PEGASO

INDUSTRIES

A SYNERGIC GROUP
BETWEEN EXPERIENCE
AND INNOVATION

THE GROUP

Pegaso Industries was founded in 2019 as a holding company to manage the coordinated synergy and union of **5 companies in Italy** and **5 foreign branches**, which in less than 25 years have succeeded in conquering the market for **plastic material treatment systems**.

It oversees **general administration, strategic marketing**, and **human resources**, as well as **safety** and **IT services** for all the companies in the group.

The industrial organization includes the historic brands **Plastic Systems, Pet Solutions, Blauwer, Ergomec**, and **Steel Systems**, which handles the production of steel and iron components. The company's philosophy reflects a sound **competitive approach**, which has made it possible to build and maintain a **strong reputation** and **global success**.

PRESIDENT'S MESSAGE

Our entrepreneurial journey began in 1994 from a small workshop in the center of Borgoricco and, looking back, it's incredible to see how far we've come in these 31 years. Today, **Pegaso Industries** has become an international organization, positioning us among the world leaders in the field of **auxiliary machinery for plastic material processing and transformation**, comprising **10** operating companies and more than **500 collaborators worldwide**.

The core principles that have guided the company since the beginning are **respect, ethics, precision, and innovation**. It is through these values that Pegaso Industries has managed to establish a strong foothold in the market, growing **steadily and sustainably**.

Our goal - and indeed our very purpose - has always been to contribute to the creation of a **sustainable and dynamic society**, through **limitless research** and continuous **technological innovation**. What truly sets us apart is the **design and development of special (and turnkey) systems** tailored to customer needs, along with a **complete catalogue of standard machines**.

As a further step toward creating value for all stakeholders, we have embarked on a path to define an approach increasingly aligned with **sustainability**, working on the **development of systems to optimize energy savings** and for the **processing of recycled plastic materials**.

The same upgrades to our production lines and the adoption of management software for daily operations have been developed with an **environmentally friendly** perspective, significantly improving both performance and energy consumption.

In the coming years, **Pegaso Industries** has the opportunity to reach more people and more

markets around the world. To this end, we will listen carefully to the various voices both inside and outside the company, giving the highest priority to the following areas: **quality assurance, organizational culture, and governance**.

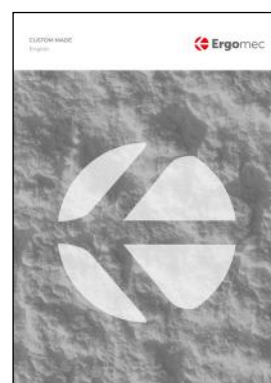

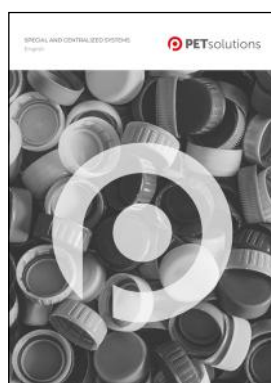

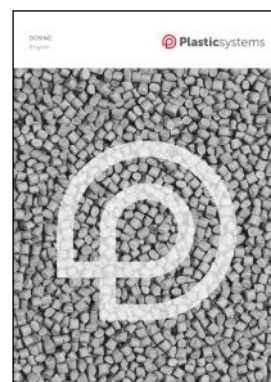

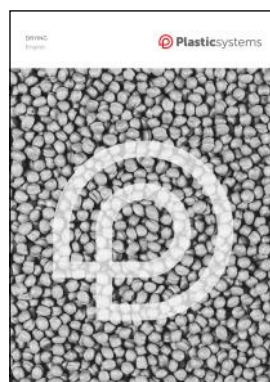

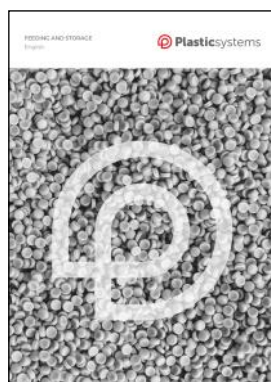

Looking ahead, we will continue investing in our people, strengthening the skills and expertise that have always represented one of the company's greatest assets. Through collaboration, **innovation, and a shared vision**, we aim to build an increasingly solid organization, capable of responding effectively to the challenges and opportunities of a constantly evolving global market.

At the same time, alongside a well-balanced business management approach focusing on **growth, profitability, efficiency, and reliability**, we will return to our fundamental principle of addressing **social challenges through our activities**, reaffirming our commitment to **sustainability as a cornerstone** of our management strategy. Starting from this approach, we will pursue the continuous enhancement of our corporate value and honor our responsibility toward **society**, our **customers, employees**, and all other **stakeholders**.

We know that over the next decade, the market will evolve faster than ever and become increasingly competitive, but we are confident in our ability to meet the goals we have set. We know our strengths and our determination - and it is precisely thanks to them that we can look to the future with confidence.

The President – Rinaldo Piva

INDUSTRY LEADER SINCE 1994

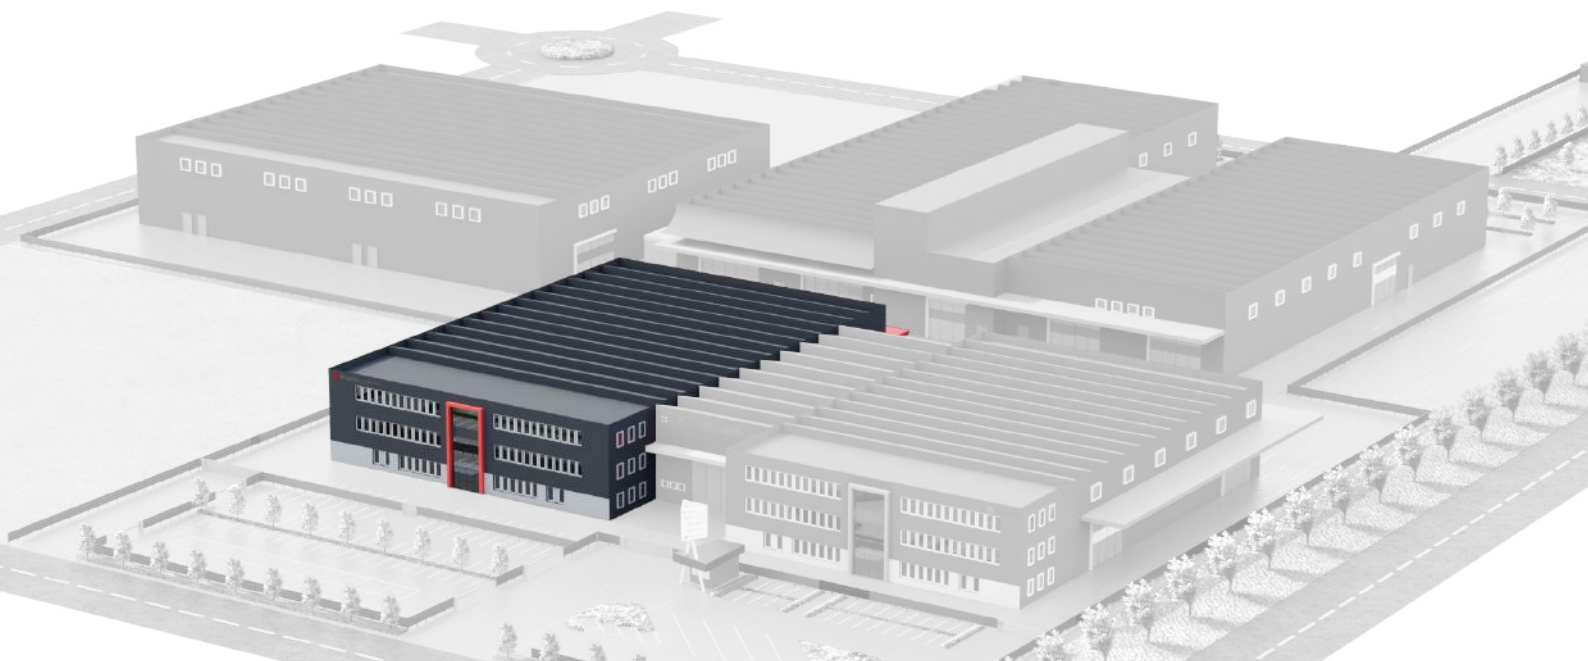

Plastic Systems is a company of the Pegaso group, internationally recognized as a leader in the design, production and marketing of **auxiliary machines** and **systems for plastic material processing**. Thanks to the experience gained over the years, the company has developed a wide range of standard products, specializing in feeding, dehumidification, gravimetric and volumetric dosing, aimed at the injection, blow molding and extrusion sectors. Plastic Systems offers technologically advanced solutions, supported by innovative software and **Easyway supervision systems**, which have enabled the creation of fully automated centralized systems. Over the course of its history, the company has delivered more than **5,000 systems**, used in a wide range of sectors including packaging, automotive, medical, electronics and the injection and extrusion molding industry.

TRADITION & EXPERIENCE POWERING THE FUTURE

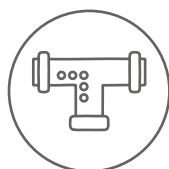

PET Solutions, part of the Pegaso Industries group, boasts over 25 years of experience as a leading company in plastic material processing machinery, with a particular focus on PET-related processes. It offers a wide range of solutions for dehumidification, drying, storage, feeding, and transport of plastic materials. With a broad selection of models differentiated by size, power, and production capacity, it can **adapt to the specific needs** of clients in the food packaging and beverage sectors, PET recycling, and preform and bottle production. Operating on a global scale, it ensures tailor-made solutions and highly **qualified technical support**. Continuous innovation and the integration of advanced technologies guarantee production efficiency, energy consumption reduction, and resource optimization.

SINCE 2015 A REFERENCE POINT FOR THERMAL SOLUTIONS

Blauwer is a company within the Pegaso Industries group specializing in the design, production, and installation of high-efficiency thermodynamic machines for industrial applications. It stands out for developing innovative solutions for the treatment of fluids used in industrial processes for **cooling, heating, and air dehumidification**. Its solutions are applied in **numerous sectors**, including plastics, pharmaceuticals, food, automotive, and HVAC (Heating, Ventilation, and Air Conditioning). The company offers systems for cooling only, heating only, simultaneous cooling and heating, and air dehumidification. The adoption of advanced technologies and a continuous commitment to research and development allow for improved energy efficiency, **reduced environmental impact**, and significant **savings in operating costs**.

ESTABLISHED EXCELLENCE IN THE MARKET

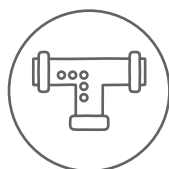

Ergomec specializes in the design and construction of turnkey systems for the storage, handling, dosing, and mixing of bulk raw materials, in powder or granular form. It operates with the goal of **optimizing production processes** in the plastics, food, chemical, pharmaceutical, and rubber industries. Its solutions include storage silos, pneumatic and mechanical conveyors, gravimetric and volumetric dosing systems, high-efficiency mixers, and **automated plants** for the complete management of raw materials. The integration of **innovative technologies** enables precise control of production processes, ensuring high productivity, safety, and reliability. Thanks to extensive experience and a highly specialized team, Ergomec operates globally, providing **customized solutions** and continuous technical support to guarantee maximum operational efficiency for its clients.

INNOVATION AND QUALITY IN METALWORKING

Steel Systems is a dynamic company founded to meet the highest standards of quality and efficiency required by demanding clients. In about ten years of activity, it has successfully combined the **metalworking experience** of its collaborators with the adoption of **modern technologies**. The company employs advanced processing techniques such as laser cutting, robotic welding systems, and robotic bending systems, all within the **steelworking sector**.

PRODUCTS

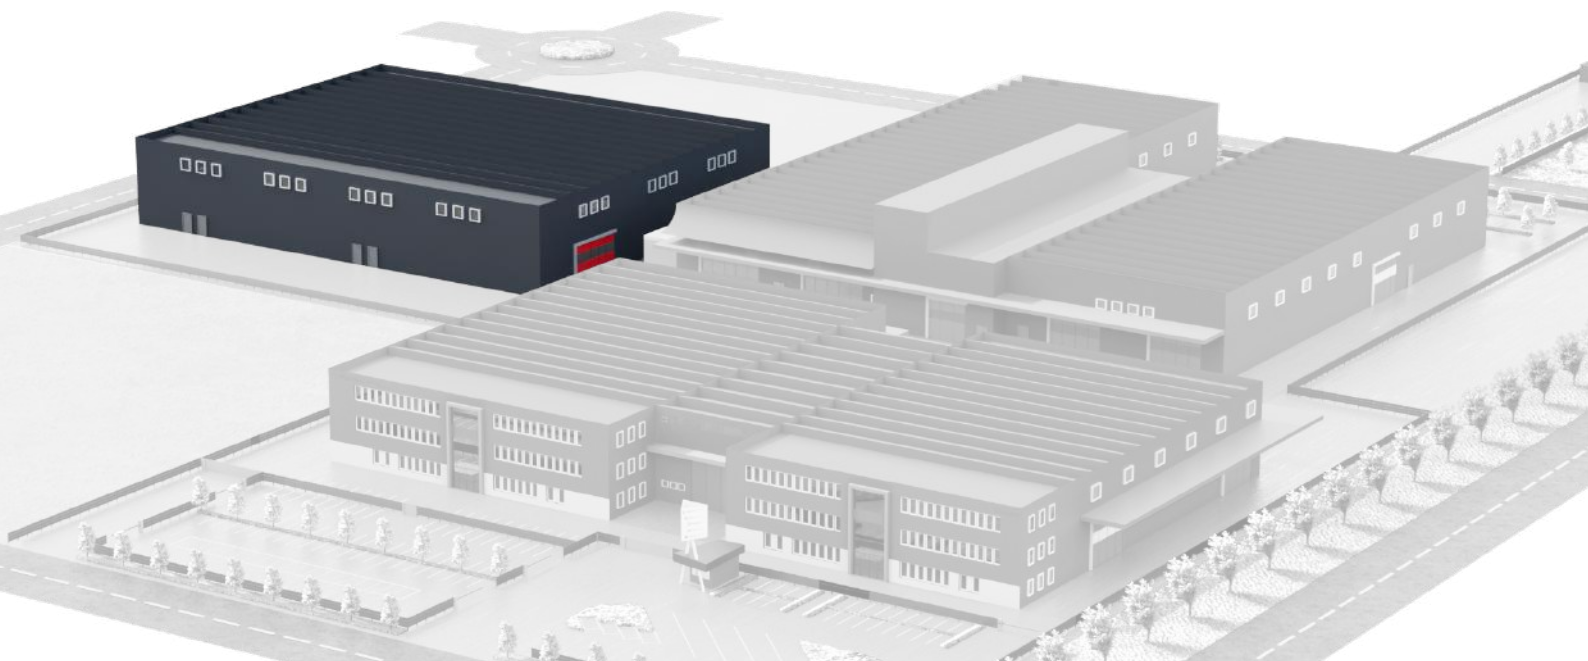

- Telescopic Tubes: modular edged tubes from $\varnothing 150$ to 400mm;
- Elbows: modular edged elbows from $\varnothing 150$ to 400mm;
- Chrome Foot: chrome-finished furniture components;
- Satin Foot: satin-finished furniture components;
- Custom: customized furniture components;
- Material storage containers (scrap);
- Certified industrial mezzanines, dimensioned.

MACHINING

- Laser cutting (cutting of iron, stainless steel, and titanium);
- Robotic and manual welding (specialized in stainless steel welding);
- Bending;
- Rolling;
- High-precision and high-quality machining.

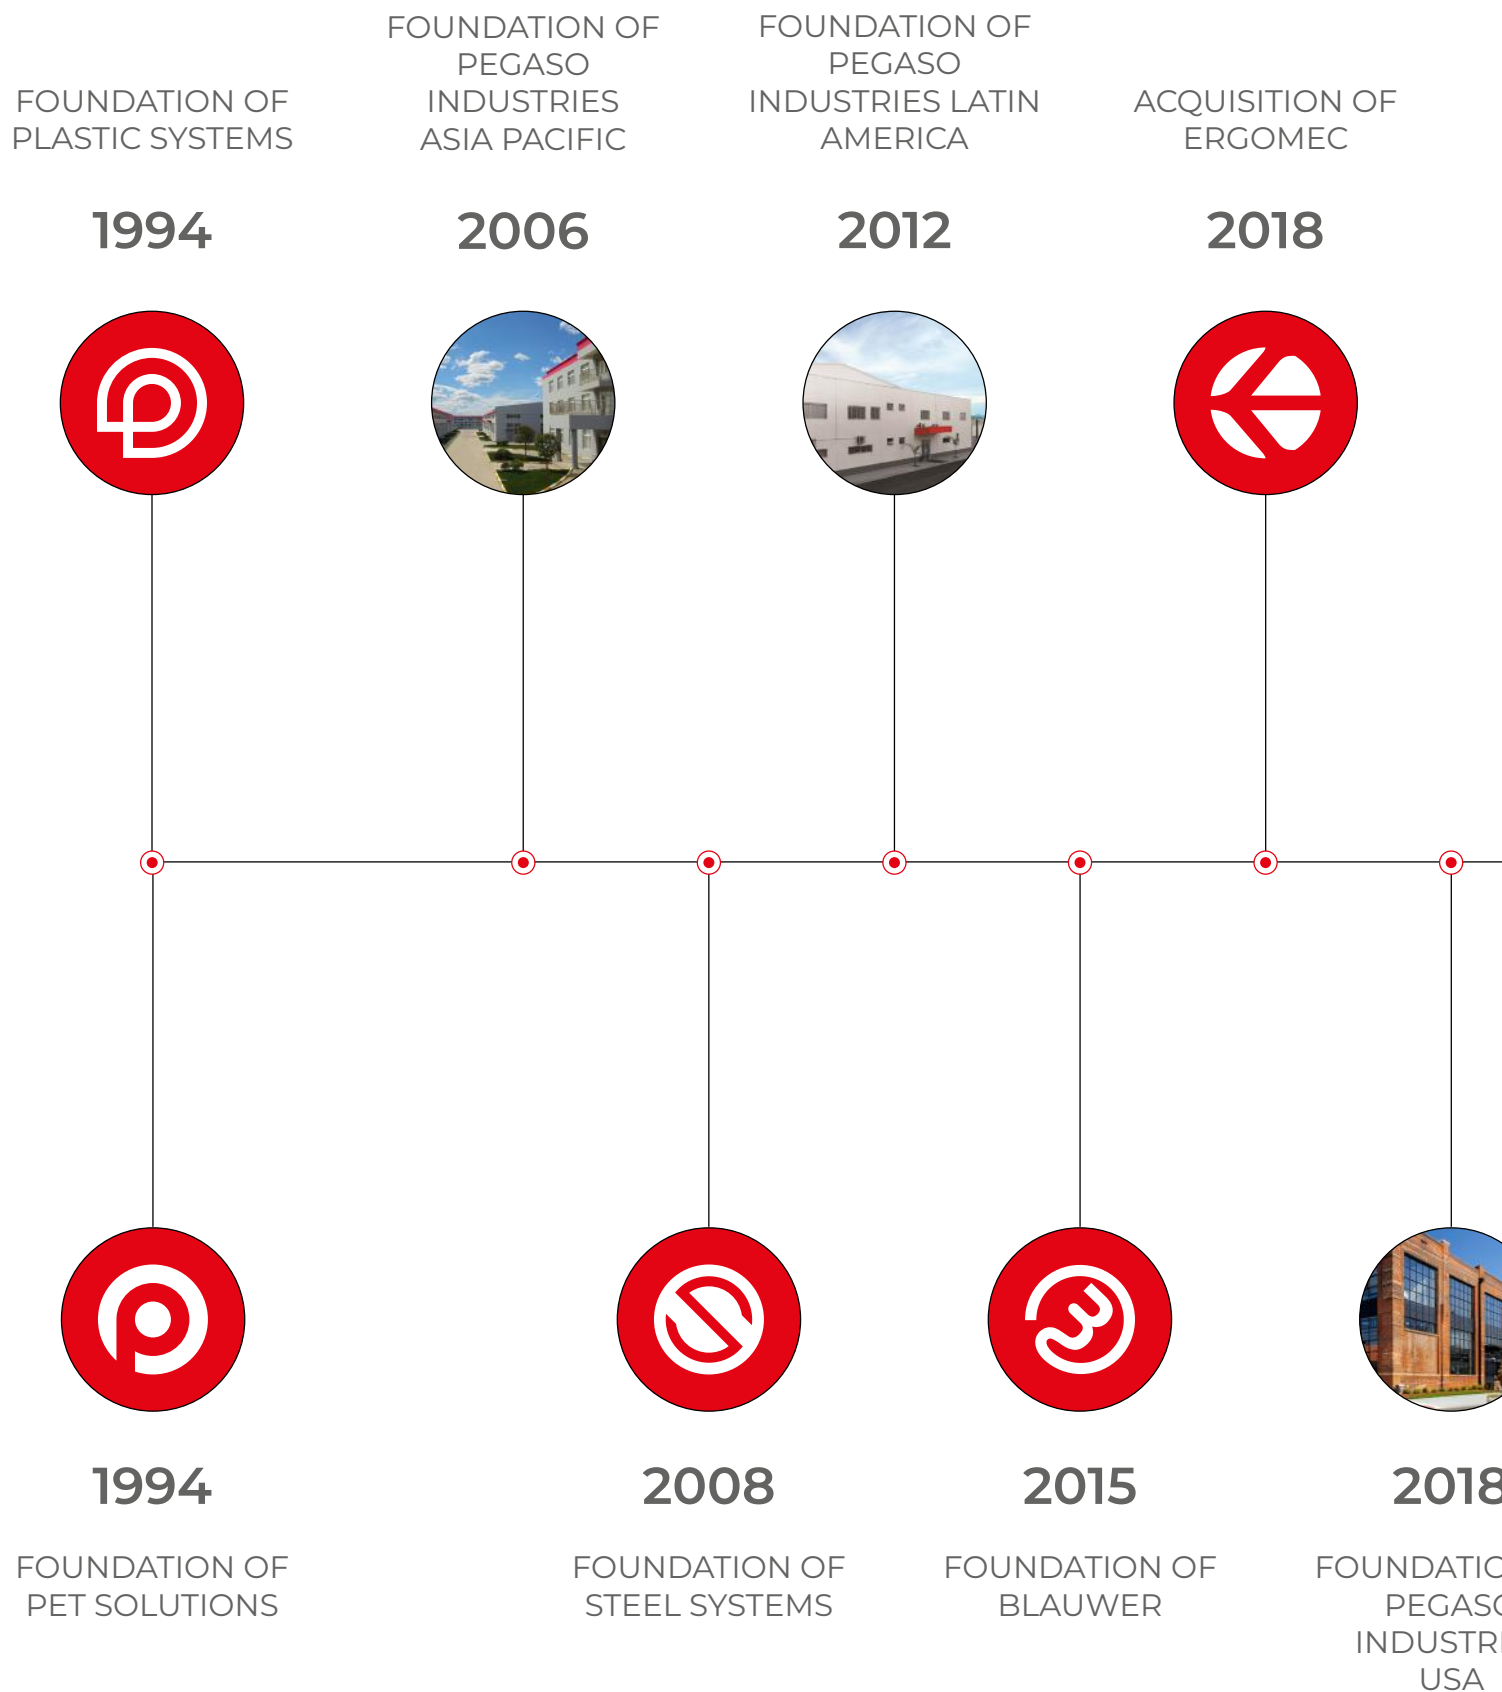

QUALITY GUARANTEE

Steel Systems guarantees the highest quality of its products through a rigorous control system that oversees every stage of production. The company adopts **advanced** quality procedures and standards, continuously monitoring processes to ensure the reliability and precision of the final products. The use of **automated technologies** and the **expertise** of our specialists allow us to offer durable solutions that meet the highest expectations, thereby ensuring our customers results that comply with the strictest criteria of **excellence**.
