Build The Right Content

● Use Mangools to discover:

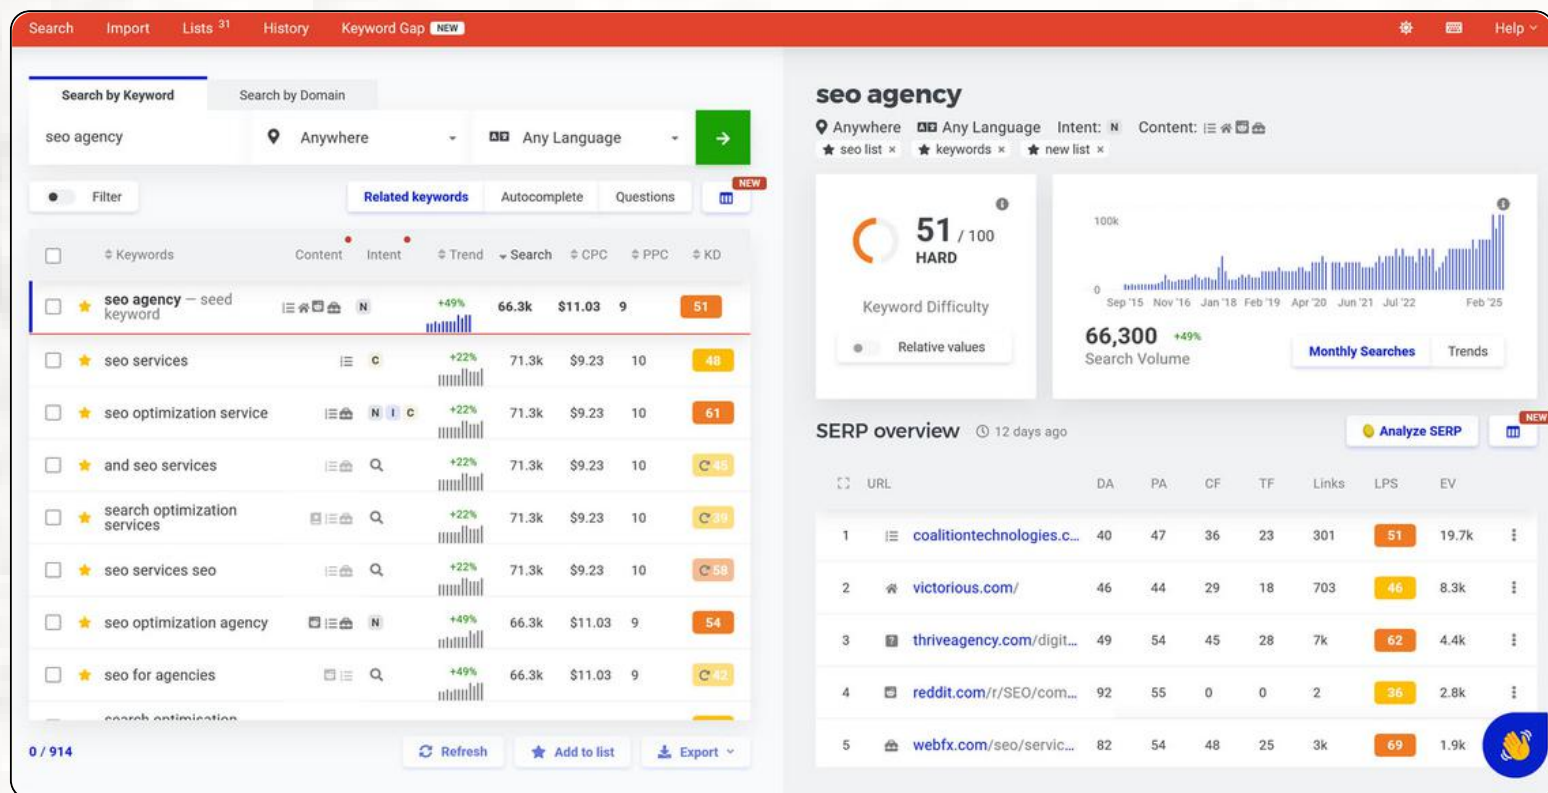

- What your audience searches for
- Keyword difficulty
- Search intent
- Long-tail opportunities

Outrank Your Competitors

- Use Mangools to see exactly:
 - Who ranks
 - Which keywords they own
 - Why they rank
 - Where your opportunities are

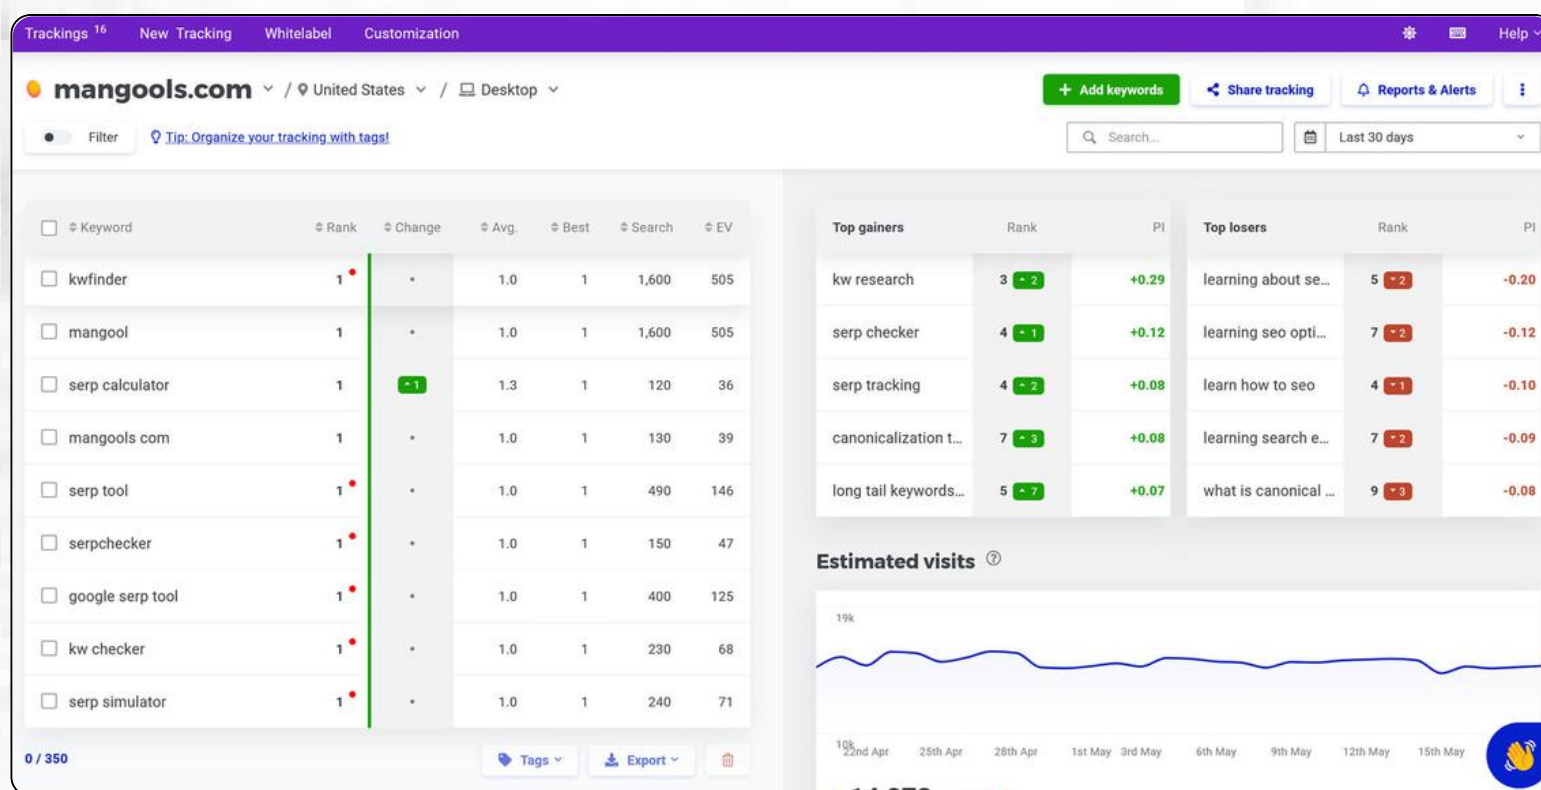

Instead of guessing what to write, start with a **strong workflow** using Mangools

Track your Rankings

- Because if you can't measure visibility, you can't improve it
- **Mangools** helps you monitor progress over time

Why This Matters

- Better SEO → More visibility
- More backlinks → More authority
- Greater chance of being cited by AI, SEO now fuels AI discovery

The screenshot displays the Mangools KWFinder tool interface. At the top, it shows the target domain 'mangools.com' and various metrics: 72/100 Citation Flow, 32/100 Trust Flow, 7.1k Ref. IPs, 9.6k Ref. domains, and 2.7m Active backlinks. A table of search results is shown below, with columns for Source URL, CF, TF, EL, FB, WPR, HREF, Anchor, and LS. The results list several URLs, including 'https://themeisle.com/blog/how-to-start...', 'https://backlinko.com/best-free-seo-tools', 'https://seohocasi.com/seo-nedir', 'https://hostnet.nl/academy/hoger-in-go...', 'https://pcmag.com/reviews/kwfindercom', and 'https://kwfinder.com'. To the right, a sidebar titled 'Discover Low-Competition Keywords' explains the tool's purpose and provides a brief example of how it can be used to find relevant keywords for a food blog.
