Learning
Belonging
Opportunity

Make more of what you have.

Our aim is affordability.

Bring campus news, achievements and everyday information into the spaces people already use.

Where technically possible, we reuse your current hardware to keep costs down. We confirm compatibility after assessing its make, model and specifications.

Unlimited campus licences

A quotation shaped around your needs.

UK made / Europe hosted

02 / LESS TIME AT THE DESK

Your next update is three steps away.

01 Add

Choose your image, video or announcement.

02 Select

Pick the screens that need this message.

03 Publish

Preview, then send your update.

03 / CAMPUS TAKEOVERS

Turn an open evening into an occasion.

Replace routine content with a coordinated campaign. Welcome visitors, celebrate success or share approved priority messages across selected screens.

Illustrative room-sign concept; not a Qbic product photograph.

04 / BETTER USE OF SPACE

The right room. At a glance.

ZEITWART

Help staff and students find and book rooms or resources through a browser, phone or QR code. Bring availability to the room door.

QBIC EP-0700

A 7.5-inch e-paper option for clear, low-power room signage. Cable-free installation makes it attractive where new wiring is difficult.

Up to 3 years of battery life at 5 refreshes per day. Gateway infrastructure is required for the proposed Zeitwart setup.

Optional package. Software, hardware and integration are specified and quoted separately.

Help people plan their next move.

Real-time transport

Local bus and rail departures, delays and service updates from supported live feeds.

Local weather

Rich weather graphics, current conditions and forecasts for journeys and outdoor activities.

HLS video & IPTV

Bring lectures, campus events and authorised live channels to compatible screens.

Explore integration with Visionary or other compatible video/IPTV systems. HLS playback depends on the source, player and network; some systems require a gateway or decoder. Live data depends on provider coverage, refresh intervals and connectivity.

06 / SHARE IDEAS, WIRELESSLY

Make room for collaboration.

Add Airtame wireless screen sharing to teaching and meeting spaces. Give staff, students and guests a practical way to present from supported devices.

Airtame hardware/software, licences and the handover between presentation and Dhruv signage are assessed and quoted separately.

DHRUV EDUCATION / NILA-AV

AIRTAME

Optional solution, scoped around your rooms and existing equipment.

Give every screen a purpose.

RECEPTION

A welcome that feels like you.

School identity, visitor information and directions.

SHARED SPACES

Useful information, beautifully presented.

Images, video, presentations and tickers, with logo, clock and weather options.

YOUR REQUIREMENTS

Room to make it your own.

Discuss bespoke layouts, data dashboards and live TV/IPTV for your campus.

Get a quotation

Tell us about your screens, spaces and ambitions.

dhruv.org.uk

nila-av.co.uk

Illustrative AI-generated campus scenes. Capabilities, hardware compatibility, multi-screen synchronisation and integration are confirmed during solution design. Licence scope, term, hosting and support are quoted. Emergency messaging supports agreed procedures.
