ABOUT

For over 25 years, our family has created unique products designed to be part of celebrations and memorable moments every day. What began as a father-and-son venture in a California garage grew from a passion for bringing ideas to life—and a commitment to the same pride and craftsmanship that inspired the original Cork Pop cork extractor.

Innovation continues to drive us. Today, more than 3,000 retailers across the country offer our products to help support their own family businesses and customers.

We take great pride in developing patented products created by inventor Bill Federighi, who remains actively involved in our facility as products like the original Cork Pop and best-selling VinOair are manufactured. We are committed to producing as many products in-house as possible, and throughout this catalog, you'll see symbols identifying items that are Proudly Made in the USA. Supporting American manufacturing remains central to who we are.

Great products are the foundation of our company, but our commitment to customer service is what defines us. We're not simply making wine accessories—we're continuing a family tradition of pride, innovation, and quality craftsmanship.

Our Mission Statement

Our mission: to maintain a family tradition of pride and quality workmanship. We built our company in a manner to ensure not only our success, but the success of our customers. We don't sell products – you can buy a corkscrew from a 1,000 different companies. What we sell is customer service, pride and quality. Here are the principles of how we live that every day:

Our Products

It has always been, and will always be, about quality. We strive to ensure that all materials are ethically sourced, and that we are not just buying materials. Our investments in factories and the employees of the factories is not just about a product, but about improving the lives of the people who contribute to our success. This is an ongoing goal and our work is never done.

Our Partners

We call the parties involved in the manufacturing, marketing, shipping and use of our products our partners, because we are not just a manufacturing company – we are a family. Together, we embrace diversity to create a place where each of us can be ourselves. We always treat each other with respect and dignity, and we hold each other to that standard. We create products that are used in the celebrations and events of life, and we are committed to providing products that will not only perform the design function, but will be part of building memories. We start with the promise of a perfectly made, quality item, but our work goes far beyond that. It is really about joy, friendship and the human connection.
