HAPPEN**

PRODUCTION

Whitehill's highly automated production machines, guarantees precision, accuracy and repeatability. The use of the highest quality raw materials results in long tool life and significant cost reductions. Whitehill places special emphasis on innovation and continuous improvement. Our production relies on robotically controlled machines which can run 24 hours a day producing our precision tooling. Our engineers can create a complex 3D model of every component part of the toolset, create a virtual assembly on the sleeve to show all the knives and inserts relationships, along with access clearance for knife changing and positioning. They are happy to assist and offer technical advice for all your requirements - giving assurance of the latest and most efficient solutions.

We are proud of our commitment to quality and service and welcome all customers to visit our Luton factory. Discover how Whitehill can make a real contribution to your business success.

PRODUCTS

There is a constant increase to the extensive range of standard cutting tools in combination with our customer specific special products. This 2019 catalogue shows our new design window and door tooling sets, which can fit spindle moulders, tenoners and CNC routers. All can be manufactured to fit your machine and unique needs. Our standard product range include: Finger Joint Systems, Spindle Moulder Tooling, Tenoner Tooling, Door and Window Tools Sets, Disposable Tipped Heads, CNC Tooling, Profile Mould and Scribe Cutters, Bespoke Tools.

QUALITY CONTROL

Before any product leaves our Luton factory, it undergoes a rigorous testing regime to ensure that you receive a perfect product, tested to the highest standards. All Whitehill products ensure optimum tool life, break resistance and best cutting results. Our efficient production planning and processing, ensures we can guarantee speed of delivery and customer satisfaction.

3	Mould for 55mm high heads 90 x 55 Limiter Head 125 x 55 Multico Top  No. 1006 Cutter: 003H01006 £32.00 Limiter: 004H01006 £25.00	400 Series For 55mm high heads 175 x 55 Bottom Sedgwick 175 x 55 Top Sedgwick 175 x 55 Bottom Wadkin/Dominion 125 x 55 Top Multico  No. 416 Cutter: 003H00416 £36.00 Limiter: 004H00416 £24.00	300 Series For 55mm high heads 175 x 55 Top Sedgwick 175 x 55 Bottom Wadkin/Dominion 125 x 55 Bottom Multico  No. 316 Cutter: 003H00316 £36.00 Limiter: 004H00316 £24.00	200 Series For 50mm high 147 x 30 Sedgwick 3" Head 125 dia to 300 dia Tenon Discs (Anti Clock) on spindle moulder  No. 216 Cutter: 003H00216 £30.00 Limiter: 004H00216 £22.00	2200 Series For 30mm high 125 dia to 300 dia Tenon Discs (Clock)  No. 2216 Cutter: 003H02216 £30.00 Limiter: 004H02216 £22.00	500 Series For 65mm high heads 125 x 65 Sedgwick 3" Head 125 x 65 Multico Top  No. 516 Cutter: 003H00516 £38.00 Limiter: 004H00516 £25.00	6500 Series For 65mm high heads 175 x 65 Sedgwick Bottom Head  No. 6516 Cutter: 003H06516 £38.00 Limiter: 004H06516 £25.00	5500 Series For 65mm high 175 x 65 Sedgwick Top Head 125 x 65 Multico Bottom  No. 5516 Cutter: 003H05516 £38.00 Limiter: 004H05516 £25.00

How to use and get the correct matches for your spindle moulder and tenoner:

Step 1: Select Mould cutters you like (from blue section - Column 1)
e.g. I like pattern 1006 (Column 1 Row 3)

Step 2: Know your Tenoner - what Tenoner do I have:
Sedgwick? Wadkin? Dominion? Multico?

ANSWER: I have a Wadkin with 175x55 Head.

Step 3: See Column 2 & 3

Step 4: I am scribing on Bottom Head

ANSWER: See Column 3 Row 3 - Scribe No: 316 (003H000316) - exact match mould 1006 and scribe 316.

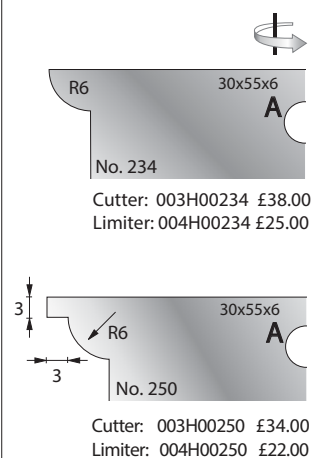

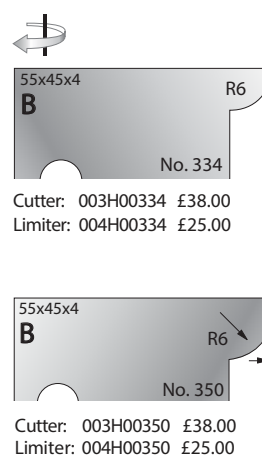

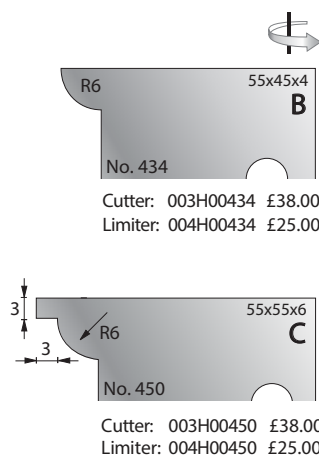

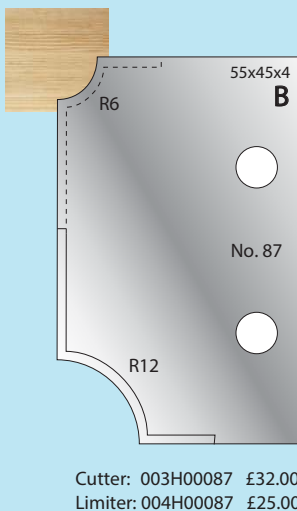

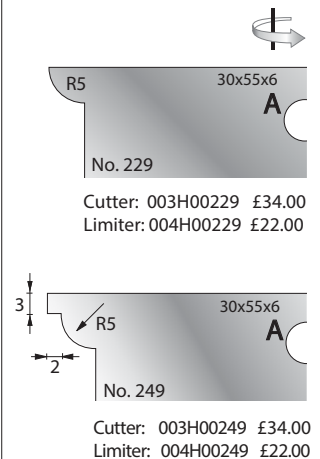

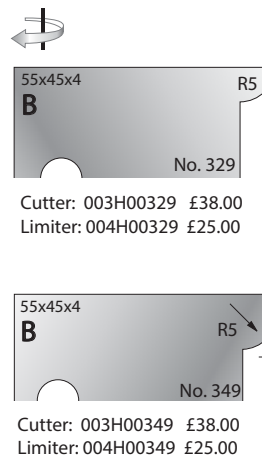

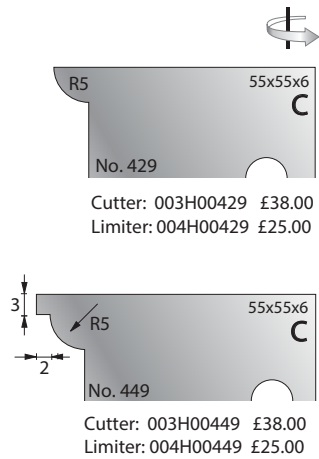

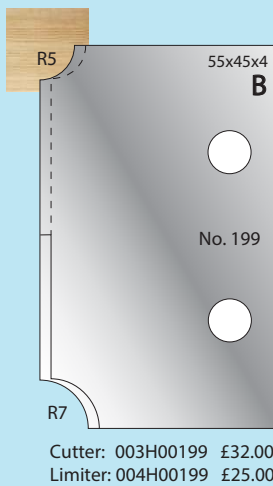

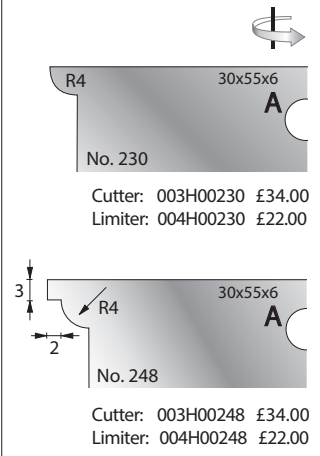

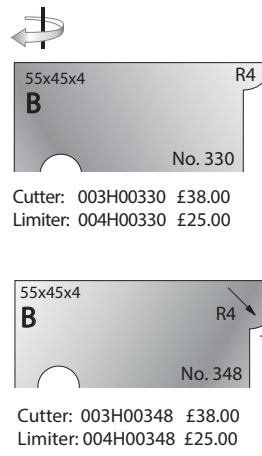

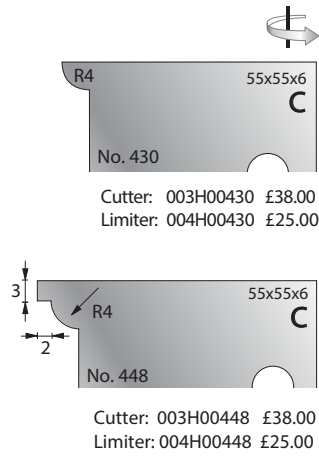

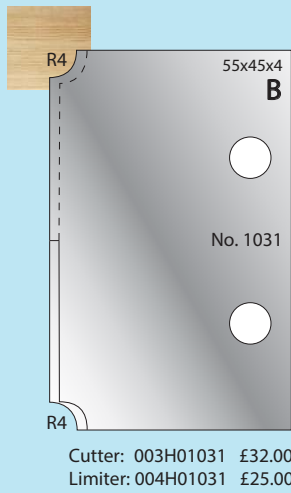

**Mould
for 55mm high heads**
96 x 55 Limiter Head
125 x 55 Limiter Head

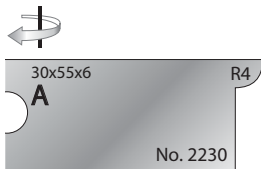

**400 Series
for 55mm high heads**

21 SEAL TC HEADS 142(129) Dia x 12mm

TC tipped 21 tool is design to cut a slot groove to fit 21 seal into rebate of door or window frame. Specific tool diameter allows this tool to run in conjunction with 125 dia rebate head to cut rebate and groove in one pass. 2.7mm Grooving slots are machined on both sides of the tool so it can be mounted both on top and underneath the rebate head. Cutterhead fitted with TC reversible main blades, 2.7 grooving tips and 14mm spurs on top and on the bottom. Tool body in steel.

WEATHER PILE GROOVERS

163(150) x 7.5mm Centre and Offset Leg

TC tipped weather seal tool is designed to cut a slot groove to fit two different types of seal into rebate of a door or window frame. Grooving slots are machined to fit both 2.7mm and 3mm tips. Tool is also machined with both centre and offset setting. The cutter head is fitted with TC reversible main blades, 2.7 or 3mm grooving tips and 14mm spurs both on top and bottom. Tool body in steel.

TCT LOCKMITRE HEADS 140 x 45 Z2 disposable TC Blades

TC head for lock mitre glue joints. It will produce both cuts - one edge needs to be cut face down (horizontal) and the other needs to be cut on edge (vertical). There is no re-set-up on spindle moulder for these two cuts. Tool body in steel, equipped with two TC profile knives and stop screw for easy setting.

VARI ANGLE HEADS 40, 50 and 60mm

Cutter head design for chamfering in various angles. Digital protractor supplied with tooling for precise (0.1 deg) setting. Available in three different sizes - 40, 50 and 60mm. Fitted with standard TC reversible blades. Swivel jaw adjustable on both sides from -45 to 45 deg in 40mm block and -90 to 90 deg in 50 and 60mm block. Tool body in steel, suitable for spindle moulders with manual feed.

Made in UK

ADJUSTABLE TURN BLADE GROOVERS

Adjustable turn blade groovers are mainly designed for applying various size grooves. Suitable for MDF, hard-textured and solid timber. 2 or 3 piece tool body in steel or light alloy, equipped with TC reversible knives and TC spurs. Adjustable through spacing collars (supplied). Accurate groove width due to spur on top and bottom. Suitable for spindle moulders with manual feed.

TENON DISCS 30mm Tenon Disc

Limiter cutter head designed to cut tenon profiles. Can be used independently or in conjunction with another tenon disc (with a spacer between) for tenon thickness. Ideal for cutting square or profiled scribe. Compatible with A blanks 30 x 55 x 6mm thick. Profiled knives and chip limiters must always be used in pairs. Block suitable for spindle moulders with manual feed. Tool body in light aluminium.

PLEASE NOTE: For max cutting circle add 50mm cutter projection to disc diameter (ie. 125mm dia tenon disc = 175 dia overall max cutting circle)

CNC TC NOSING HEADS

18 - 32mm Z2 Disposable TCT Head Mounted on HSK Holder

TCT Nosing head design for rounding all kinds of wood. Fitted with TCT profiled radius tips with 5 deg run off on each side. Head also fitted with end stop screws for easy blade replacement. Cutter head available mounted on HSK Holder or on its own. Other tooling can be also modified to fit CNC - please call with requirements.

Available for 18, 23, 26, 28, 30 and 32mm Material

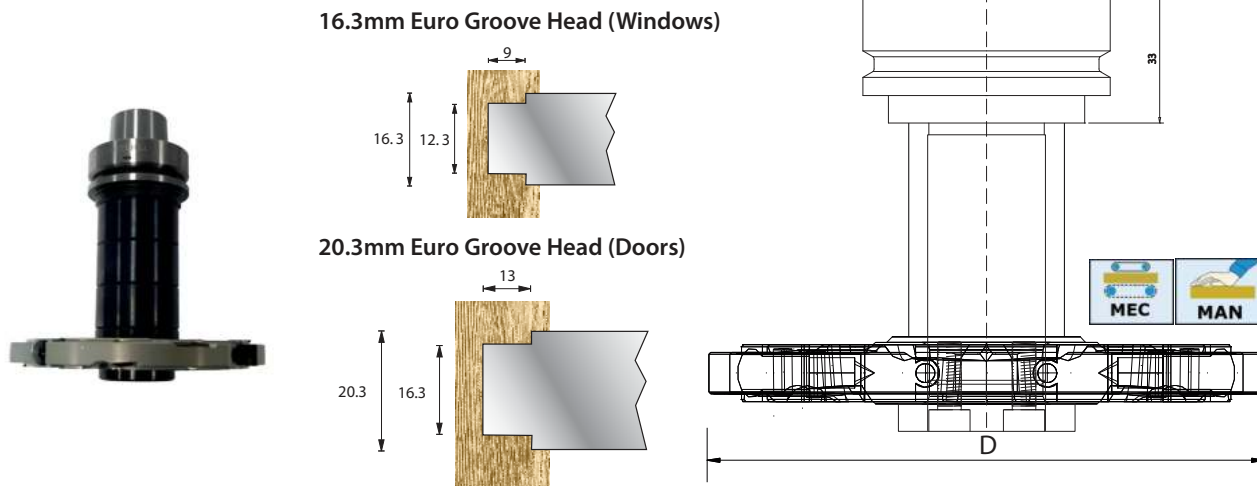

Please call for details and prices.
(for TC Heads only - please see page 95)

Made in UK

CNC DOOR & WINDOW TC EURO GROOVE HEADS Mounted on HSK Holder

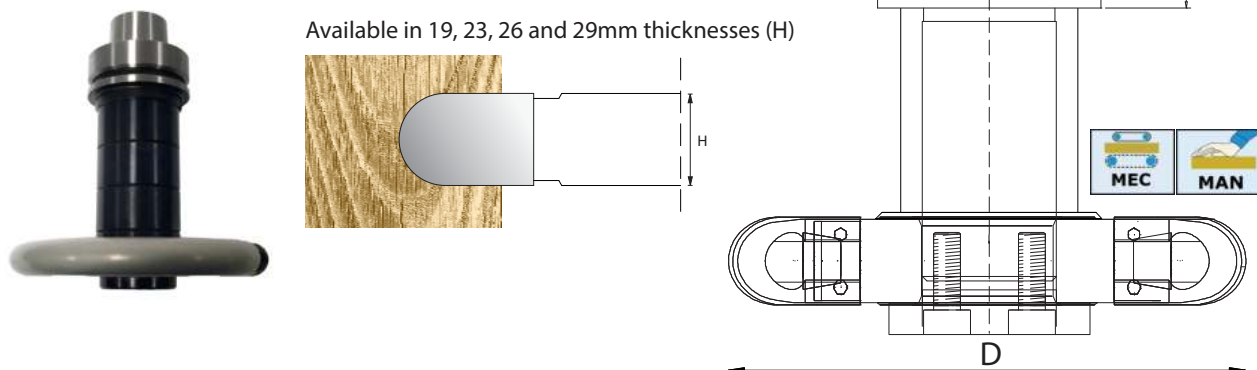

Euro groove heads are suitable for producing a stepped groove in wooden doors and windows for accommodating recessed hardware. Tool fitted with standard 11 and 15mm TC reversible tips (overlapped, to keep running cost down) and TCT spurs on both sides. Tool body in light alloy. Available in two diameters 125 and 150mm. Cutter heads available mounted on HSK Holder or on its own. Other tooling can be also modified to fit CNC - please call with requirements.

Please call for details and prices.
(for TC Heads only - please see page 83)

CNC CONVEX RADIUS TC HEADS 150 Dia Mounted on HSK Holder

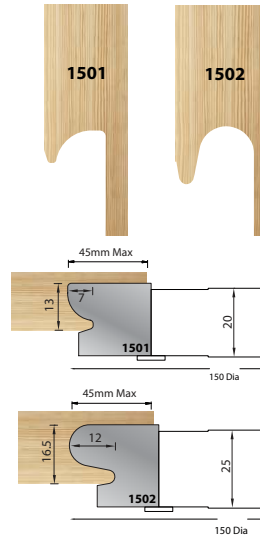

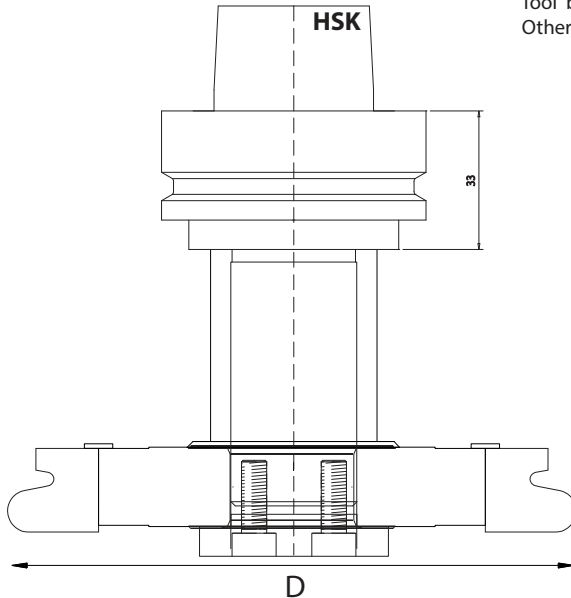

TC tipped convex radius TC head ideal for cutting string grooves in sliding sash windows. Suitable for spindle moulders with manual feed. Tool body in light alloy. Available in 19, 23, 26 and 29mm thicknesses. Cutter heads available mounted on HSK Holder or on its own. Other tooling can be also modified to fit CNC - please call with requirements.

Please call for details and prices.
(for TC Heads only - please see page 97)

CNC TC DRAW PULL HEADS 150 DIA Mounted on HSK Holder

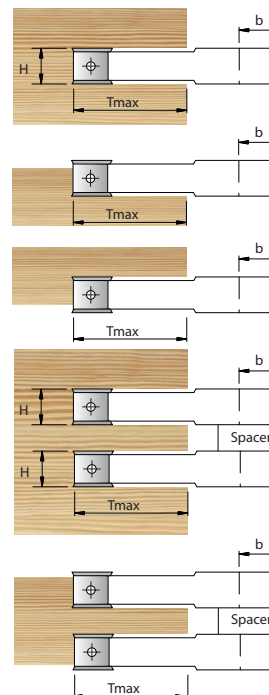

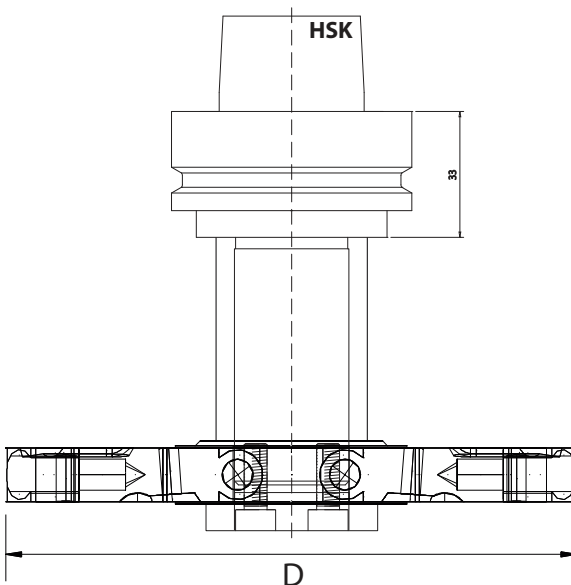

TCT draw pull cutter head design for cutting draw pulls on the edge of door profiles. Profile creates just enough room for fingers to catch hold of the draw/door. Ideal for furniture with no visible hardware. Available in two different shapes for thin and thicker doors. Fitted with two TC replacement blades and end stop screws for easy blade setting. Tool body in light alloy. Cutter heads available mounted on HSK Holder or on its own. Other tooling can be also modified to fit CNC - please call with requirements.

Please call for details and prices.
(for TC Heads only - please see page 96)

CNC TURN BLADE GROOVERS Mounted on HSK Holders

Turn blade groovers are designed for applying fixed size grooves. Suitable for MDF, hard-textured and solid timber. Tool body in steel or light alloy, equipped with TC reversible knives and spurs. Accurate groove width due to spur on top and bottom. Cutter heads available mounted on HSK Holder or on its own. Other tooling can be also modified to fit CNC - please call with requirements.

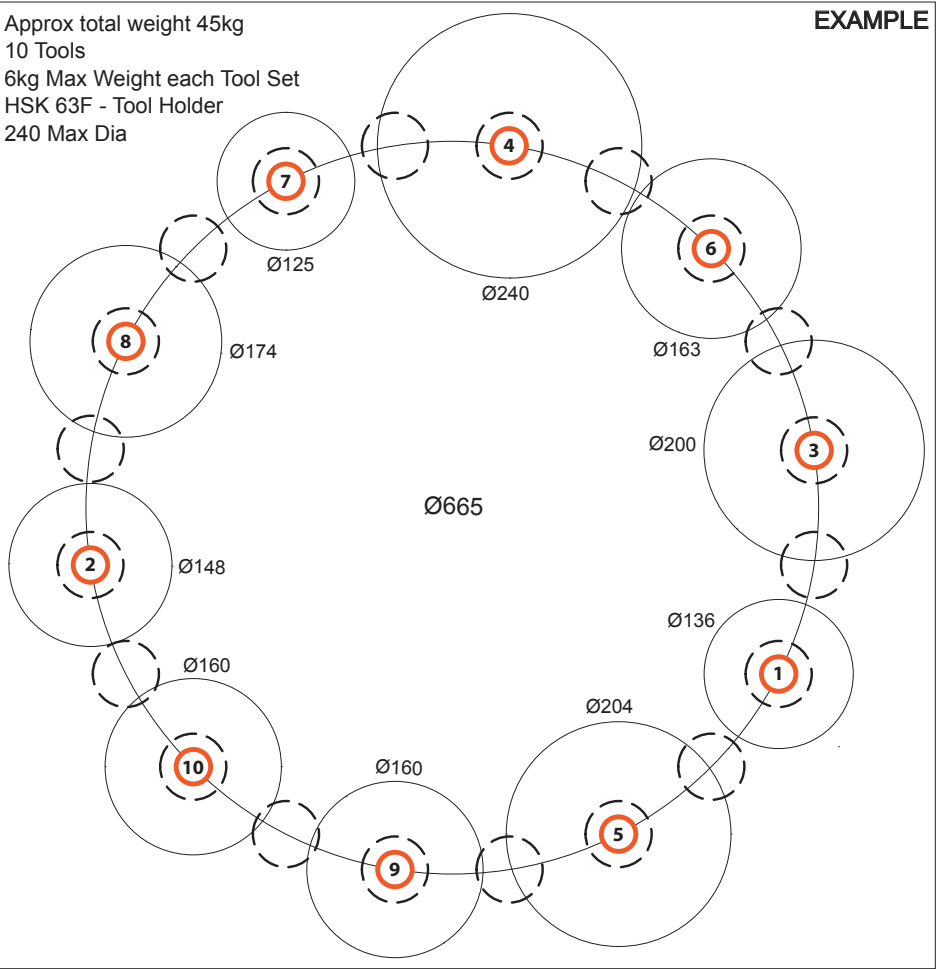

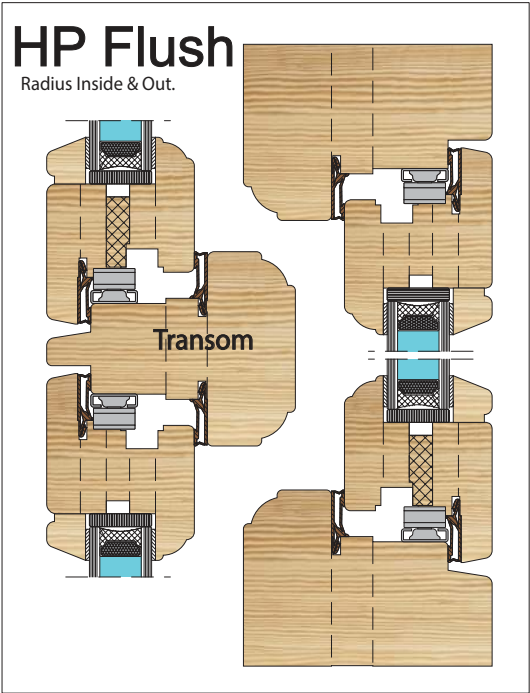

Please call for details and prices.
(for TB Groovers only - please see page 100 - 101)

TC MULTI BEAD (STICK ON BARS) HEADS FOR MECH MOULDER

Produce Stick on Bars, four at a time and Glazing Beads with Tungsten Carbide interchangeable blades. Choose either square or radius corners on beads in the same cutterhead, completely interchangeable. Tool body in steel with 40mm Bore design for Top shaft on Mech Moulder.

These profiles match our window tooling systems. See page 25 for stick on bars cutters no. 1091 & 1092, and bead profiles no.1267 & 1268.

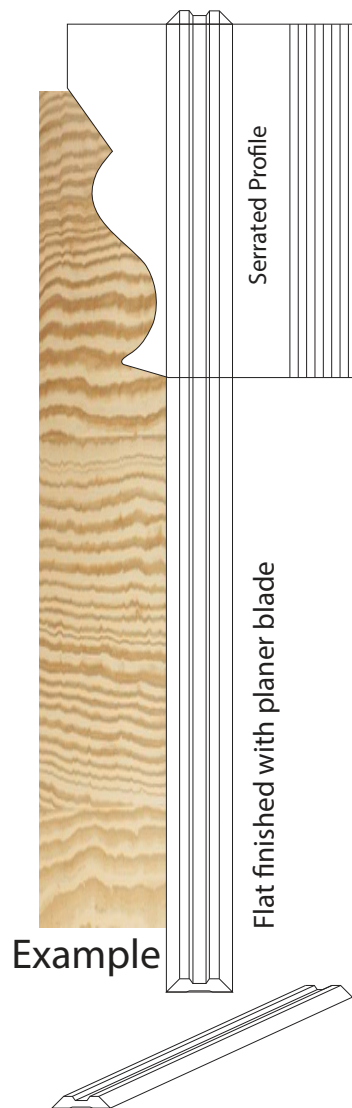

For pricing and availability - please call 01582 736881

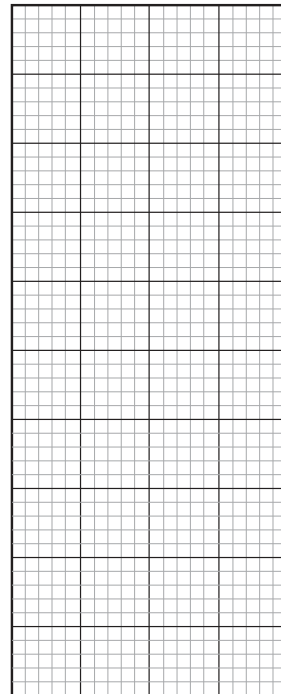

PLANER / SERRATED MOULD HEAD

Combination planer and serrated profile cutter head for 40mm shaft on moulder with mechanical feed. Block design to take 8mm thick serrated profile knife for mould section and centre lock planing blades for flat section - 230 long. Head can be fitted with 40, 60, 80, 100 or 130 mm Serrated profiles. Same size serrated jaw assembly must be used as the size of profile serrated mould. Price include cutter head fitted with planing section and one pair of serrated jaws only (please specify size of jaws/profiles). Other sizes can be purchased separately. Tool body made in steel.

FRENCH DOOR MULTIPOINT PROFILE HEADS

French Doors feature two panels consisting of glass panes throughout its length surrounded by narrow stiles. Whitehill SOLO and KLONE TC Heads for single or double handle option will cut Master and Slave with one tool. Head equipped with TC profile blades, scribing spurs and grooving tips for seals. Suitable for spindle moulders. Tool body in light aluminium.

Whitehill

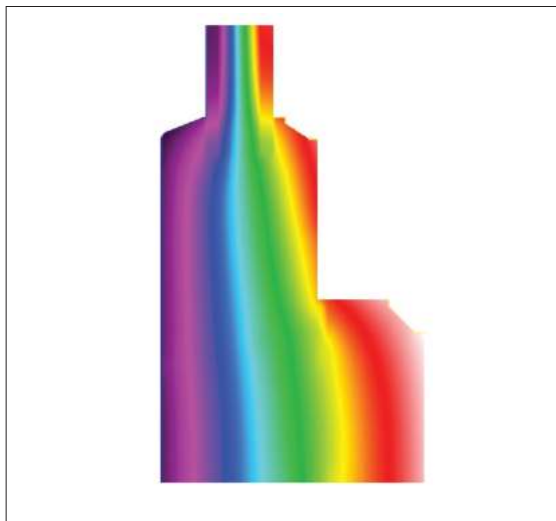

Performance Window Systems

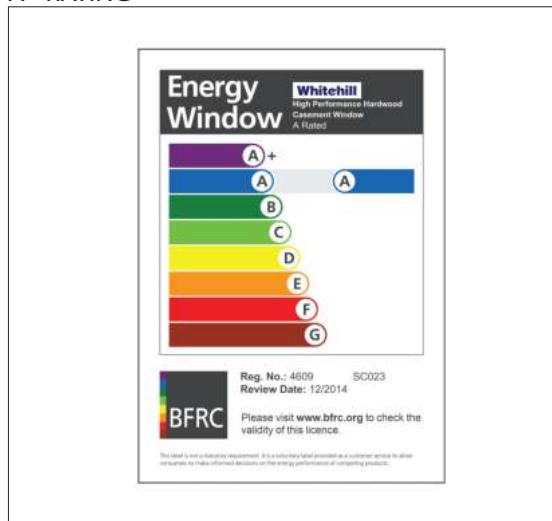

Made in UK

U-VALUE CERTIFICATE

U-Values measure how well heat is transferred by the entire window/door frame, sash and glass - either into or out of the building. The lower the U-Value number, the better the window or door will keep heat inside a building on a cold day. Whitehill Window Systems have achieved a U-Value as low as 1.2 in thermal simulations (accredited through British Woodworking Federation), and the documentation and graphics are included with every complete window system sold. This means that businesses investing in Whitehill tooling solutions have all the information necessary to satisfy architects etc. This Certificate is a valuable marketing tool to attract new business.

A - RATING

The HP Flush window is an A-rated energy efficient window system, guaranteeing high levels of thermal efficiency and performance. BFRC energy licences can be obtained by any Joinery business using the Whitehill HP window system tooling; a small annual fee is payable to the BFRC - British Fenestration Rating Council – to join the scheme, and they will send you the artwork and put your company on the BFRC website. The energy rating licence scheme is an invaluable marketing tool for all joinery manufacturers.

PART-Q

From October 2015 all doors and windows installed in new buildings or change of use projects, must comply with Approved Document Q. This requires that the design has been tested to meet the security requirements of PAS 24:2012. Our HP Flush window, Conservation window and Traditional door have passed PAS 24 by upgrading to security improved hardware. Full details are available, with full certificate to Whitehill customers manufacturing this window system.

TIME SAVER - ZERO SETTING - SLEEVE MOUNTED

Whitehill Performance Systems saves on the time it takes to produce any size window. Ideal tooling for those producing either single or high volumes of windows. Just some of the benefits:

- Individual sections on every stack assembled on sleeves for quick change
- All stacks have 'pre-set' height, no need to adjust your machinery
- Individual tools with cut-way sections, to enable fast and easy replacement of tips, without removing from the stack
- Saving time on set-up and tool changing enhances speed of manufacture and saves money

Tooling can also be mounted on HSK Holders or supplied individually to suit your requirements and designs.

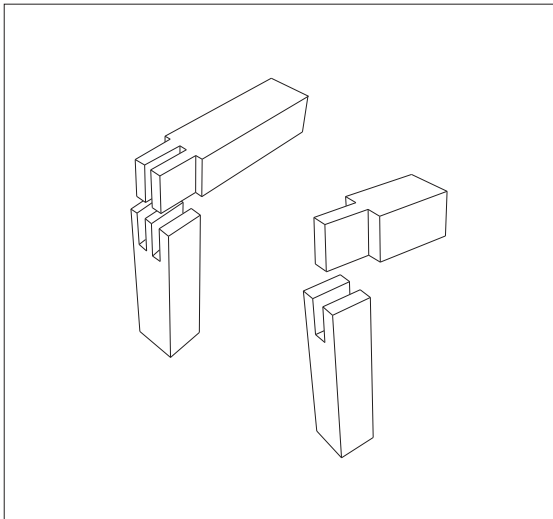

MULTI MACHINE - FLEXIBILITY

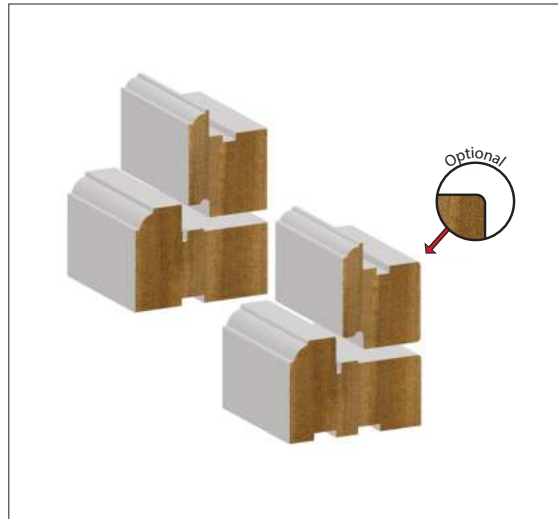

All Whitehill Window sets are bespoke when it comes to machine requirements. We all know that there are hundreds of different spindles, tenoners and other machines available. Whitehill can manufacture all systems to be compatible with your own machinery. Our Tools can be redesigned with all bore sizes, rotations and cutting circles. Your machine - our window system.

MULTITYPES

Our four standard Window designs are Traditional, HP Flush, Storm-proof and IPA Systems. As you can see in this brochure we can also manufacture tooling for other systems like Sliding Sash, Tilt & Turn or 68mm Sash. Open-in and open-out doors can be also simply manufactured using our stack tools (and an additional few tools). Large database of drawing designs help us to manufacture bespoke systems and develop even further our existing tooling. Simply provide details regarding your own project and let us find the best suitable tooling solution.

SINGLE TENON AND COMB JOINT

Joinery is a part of woodworking that involves joining together pieces of wood, to produce more complex items. Some wood joints employ fasteners, bindings, or adhesives, while others use only wood elements. The characteristics of wooden joints - strength, flexibility, toughness, appearance etc. With Whitehill Window system you can choose between joining frame with single tenon or comb joint (finger joint). Sashes on the other side are only designed with comb joint which is stronger than a butt joint, and often contributes to the aesthetics of the piece.

RADIUS OR STRAIGHT OPTION

All Whitehill Performance Systems are manufacture to be fitted with either radius corner or straight finish blades. The option is yours. Each tool is designed to take whichever finish you require. If you choose radius finish and later require straight - simply change the blades, not the whole tool. Completely versatile.

ACCESSORIES

Bearing Guide

For working on a template or directly on the work pieces with the ring. Body in steel with bearing glued inside (not removable) fixed diameters of 100mm and 125mm but other diameters can be manufactured to order.

Code	D(mm)	H(mm)	b	Material	Price (exl. Vat) £
280S00010	100	15	30mm	Steel	70.00
280S00020	100	15	1 1/4"	Steel	102.00
280S00030	125	15	30mm	Steel	70.00
280S00040	125	15	1 1/4"	Steel	102.00

Mag Base Micrometer

Dial indicator gauge complete with magnetic base stand. Adjustable articulated arm for flexible setting. Measures between 0 - 10mm in 0.01mm precise graduation. A must have tool for precise alignment of profile cutters mounted in cutter head.

Code	Price (exl. Vat) £
330S00010	70.00

Digital Protractor

Digital angle gauge - has a wide range of applications for measuring and setting angles. Displaying the measurement on an easy to read LCD display to a resolution of 0.1 degrees. Easy to calibrate - any reference surface, by placing the unit onto the surface and pressing the zero button. The units LCD display will read zero degrees and is ready to measure any relative angle. Digital Angle Gauge with a magnetic base to attach to machine tables etc. Simple to calibrate to any reference surface with the zero button. This unit has a number of possible applications such as the following; mitre saws, table saws, planner fence, band saw fence, tilting angle plates, angle table, swivel / tilt vice etc.

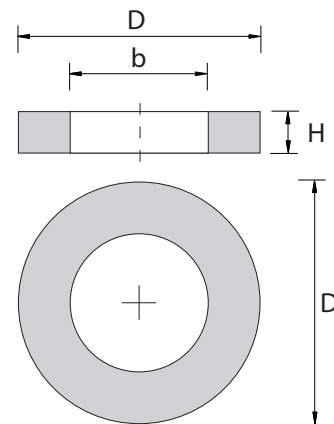

Code	Price (exl. Vat) £
330S00100	30.00

SPACERS

High quality steel spacer rings with 30mm, 1 1/4" and 40mm Bore. Provide fast and accurate adjustment.

Fits
Panel Heads 190 dia

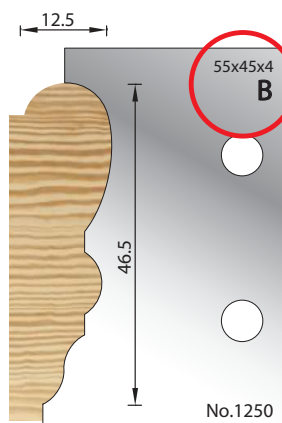

General Profile Cutters

IF YOU SEND A SCAN OR FAX, these are very often **NOT TO SCALE** when printed - please put all dimensions on before sending.

ROTATIONS! It is helpful to know if you have drawn, from Infeed View, or Outfeed.

WHAT CUTTERHEADS DO YOU HAVE – please let us know, we don't want to manufacture for the incorrect tool holder.

Blank Size

- A1** - fits 96 diameter x 30mm wide
- B** - fits 96 dia x 55mm wide, 125 dia x 55mm, 125 x 55 Combi
- C** - 125 dia x 55, 125 x 55 Combi
- D** - fits 125 dia x 80 and 125 dia x 100 wide
- E** - fits 125 dia x 80 and 125 dia x 100 wide
- F** - fits 96 dia x 100mm wide
- G** - fits 125 x 65mm wide

CANNOT FIND THE CUTTER YOU ARE LOOKING FOR ? – THEN LET US HAVE YOUR REQUIREMENTS HELP US TO HELP YOU!

It is important that we produce exactly what you need. These are a few notes to help.

You can send us either:

- Sketch
- Wood sample
- CAD drawing

Via:

- E-mail
- Post
- Fax

You must:

- Put dimensions on any sketch/drawing
- Specify if you have drawn the Cutter or the wood

Whilst there is a lot to think about, this is not as complicated as it sounds!

We endeavour to get things 'right first time'. In order for this to happen we need as much information as possible, which saves us all time and money. **Please see Page 151 for profiling graph.**

Whitehill can profile cutters for any type of head including HSS or TCT for:

Pinned

Serrated

T.C. Replacement Tip

Please send your drawing to us on this form

TERMS & CONDITIONS

All prices are in pounds sterling.

All prices are exclusive of **VAT**, which will be levied at the current rate.

Carriage, postage and packing charges are extra.

All goods remain the property of Whitehill Spindle Tools Limited until full settlement of the relevant charges has been made.

A comprehensive list of our Terms and Conditions of Sale is available on request.

Minimum Order Value

We reserve the right to impose a minimum order value on all items.

To avoid this charge, order from **www.whitehill-tools.com**

Handling Charge

A handling charge will be imposed on all returned, and/or exchanged items.

Stock

Whilst every effort is made to keep our products in stock, at times due to high demand, this may not always be the case.

E&OE

Whilst every effort is made to give comprehensive and full information on all our products and prices, we may not be held responsible for any errors.
