Series

Focus on Dentistry

Dr Aaron Forsayeth

15 - 17 September 2026 | Webinar Series

[Learn More](#)

Join Dr Aaron Forsayeth for Focus on Dentistry, a three-day live webinar series designed to build confidence in managing common dental conditions in small animal practice. Through practical, case-based discussions, you'll gain valuable insights into performing effective canine and feline dental nerve blocks, assessing and treating orofacial trauma, and managing fractured teeth. Whether you're looking to refine your dental skills or improve patient outcomes, this series will provide practical knowledge you can apply in everyday clinical practice.

Deep-Dive
Live Course

Updates in Management of Neurological Emergencies

Dr Philip Judge

Starts 5 October 2026 | 3-Week Course

[Learn More](#)

This 3-week online course reviews current evidence and practical approaches to three common neurological emergencies in veterinary patients. You will cover traumatic brain injury, status epilepticus, spinal trauma and acute disc disease. Each week focuses on triage, diagnostic decision-making, medical a discussion of surgical options, and patient monitoring. The content is perfect for veterinarians who want the latest updates, with clinically applicable protocols you can use in practice every day.

Coming Up

Online
Conference

Online Veterinary Nurse & Technician Conference

in collaboration with Hill's Pet Nutrition Australia

6 - 8 October 2026 | Online Conference

[Learn More](#)

Join us for VNCON26 - a free, three-day online conference created specifically for veterinary nurses and technicians. Enjoy six engaging and practical clinical lectures from leading veterinary professionals, covering topics including emergency care, behaviour, nutrition, exotics and weight management. With plenty of practical takeaways to bring back to practice, VNCON26 is a great opportunity to learn, refresh your knowledge and connect with the veterinary community. Plus, earn 6 CPD points (RACE approval pending)

Deep-Dive
Live Course

Updates in Management of Anaesthetic Complications

Dr Philip Judge

Starts 26 October 2026 | 3-Week Course

[Learn More](#)

This 3-week online course for veterinary nurses and technicians focuses on the recognition and management of common anaesthetic complications. We will cover the big three: hypotension, hypothermia and abnormal respiration, along with a number of others, including vomiting/regurgitation, and prolonged anaesthetic recovery. Each week emphasises practical monitoring, early intervention, and clear communication with the veterinary team required to manage these complications in a stress-free manner – so you can support your patient in the best way possible.

For Veterinarians

Focus on Dentistry.
