We have supported United Way for decades! In our opinion, it's the most efficient and effective way to get our dollars to the right people in our communities.

United Way has always served as a true convener in our community – an organization with a deep understanding of the community’s needs, gaps, and opportunities. You know where support is needed most, who is doing the work, and how partners can come together to create meaningful impact.

For donors, you make it easier to step in and invest where it matters most – connecting people, resources, and organizations in ways that strengthen the entire community.

I support UWGT as a way of giving back to the community through a United Way that I trust to focus in on the community's neediest, and then to vet the organizations and initiatives which can offer the best help possible to improve their situation as far as financial stability and education.

The part of United Way's work that resonates most with me is the 2-1-1 resource. There's something incredibly powerful about knowing that when someone doesn't know where to turn, - there's a simple, human connection available to them.

“

I believe in the work that the United Way does in not only my community but also across the globe. It means the world to me to be able to give back to the community in which I grew up in, live in and work in. I partner with the United Way because I know what it's like to have a need and to not know where to turn to have that need filled.
