

2026 GLA SUV

2026 GLA SUV COLORS

DESIGN

More than a commanding view of the road ahead, the GLA offers a rewarding view of what's next. With intelligent tech, thoughtful luxury and smart looks, it not only puts more sport in compact SUVs, it puts more you.

GLA COMFORT & TECHNOLOGY

Fit more in.

Within its nimble length, the GLA gives you more space to ride, more room to shop, stow and be spontaneous. A standard power liftgate and 40/20/40 rear seats welcome your gear.

Twin widescreens. Side-by-side.

Dual 10.25-inch screens help keep you informed, entertained and in command. One's for gauges, one's a multimedia touchscreen. Both let you customize, personalize and visualize to suit your style.

Dress it up now. Change it up later.

Expressive design and elegant details are just the start of GLA style. The AMG Night Package adds sporty pedals, seats and steering wheel. Available 64-color ambient lighting lets you choose the hues that suit your mood.

VERSATILITY

From a tight corner of the city, to a tight corner of a back road, the GLA is agile and easy to maneuver. Turbo-hybrid power and a solid stance make it quick on its feet, confident in your hands.

Fully independent. With true team spirit.

With front wishbones and a multilink rear setup, each wheel tackles bumps on its own for composed comfort. But they're all in for crisp handling. Multimode adaptive damping is also available.

Turbo torque, with an electric twist.

The GLA 250's advanced engine delivers 221 turbo horses from a compact 2.0 liters. Its 258 lb-ft of torque is at your command over a wide range of rpm, for quick response anytime. Its 48-volt mild hybrid assist can add up to 13 hp electrically.

Geared to please.

The dual-clutch 8-speed is a quicker, smoother automatic, or a paddle-shifted manual on demand. With DYNAMIC SELECT, one console control calls up a range of performance profiles.

Sun, snow or rain. Tarmac or terrain.

Light, nimble variable-torque 4MATIC can send power from front wheels to rear based on each tire's real-time grip. A suite of engineering features heightens off-road capability.

INNOVATION

People are talking. The Mercedes-Benz User Experience (MBUX) is truly user-friendly tech. Its natural, intuitive speech interface is easy to learn because it can learn you.

Say what you want, your way.

Along with its own intelligent voice assistant, wireless Apple CarPlay and Android Auto are standard, too. Wireless charging is available as well.

Keep your world, and car, close.

Mercedes-Benz Digital Extras help make ownership easy, with an acclaimed app for Apple iPhone, Apple Watch and Android-based phones that includes Remote Start and countless other benefits. You can also add Online Music Streaming, or in-car WiFi for a low monthly rate.

Tell it, tap it, watch it, and go.

Say 'Hey, Mercedes, I'm cold' or 'I need a coffee,' and MBUX can control many cabin features, including the available MB Navigation. It even gets smarter the more you use it. Multiple touch interfaces also let you take charge silently.

Smoother moves, safer exits.

Standard Blind Spot Assist includes a feature to help make exiting the car safer for all your passengers. Available DISTRONIC adaptive cruise can stop-and-go in traffic, and even slow for an offramp.
