POLLED HEREFORDS

Yearling Bull Sale

- ✓ Genomic & semen tested
- ✓ Quiet temperament
- ✓ High calving ease
- ✓ Good growth & low birth

On-farm & online auction

**12pm, Friday 25
September 2026**

See you at 'The Sale Shed'
839 Maraetotara Rd, Havelock North

www.koanuiherefords.co.nz

bidr

Koanui calves are bred for the hills, and thrive even in rare Maraetotara Valley snow.

35 YEARLING POLLED HEREFORD BULLS
12pm Friday 25 September
On-Farm auction, or online via bidr®

All our spring yearling sale bulls are:

- TB Status C10
- Fully BVD vaccinated and tested negative
- Backed by our satisfaction guarantee
- Semen and service tested
- Ideal for beef and dairy heifer mating
- Free of tested genetic defects using Neogen 100K testing
- Selected for calving ease, low birth and good growth.
- *Backed by our satisfaction guarantee!*

All bulls will be accessible for easy viewing next to the sale shed after 10am on sale day.

You are invited to enjoy our hospitality on sale day. There will be morning tea, lunch and refreshments as usual.

We look forward to seeing you!

Welcome to our 2026 Yearling Sale

The current farming climate is very positive for beef and lamb with prices reflecting the true value of the quality protein that our industry produces. Talking to friends in the States, the beef industry over there is also seeing record high prices due to high demand and low domestic production. There are no indications of the beef industry rebuilding with continued dry seasons in the mid-west, a large breeding area.

Closer to home, things are ever evolving for us at Koanui with the goal to expand the registered herd back to 800 cows and consolidating our land holdings. There are some very positive things happening in our breeding programme with Koanui Lips T147 being a rockstar in Australia and selling over \$150,000 in semen and now being accepted in the USA Hereford evaluation programme which we are very excited about.

We have a lot of bulls that excel in modest birth, with high calving ease and good growth in this catalogue. This year's line of yearling bulls for beef heifer mating are predominantly out of two-year heifers by yearling bulls so they represent cutting edge genetics.

All our sale bulls are genomics tested, carcass scanned, weighed at birth, calving ease and docility scored and weighed again at 200 and 400 days of age. It is Koanui's commitment to providing you with complete performance information, genomics and genetic estimates that will reliably help with your selection decisions.

These bulls have been wintered in mobs of 50 to give good data and they are well grown. We do not believe in excessive feeding, the bulls will continue to grow on. Our yearling sale bulls are all service and semen tested, the gold standard for all Koanui sale bulls.

All bulls are BVD tested negative and vaccinated with Hiprabovis which covers BVD and IBR. The bulls have been scrutinized for docility and structural correctness.

We will endeavour to update our channels with photos and videos of the sale bulls closer to sale time so keep up with our updates by email and posts on Facebook to stay up to date. Please do not hesitate to contact any of the team below or your livestock agent if you require any further information.

Kind regards

Jennifer and Chris Chesterman

Understanding the Koanui Yearling Sale Catalogue

Bulls are catalogued in mob order. As with all yearling bulls, changes can occur in a short period of time as they mature. You may find bulls that are best suited to your needs dispersed throughout the catalogue

Every animal is displayed with a three-generation pedigree, herdbook number, date of birth, genetic description of its horn/poll status and full table of Estimated Breeding Values.

This year we have included a QR code on every lot which will take you to the animal's page on the Hereford New Zealand website. There, Breedplan EBVs are updated every month so you can access the most accurate estimates.

Read more about our EBV selection criteria and tips for interpreting the data in this catalogue on our website:

www.koanuiherefords.co.nz/news/ebvs

Column headings are grouped according to the EBV type of trait being described.

Row Headings show specific EBV and percentile values. These let you compare traits and see how these compare to breed averages.

Hereford Breedplan average EBVs for all 2024 born animals

------------------------	---------------------	--------------------

Understanding the Koanui Yearling Sale Catalogue ctd.

EBVs are the best estimates of the genetic merit of the animal for a selection of commercially relevant traits. They are produced from the monthly NZ Hereford Breedplan analysis of pedigree, measured performance data and genetic data from genomics. These figures allow buyers to rank the relative performance of Hereford bulls.

% row helps you to rank our sale animals on their EBVs within the NZ Hereford breed. The % figure beneath the Breedplan EBV for each trait represents where the animal's individual EBV sits in relation to the average EBVs for all animals born in 2024.

\$ INDEX VALUES Table

Every bull has a \$ Index value table in the catalogue.

The \$ Indexes are a summary of the individual EBVs weighted for different production systems. There are three NZ Hereford \$ Indexes: Hereford Prime \$ Index; Beef Heifer \$ Index and Dairy Beef \$ Index.

The **Hereford Prime and Beef Heifer \$ Indexes** are for self replacing commercial herds. Hereford Prime focuses on steer and prime heifer production from a mixed aged cow herd. The Beef Heifer \$ Index is similar but the index is weighted for calving ease to assist with selection of bulls for use on yearling heifers.

The **Dairy \$ Index** is designed to assist with identifying bulls that are suitable for use on mixed aged dairy cows. The Index is targeted for a terminal sire where the self replacing, maternal traits are not required. Growth and beef production from easily born live calves is the focus.

Traits observed

Under the EBV box you will find a row which shows the traits that have been observed for each animal. GL – Gestation length where possible, CE – calving ease, BWT – birth weight, 200WT – 200 day weight, 400WT – 400 day weight, SS – Scrotal size, Fat, EMA – eye muscle area, IMF – Intra Muscular Fat, the carcass traits are measured by live animal ultrasound scan, DOC – docility and Genomics – DNA genome from 100K SNP tissue sample from the animal has been incorporated into the Breedplan analysis.

Semen and Service Tested

All animals have been semen and service tested to the Tararua Breeding Centre Bull Fertility Evaluation Gold standard to Libido, Penile Soundness and Semen Evaluation.

NZ Hereford Breedplan Percentile Bands for all 2024 born animals.

Use this table as a guide to compare individual animals with the current genetic level of the Hereford Breed.

A photograph of a brown and white cow standing in a lush green field. The cow is facing right, with its head turned slightly towards the camera. It has a white face and neck, with brown patches on its ears and body. A yellow tag with the number '51' is visible on its right ear. The cow is standing in tall green grass. In the background, there is a wooden fence and a grassy hillside. A small red object is visible on the left side of the fence.

These bulls are not catalogued in order of quality as this is one of the best bulls on offer. In the top 20% of the breed for Beef Heifer \$ Index.

Purchaser: **Price:** \$

Conditions of Sale

1. This sale is a “Hybrid online and on farm auction sale.”

In addition to the normal on-farm auction format the sale will be hosted by bidr® (www.bidr.co.nz) as a HYBRID auction, with online bidding and a live-stream available on sale day. Note the on-farm auctioneer remains in control of the sale and the fall of the hammer.

All intending ONLINE purchasers must register on bidr® in advance of the sale date, by visiting the website and using the “sign up” button, adding their contact information and nominating the agency they would like to purchase through and account held with that agency. Alternatively, purchasers can organise an agent from one of the agencies listed on bidr® to buy on their behalf.

All intending ON-FARM purchasers must register with the booking clerk prior to commencement of the sale.

2. On behalf of the vendor, PGG Wrightson Ltd (PGW) will pay a purchasing rebate of 6% of the purchase price excluding GST, plus GST, to livestock agents with a PGW Monthly Account. This also applies to Accredited Agencies on bidr® where the buyer has registered on bidr® under that Accredited Agency.

3. All bulls sold for stud transfer will have a minimum sale price of \$6000 plus GST.

4. Koanui reserves the right to collect semen on any bull at the purchaser’s convenience for within herd use only.

5. All Lots sold exclusive of G.S.T

6. PAYMENT: Fourteen days after the sale. bidr®’s Conditions of Sale and Terms of Use apply. These terms can be inspected at <https://bidr.co.nz/content/user-terms-conditions>

PGG Wrightson (PGW)’s Monthly Account Terms of Trade also apply to the extent deemed relevant by PGW. The current versions of PGW’s Monthly Account Terms of Trade are also available online at: <https://www.pggwrightson.co.nz/Our-Company/Terms-and-Conditions> or in hardcopy on request.

7. Although all care has been taken in compiling this Catalogue, no responsibility will be taken for any errors or omissions thereof.

8. All bulls are to be uplifted by 10 October 2026.

9. All bulls have been Semen Tested, BVD tested Negative and vaccinated for BVD with Hiprabovis prior to sale.

10. All bulls have been vaccinated with Leptoshaed, Coglavax 8 and have had a 20gm Copacap.

11. T.B. status C10.
