ABOUT NATURE AND TIPS

Sargassum is a seaweed that floats free and provides a natural and essential habitat for many species of fish including endangered species. There are certain spikes a year (mostly from March to November), when ocean currents naturally bring this seaweed to our shores; Our resort staff works diligently from the early morning hours each day to remove what washes up in order to keep our beautiful beaches clean and accessible for guests to enjoy.

The Resort is surrounded by a Mangrove, natural habitat of animals such as lizards. We work endlessly to maintain our areas as clear of animals as possible. Nevertheless, you may receive an unexpected visit. Please let us know, and we will gladly assist you. We highly recommend you to wear mosquito repellent while enjoying natural environments. When requesting a taxi service outside the resort, please ensure its an official cab that is registered and marked with the town's color and number.

Our water has been treated through an osmosis process. Nevertheless, drinking water from the tab is not recommended, always request filtered or bottled water.

SOCIAL RESPONSIBILITY

Travel with Purpose is our Environmental, Social and Governance (ESG) strategy to drive responsible travel and tourism globally.

We have committed to double our investment in social impact and cut our environmental footprint in half by 2030.

LIGHTSTAY

Waldorf Astoria Riviera Maya uses the award-winning LightStay system to measure, report, and improve our environmental impact. We are proud to be taking a leadership position in fighting climate change, with Hilton being the first major hotel company to establish science-based targets to reduce greenhouse gas emissions in line with the Paris Agreement. Hilton is also taking major steps to reduce waste across its portfolio, to improve water stewardship, and to implement sustainability initiatives in our supply chain.
