ALPHA VICO

Canada's leading experts in educational furniture

For over 40 years, Alpha-Vico has been the sole producer of educational furniture in Canada, revolutionizing classrooms with durable and functional designs. Our diverse range of products is designed to meet all your educational requirements, from early childhood to higher education, with a special focus on custom manufacturing and the most extensive selection of colours and configurations available in the industry.

Our team of specialized consultants is ready to guide you in maximizing the value of your investment. Through our 100% integrated manufacturing process in our quebec facilities and direct-to-customer sales approach, we deliver exceptional quality while maintaining competitive pricing. Our focus on environmental responsibility is evident in our use of eco-conscious design and a supply chain that emphasizes local sourcing.

Browse our catalogue to discover our assortment of durable and versatile furniture solutions, designed to help you build functional, safe and inspiring spaces for learning.

OFFICE CHAIRS

OFFICE CHAIRS

We now offer a premium collection of executive chairs. Biofoam, an innovative foam compound incorporating renewable natural resources, contributes to reducing greenhouse gas emissions.

The breathable mesh fabric is flexible and adapts easily to provide continuous back support as users adjust their seating position during work. This design allows for optimal air circulation through the backrest.

Available in soft black polyurethane (faux leather) with select models also offered in genuine leather. Please contact our sales office for additional details.

A-44

The background of the page is a solid teal color. Overlaid on this background are several white line drawings of different table designs. In the top left, there is a rectangular table with a simple A-frame leg. To its right is a smaller, square table with a more complex, multi-legged base. In the top right, a large, irregularly shaped table with several legs is shown. In the bottom left, a small square table with a four-legged base is depicted. In the bottom right, a large, curved, kidney-shaped table with multiple legs is shown. In the center of the page, there is a large, white, rounded rectangular frame containing the word "TABLES" in bold, white, uppercase letters.

A high-angle photograph of a light-colored wooden table with rounded corners. On the table are various art supplies: a palette with blue, orange, and green paint, three paintbrushes (two green, one red), and several jars of paint in yellow, blue, and red. A coloring page of a cartoon elephant is also visible. A semi-transparent white box with orange text is overlaid on the upper right portion of the table.

ENGINEERED FOR ALL TYPES OF LEARNING

Durable, versatile, and engineered for longevity, our tables adapt to all types of activities - from laboratory work to café settings and team projects. Offered in numerous shapes and dimensions, they blend seamlessly into any environment.

OPTIMIZE YOUR SPACES

Our innovative cafeteria tables improve accessibility and occupy 33% less floor area compared to traditional models, significantly increasing the seating capacity of your facility. Maintaining clear pathways for traffic promotes easy navigation, and by decreasing the frequency of furniture adjustments, noise disruption and floor wear are notably minimized.

Our environmental commitment

Crafting a Sustainable Legacy for Tomorrow's Generations

For us, excellence and environmental stewardship are inseparable principles. Our furniture, engineered for a 30-year lifespan, combine exceptional durability with ecological mindfulness through sustainable material selection and environmentally conscious manufacturing processes. When you select our products, you create learning environments that balance functionality and comfort while demonstrating genuine commitment to preserving our planet for future generations.

Enduring Furnishings Designed for Longevity

Our proprietary Durotop/Duroedge technology significantly enhances surface resilience, ensuring your investment delivers exceptional value throughout its extended lifecycle. By meticulously preserving manufacturing molds and replacement components for all previous models, we facilitate seamless repairs and maintain perfect compatibility with your already established installations.

Premium Canadian Craftsmanship

Our localized manufacturing approach ensures superior quality control and environmental oversight that exceeds the industry's most rigorous standards. Through our carefully cultivated network of regional suppliers and distinctive Canada expertise, we achieve significant carbon footprint reduction while maintaining uncompromising quality. This geographic proximity in our supply chain represents both an environmentally responsible strategy and a hallmark of regional excellence and specialized knowledge.

Advanced Eco-Conscious Finishing Technologies

Our innovative solvent-free finishing system and 100% zero-discharge closed-loop electrostatic powder application represent the pinnacle of industry performance standards. These sophisticated technologies, complemented by our integrated thermal recapture and water recycling systems, exemplify our unwavering dedication to environmentally progressive production methodologies.

Responsible Materials Management

We implement comprehensive steel waste recycling, systematic reuse of cardboard packaging and plastic bags, complete shredding and recycling of plastic residues, and prioritize the use of environmentally certified materials throughout our production processes.

Optimized Logistics Infrastructure

We give meticulous attention to packaging efficiency while systematically reusing and repairing all transport pallets. Our delivery fleet then supplies your facilities along carefully optimized routes with maximized cargo capacity, significantly reducing our carbon footprint with every mile traveled.
