MADE IN ITALY

Entirely handmade

All the HRX products are **unique pieces**.

Every single HRX product is a focus of industrial attitude with an extra trademark of *Italian craftsmanship*.

All projects can be considered as a real **masterpiece**.

Sublimation

A technique that allows graphics printed by a plotter to be transferred directly onto white fabric.

Thanks to this process, any design can be created, with no limits on colors or creativity.

Transfer

A technique that uses a heat-transfer film, cut with a plotter, to create lettering, logos, and numbers on fabric using heat.

It guarantees a precise and uniform result, keeping the colors bright and unchanged over time.

›Customize options

DTF print

A modern customization technique that involves printing onto a special film, applying an adhesive powder, and then heat-transferring it onto fabric or other materials.

Thanks to its lightness and flexibility, it fits perfectly without compromising the elasticity and fit of the product.
