

CIS

COMMUNICATION INTERCONNECTING SYSTEM

Seamless Integration, Infinite Communication

CIS is borderless communication system that is critical for operations that require the rapid and steady interchange of data across multiple channels of communication. The CIS is a network interoperability solution that enables many communication platforms to seamlessly connect to a single platform.

Key Features

High-capacity Router and TDM switch.

Configurable media gateway and router with numerous interfaces.

IP

Integrates legacy radio to IP environment and IP network to military gateway.

Customized number of port and connector based on user requirement.

- Small and durable design.
- Suitable for severe environment.

- Manage by Communication Management System (CMS) software.
- Software is custom, easy to use, and can be integrate with other system solutions.

Technical Specifications

Port Connections	Protocols	Services
WAN	SIP	IPv4 and IPv6
LAN Port	RoIP	Call Handling
Maintenance Port	OSPFv2 and OSPFv3	SIP Telephone
Configurable Port	RIP	DHCP Server/Client
Radio Port	EOIP	Remote Management From CMS
Serial Port	BGP	
Fiber	GMP	
FXO	NTP	
FXS	SIP	
E1/T1	PIM-SM	
Dimensions		
Height	177mm	
Width	483mm	
Depth	500mm	
Weight	15kg	
Power Supply		
Input Voltage	110VAC-250VAC 50/60Hz	
Power Consumption	200 W	
Environmental		
Operating Temperature	-10°C to 55°C	
Environment	MIL-STD 810	
EMC	MIL-STD 461 IEC 61000-6-4
