Fire Safety Apprenticeships Qualifications Training

Enhancing Competency of
Fire Safety Professionals

www.xact.org.uk

01386 277980

Who Are We?

Xact Consultancy and Training offers nationally recognised fire safety qualifications, apprenticeships, and specialised training in the UK. Our programmes enhance skills, build competency, and provide delegates with knowledge for effective decision-making in fire safety. With industry-recognised qualifications and experienced tutors, Xact is dedicated to delivering high-quality, competency-based training that fosters success and confidence.

Enhance your knowledge with our expert tutors.

Our tutors are all experts in their fields, with years of experience which they draw upon to contextualise knowledge and deepen understanding within the course environment.

They have all come from a wide range of fire safety backgrounds, including fire service and ex-military. This expanse of knowledge allows us to ensure that each course is taught by an individual who has first-hand experience and knowledge to draw upon.

When asked to rate the quality of our tutors, the majority of delegates rated them 5/5 and highlighted the tutor as one of the most valuable things about their course.

"The tutors were very knowledgeable and adapted well to the different levels of competency across the people in the class. I enjoy the tutor lead discussions and the ability to stop and ask questions."

-Delegate Feedback, Auditing Complex Premises

"I thought the information provided by the tutors was brilliant including their knowledge on how to navigate the British Standard to obtain the relevant information which is required to determine building requirements."

-Delegate Feedback, Auditing Complex Premises

"The tutors knowledge and experience was so valuable and helped work through the 'grey' areas. He could read the room well and gauge candidates very quickly"

-Delegate Feedback, Principles of Fire Safety

Support and Delivery

Find the right learning environment for you.

We offer courses in both a traditional face-to-face learning environment and online through our Interactive Virtual Classroom (iVC).

Our virtual training allows participants to learn from any location without compromising the quality of an in-person course. Conducted live by our team of expert tutors, participants engage in interactive activities, utilise breakout rooms for discussions, and benefit from responsive tutor interaction that caters to individual needs.

The Xact Learning Environment, more commonly known as the XLE is an online platform that supports the delivery for all of Xact's qualifications, courses and apprenticeships.

24/7 access to course materials, standards and guidance notes.

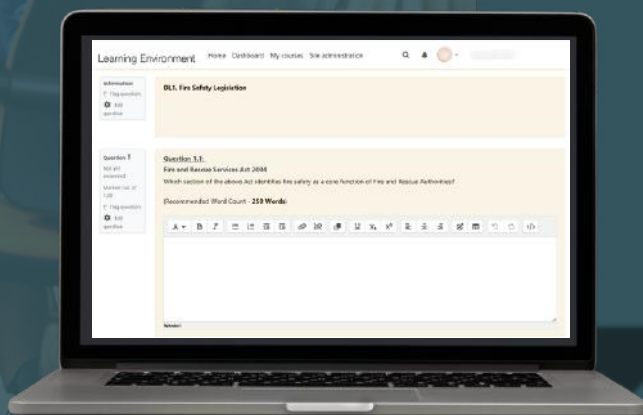

Easily manage active deadlines with integrated calendar.

Accessibility features to support learners, including fully customisable interface with different fonts, colours and sizing.

Online assessments and submissions.

Video guides available to support users.

Access grades and feedback for your assessments.

Organisational Courses

We offer private delivery of qualifications, apprenticeships and specialist training courses for organisations, with more than 10 individuals requiring training. Organisational courses can be conducted virtually, or in-person at your facility (if appropriate).

By booking courses exclusively for your organisation, you can ensure consistent training across all staff members and organise training at a time that suits your organisation. As well as this, we offer a reduced rate for organisational course delivery.

Consistency

Everyone hears the same message, learns the same methods, and applies the same standards.

Teamwork

Shared learning builds trust, alignment, and smoother collaboration.

Cost Efficiency

Rates for organisational cohorts are more cost-effective.

Scan to contact
our delivery team.

CPD Sessions

The Fire Safety industry has become a fast moving environment, particularly with the drive towards the importance of competency for all fire safety professionals.

We provide bespoke CPD for organisations, curated in collaboration with you to provide reliable and relevant CPD sessions that meet the needs of your staff members. Bespoke CPD Sessions can be delivered online via our Interactive Virtual Classroom, led by one of our expert tutoring team.

If you have a requirement for specialist fire safety CPD Sessions for your employees, we may be able to help! Contact us at cpd@xact.org.uk to enquire.

FIRE SAFETY QUALIFICATIONS

Level 2

Award in Fire Door Inspection

Certificate in Fire Risk Assessment

Certificate in Fire Safety

Level 4

Certificate in Fire Risk Assessment

Certificate in Fire Safety

Diploma in Fire Safety

Level 5

Diploma in Fire Engineering Design

LEVEL 2 Award Fire Safety Principles

Qualification Overview

This qualification is aimed at individuals who intend to have responsibility for fire safety in the workplace. It provides learners with formal recognition of their knowledge and understanding of fire safety. It is applicable to a variety of working environments.

It is suitable for Fire Marshal roles, Managers, Supervisors and Team Leaders.

Core Topic Areas

Hazards and risks associated with fire in the workplace.

How the fire risk is controlled.

Principles and practice of fire safety management.

The content of a fire safety briefing.

LEVEL 2 Award Fire Safety Checks

Qualification Overview

The objective of this qualification is to provide the knowledge and skills to a range of individuals who have responsibility for undertaking fire safety checks.

The aim of a Fire Safety Check is to minimise risk in residential and/or workplaces. Premises subject to fire safety checks covered by this qualification exclude single private dwellings, which are covered by Home Fire Safety Visits.

Core Topic Areas

- Fire safety legislation.
- Organisational policies.
- Roles and responsibilities.
- Principles of Fire Risk Assessment.
- Principles of means of escape, fire detection and emergency lighting systems.
- Causes and effects of fire.
- Human behaviour in fire.
- Planning and conducting fire safety checks.
- Reporting outcomes of fire safety checks.

LEVEL 3 Certificate Fire Risk Assessment

Qualification Overview

This qualification aims to equip learners with the knowledge and practical skills to identify fire hazards, evaluate risks and implement effective control measures in line with current legislation and best practice at a foundation level. The qualification was designed in response to the publication of BS 8674 - Built Environment: Framework for Competence of Individual Fire Risk Assessors - Code of Conduct.

Core Topic Areas

- Roles and responsibilities of a fire risk assessor.
- Understand fire development & spread.
- Fire prevention principles.
- Human behaviour in fire.
- Understand fire protections.
- Means of Escape.
- Management Systems.

5 Weeks Completion

LEVEL 4 Certificate/Diploma Fire Risk Assessment

Qualification Overview

The Skills for Justice Awards Level 4 Certificate & Diploma in Fire Risk Assessment aims to support learners in developing the knowledge, skills and understanding required to undertake fire risk assessment activity at an intermediate level, in line with BS 8674:2025.

Achievement of this qualification supports progression towards demonstrating competence through supervised practice, workplace experience and ongoing professional development.

Core Topic Areas

- Fire safety requirements in buildings for intermediate-level fire risk assessors
- Coaching, mentoring and personal development for fire risk assessors
- Legal Framework and Fire Risk Assessment methodology
- Fire protection systems
- Building risks and hazard identification
- Fire Risk Assessment evaluation and risk improvement
- Full Fire Risk Assessment application

LEVEL 3 Award Fire Door Inspection

Qualification Overview

This qualification is aimed at those who intend to carry out fire door inspections as 'competent persons'. The purpose of the Level 3 Award in Fire Door Inspection qualification is to allow learners to demonstrate that they are capable of carrying out fire door inspections and have the under-pinning knowledge needed, at the required depth to confirm occupational competence.

Core Topic Areas

- Understand what is meant by a 'Fire Door'.
- Understand regulations and standards for fire doors.
- Prepare to undertake a fire door inspection.
- Carry out a fire door inspection.

LEVEL 3 Certificate Fire Safety

Qualification Overview

This qualification is aimed at those who are new to working in a fire safety role and wish to expand their knowledge and gain recognition of their competence to work as a regulatory fire safety auditor for simple premises. It aims to enable learners to identify and report hazards and assess risks associated with fire in simple buildings.

It applies to those who audit simple buildings such as shops, offices, hotels, residential care homes, industrial units and blocks of flats.

Progression

Once completed, this qualification enables learners to progress to the Level 4 Certificate or Diploma in Fire safety.

LEVEL 3 Fire Safety Advisor Apprenticeship

13 months training

+ 3 Months for EPA

Funding Available

Maximum £6,000 per Apprentice

Structure

Training Modules

- Introduction to the role.
- Principles of fire safety.
- Auditing simple buildings.
- Planning & gathering evidence.
- Personal Professional Development.

Assessment Periods

Support & Mentoring

Meetings hosted with Xact Apprenticeship Mentors every 6-12 weeks.

End Point Assessment

EPA is the final stage of an apprenticeship in which the apprentice completes a variety of assessments.

- Practical Assessment.
- Professional Discussion on Portfolio of Evidence.

The Role

A Fire Safety Advisor works to audit fire safety in simple buildings and premises. Helping keep people, premises and the environment safe from fire by offering advice and education to reduce risk.

Qualifications

Completion of the Apprenticeship Programme also awards the individual with the SFJ Awards Level 3 Certificate Fire Safety.

Where It Applies

This apprenticeship can be utilised in a variety of sectors, such as Fire & Rescue Service, Private Fire Safety Businesses, Local Authorities, NHS Trusts, Housing Associations and Education.

APPRENTICESHIP

LEVEL 4 Fire Safety Inspector Apprenticeship

The Role

The Fire Safety Inspector is a specialist protection role. Aiming to assess, support, advise and enforce fire safety measures in simple and complex premises.

Qualifications

Completion of the Apprenticeship Programme also awards the individual with the SFJ Awards Level 4 Diploma in Fire Safety.

Structure

For individuals who have obtained the Level 3 Certificate in Fire Safety, the total training duration is reduced.

Where it Applies

This apprenticeship can be utilised in a variety of sectors, such as Fire & Rescue Service, Private Fire Safety Businesses, Local Authorities, NHS Trusts, Housing Associations and Education.

It should be noted, you do not have to be an enforcement body to undertake this Apprenticeship.

21 months training

+ 6 Months for EPA

Funding Available

Maximum £11,000 per Apprentice

Structure

Training Modules

- Introduction to the role.
- Principles of fire safety.
- Principles of means of escape.
- Auditing complex buildings.
- Regulated and licensed buildings.
- Building regulations and technical guidance.
- Fire safety order enforcement.
- Serving a notice.
- Drafting a notice.
- Professional development

Assessment Periods

Support & Mentoring

Meetings hosted with Xact Apprenticeship Mentors every 6-12 weeks.

End Point Assessment

EPA is the final stage of an apprenticeship in which the apprentice completes a variety of assessments.

- Knowledge Test.
- Practical Assessment.
- Professional Discussion on
- Portfolio of Evidence.

Fire Safety Apprenticeships

Employer Information

We are a growing apprenticeship training provider, and now proudly support over 100 fire safety apprentices across England. Offering a blend of quality training, flexibility, cost-efficiency and comprehensive support. Whether you're looking to upskill or retrain, our programs are tailored to help individuals become competent fire safety professionals.

At Xact, we are committed to your success. From the initial recruitment phase to the End Point Assessment, we provide unwavering support and ensure you receive top-quality service every step of the way. Future-proof your workforce with Xact Apprenticeships.

Access to Funding

For businesses that have a wage bill of more than £ 3 million per year, the UK government initiated an Apprenticeship Levy in 2017. This required those employers to pay 0.5% of their annual pay bill as a tax levy. This levy can then be reinvested into the workforce, funding apprenticeships for people who are new to the business or those who wish to continue their learning.

For those businesses who do not have such a significant wage bill, there are still opportunities to access government support. Business pays just 5% towards the cost of training and assessing an apprentice, with the government contributing the remaining 95%.

The Apprentice Benefit

Funded Route to Enhancing Skills

Funding helps organisations recruit, upskill, and optimise their workforce at a lower cost than traditional qualification methods.

Collaborative Training Approach

A successful apprenticeship relies on employer input, where training providers impart knowledge and employers support apprentices in applying that knowledge. This collaboration helps develop skills, instil behaviours, and shape competencies to meet organisational needs.

Xact will provide a specialist fire safety professional mentor to support the employer and apprentice throughout the programme.

Future Proof Your Workforce

Taking on apprentices secures the future of the fire safety sector by lowering entry barriers, encouraging youth participation, and developing competent team members to support the next generation.

Recruit, Retain, Retrain

Apprenticeships aid recruitment and retention for businesses and the industry, benefiting school leavers, those seeking to upskill, and individuals entering the workforce later in life.

The Xact Apprenticeship team can provide advice and support around recruitment and retention of your workforce. As well as signpost additional funding that may be available.

Next Steps?

They are ready to answer all your questions and help you get started!

LEVEL 5 Diploma Fire Engineering Design

Qualification Overview

This qualification is for individuals who are involved in auditing or risk assessing fire engineering in buildings. As well as designing or assessing fire engineering design submissions.

It aims to provide individuals with a practical understanding of fundamental engineering principles, enabling them to identify proven techniques and procedures to solve practical fire engineering problems and, when appropriate, to hand over to a fire engineer.

Modules build on previous experience in applying fire safety guidance such as Approved Document B and BS 9999 fire safety in the design, management and use of buildings.
