Welcome to Dalarna

The cultural heart of Sweden

DALARNA IS EVERYTHING you love about Sweden – all in one unforgettable place. A region where rich traditions, breathtaking nature and warm hospitality come together. Nestled between deep forests and glittering lakes, this is where visitors can truly experience the essence of Sweden.

Home to red cottages, lively folk festivals, iconic handicrafts and unspoiled landscapes, Dalarna offers many possibilities for authentic travel: from hiking and biking to experiencing local culture and tradition.

But Dalarna is more than just a scenic destination – it is a place where local producers, hotels and experience providers work together to offer sustainable, meaningful tourism. Whether your guests seek cultural encounters, active days in nature or simply a place to breathe, Dalarna delivers.

Tällberg

The small village with the warm embrace

LOCATED IN THE heart of Dalarna, Tällberg offers international visitors a unique blend of Swedish culture, nature, and tradition. The village with only 400 inhabitants offers a long tradition of generous hospitality that started in the early 1900s. Think red cottages, shimmering lakes, deep forests, and vibrant seasonal celebrations like Midsummer – all in one picturesque village.

This is a destination rooted in craftsmanship, shaped by nature, and driven by sustainability. With activities like hiking, outdoor dining and cultural experiences, Tällberg is ideal for travellers seeking an authentic, balanced and unforgettable Swedish getaway. Take a deep breath, root yourself and enjoy the harmony.

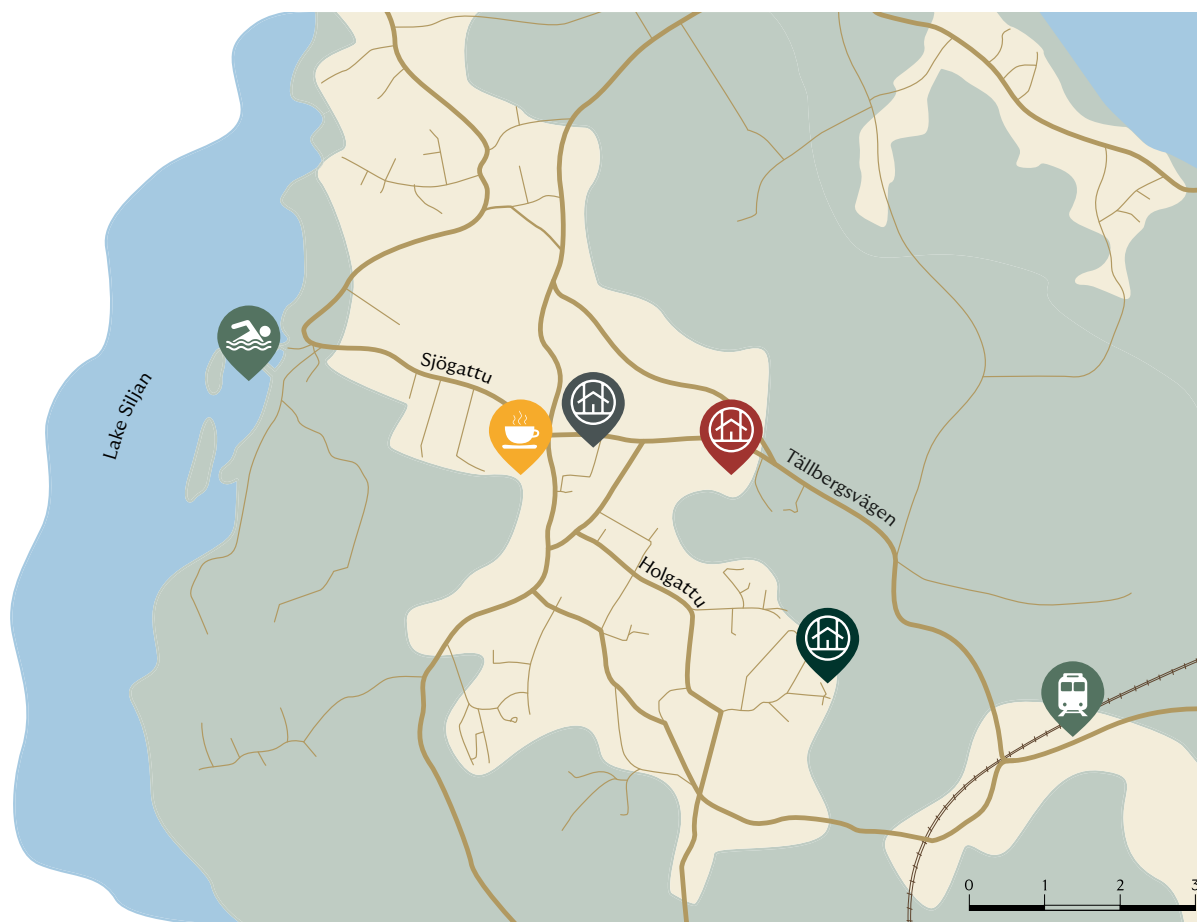

Shaped by a Meteorite

– defined by beauty!

AROUND 380 MILLION years ago, a four kilometre wide meteorite hit the earth and created the area which we today call The Siljan Ring. On the edge of this crater you will find the village of Tällberg, with gently rolling and fertile terrain, stretching down to the lakeshore.

The impact of the meteorite was so powerful that rocks were lifted and turned upside down and cracks were formed deep in the bedrock. Even today, you can see the upturned rock layers from the meteorite impact standing upright in Siljan Geopark – Sweden's first national geopark with unique geological phenomena and natural value.
