THE DEDICATED SUPPLIER

SKS T/A JMA UK are the leading wholesaler, supplying key cutting equipment and security products to the locksmith and key cutting trades.

Formally Simonds Key Services, the company was established in 1972. During the late 70's the company started wholesaling keys from their locksmiths premises in Harrow. By 1984 the wholesale side of the business had grown enormously making it necessary to separate it from the retail business and at the same time its partnership with JMA was formed. Since then SKS T/A JMA UK have continued to grow year on year to become the UK's largest key blank wholesaler.

SKS T/A JMA UK is a trade only supplier. With our comprehesive range of products we are a 1 stop shop for locksmiths and key cutters. Ordering is simple and can be done online at jma-uk.co.uk, by telephone, by email, by fax or even by post.

SKS T/A JMA UK have a true passion for keys and we feel our service and publications clearly demonstrate the pride we put into the trade. Living and breathing 'Keys', SKS T/A JMA UK are able to give unrivalled technical support and advice to our customers. Our passion allows us to continue to source new keys and work wih manufacturers to offer the key cutter the most up to date range of keys.

SERVICE & QUALITY

SKS T/A JMA UK aims to provide a friendly, helpful and efficient service to its customers. Our easy to use yearly catalogue contains information and prices for 7,000+ security products, that are available 99% of the time from stock. An extention to the service is sks.co.uk, which provides an easy method to order, check prices & stock and pay bills.

The Technical team have a wealth of knowledge and can assist customers with master suites, key blank identification, key machines and general product enquiries.

Although SKS T/A JMA UK stock over 14,000 product lines, many more are available to special order via the Sales and Purchasing teams. Please contact them with your requirements.

SKS T/A JMA UK work with its carriers to offer a reliable delivery service to UK and Europe. SKS T/A JMA UK offers a free of charge service to email or text you details about your delivery. On the day of delivery you will be updated with the hour time slot of when your parcel will be delivered meaning you don't have to wait in all day.

Next working day service is available on most orders placed before 3pm. Special services are also available at an added cost for next working day before 10:30am, before 12pm or Saturday delivery.

SKS T/A JMA UK can also deliver to your nearest DPD Pick Up Location where there is no need to wait in for the delivery. Your goods are kept safe for you to collect at a time to suit you.

JMA, THE KEY TO EXCELLENCE

Established in Mondragón (Spain) in 1942, JMA is one of the leading international brands in the locksmith sector and global security solutions. It is the first manufacturer of keys in Europe, with a global production of 2,200,000 keys daily in its production plants in Europe and America, both for the replacement and for the OEM markets.

The JMA catalogue includes more than 50,000 references. In addition to all types of keys, JMA offers mechanical and electronic key-duplicating machines; remote controls for the opening garages, gates and access doors and transponder technology for the vehicle keys of the main manufacturers in the market.

Since 1984, SKS T/A JMA UK is the exclusive distributor of JMA in the United Kingdom and brings to the British market the high quality, technology and innovation of the brand's products.

IFAM, PASSION FOR QUALITY

IFAM is one of the leading Spanish manufacturers in the locksmith sector. Its wide catalogue ranges from locksmith products such as door cylinders, rim locks, locks and padlocks to anti-theft devices for motorcycles and bicycles, as well as a wide variety of products for industrial safety.

The IFAM brand is well known in the United Kingdom, thanks to its commercial presence in British soil started more than a decade ago. Thus, British consumers have been able to verify that the quality of the products and a great variety of services are the hallmarks of the brand, which sells its products in more than 60 countries.

MAXUS

Maxus is a leading UK brand of security products. The Maxus brand was first created and developed by SKS T/A JMA UK in 2010, to fulfil a need to offer a comprehensive range of security products that offered good margins to retailers and value for consumers. Its wide range represents everyday products, such as padlocks, mortice locks and cylinders. All of which are built to a good quality at a competitive price.

Maxus continually develops its range by considering the needs of locksmiths and security resellers; with multiple packaging and an extensive selection of sizing options available. Additional services such as master keying and keying alike are available. Maxus has 800 product lines within its range and is currently being distributed in the UK, Ireland and Norway.

REMOTE CONTROLS

JMA introduces BT MULTIUSER, its first device for opening garage doors, fences and access doors through your mobile phone. Available in versions with licenses for 2 or 4 users in its basic format, BT MULTIUSER is ideal for families and small communities, as well as for small work centers, etc.

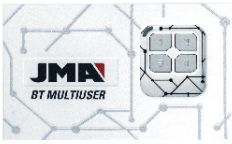

The device connects via Bluetooth to your smartphone and is handled with ease from the JMAREMOTESUSER. The APP is available on Google Play and Apple Store.

The system consists of a power housing, which is placed near the door, and an M-BT remote control. The current users of this remote can also use BT MULTIUSER, acquiring only the power housing and user licenses.

GET IT ON Google Play

Download on the App Store

MARKET INNOVATION

JMACLOUDPRO

THE FIRST CLOUD-BASED KEY DUPLICATION APP

SAVE YOUR CUSTOMERS' KEY DUPLICATES

Customers will no longer need to bring you their keys every time they want a new duplicate. Keep a tidy record that takes up no space whatsoever on your premises.

NEVER LOSE DATA

The information is stored "in the cloud". JMA IS THE FIRST BRAND TO OFFER THIS SERVICE.

IMPORT KEY MASTERING PLANS

Import .DAT and .XML files from the web version of JMACLOUDPRO to your machine's tablet. Select which keys from the mastering plan to duplicate and how many units of each model to copy.

AUTOMATIC UPDATES

Access the new keys that JMA constantly adds to its catalogue.

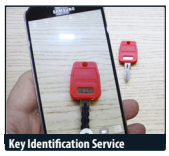

AVAILABLE FOR:

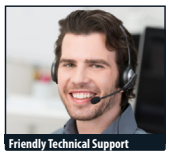

- *MULTICODE*
- *MULTICODE SINGLE*
- *MULTICODE DUPLA*

See page 35

- Weight: 5kg

✓ Cylinder Keys
✓ Standard Mortice Keys

Ref.	Size W x D x H	Voltage
OM002P	320 x 240 x 150mm	220V

SKS | Tempest Evolution

The new Tempest Evolution has the same features as the standard Tempest machine, but with some great additions including dual power (works from battery, 12v car socket, 220V UK plug), and Semi Automatic carriage action making it quicker and easier to use as well as an extended jaw set which allows longer keys to be held. The standard base can be swapped for a 12V rechargeable battery base (available separately) for added convenience.

✓ Cylinder Keys
✓ Standard Mortice Keys
✓ Long Mortice Keys

Ref.	Size W x D x H	Voltage
OM002EV	300 x 280 x 200mm	Dual
OS032	Optional Battery Base	12V

SKS | Power Inverter

Power Inverters with modified wave output waveform, high transformer efficiency, a built in cooling fan and over/low battery voltage protection.

2000W - Recommended for heavy duty machines such as the SKS Cyclone machine.

Ref.	Contents	Pack
MP57100A	2000W Power Inverter	DB

DUAL MACHINES

SKS | Cyclone (101B)

A popular choice for start-ups or a second machine. Easy to use and very reliable. Semi automatic dual machine.

- Dual Purpose - Cuts both cylinder and Mortice
- Switches from Cylinder to Mortice cutting in seconds
- Extra carriage available for Abloy & Abus keys
- Compact and low cost key cutting solution
- 4-way cylinder jaw system & nylon brush
- Eye swarf guard & power light attachments
- Weight: 22kg

- Cylinder Keys
- Standard Mortice Keys
- Abloy/Abus Keys*

*With additional Abloy Carriage

Rating

Ref.	Size W x D x H	Voltage
OM005	340 x 330 x 230mm	220V
OS016	Carriage to cut Abloy keys	---

SKS | Cyclone Plus (101B-L)

The Cyclone Plus gives the extra ability to cut longer length mortice and safe keys with in-built Abloy jaws.

- Dual Purpose - Cuts both cylinder and Mortice
- Cuts longer length mortice keys with rounding feature
- Cuts Abloy & Abus keys with no extra carriage
- Reliable, accurate and quick to use
- 4-way cylinder jaws and heavy duty mortice jaws

KEYLESS PROTECTOR

PROTECT YOUR VEHICLE

Remote keyless systems used to open vehicles by proximity represent a major advance for the comfort of thousands of drivers.

Yet, theft systems have evolved at the same time as technology. KeyLess Protector prevents thieves from scanning your keyless system as they walk by you by inhibiting the frequency that makes it possible.

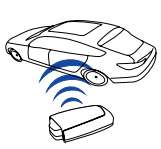

KeyLess Protector is light, discrete and easy to install.

What are you waiting for to protect your vehicle?

Ref.	Description	Price
KLP16	Keyless Protector 16 (for Ø16mm batteries)	POA
KLP20	Keyless Protector 20 (for Ø20mm batteries)	POA
KLP24	Keyless Protector 24 (for Ø24mm batteries)	POA

HOW DOES IT WORK?

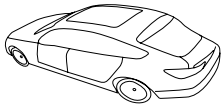

The remote control emits a constant signal to communicate with the vehicle. The car captures it when the remote is near.

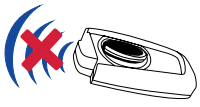

During proximity attacks, thieves take advantage of the fact that the key and vehicle are close to each other to hack the signal and open and start up the vehicle.

WITH KEYLESS PROTECTOR, *THE SIGNAL IS BLOCKED until you reactivate it by lightly tapping twice on the remote.*

DIAGNOSTIC MACHINES

Zed-FULL PLUS

The Zed-FULL Plus from IEA is the first "all in one" programming tool for the diagnostic or auto locksmith professional, with a huge range of specialist software and purchasing options.

The Zed-FULL Plus is a top quality computerised tablet with a large full colour touch screen, huge memory and easy to use software. It also comes with a range of cables, adapters and accessories together with a strong carry case.

The Zed-FULL Plus combines an exceptional range of software that until now has only been available in separate tools. The Zed-FULL Plus combines Key cloning, transponder management, OBD key & remote programming, EEPROM programming and other features such as a remote tester, key and remote virginising, voltage & continuity tester, WiFi communication and PC software package. So for the first time you can have your cloning machine, key programmer and EEPROM package all in one exceptional tool.

Not only does the Zed-FULL Plus combine all the features of many competitive tools but the level of software takes key programming options to new heights.

- Rugged tablet handset with steering wheel hook
- 7" HD TFT colour touch screen
- Excellent graphics and intuitive to use
- Single OBD cable for all applications
- 12V and 24V operation for car and truck
- Built-in transponder reader / holder, key and remote reader
- Built-in infrared and remote frequency tester with frequency display
- Built-in volt meter and continuity tester for vehicle and remote battery testing
- Built-in eeprom reader/writer and programming system
- Quick start guide

The Zed-FULL Standard package includes many features that are completely free to use these include:

- Transponder identification (all types)
- Transponder cloning for fixed 11, 12, 13, 14, 33, T5 & 4C
- Transponder cloning for Crypto 40(some), 41, 42, 44 (unlocked VAG), 45, 73 & 8C
- Transponder cloning for Crypto 2, ID46 onto carbon TS46 or TK60 (Internet) & CN3
- Transponder cloning for Texas 4D (Internet) to TPX2
- Transponder cloning to a range of VAG & Fiat ID48 vehicles onto a ZED48 using ZFH48 sniffer
- Transponder cloning for ID48 Daewoo, Chevrolet and some Hyundai/Kia onto TS48
- Writing to transponder T5, PCF7930, PCF7931, PCF7935, PCF7936, PCF7946, PCF7947, 4D60, 48, 8C, TPX1, TPX2, EH1, EH2, TK60, Z4C, CN2, TS46, TS48, TK5551, CN3
- Transponder test
- BMW EWS remote battery charging
- Built-in infrared and remote frequency remote tester
- Manual remote programming procedures
- Pincode reading fromkey on peugeot 45, Renault 33, Hyundai/Kia 6pin
- Unlock ID48 & virgin 48 CAN & Honda ID46
- Reading KM, chassis and key info from BMW EWS keys and remotes
- Transponder catalogue
- Customer database
- PC software for cloning, pincodes, updating, loading software, eeprom applications and emulator unlocking
- Transponder production for 33 various, 40, 41, 42, 44, 45, 46 various, 61, 62, 63, 65, 67, 68, 69, 70 & 73 to PCF7930, PCF7931, PCF7935, PCF7936, T5, TPX2 and CN2
- Mercedes E, C & G class up to 1999
- Pincodes for Renault 33, Renault 60-64 and Peugeot 45 from key head
- 159 of the 219 eeprom files are free to use

Other Zed-FULL features available via credit or unlimited use package

- Transponder, Key & Remote Management
- Transponder production of 8C and Canbus ID48
- Fiat remote cloning to special remote emulators
- Transponder & remote recycling for ID46 Vectra C, Renault Clio, Renault Master, Vauxhall Molvano, Renault Traffic, Renault Clio3, Renault Modus, Renault Laguna, Renault Megane. Nissan, Honda & Saab
- Pincode Solutions without OBD Connection
- (See OBD Programming for pincode reading direct from vehicle)
- Fiat Panda ID46 picode calculation from key (with internet)
- Nissan Almera & Primera ID46 pincode calculation from key (with internet)
- Renault Symbol-Dacia Duster continental box ID46 picode calculation from key (with internet)
- Hyundai and Kia pincode calculation from VIN number (up to 2007)
- Hyundai and Kia pincode calculation from key
- Pincode calculation from Nissan ICU-SEC-BCM labels
- Eeprom Programming
- Built-in eeprom reader / programmer with external port
- 252 different immobiliser applications for car, truck and motorbike (of which 159 are free to use)
- System applications, information, pictures and circuit diagrams
- Read pincodes, CS codes, generate transponders to start vehicle and create programmable transponders
- Catalogue of Motorola masks
- Software loaded on Zed-FULL Plus and PC software

24 Hour Unlimited Use Package

The new 24 Hour unlimited use package allows totally unlimited of use of your Zed-FULL for any 24 hour period. So, on days where you are going to be using your Zed-FULL for a quantity of work, a 24 hour package could be the best choice.

The 24 Hour package can be purchased in packs of 5, giving you 5 x 24 hour periods. You can switch on a 24 hour period at any time, simply by connecting your Zed-FULL to the internet. The Zed-FULL will then run, credit-free, for the next 24 hours. Your remaining 24 hour packs can be used as and when you require. They will never expire.

Benefits of the 24 Hour Pack

- **Many programming procedures use more than 40 credits (Mercedes, BMW etc.) so switch on a 24hr period and limit your cost to £20.**
- **On days where you have no programming to do, you're not paying.**
- **Don't worry about wasted credit or jobs that go wrong, it's only £20 for the day.**
- **Don't worry about what to charge the customers, your maximum cost that day is £20.**

24hr unlimited use days can only be added to your account in office hours so please ensure you have your 5 days pre purchased and ready on your Zedfull for when you want to use them. (Once added to your account, they can be activated at any hour).

Other package options available. Please enquire for details

CUT TO CODE MACHINES

JMA | Supracode

SupracodeSupracode is the latest electronic machine for professionals from JMA for code cutting and decoding high security and vehicle keys. It includes the first automatic device for engraving text onto the key grip, no operator actions required.
This machine is designed for professional key cutters seeking precise and fast machining.

- **KEY CUTTING AND ENGRAVING FROM A SINGLE MACHINE**
  More precise, faster and simpler cutting of high security and vehicle keys.

  Fast, silent and precise marking thanks to the line engraving system.
- **NEW JMA KEY PRO 2.0 APP**
  New easy and intuitive interface: step-by-step instructions that are easy to follow.

  Constant updates for keys and software.

  Faster searches and faster data management speeds.
- **SYNCHRONISATION WITH JMA CLOUD PRO**
  Save your customer data in the cloud and access it wherever you want.

  Import master key plans and cut the keys.

  Keep a copy of your data without depending on the machine's tablet.
- **TAKE YOUR SUPRACODE TO THE NEXT LEVEL**
  X-VAC vaccum kit and special clamps.
- **NEW FEATURES**
  An advanced flexible coding system for high security keys: movements by the machine adapt to the chosen coding system.

  Grip with self-centering clamp: operated by 1/4 turns.

  Cutters with anti-wear coating.

  Tool holder: with independent lighting and storage space for 12 cutters.

CUT TO CODE MACHINES

JMAKEYPRO 2.0

More dynamic and intuitive interface thanks to new technologies applied to the software.

Better graphical representation of the duplication processes.

A database that is more accessible, faster and always up to date.

New functions: key search with partial cuts,variable speed, axis override....

CUTTING & ENGRAVING

Duplication and engraving of FLAT, SECURITY and AUTOMOTIVE keys on a single machine.

JMA | Multicode NXT Engraving

With the new Multicode NXT range, JMA offers an all-in-one professional solution for your business. Its multi-functional nature means it can cut to code and copy flat, dimple and vehicle keys without needing to switch machines. Witness its power and speed for cutting keys in a single motion and discover its cutting-edge technology, which uses a tablet and the JMAKEYPRO2 app for duplicating the entire catalogue of JMA keys and their equivalents.

- Copies flat, security and vehicle keys
- Built in 'Engraving' function
- Powerful motor for cutting keys fast and in a single motion
- Clamp for security keys with interchangeable clasps
- Tool holder included with the machine
- Fully enclosed protective screen

Copy Service JMA UK can offer fob copy service - Please enquire for more details (sales@jma-uk.co.uk)

SKS | EDT1 - Fob Cloning Machine

NEW

Encrypted Token Duplicator.
This Device will duplicate newer fobs that the Smart card deluxe can't do.

The EDT1 is a PC based machine that requires internet access so that it will remain updated.

The software will automatically tell you if a new version is available for download. This will only happen when the machine running the software is connected to the internet.

- EDT1 Duplicator
- Software USB
- 5 Blank Fobs/Tokens

OM092/FOB	TDFI Bullet Fobs

ACCESS CONTROL MACHINES

ICOPY-XS Fob Cloner

NEW

The ICopy-XS Fob Cloner is the perfect tool to provide your customers with duplicate electronic cards and fobs.

Why ICopy-XS
With its wide coverage, you will be able to copy not only low-frequency fobs but also high-frequency, high-security fobs and cards currently not cloneable by other devices on the market such as the Smart Card Deluxe.

ICopy-XS is also easy to use. Place the card/fob on the ICopy-XS and with a few presses of one single button, you can read and copy them.

- Expand your key duplication services. You can use it as a duplication machine along with standard key cutting in a retail store or van.
- Beat your competitors. With its extensive coverage, you will duplicate most access control cards and fobs on the market.
- Easy to use. Present the existing card/fob to the machine, the machine reads it and you will have a copied card or fob in no time.
- Free software upgrades.

Kit includes:
1x ICopy-XS, 20x M1-4B fobs to clone high-frequency fobs, 4x ID1 cards and 36x ID1 fobs to copy low-frequency fobs.

Please note:
Intratone fobs: the iCopy-xs can copy these perfectly. HOWEVER: most Intratone readers have a cloning detection system whereby they read from and write to the tag and check if it is genuine. If it isn't then they disable the original and the clone so it's best not to take a chance.

KMS fobs. This is a dual frequency fob. To copy this fob you can't use the single button but need to use the Read option from the menu and select. 1. M1 S50 1K 4B then once read you can select Write. This copies the HF part of the fob. To copy the LF part Select Read from the menu then 39. T5577 and once read select Write.

Paxton PX1 Fob Cloner

NEW

The PX1 Paxton fob copier is a dedicated standalone device that allows you to copy Paxton fob in seconds providing a valuable extra level of customer service to your business.

- The PX1 Paxton fob copier is a dedicated standalone device that allows you to copy Paxton fob in seconds providing a valuable extra level of customer service to your business.
- You will be able to copy blue, red, yellow and green-ringed Paxton fobs.
- Completely self-contained so no extra battery pack is required.
- Faster than the TDF1.
- Warranty: 12 months from the date of purchase. Details of each device sold will be stored on secure storage ie, serial number, name of owner and location.

Package includes:
1x PX1 Fob Cloner Unit.
2x Generic Paxton Fobs.
2x Tear Drop Paxton Fobs.
2x Paxton cards.

Please note that The PX1 Cloner will only work with original Paxton fobs. There is a very similar system called PAC GDX that has identical fobs. Before attempting to clone your customer's fob, please confirm that their entry panel is a PAXTON one.

KEYCAT	SKS Key Blank Catalogue

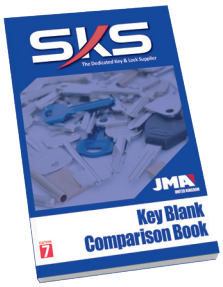

INSTACODE Instacode Software

- 1 Year subscription
- See page.34 for full details

Ref.	Description
OM062A	Instacode- 1 Year Subscription

SKS Comparison Book

- Cross references 11 major manufacturers, producing over 30,100 lines of key blank comparisons
- A 'must' for the serious key cutter

Ref.	Description
CB	SKS Comparison Book

KEY GAUGES

Popular Cylinder Keyway Panel

- Keyway panel to help with the identification of popular cylinder key blanks
- Updated version with 20 keyways - now includes popular double glazing keys

Ref.	Description
LA001	Popular Cylinder Keys

Key Checker

- A useful tool for finding the correct blank
- Simply slot the key in, lock the shims into place & remove key
- The locked shims have produced an exact key hole for you to try different blanks

Ref.	Description
LA008A	LP-1 Profile Reader

Yale Security Panel

- Keyway panel to help with the identification of old Yale security keys
- 60 keyways shown covering the Yale, YN, YR, NA & AY sections

Ref.	Description
LA006	Yale Seurity Keys

Mortice Pin & Pipe Gauge

- A must for all mortice key cutters
- Quickly measure the thickness of mortice keys & the diameter of internal pipe holes
- Gauge includes half gauges for better readings

Ref.	Description
LA002A	Pin & Pipe Gauge

ASSA/Ruko Keyway Panel

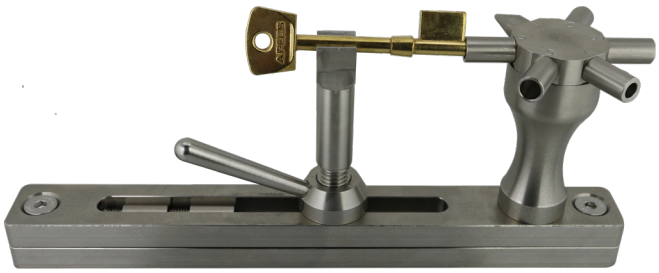

- Keyway panel to help identify Assa & Ruko security keys
- 80 keyways shown covering the main Assa & Ruko key blanks

Ref.	Description
LA005	ASSA/Ruko Security Keys

Jeff Turners Capstan Key Horse

- A must have tool for making and finishing keys. Ideal for the professional key cutter and locksmith.

NEW

Ref.	Description
LA090	Jeff Turners Capstan Key Horse

KEY CUTTING SAFETY

Safety Glasses

- Essential for health & safety when key cutting
- Sturdy & adjustable with a modern appearance

Ref.	Description	Price
LA050	Safety Glasses	£5.90

KEY SAWS

Key Saw Frame

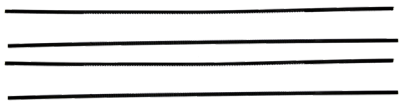

- Key saw frame for ward cuts or general tidying of keys

Ref.	Description
LA030	Key Saw Frame

Key Saw Blades

- Key saw blades suitable for LA030 frames (130mm) long

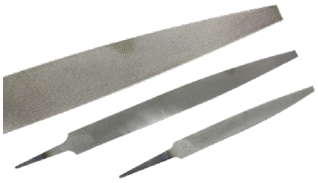

Ref.	Description
LA031	1.2mm Wide
LA032	1.5mm Wide
LA033	2.0mm Wide

FILES

File Finishes:
Bastard - Suitable for fast removal of surplus material.
2nd Cut - A finer file for smoother finishing.

Warding Files

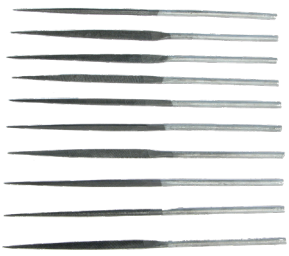

- Professional quality files for the key cutting trade
- Available in 2 different cuts & 3 different lengths

SMART ACCESS

IGL00 Smart Padlock

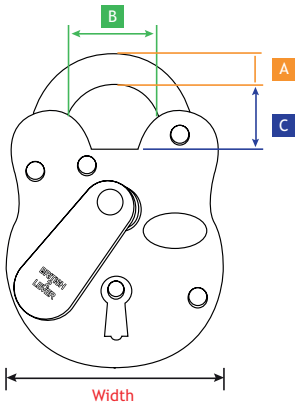

- Fuss-free security. No more fiddling with small digits or fussy dials on conventional padlocks; nor will you need to keep track of keys or codes to unlock. The Padlock is mobile app-enabled for you to gain or grant access on your terms
- There for you always. Use it both indoors and outdoors, the Padlock can withstand wet and dry weather conditions
- A cut above the rest. Unlike other Bluetooth padlocks, the igloohome Smart Padlock does not require the user to download an app to unlock it. With algoPIN™ technology, simply send PIN codes to your friends, family and more for them to use
- Safeguard your assets. Choose from One-Time, duration or permanent PIN codes. Time-sensitive access ensures that your assets will always be kept safe with the Padlock

212-217	Garage Door

Key Cutting

Our workshop is fully equipped with every type of key cutting machine. Our key cutting service includes:

- Extra keys cut for locks ordered at the same time
- Making copies of specialised and non-standard keys
- Cut to number (Vehicle keys, locker keys, etc)
- Duplicating proximity fobs

Key Alike

We have pinning service kits for most of the products we sell, so providing we have the parts and the lock can be dismantled and reassembled, we can key it alike for you. Examples of items we can key alike:

- Mortice Locks
- Rim & Euro Cylinders
- Padlocks
- Cam locks

Master Keying

We can provide multiple master keying services, depending on your requirements. The popular Maxus Pro is capable for most size suites and can handle common entrance lock and sub master keys. Your suite is designed to your specification and then assembled. Replacement locks & keys can be assembled quickly.

If you are in a hurry we have the Maxus HS1 suite, which is a simple shared system available from the shelf. Each lock has a differ key and can be accessed via a master key.

Commercial grade or large scale systems can be achieved with the GEGE pExtra suite, which offers extra durability and scalability. Its keys are also patented so you have full key control.

Key Control

SKS offer several product series that have patented protected keys, which are registered to your SKS account. This means your customers will need to come back to you for extra keys, giving control and securing future profits. We currently offer patented keys for cylinders and padlocks from these leading brands:

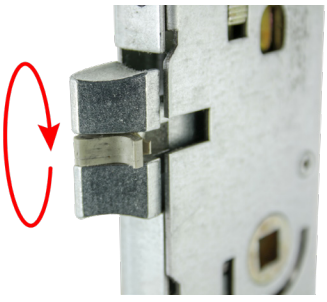

- Ifam
- Kaba
- Viro

Configuration

We can pre-configure certain locks to the way you require, ready to install and saving you time. Some examples are:

- Setting codes on digital door locks
- Reversing latches on mortice locks and MPL gearboxes
- Converting electric locks to different power input or locking option

Bespoke Jobs

Our workshop is filled with resourceful people so we are able to do certain bespoke jobs, which include:

- Assembling euro cylinders with a thumb turn on a non-stocked length up to 60mm
- Making a padlock or cylinder suit an old existing key
- Making keys for locks where the keys have been lost

Specials *

And if we can't do it, we have plenty of great suppliers that might be able to help with your requirements.

* Please note: all special orders must be paid in advance.

PEXTRA B.S EURO CYLINDERS

pExtra
Patented Security Cylinders

The Gege pExtra security cylinder is ideal for offices, schools and businesses where key control is essential. High quality grade components ensure these cylinders are durable, robust and ideal for high traffic situations.

pExtra cylinders can be supplied keyed to differ or master keyed. Additional sizes, cylinder types and finished are available to order.

CERTIFIED TO BRITISH STANDARD
BS EN 1303: 2005
TS007: 1Star

The patented key design cannot be copied with common key milling machines like "Easy Entry". An illegally made key will only turn in one direction making it un-useable.

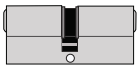

Euro - Key One Side

Commerical grade high quality 6 pin euro cylinder with Patented security key that can only be cut by SKS. Anti-Drill, Bump & Pick protection. Available Keyed Alike & Master Keyed. Supplied with 2 Keys.

ELECTRONIC SMART LOCK

Electronic Digital Smart Lock

The Yale Keyless Connected smart lock gives you freedom to secure your home without the need for a key. Simple to use, you now have complete control on how you unlock your door.

Convenience
There's no need to worry if your children arrive home early, or if you're stuck at work with friends on your doorstep. You control who and when people have access to your home. For example, you can set a PIN code that works for 24 hours for a family member or your cleaning person.

Simple to use
You choose how you want to open your door. PIN code, key card, key tag, remote fob and even from your smartphone when connected to a smart home system. It is also easy to add and remove users if you need to.

Security as standard
Feeling safe and secure is a must for any home owner. The smart lock has a tamper alarm and incorrect PIN code feature.

- **Replaces existing rim cylinder used on a 60mm backset Nightlatch**
- **Touch-screen with backlit keypad**
- **Battery operated**
- **Low battery indicator with emergency battery connection**
- **User codes and settings remain if batteries are replaced**
- **3 minute lock out if code is entered incorrectly 5 times**
- **Tamper alarm**
- **For use on timber doors**
- **2 year guarantee**

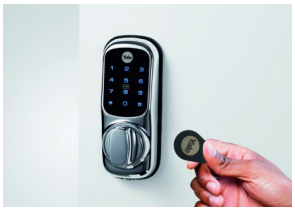

Opening the lock
4 -10 digit PIN code
24 hour PIN code for visitors, Key Card or Key Tag
You can use a mix of up to 20 PIN codes, key tags and key cards.

Connectivity: Complete your smart home system. The Keyless Connected smart lock can connect to leading smart home systems when the appropriate module is fitted. It also connects to the Yale Smartphone Alarm and CCTV systems when you use the Yale module.

Era 1730/1530 British Standard Keyless Egress

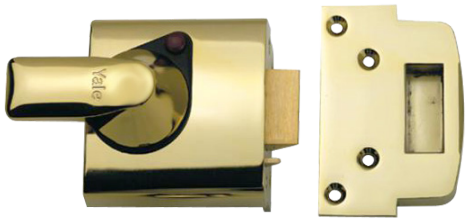

- BS 8621:2007 standard which mirrors BS 3621:2007 but is for escape locks
- Classified as providing keyless egress at all times - this applies where there is a requirement for an easy action method of opening an external door from the inside with no need for key or similar devices for unlocking
- A keyless lever on the inside ensures it is possible to make an emergency escape in the event of a fire

Chubb LOCKS Union Detainer Range

- Suitable for various models including: 3G110, 3J60, 3K70, 3R35 & 3M50
- For servicing & re-keying/keying alike

Ref.	Description	Pack
UN 360 SET	Lever Pack with 2 Keys	Bag
UN 360 DP	Lever Pack Keyed Alike	Bag
UN 360 DET	Ind. Levers (1-9 differs)	L
UN 3G110BT	Bolt Thrower (Curtain)	L

Chubb 3U114E/3U3K74E Range: See Union 2134E Range
Chubb 3U177/3U277 Range: See Union 2177 Range

maXus Bolt Thrower Kit

- A worn bolt thrower (curtain) is the main cause of non working & sticky action mortice locks
- This handy kit has a selection of 8 of the most common bolt throwers covering various locks from Chubb, Union, ERA & Yale
- Supplied 2 of each (16 in total) in a small case
- Bolt throwers can be ordered individually to replenish kit

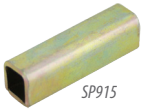

Ref.	Description	Pack
BT KIT	Bolt Thrower Kit (16 Pieces)	L

maXus Spindles

SP758

- Replacement spindle bars
- Available in different lengths but can be cut down if required
- Standard 8mm thickness for common mortice lock latches

SP915

Ref.	Style	Length	Thickness	Pack
SP916	Straight Spindle	65mm	5mm	L
SP758	Straight Spindle	90mm	8mm	L
SP759	Straight Spindle	150mm	8mm	L
SP915	Adapter 5mm to 8mm	30mm	8mm	L

DOOR LATCHES

maXus Bolt Through Tubular Latches

- Suitable for 100,000 Cycles.
- Zinc Live Bolt, Zinc follower, MS Faceplate, MS Striker plate & MS Body.
- Follower is suitable for 8mm square spindle
- Suitable for light doors.
- Sprung furniture.
- Suitable for bolt through 32-38m

NEW

Ref	Length	Backset	Finish	Pack
MX810/NP	67mm	45mm	Nickel	Display
MX810/PB			Brass	
MX811/NP	79mm	57mm	Nickel	Display
MX811/PB			Brass	

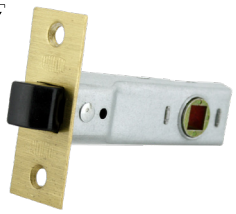

Legge Tubular Latches

- High quality tubular latches
- CE Marked with lifetime guarantee
- Includes striker plate & fixing screws

ELECTROMAGNETIC LOCKS

Electromagnetic Lock Guide

Electromagnetic Locks commonly known as 'Maglocks' have a large magnetic coil and when powered attracts to an armature plate that is fixed to the door to hold the door locked.

Voltage – Electromagnetic locks are commonly dual voltage (12v & 24v) meaning they are suitable for most systems. They are generally only available as 'Fail Safe' operation and only work from DC (direct current) power source.

Operation – Maglocks are only available in 1 operation, which is 'Fail-Safe' (also called fail-open). Fail-Safe works by applying electric current to the lock causing it to lock. If there is a power failure to the maglock, the door opens merely by being pushed or pulled.

Current – This is the value of 'Amps' a unit requires to operate. Current is not a measure of the strength or durability of a Maglock. Your power supply must have a higher output than the sum of everything being powered from it.

Holding Force – The size of a Maglock and its magnetic coil will determine its maximum holding force.

Monitored – Some Maglocks come with a sensor used for monitoring purposes. The sensor can be wired in a multiple of different ways to different things. A simple example is it's wired to a buzzer that sounds until the door is fully closed.

Fixing Brackets – Maglocks require fixing brackets to fix onto the door and frame, which are not supplied with the lock. Armature plates allow you to fix the locking plate and either 'L' bracket is required for outward opening doors or 'Z & L' brackets for inward opening.

Strength Guide

1 – 0kg-150kg
2 – 151kg-300kg
3 – 301kg-600kg
4 – 601kg-1000kg
5 – Over 1000kg

Standard Series Mag Lock

- Dual voltage 12v/24v
- Holding force up to 136kg
- Door monitor sensor
- Suitable for inward & outward opening doors
- Internal use
- Size: L116 x W39 x H21

1

Voltage	Operation	Current	Holding	Ref.
12v DC	Fail Safe	0.36A	136kg	ES250-SGL
24v DC		0.18A		

Standard Series Mag Lock

- Dual voltage 12v/24v
- Holding force up to 272kg
- Door monitor sensor
- Suitable for inward & outward opening doors
- Internal use
- Size: L251 x W47 x H25

2

Voltage	Operation	Current	Holding	Ref.
12v DC	Fail Safe	0.40A	272kg	ES251-SGL
24v DC		0.20A		

Standard Series - Double Mag Lock

- Dual voltage 12v/24v
- Holding force up to 272kg
- Only for double doors
- Door monitor sensor
- Suitable for inward & outward opening doors
- Internal use
- Size: L502 x W47 x H25

2

Voltage	Operation	Current	Holding	Ref.
12v DC	Fail Safe	0.40A	272kg	ES251-DBL
24v DC		0.20A		

Standard Series Mag Lock

- Dual voltage 12v/24v
- Holding force up to 544kg
- Door monitor sensor
- Suitable for inward & outward opening doors
- Internal use
- Size: L266 x W73 x H40

3

Voltage	Operation	Current	Holding	Ref.
12v DC	Fail Safe	0.50A	544kg	ES252-SGL
24v DC		0.25A		

Standard Series - Double Mag Lock

- Dual voltage 12v/24v
- Holding force up to 544kg
- Only for double doors
- Door monitor sensor
- Suitable for inward & outward opening doors
- Internal use
- Size: L512 x W73 x H40

3

Voltage	Operation	Current	Holding	Ref.
12v DC	Fail Safe	0.50A	544kg	ES252-DBL
24v DC		0.25A		

Weather Series - Hold Strength 1 Mag Lock

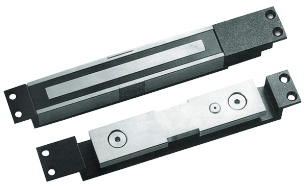

- Dual voltage 12v/24v
- Holding force up to 181kg
- Suitable for inward & outward opening doors
- External or internal use
- Size: L164 x W35 x H26

1

Voltage	Operation	Current	Holding	Ref.
12v DC	Fail Safe	0.37A	181kg	ES253-SGL
24v DC		0.19A		

ELECTROMAGNETIC LOCKS

Shearlock

- Mounted inside the door to be less visible
- Timer (0, 2.5, or 5 seconds)
- Lock monitor sensor
- Suitable for inward & outward opening doors
- Size: L228 x W38 x D27

3

Voltage	Operation	Current	Holding	Ref.
12v DC	Fail Safe	0.50A	544kg	ES254
24v DC		0.25A		

1354 Shearlock

- Mounted inside the door to be less visible
- Timer (1 to 30 seconds)
- Lock & door position sensor & retry facility
- Suitable for inward & outward opening doors
- Size: L164 x W30 x D25

5

Voltage	Operation	Current	Holding	Ref.
12v DC	Fail Safe	1.50A	1500kg	AR1354
24v DC				

Mini Maglock

- Used for cabinets & drawers
- Surface mounted
- Dual Voltage
- Fail Safe operation
- Size: L70 xW31 x D18

1

Ref.	Voltage	Current	Holding
ES257	12v DC	0.10A	36kg
	24v DC	0.05A	

Hold Open Magnet

- Magnetic door holder designed to retain a fire door open
- In the event of a fire, the door holder magnet can be turned off by the fire alarm, allowing the door to shut
- Complete with adjustable place

Ref.	Operation	Current	Holding
ES256	Fail Safe	0.13A	150kg

Doorsense Fire Door Releaser

- Works manually or automatically via a timer to set a night release time
- Compliant with BS EN 1155 - EMC Tested and rated for timber doors (FD120)
- Width: 194mm Height: 207mm Depth: 43mm

Ref.	Operation	Finish
UN 8755A-BLK	Fail Safe	● Black
UN 8755A-WHT		○ White

ELECTRIC STRIKE GUIDE

Electric Strike Guide

Electric strikes have a solenoid coil and when powered or un-powered it moves the pivoted keep allowing the door to open.

Voltage – Electric strikes are commonly available in 12v or 24v with 12v being the most common. Voltage does not impact on the strength or durability of an electric strike. When replacing a strike you should replace with the same voltage (check labelling on old strike or power source).

AC or DC – Electric strikes are available in either AC (alternating current) or DC (direct current). Your strike should match (AC or DC) the power supply powering it. If you require either 'Battery Backup' or 'Fail Safe' (see below) installation you must use a DC strike and PSU.

Current – This is the value of 'Amps' a strike requires to operate. Like voltage, current is not a measure of the strength or durability of a strike. Your power supply must have a higher output than the sum of everything being powered from it.

Operation - Electric strikes are generally available in two operations:

Fail-secure – Also called fail-locked By applying electric current to the strike it will cause it to open. The strike would remain locked and secure in a power failure, but typically a handle or key override can still be used to open the door. Strikes with this operation can be powered by AC that will cause the unit to buzz, or DC power, which offers silent operation, except for a "click" while the unit releases.

Fail-safe - Also called fail-open By applying electric current to the strike it will cause it to lock. If there is a power failure, the door opens merely by being pushed or pulled. Mainly used for exits without panic hardware that may need to be used for escape in emergency. Fail-safe units are always operated with DC power.

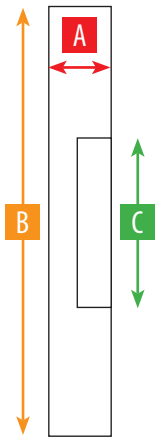

Adjustable Jaw – The lip of the jaw can be adjusted in or out by a few millimetres to allow the installer to align the strike after fitting.

Monitored – Some strikes come with a micro switch used for monitoring purposes. When the door is closed the latch bolt depresses the switch, which can be wired in a multiple of different ways to different things. A simple example is it's wired to a buzzer, which sounds unless the door is closed fully.

Strength Guide

1 – 0kg-150kg
2 – 151kg-300kg
3 – 301kg-600kg
4 – 601kg-1000kg
5 – Over 1000kg

UNION ASSA ABLOY CodeGUARD 5™

BS8607:2014 +A1: 2016 Lic.KM 690973

CodeGUARD 5 from UNION is a new generation of push button mechanical locks, purpose-designed to combine both high security and access control.

- Universal handing for timber and metal doors
- Individual code to deter opportunists if the factory code is not reset
- Over 2000 combinations available
- Resistance to sustained attack when trying to remove the unit from the door
- Suitable for 30 & 60 minute timber fire doors and 240 minute metal fire doors
- Automatically deadlocks the latch when it comes into contact with the security box strike
- If the unit is removed the auto firing pin releases to deadlock the unit permanently

FIT AND FORGET.

FURNITURE/CABINET CODE LOCKS

KL1000 Classic KitLock Locker Lock

This neat lock is easy to fit, taking just a few minutes to remove the existing cam lock and making an additional top fixing. KL1000 Classic Locker Lock can also be fitted to a locker or cabinet that does not have an existing locking device - just drill another hole. Once in place the lock will perform up to 15,000 openings on just two AAA batteries. Access control without the need for keys.

- 11 button keypad
- 8 digit Master and Sub-Master Code
- 4 digit User Code
- 6 digit Technician Code
- Left hand and right hand versions available
- Up to 15,000 operations from 2 x AAA batteries (supplied)
- Battery override
- Slam latch accessory available
- IP55 rated when fitted with gasket
- All parts / fixings / templates included

Ref.	Description	Finish	Pack
KL1000	KL1000 Kitlock	Silver	Box

KL1200 KitLock Locker Lock

Robust keyless access. For more challenging environments, the KL1200 includes all the benefits of the KL1000 Classic but is tougher and more robust.

With additional programming features, stainless steel buttons, dual fixing points and increased battery life, the KL1200 provides enhanced benefits to facilities managers looking to simplify access control without the need for keys. Quick, tough and cost effective.

- 11 button keypad
- 8 digit Master and Sub-Master Code
- 4 digit User Code
- 6 digit Technician Code
- Right hand version available
- Up to 50,000 operations from 2 x AAA batteries (supplied)
- Battery override
- Auto unlock feature
- Audible keypad
- Slam latch accessory available
- IP54 rated when fitted with gasket
- All parts / fixings / templates included

KL15 KitLock Mechanical Combination Lock

Simple, tough and good value for money, the KL15 offers mechanical keyless access with Public or Private Function models suitable for a variety of locker and cabinet applications.
The KL15 can be surface mounted with an ergonomically designed surface trim plate that provides additional grip allowing ease of opening. If it's a sleek look that will better suit the application, the KL15 can also be flush fitted.

- No keys to manage
- Code retrieval function
- Flush or surface mounted
- Anti-vandal handle
- Salt spray tested
- High / low temperature tested
- High / low humidity tested
- 4 wheel combination
- Up to 10,000 unique combinations
- Locked / unlocked indicators
- Private Function Shown (Public version available)
- Suitable for internal and external applications

NEW

Ref.	Description	Finish	Pack
KL15	KL15 Kitlock	Black	Box

KL20 KitLock Mechanical Combination Lock

Designed with simplicity in mind, the KL20 offers mechanical keyless access suitable for a variety of lockers, cabinets and cupboards.
A simple robust mechanical lock. Tough alloy front and handle. Flush mounted ideal for personal storage in offices, schools and colleges. The user selects their own 4 digit code and this remains unchanged until they wish to alter it. The user can change their code at anytime and the KL20 has the added security and convenience of auto scramble. The dials automatically scramble to 0-0-0-0 when the lock is used, thus hiding the user code from others

- No keys to manage
- Code retrieval function
- Auto code scramble function
- 4 wheel code combination
- Black powder coated finish
- Locked / unlocked indicators
- Available vertical, right hand and left hand
- Private Function only
- Suitable for indoor use only

CODELOCK LOCKER LOCKS

KL15 KitLock Mechanical Combination Lock

Simple, tough and good value for money, the KL15 offers mechanical keyless access with Public or Private Function models suitable for a variety of locker and cabinet applications.
The KL15 can be surface mounted with an ergonomically designed surface trim plate that provides additional grip allowing ease of opening. If it's a sleek look that will better suit the application, the KL15 can also be flush fitted.

- No keys to manage
- Code retrieval function
- Flush or surface mounted
- Anti-vandal handle
- Salt spray tested
- High / low temperature tested
- High / low humidity tested
- 4 wheel combination
- Up to 10,000 unique combinations
- Locked / unlocked indicators
- Public and Private Function
- Suitable for internal and external applications

KL15	KL15 Kitlock	● Black	Box

KL20 KitLock Mechanical Combination Lock

Designed with simplicity in mind, the KL20 offers mechanical keyless access suitable for a variety of lockers, cabinets and cupboards.
A simple robust mechanical lock. Tough alloy front and handle. Flush mounted ideal for personal storage in offices, schools and colleges. The user selects their own 4 digit code and this remains unchanged until they wish to alter it. The user can change their code at anytime and the KL20 has the added security and convenience of auto scramble. The dials automatically scramble to 0-0-0-0 when the lock is used, thus hiding the user code from others

- No keys to manage
- Code retrieval function
- Auto code scramble function
- 4 wheel code combination
- Black powder coated finish
- Locked / unlocked indicators
- Available vertical, right hand and left hand
- Private Function only
- Suitable for indoor use only

KL1000 Classic KitLock Locker Lock

This neat lock is easy to fit, taking just a few minutes to remove the existing cam lock and making an additional top fixing. KL1000 Classic Locker Lock can also be fitted to a locker or cabinet that does not have an existing locking device - just drill another hole. Once in place the lock will perform up to 15,000 openings on just two AAA batteries. Access control without the need for keys.

- 11 button keypad
- 8 digit Master and Sub-Master Code
- 4 digit User Code
- 6 digit Technician Code
- Left hand and right hand versions available
- Up to 15,000 operations from 2 x AAA batteries (supplied)
- Battery override
- Slam latch accessory available
- IP55 rated when fitted with gasket
- All parts / fixings / templates included

KL1000 RFID Kitlock Locker Lock

The KL1000 RFID KitLock offers functions for single users (Private Function) and short term use by multiple users (Public Function). The KL1000 RFID Locker Lock can be easily fitted to replace an existing cam lock, or to fit to a new locker or cabinet that does not have an existing locking device. The lock will perform up to 15,000 openings on just two AAA batteries.

- Previously known as the KL1050
- Supports MIFARE® Classic
- Master User Card
- Technician Card
- Public Pairing Feature
- Any orientation
- Up to 15,000 operations from 2 x AAA batteries (supplied)
- Battery override
- Slam latch accessory available
- All parts / fixings / templates included

CODELOCK LOCKER LOCKS

KL1100 KeyPad KitLock Locker Lock

This stylish standalone lock shares the same slimline design and powered latch as the KL1100 RFID but maintains the traditional code access keypad and features found in classic KitLock products. The product enhancements make this a front runner for those looking for traditional standalone digital locks with additional User Codes and auto-unlocking capabilities.

Codelocks KitLock products are designed for easy install and the KL1100 KeyPad is no different, sharing the same fixing holes as the KitLock KL1000 Classic, retrofit is an option for many applications. With up to 100,000 operations, 20 User Codes, Auto-Unlock at a set time or predefined period, this lock is an easy first choice for anybody looking for an upgrade to their lockers.

Suitable for a wide range of applications where the same code will be repeatedly used or where a single one-time user code can be entered and then erased ready for the next user, for example, hot desking in an office or a locker in a gym.

- 8 digit Master Code and Sub Master Code
- 20 User Codes
- 6 digit Technician Code
- Auto-Unlock at a set time
- Maximum locked period
- Battery override
- On the door battery change
- Powered latch
- Supports Private and Public Functions
- IP55 when fitted with gasket
- Anti-bacterial wipe clean

KL1100 RFID KitLock Locker Lock

Featuring a stylish, slimline front plate the KL1100 RFID gives any environment a modern, contemporary feel. Choose between offline or cloud based software options to configure your locks and cards. The KL1100 RFID is perfect for applications with a large quantity of lockers that would benefit from issuing and managing Card Clients from reception desks, for example, gyms, leisure centres, hospitals, hotels, schools and universities.

The KL1100 RFID is easy to install, operate and manage, featuring a powered latch enabling intuitive 'push shut' closing. Available in a Metallic Silver or Gloss Black finish.

- Master Card
- Technician Card
- Standalone Mode
- RCA (Remote Card Authorisation) Mode via offline or cloud based software
- Local management via plug-in Keypad Programmer (sold separately)
- Date and time based features
- Powered latch
- Battery override
- Override code
- MIFARE® Classic 1k compatible cards, fobs or wristbands can be used

KL1000 G3 NetCode® KitLock Locker Lock

Applying advanced technology to our core products.
Introducing the KL1000 G3 NetCode® designed through the evolution of our best-selling KitLock, the KL1000. Boasting popular features from the KL1000 Classic+ including 20 User Codes, 24hr countdown timer1 and introducing key override. The KL1000 G3 NetCode® has key override and front battery change capabilities, providing ease of use and peace of mind. The updated chrome effect back panel and handle finishes reflect their surroundings giving the lock a slimmer, more subtle aesthetic.

This compact digital lock is ideal for replacing keyed cam locks commonly supplied on a wide range of lockers, cabinets and cupboards. Sharing the same fittings & fixings as the KL1000 Classic this lock is easily retrofitted, ideal for upgrading existing installations.

- Date/time specific code generation
- Send generated codes via email or SMS2
- No WiFi connection required
- Easy install or retrofit
- Front battery change
- Key Override
- Battery Override
- Private, Public + NetCode® Functions
- Up to 20 User Codes
- Auto-unlock after a set time
- Slam latch accessory available

KL1200 KitLock Locker Lock

Robust keyless access. For more challenging environments, the KL1200 includes all the benefits of the KL1000 Classic but is tougher and more robust.

With additional programming features, stainless steel buttons, dual fixing points and increased battery life, the KL1200 provides enhanced benefits to facilities managers looking to simplify access control without the need for keys. Quick, tough and cost effective.

- 11 button keypad
- 8 digit Master and Sub-Master Code
- 4 digit User Code
- 6 digit Technician Code
- Right hand version available
- Up to 50,000 operations from 2 x AAA batteries (supplied)
- Battery override

V06 - Electric Lock

The V06 electric lock is suitable for inside or outside, manual or automatic doors, pedestrian or drive through gates, and is interchangeable with the V96 electric locks.

It is supplied as standard with the **'Service' function**: the lock opens with a single electric pulse & only resets once the door or gate has been opened & then closed.

With the removal of an internal part can also have a **'Security' function**: the lock opens only with a continuous electric impulse & manual or automatic pressure is applied simultaneously to open.

- Replaceable Double Electric Coil
- Standard 12v AC
  Also available: 12v DC, 24v AC, 24v DC
- Key Override
- Euro Profile *(Not Supplied)*

ELECTRIC LOCKS

Viro® V09 - Rotating Spike Electric Lock

The V09 electric lock is a high reliability lock specially designed for use on outdoor, manual or automated sliding gates.

Unlike closing systems with padlocks, chains & standard mechanical shackle locks, the V09 offers new & effective levels of security with hardened rotating spike deadbolt.

Easy to use, weatherproof & cannot be attacked from the outside. Standard 12v AC. Supplied with 2 keys.

258 -260 Window Handles
260 Window Gearboxes
261-264 Window Locks
266 UPVC Fixings

Identifying and Measuring a Multi Point Lock:

Multipoint locks are fitted to UPVC doors, timber doors and composite doors and are becoming increasingly more popular. Use this simple step by step guide to help identify and measure your MPL. If you cannot find it listed as a stock item then please fill in the MPL identification form on page 218 and we will try to source one for you.

1 Brand of Lock:

The initial thing to look for when identifying your MPL is to check for a brand name on the long faceplate of the mechanism. For example AVOCET, ERA, GU, FERCO, WINKHAUS, MACO, YALE, MILA, SARACEN etc. This can save a lot of time identifying your MPL.

ERA GU KFV FUHR FERCO INTERNATIONAL avocet

2 Faceplate:

Next measure the width of the long faceplate and check if it is flat profile or a U-Rail profile.

Faceplate 16 Faceplate 20

Flat Profile

U-Rail Profile

3 Locking Points:

Make a note of the number and types of locking points on the strip.

Deadbolt

Roller

Mushroom

Pins

Hook

Hook & Pins

Hook & Deadbolt

4 Centre Case:

Check the Lock Centre (PZ*) by measuring from the spindle centre to the lock centre, the backset measurement, case height and width (*Fig.1*) and also the type of case (*Fig.2*)

Fig.1

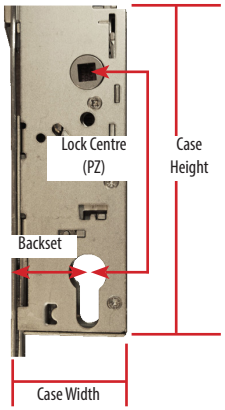

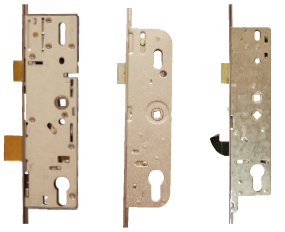

Fig.2

*Example PZ's:

PZ 92 PZ 72 PZ 62/92

5 Check the locking operation of the existing lock.

There are 4 main types of locking operation:

Lever Operated (L/L) - Lift the handle upwards to engage the locking points then turn the key one full turn to lock the door. Unlock by turning the key the opposite way one full turn and push down on the handle to disengage the locking points.

Lever Operated

Operation L/L

Twin Spindle (T/S) - Lift the handle upwards to engage the locking points then turn the key one full turn to lock the door. To unlock from the inside turn the key the opposite way one full turn and push down on the handle to disengage the locking points. To Unlock from the outside turn the key the opposite way one full turn and push down on the handle to disengage the locking points then turn the key again to release the door latch.

Twin Spindle

Operation T/S

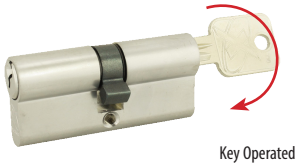

Split Spindle (S/S) - Lift the handle upwards to engage the locking points then turn the key one full turn to lock the door. To unlock from the inside turn the key the opposite way one full turn and push down on the handle to disengage the locking points. To Unlock from the outside turn the key the opposite way one full turn and push down on the handle to disengage the locking points then turn the key again to release the door latch.

Split Spindle

Operation S/S

Key Operated (K) - Lock by turning the key two or more times to engage all locking points and deadlock. Unlock by turning the key two or more times to release the locking points and the latch.

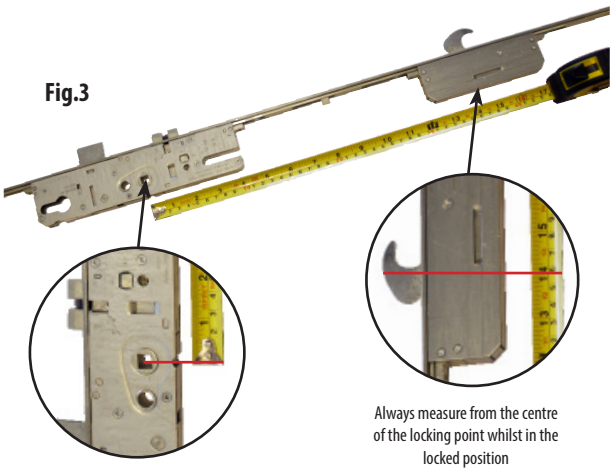

Key Operated

Operation K

6 Locking Point Measurements:

Measure the distances between the locking points and the centre of the spindle (*Fig.3*).

Fig.3

Always measure from the centre of the spindle hole

Always measure from the centre of the locking point whilst in the locked position

7 Handle Type.

Each MPL strip will have a handle symbol, this shows the recommended handle type for the lock. Just simply go to the handle section and pick any handle with the corresponding symbol

Handle A B C D Handle E F

T: 01442 291400 E: sales@jma-uk.co.uk www.jma-uk.co.uk

1

v

Make/Model:

Complete MPL: ☐ **Gearbox Only:** ☐

2 Faceplate:

Next measure the width of the long faceplate and check if it is flat profile or a U-Rail profile.

U-Rail Profile ◯ **Flat Profile** ◯ **Faceplate Width** mm

3 Centre Case:

Check the Lock Centre (PZ) by measuring from the spindle centre to the lock centre (A), the backset measurement (B), case height (C) and width (D) and also the type of case (E).

(A) Lock Centre(s): mm

(B) Backset: mm

(C) Case Height: mm

(D) Case Width: mm

4 Check the locking operation of the existing lock.

There are 4 main types of locking operation:

Lever Operated (L/L) - Lift the handle upwards to engage the locking points then turn the key one full turn to lock the door. Unlock by turning the key the opposite way one full turn and push down on the handle to disengage the locking points.

Operation L/L ◯ Lever Operated

Twin Spindle (T/S) - Lift the handle upwards to engage the locking points then turn the key one full turn to lock the door. To unlock from the inside turn the key the opposite way one full turn and push down on the handle to disengage the locking points. To Unlock from the outside turn the key the opposite way one full turn and push down on the handle to disengage the locking points then turn the key again to release the door latch.

Operation T/S ◯ Twin Spindle

Split Spindle (S/S) - Lift the handle upwards to engage the locking points then turn the key one full turn to lock the door. To unlock from the inside turn the key the opposite way one full turn and push down on the handle to disengage the locking points. To Unlock from the outside turn the key the opposite way one full turn and push down on the handle to disengage the locking points then turn the key again to release the door latch.

Operation S/S ◯ Split Spindle

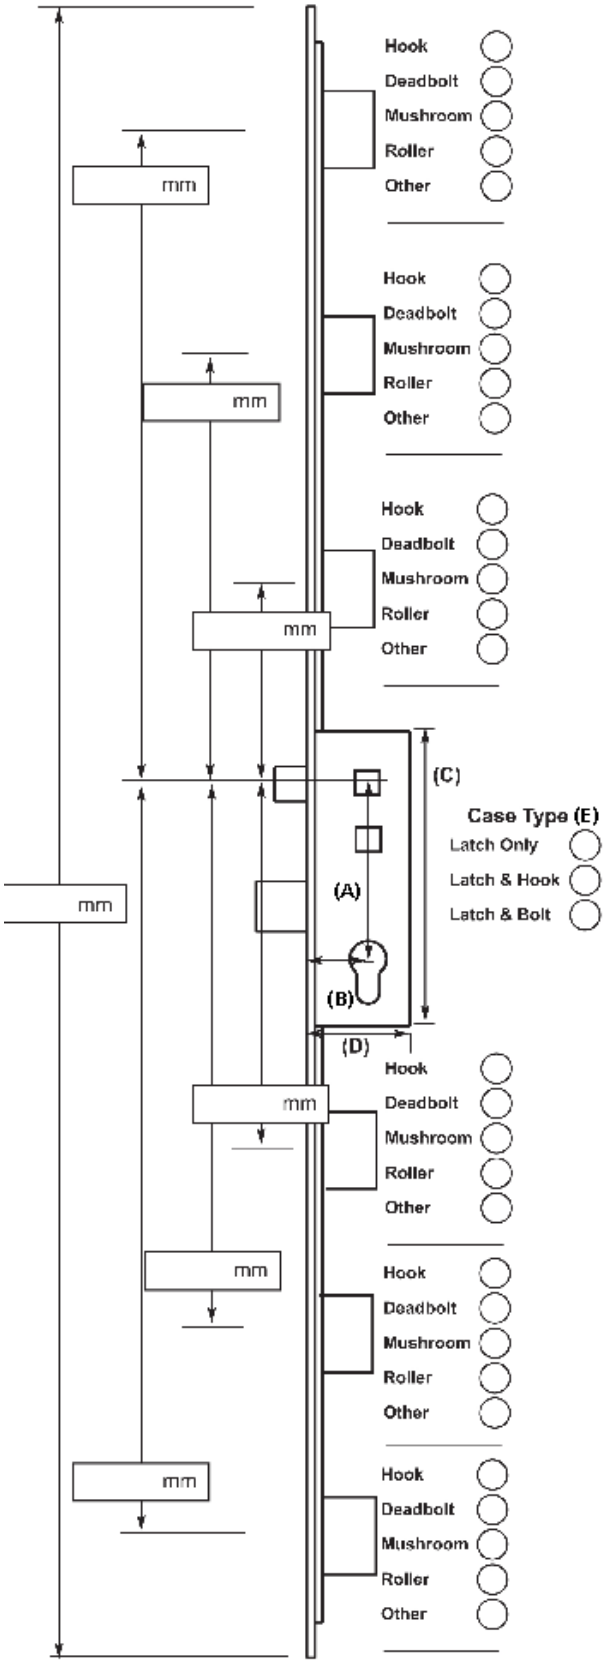

Key Operated (K) - Lock by turning the key two or more times to engage all locking points and deadlock. Unlock by turning the key two or more times to release the locking points and the latch.

Operation K ◯ Key Operated

5 Locking Options & Positions:

Tick the type of locking options on MPL Diagram. Then provide measurements between locking options on MPL Diagram. These must be measured whilst the MPL is in the locked position.

TORCHGUARD

SASHSTOP Torchguard

Built on the continued success of SASHSTOP, we are proud to offer the TORCHGUARD range design to further secure, enhance and protect your door via an easy to install design.

Sitting just underneath your existing door handle the TORCHGUARD can be added without the need for a drill, and has been designed to protect, in the event of a heat attack, by deflecting heat away from the plastic surrounding your door lock. Not only is it an additional security product, it can also be used as a repair plate to strengthen an otherwise 'weaker' door, as well as a cover plate to hide unsightly holes from previously drilled handles (after a replacement or conversion).

SASHSTOP have a developed an extensive range to cover a range of doors, from the traditional 35/35 size to a 28/35 which is also reversible meaning the same product can be used to fit a narrower backset of 28mm, or a 35mm option too!

MISCELLANEOUS

UPVC Frame Packers

Assorted Mixture (10 Each Size):

Ref.	Finish
MPL626/MIX	Mixed Pack (100)

Glazing Shovel

- Glazing shovel used for tow & healing windows and doors
- Also used for lifting and glazing & de-glazing safely
- Using a glazing shovel will minimise cracking or damaging glass

Ref.	Description
MPL629	Glazing Shovel

UPVC Adhesives

- **MPL680 -** a transparent adhesive for rapid constructional adhesion of PVC materials, e.g. water bars, drainpipe strips & cover strips
- **MPL681 -** a single component adhesive for fast bonding of rubber seals made of APTK & EPDM
- Type 500 is especially non-ageing & elastic

Ref.	Finish
MPL680	PVC-U Adhesive
MPL681	Fast Curing Adhesive

UPVC FIXINGS

Misc Fixings

Metal expanding cavity fixings for use on sheet thickness of less than 4mm. Ideal for using in UPVC to fix door chains, sash jammers, re-fixing keeps, etc. Requires M4 Screw. Sold individually.

Ref.	Size	Pack
WDS19/CF	M4	Loose

UPVC Fixing Kit

A useful collection of fixings for UPVC use supplied in storage case. Kit includes (approx):

50 x WDS20/16
50 x WDS20/25
50 x WDS20/45
50 x WDS21/25
100 x WDS22/25
50 x WDS28/45
50 x WDS22/38
50 x WDS27/25
12 x WDS26/90
20 x WDS19/CF
50 x WDS23/25
50 x WDS24/38
50 x WDS25/60
50 x WDS27/25

Ref.	Contents
WDS/KIT1	Selection of 13 Fixings (Approx 602 pieces)

UPVC Screw Set

A useful collection of fixings for UPVC use supplied in sturdy steel storage case. 12 different types of screws are included designed for use with UPVC material. Kit includes approx 2750 screws in total.

Ref.	Contents
WDS/KIT2	12 x Types UPVC Screws (2750 pieces)

UPVC FIXINGS

UPVC Fixings

Fixing screws used on UPVC. Yellow finish.
Sold individually.

OVERHEAD CLOSERS

Door Closer Guide

Types of Closers:

Overhead - This is the most common type of closer, which you can see above the door. It can either be used for inward/outward opening doors, fixed to the frame or door & can be used on wooden or metal doors.

Cam Action - Very similar to the Overhead closer. Its slight difference in design makes it more efficient, easier to use & more pleasing to the eye.

Electromagnetic - These closers work the same as other closers apart from the hold open is operated by a electromagnet rather than a catch. When wired into a Fire Alarm system the closer can automatically be released closing the door in the event of a fire.

Transom Closers - Commonly found in aluminium & glass shop front style doors. These are hidden from view & mounted inside the top part of the door frame.

Floor Spring - For use with timber, metal or glass doors. Very similar looking to a Transom closer but fitted into the floor instead. Can be used for single action (door can only be used from one side) or double action (door can be pushed open from either side).

Size - Rating of the strength to indicate the maximum size & weight of a door it can control. If too weak it will not close the door properly & fail in a short period of time.

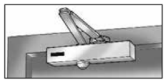

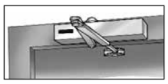

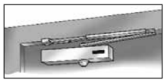

Power Size	Max. Door Width	Max. Door Weight
1	750mm	20kg
2	850mm	40kg
3	950mm	60kg
4	1100mm	80kg
5	1250mm	100kg
6	1400mm	120kg

Back check (180 to 70 degree angle) - A function to stop the door being 'flung' open out of control and possibly causing property damage or risk of injury to people.

Delay Action (180 to 70 degree angle) - Once the door is open the door closer 'delays' the closing action allowing a person extra time to walk through.

Closing Speed (120 to 10 degree angle) - The rate of speed the door closes.

Latching Speed (10 to 0 degree angle) - The rate of speed of the final closing. Slowly will stop the door banging against the frame. Faster if the door is set to close too slowly and more momentum is needed to latch fully.

ACCESSORIES

'Click & Find' is an innovative item finder that harnesses technology to give you daily peace of mind. This small lightweight device connects to your smartphone via Bluetooth, letting you use an app to find any item you want to associate with the system: handbags, keys, wallets, etc. 'Click & Find' can also be used in reverse, so the device finds your phone.

Besides other interesting features in the app that will always tell you where your most important items are, 'Click & Find' can also be used as a remote phone camera shutter button to guarantee you the perfect selfie.

Ref.	Name	Rate	Pack
AM080	Click & Find	POA	Box

CLICK & FIND APP'S MAIN FUNCTIONS

MOST RECENT LOCATION

The app saves the GPS location of the item to which the 'Click & Find' is attached on a map just in case the connection between the device and mobile is lost, helping you recover the lost item.

MARK AS LOST

If you lose an item to which you have attached your 'Click & Find', you can mark it as lost in the app. If another user of the app passes near the item, they will pick up the signal from the device and notify you of where it is.

SEPARATION ALARM

The 'Click & Find' device and your mobile connect via Bluetooth. When they move out of connection range, they emit an acoustic alert signal.

Open the camera app on your phone and then press the button on your 'Click & Find' device to get the perfect selfie.

ILO130	22mm	000442	Box

ELECTRICAL SAFETY LOCKOUT

IFAM Thermal-Magnetic Circuit Breaker - External

- Designed for lockout of thermal-magnetic switches on control panel
- Outward locking pins
- Available in 2 sizes to suit width of circuit breaker switch
- Lockable with 6mm diameter padlock

Ref.	Size	Description	Rate	Pack
ILO205	9.9mm	B1 - Circuit Breaker Lockout	000452	Box
ILO225	18.0mm	B2 - Circuit Breaker Lockout	000494	Box

IFAM Thermal-Magnetic Circuit Breaker - Internal

- Designed for lockout of thermal-magnetic switches on control panel
- Inward locking pins
- Button or screw adjustable
- Lockable with 6mm diameter padlock
- Resistant to chemicals and extreme temperatures

Ref.	Size	Description	Rate	Pack
ILO210	18mm	Circuit Breaker Lockout	000389	Box

IFAM Thermal-Magnetic Circuit Breaker - Axis

- Designed for lockout of thermal-magnetic switches of different sizes on control panel
- Fixes to switch to restrict movemet
- Available in 2 types - Single switch and large multi-pole switches
- Adjustment by thumb turn screw system
- Lockable with 6mm diameter padlock

Ref.	Type	Description	Rate	Pack
ILO232	Multi-Pole	C2 - Circuit Breaker Lockout	000710	Box
ILO231	Single	C3 - Circuit Breaker Lockout	000473	Box

IFAM Universal Thermal-Magnetic Circuit Breaker - Mini

- Designed for lockout of most thermal-magnetic switches on a distribution panel
- Lockable with 5.5mm diameter padlock
- Resistant to chemicals and extreme temperatures

LOCK LUBRICATION

GT85 PTFE Oil

- GT85 oil contains PTFE to provide long lasting protective film.

Ref.	Description
CA122	200ml Can
CA123	400ml Can

redline Graphite Powder

- The best for lock and hinge lubrication. Long lasting without attracting dirt or dust.

95ml average contents in puffer pack

Ref.	Description
CA045L	Graphite Powder

redline LAB Lube

- Made of Polytetrafluoroethylene, this superior friction fighting lubricant does not suffer from 'cake-up' or undesirable staining. Used by many lock manufacturers.

28g average contents in puffer pack

Ref.	Description
CA119	Micronised Lubricate

T: 01442 291400 E: sales@jma-uk.co.uk www.jma-uk.co.uk

LOCK LUBRICATION

WD-40 Range

WD-40
Protects metal from rust & corrosion, penetrates stuck or jammed parts, displaces moisture & lubricates just about anything.

Ref.	Description
CA049	100ml Can
CA092	250ml Smart Straw
CA093	450ml Smart Straw

ANTI FRICTION DRY PTFE LUBRICANT
Enhanced lubrication leaving a dry, clear film that won't attract dirt, dust or oil. It's quick drying & great as a mould release agent.

Ref.	Description
CA118	400ml Can

WHITE GREASE
Ideal for metal-to-metal applications that require heavy duty lubrication and protection.

Ref.	Description
CA124	250ml Can

HIGH PERFORMANCE SILICONE LUBRICANT
A non-staining, hard working formula which provides excellent lubrication.

Ref.	Description
CA116	400ml Can

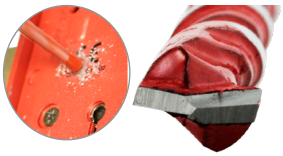

FAST RELEASE PENETRANT
Quickly penetrates its way into hard to reach areas, rapidly loosening seized fixings, stuck or rusted moving parts.

Ref.	Description
CA117	400ml Can

TERMS & CONDITIONS

Our trading relationship with our customers is very important, so please ensure you read our summarised terms below.

Prices

All prices are quoted at the Trade Rate excluding V.A.T. Prices are subject to alteration without notice. Please ask for current prices prior to ordering.

The Minimum Invoice charge is £2.00 excluding carriage and V.A.T (£5.00 for credit card payments).

Delivery

Carriage is paid by SKS on all orders over £80.00 net (U.K mainland). All orders under £80.00 will be despatched by post at cost (plus 50% >500g or 75% <500g) or by carrier at the rate of £6.25 per parcel. Carriage to Scottish Highlands, Islands, Eire, Northern Ireland & Isle of Man is paid on all orders over £150.00 (2 day service).

Unless previously advised SKS will supply all goods on back order which were previously unavailable at the original time of ordering. Carriage will be paid by SKS on all back orders.

Accounts

For customers who hold a monthly account, payment is due the end of the following month from the invoice date.

Unless previously agreed, goods paid by credit card will only be shipped to the cardholders billing address.

SKS reserve the right to withdraw credit facilities on accounts that show to be continuously overdue or cheques not honoured.

Claims

SKS must be notified in writing within 7 days of receipt of goods, of any claims, shortages or goods for return. A valid delivery note or invoice number must be quoted in all cases. Verbal Proof of delivery is available free of charge for goods despatched by carrier within six months of despatch.

No consequential loss or third party claims will be entertained as a result of any late deliveries, failure of our products, or changes/errors to the published catalogues or web site.

Returns

Items will only be accepted for return if accompanied with a valid invoice number or RMA number.

Correctly supplied goods which are returned for credit will be subject to a minimum 10% handling charge. All correctly supplied goods returned for refund after 30 days, will be subject to head office approval and a higher handling charge of up to 50% will be applied. Any items specially ordered will not be accepted in return for credit, unless faulty.

All items being returned must be in as new (resellable) condition, otherwise no refund will be given. Faulty goods will be returned to the manufacturer and will not be replaced/credited until SKS receives authorisation from the manufacturer. Please refer to our website for more detail.

Title

The title of goods supplied only passes to the customer when payment in full has been received. SKS reserve the right to collect any goods which remain un-paid after 70 days.

Phone Calls

Please be aware that all calls made to the Sales Office may be recorded for training and monitoring purposes. All calls are deleted from our system on a regular basis.
