CREATIVITY BEYOND ENGINEERING

Municipal Engineering

Municipal Engineering

Since 1979, raSmith has partnered with local governments across Wisconsin as a trusted engineer of record. We provide practical planning and design solutions that help communities strengthen and improve critical infrastructure.

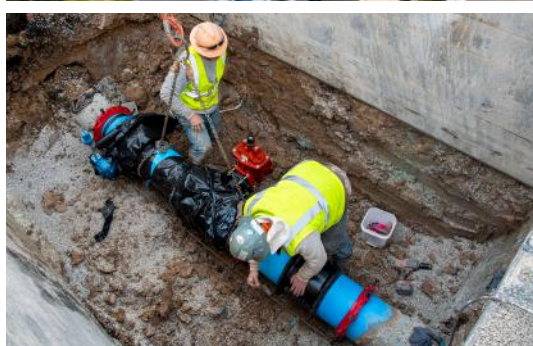

Our multi-disciplinary team delivers integrated expertise across transportation, water and wastewater systems, stormwater management, and public infrastructure. We focus on clear communication, responsiveness, and effective project management to ensure successful outcomes for municipal staff, stakeholders, and residents.

Who We Are

raSmith is a nationwide multi-disciplinary engineering consulting firm providing municipal engineering, structural engineering, transportation and traffic engineering, surveying, GIS, landscape architecture, stormwater management, ecological services, grant writing, and construction services from six offices in Wisconsin, Illinois, and California.

Municipal Infrastructure and Planning Support

We support a wide range of municipal projects, helping communities plan, fund, design, and maintain:

- Roads, bridges, and transportation systems, including sidewalks, trails, and multi-use facilities
- Water and wastewater systems
- Stormwater management and flood mitigation
- Public facilities, parks, and site development
- Utility infrastructure and system improvements
- Capital planning, asset management, and system rehabilitation

How We Support Projects from Planning Through Completion

raSmith provides targeted expertise across planning, funding, design, and permitting, helping local governments throughout Wisconsin move projects forward from early concept through construction and beyond.

How We Deliver Results

Plan and Prepare

We work with municipal teams to define project goals, assess existing conditions, and position projects for funding through capital planning and grant support.

Design and Deliver

Our team develops practical, cost-effective solutions and manages projects through design, permitting, and construction.

Maintain and Support

We support long-term system performance through asset management, rehabilitation planning, and infrastructure improvements.

Respond and Adapt

When challenges arise, we provide timely solutions to keep projects moving and minimize disruption.

A Proven Partner for Municipal Engineering Projects

As a trusted advisor, raSmith serves as an extension of your team, delivering responsive communication, industry expertise, and proven results across every phase of a project.

Why Local Governments Choose raSmith

Plan and Fund Projects with Confidence

We support capital improvement planning, grant research, and funding strategies to help position projects for local, state, and federal funding.

Deliver Practical, Well-Rounded Solutions

Our team considers constructability, phasing, safety, utilities, and stakeholder impact from the start.

Anticipate Challenges Early

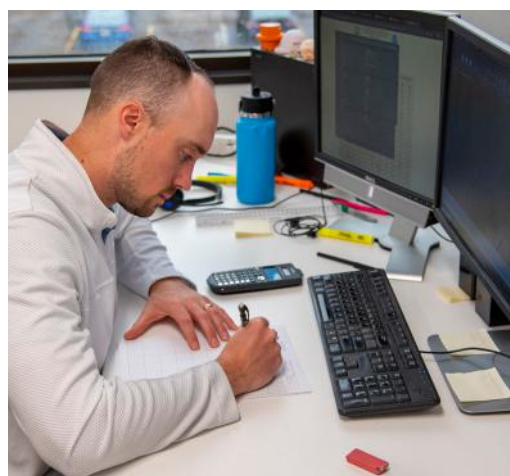

We identify permitting, environmental, and infrastructure constraints early to reduce risk and avoid delays.

Bring Integrated Expertise

Our multi-disciplinary team provides practical engineering solutions that help communities maintain and improve their infrastructure, plan for growth, protect natural resources, and enhance public spaces.
