Digital Innovation Group

About Us

DIG Digital Innovation Group Ltd, (DIG), is a Cypriot Registered Company, and is the Authorized Representative and Exclusive Distributor of theBreath Pure Technology, by Anemotech Italy, in Cyprus. Anemotech S.r.l. is the first Italian company founded with the aim of developing technologies to enhance people's well-being, improving their quality of life and promoting a Healthy Environment. At DIG we share the same views and values as Anemotech.

DIG DIGITAL INNOVATION GROUP

theBreath®

About

theBreath® is an innovative, patented technology from Italy designed to absorb and decompose harmful particles in the air, making it effective in combating indoor and atmospheric pollution caused by cars, allergies, heating systems, and industrial emissions.
In practice, theBreath® is a special fabric that acts as a filter. We have the advantage that you can print on the material. So for example we can create canvas panels that can purify the air around them.

Mission

We want to create and disseminate accessible technologies to respond to a common goal for people around the world: to improve quality of life starting with the air we breathe.

Vision

We believe in the possibility of living in a healthy, safe and sustainable environment.
