FOREWARD

A personified and innovative design concept is what we stress in the development of each and every product. In line with our most advanced counterparts abroad, we adopt the latest technology and make use of the most distinguished hardware in the formation of each product design. In order to achieve our high ideals, we put the utmost effort in treating the least eye catching and raw materials transforming them into fine and elegant finished products. By utilizing the artist's mind and spirit, we add beauty to our product's unique character and charm. We match every line and curve with the product's own unique personality.

MESSAGE FROM THE CHAIRMAN

A tremendous growth in our business from zero to four factories established should contribute to all our customers who gave us a big support during the past years.

CHUN-TE WANG.
PRESIDENT

OUR HISTORY

1. Our company was established since the year of 1968 by the chairman, Mr. Chun-Te Wang in name of "Der Hon Plastic Factory". In 1975, the company was changed to "Der Kwei Co., Ltd." In 1974, the current company name "DER KWEI ENT. & CO.,LTD." was formally registered.
2. Started from one injection molding machine, the christmas flower was our first product, then umbrella handle as the second at the beginning years. Since 1971, an order from Kissme cosmetic company pioneered our journey of cosmetic container's manufacturing. Then, coming with big support of Kanebo and Shiseido etc, we enter into domestic cosmetic market.
3. To meet with the increasing requirement of production capacity, the factory was expanded from home size to 4 factories until 1993.
 - 1979 Move factory from home size to the newly built factory I.
 - 1985 Bought factory II which is located in Hsinchu industrial park.
 - 1989 Extend assembly factory in Buji, China.
 - 1990 Factory III built in Buji. China and production started from 1991.
 - 1992 Factory IV in Shanghai, China was built and entered production since Dec. of the year.
 - 1994 Will add another two factories in Jakarta, Surabaya of Indonesia from the joint venture.
4. Continuous different technics developed:
Our original expert is in injection molding.
 - 1974 started blow bottle production.
 - 1988 started injection blow molding.
 - 1991 started in-mold decoration technics.
 - 1992 started injection urea production.
 - 1993 induct "kammann" hi-speed 4-color printing machine for blow bottle.
