginative and powerful aquatic experiences.

We exist to have an impact—one that lasts long after families are dried off.

Splashpad®

THE WORLD'S LEADING AQUATIC PLAYSCAPE

With colorful, open-ended designs and imaginative water choreography, Splashpad® continues to revolutionize how families play in urban spaces, aquatic centers, and waterparks.

KEY BENEFITS

ILLUMINATED DANCING WATER

CoreoPlay™ is a cluster of dancing water jets and lights that create an immersive play experience during the day and into the night. Each pattern is intentionally designed with a unique mood, expressed through water movement, and color and light sequencing.

Elevations™

MULTI-LEVEL WATER PLAYGROUNDS

Elevations™ condense the excitement and diversity of an entire waterpark into a complete multi-story play zone.

KEY BENEFITS

Designed for zero-depth and pools

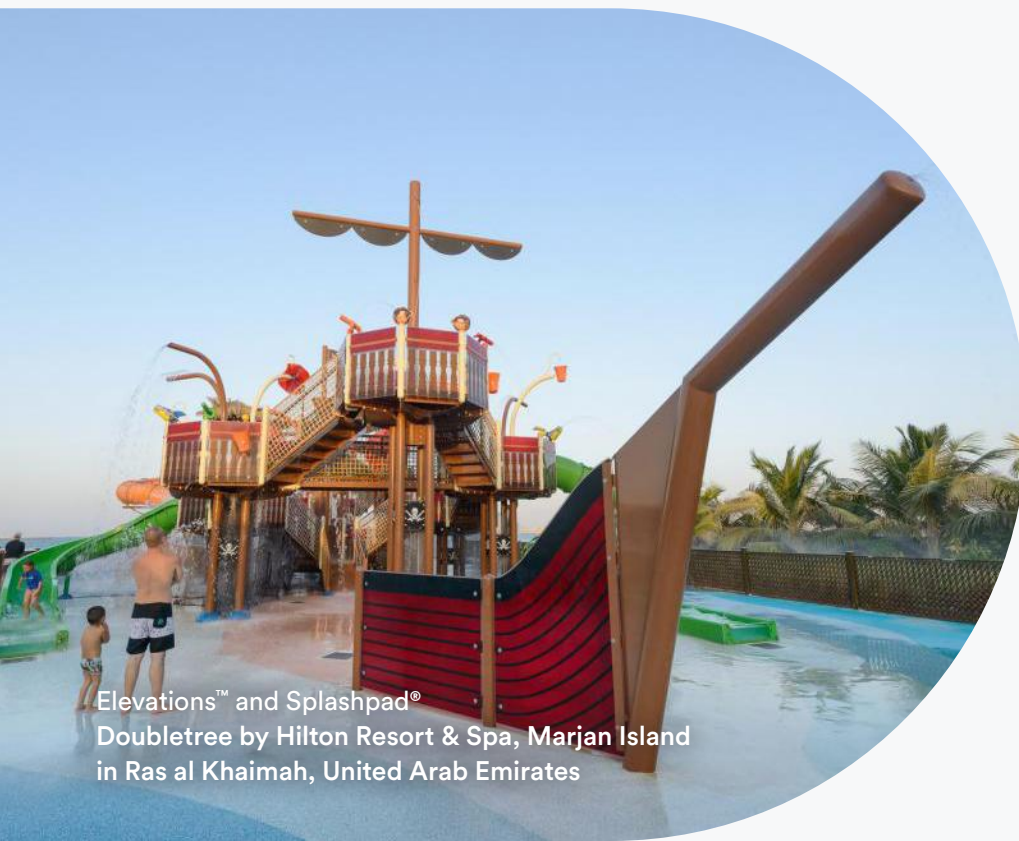

Easy facility integration

Inclusive designs available

ICONIC AND IMAGINATIVE

Draw in a crowd with a pirate ship adventure or transform your water playground into a whimsical forest. Elevations™ offer a full spectrum of theming opportunities that make brand integration easy.

KEEP FAMILIES ONSITE AND ENGAGED

The fun never ends with Elevations™. Multiple water effects, including jets, buckets, activators, cascades, and sprays, encourage visitors to stay onsite longer, and to return.

Elevations™

FLEXIBLE AND ADAPTABLE

With their modular building-block system, Elevations™ can be adapted to almost any exterior or interior site ranging from a small PlayNuk™ to a sprawling aquatic destination. Elevations™ can also be retrofitted onto existing facilities to easily refresh and revamp any location.

- ✓ Municipal aquatic centers
- ✓ Hotel and resorts
- ✓ Campgrounds
- ✓ ...and many more locations!

Discover our
Elevations™
product solutions

PlayNuk™

Identifying a play gap in the 2-5 age group, PlayNuk™ is a new breed of Elevations™ that scales down accessories, softens sprays, and adds more lower-level interactions to make accessibility easy for your pint-sized visitors.

PoolPlay™

Transform your pool environment into an exciting immersive experience! Our imaginative PoolPlay™ designs seamlessly fit with our Splashpad® and Elevations™ solutions to keep families moving—and coming back for more.

Waterslides

MAKE A BIGGER SPLASH

From first-time splash experiences to thrilling main attractions, Vortex waterslides get every family member off their beach towel and into the water.

- 1 Soft Rain:** Gentle water droplets provide instant refreshment
- 2 Push-Button Control:** Simple, user-activated interaction with timed water release
- 3 Water-Efficient:** Minimal flow per minute optimizes water use while maximizing cooling impact

CoolHub™ BY NIGHT

CoolHub™ transforms any site into a refreshing and inviting gathering spot. Both Abrio and Glomist emit a soft, ambient glow that gently illuminates the area—creating a magical, cozy atmosphere perfect for evening enjoyment.

Abrio

SEAMLESS LIGHTING CONTROL

Abrio's lighting can be customized through the mobile app, allowing site operators to set the exact time the lights turn on and off, offering full flexibility and control.

Glomist

AUTOMATIC AMBIENT LIGHTING

At dusk, Glomist emits a soft, ambient glow that gently illuminates the area—creating a magical, cozy atmosphere perfect for evening enjoyment. Equipped with a built-in light sensor, its glow automatically activates at sunset and turns off at sunrise, providing a seamless and energy-efficient experience.

Water Management

THE HEART OF EVERY SUCCESSFUL PROJECT

Beneath the eye-catching features is an intricate system that controls water usage and quality, and ensures that your solution is safe, efficient, and sustainable over time.

KEY BENEFITS

Remote access
control systems

Sustainable
systems

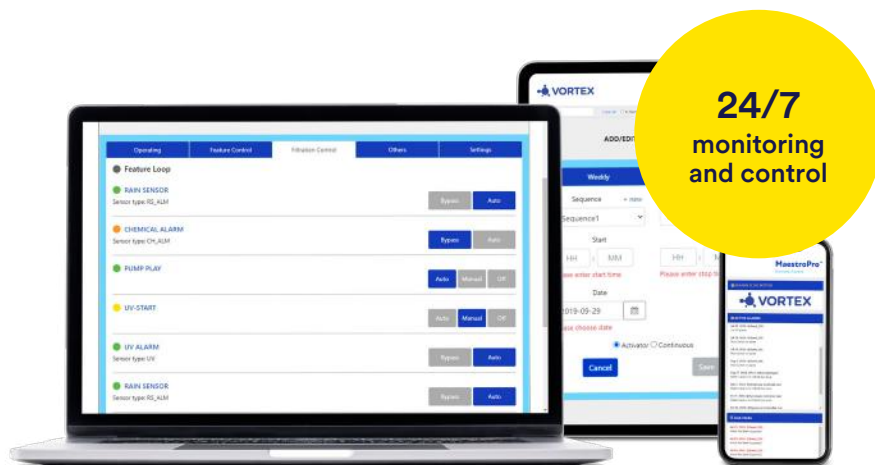

Pre-engineered
or custom designs

BE IN CONTROL OF EVERY DROP

With on-demand activation options, nozzle technologies and our MaestroPro™ water controller, our innovative technologies provide a sustainable solution and help you manage your resources with greater efficiency.

SEAMLESS CONTROL ANYTIME, ANYWHERE

MaestroPro™ controllers allow operators to verify the status of each Splashpad®, in real time, without travelling to the site. Tasks such as verifying system alarms, changing operational hours, and opening or shutting down the system can all be performed remotely.

Water Management

SYSTEMS FOR ALL PROJECT TYPES

Vortex has developed two industry-leading water management systems: SmartFlow™, our trademarked Flow Through system and Recirculation. Depending on your project's unique requirements, each solution is engineered and manufactured in our in-house facility, and therefore superior in quality to site-built systems.

- ✓ Housing options available
- ✓ Easy accessibility for maintenance
- ✓ MaestroPro™ compatible

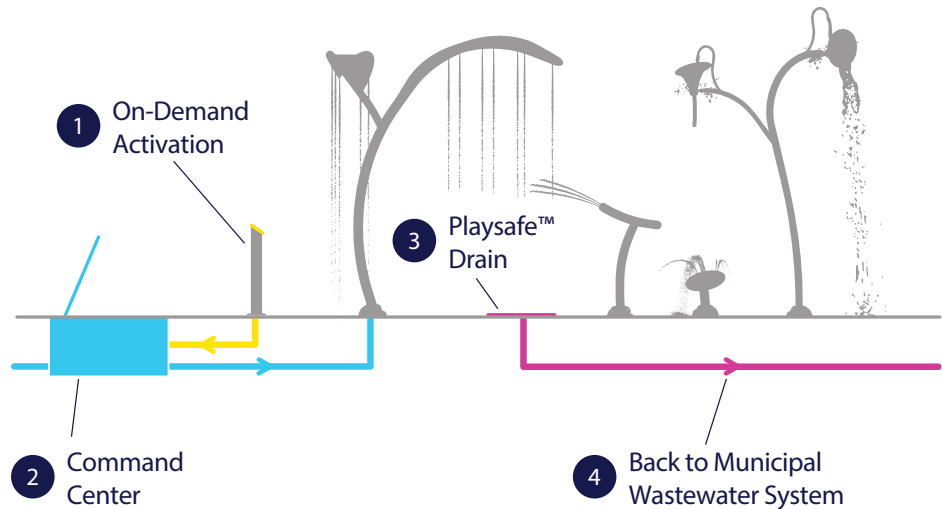

Learn more
about Water
Management

Flow Through

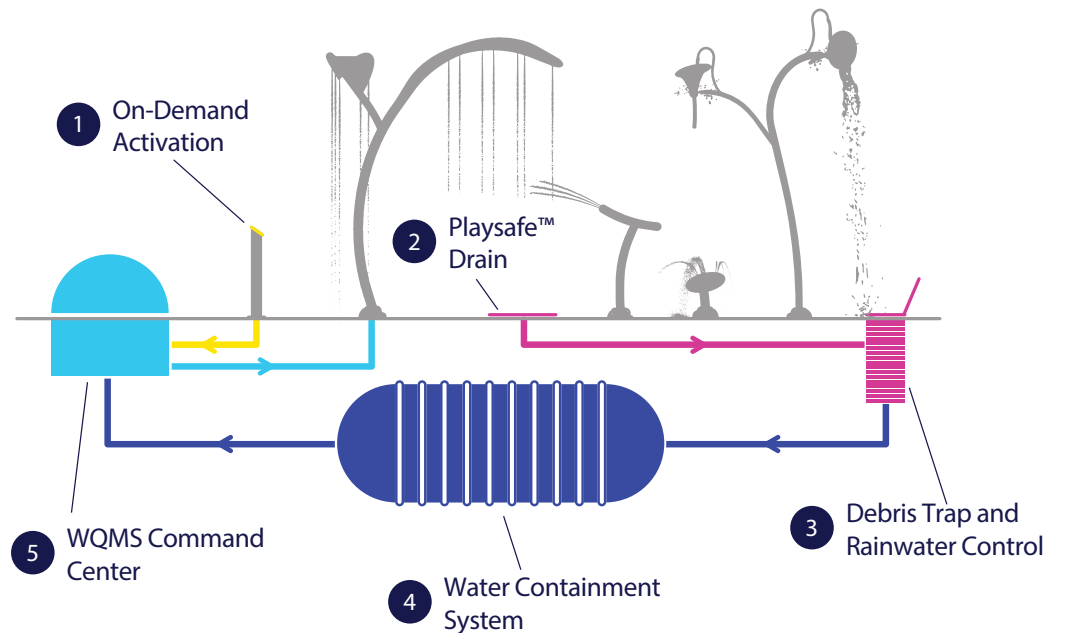

SmartFlow™

SmartFlow™ our trademarked Flow Through system makes use of the potable water that runs through your play area. After releasing from your playscape, the effluent water returns to the municipal treatment system, or transfers into a holding tank and then gets repurposed to nourish vegetation.

Recirculation

This closed-circuit system filters and reuses the very same water flowing from your play area. Simplifying installation and keeping quality top of mind, recirculation systems are engineered to your project requirements and factory built and tested.

Designing For Future Generations

A SUSTAINABLE APPROACH

When designing for future generations, sustainability is essential. That's why we innovate with advanced water management systems that help reduce both water and energy consumption.

Built to last, every Vortex aquatic play solution is thoughtfully designed to minimize environmental impact, ensuring each product contributes to a healthier planet for years to come.

PERFORMANCE WITH PURPOSE

Our solutions are engineered to reduce water and energy use without compromising performance or play value. Advanced system design ensures long-lasting durability while supporting responsible resource management for communities today and tomorrow.
