3,095

Practices Engaged in Transformation
183

Total Number of Healthcare Professionals Trained
554

Patient Lives Touched
686,250*

*Based on the average of 2.5 providers per transformation practice and an average panel of 1,500 patients.

This training was invaluable to me as a nurse care coordinator in the first year of this role. I learned ideas and principles to help me strengthen my outreach to TCM and CCM patients, the value of sharing my work and my accomplishments; as well as the need to develop care management goals. In addition, self-care and burn-out were addressed which are tantamount to being successful as a care manager but in the helping professions as well.

Jason C. Matice, Registered Nurse Care Coordinator, The Community Health Center of the North Country (Care Management Intermediate Training)

Excellent course with plenty of actionable takeaways to implement in my work!

Marjanna Barber-Dubois, Quality Manager, Manet Community Health (Care Management: Leading Training)

Our Strategic Focus Areas:

1 Increase successful participation in Alternative Payment Models (APM)

2 Foster resilience in primary care

3 Bridge clinical, public health, & communities to seamlessly meet whole-person care needs
