Malthoid is a 2 ply felt material impregnated with bitumen which is also covered in a fine sand to prevent sticking when rolled. Malthoid is inert to lime in mortar mixes.

- Waterproofing of flat roofs.
- Dampcourse on brick and block walls.
- Also used under corrugated iron water tanks to prevent condensation corrosion.

Polyflash is a bitumen coated 99% pure aluminium foil core dampcourse laminated both sides with polyethelene film, embossed to provide a mortar key.

The aluminium foil core is coated with bitumen and polyethelene to prevent lateral corrosion. It is used in brickwork as a dampcourse and suitable for use around internal windows and doors.

1	1	—

The Roses at Flemington Racecourse have been grown on Charlie Carp for over 10 years. The NPK of Charlie Carp helps maintain a strong immune system throughout the year which then helps promote a healthy plant & strong green leaf growth which then produces beautiful colourful roses, greener lawns, trees and shrubs at the right time.

CHARLIE CARP
